

Partners in Project Green

The Toronto Pearson International Airport was presented with an Environmental Achievement Award for its Partners in Project Green & Pearson Eco-Business Zone program in the Special/Innovative Projects category by the Airports Council International – North America (ACI-NA).

Launched in October 2008, Partners in Project Green is a growing community of businesses working together to improve their financial and environmental performance by creating an internationally-recognized 'Pearson Eco-Business Zone' around Toronto Pearson International Airport. Through new forms of business-to-business collaboration, Partners in Project Green delivers programming that

Smart Commute Mississauga

Smart Commute Mississauga is a non-profit organization dedicated to improving sustainable transportation options for commuters in Mississauga.

Most recently, Smart Commute launched their 2009 Workplace Program, an innovative membership program that suggests travel options for commuters working in Mississauga and assists companies in

implementing cost saving commuter solutions for their employees by offering innovative tools, incentives and programs.

Smart Commute Mississauga membership is open to the private and public sector and includes such companies as; Aerocentre, BMO Bank of Montreal, City of Mississauga, Hatch Limited, LoyaltyOne, RBC Meadowvale and U of T Mississauga.

To find out how your company can become a Smart Commute member, visit: www.smartcommutemiss.ca.

Openings and Announcements

Greenpath Eco Group Inc.

Greenpath Eco Group Inc.

Greenpath Eco Group Inc., a waste diversion and manufacturing company, has selected Mississauga for their new 35,000 sq. ft. manufacturing facility located at 121 Waltine Ave. Greenpath applies sustainable innovative green technologies through its own divisions and associated companies and with consortium partners who have complementary technologies, expertise and market access.

By the end of 2009, Greenpath will have diverted over 281 million kgs of waste destined for landfills to be recycled into environmentally friendly value added products.

LoyaltyOne

LoyaltyOne

LoyaltyOne, a leading provider of loyalty and marketing solutions to more than 100 of North America's leading brands in the retail, service, travel, and hospitality industries, has selected Mississauga for their new 500 employee AIR MILES customer care call centre. Located at 6696 Financial Dr., the 50,000 sq. ft. building features the largest solar photo voltaic roof top system in Canada with over 800 panels with an annual output of approximately 159,500 kWh.

LoyaltyOne has a range of other sustainability initiatives, including "My Planet" a program recently launched by Air Miles Reward Program that offers its more than

9.5-million active members an opportunity to make more environmentally sustainable choices in their everyday lives.

Nederman

IMPROVING YOUR WORKSPACE

Nederman Canada

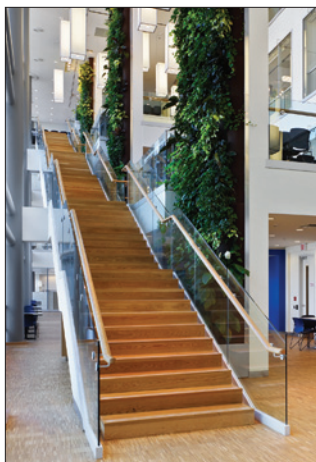

Nederman Canada expanded within Mississauga to a new 43,000 sq. ft. Canadian sales head office and assembly facility located at 5775 McLaughlin Rd. Nederman is one of the world's leading environmental technology companies that develops, produces and markets products and systems for the extraction and filtration of dust, smoke, vehicle exhaust fumes and equipment for industrial cleaning.

"The decision to remain in Mississauga logistically just makes sense based on the proximity to major transport routes and hubs," said Joseph Collins, General Manager of Nederman Canada. This new Mississauga facility is the central assembly and warehousing hub for Nederman in North America.

Bell Canada

The completion of a dynamic fifth structure on Bell's Creekbank Campus renders the site complete as the largest Bell in Canada with over 1 million sq. ft. of office space. Bell maximized the opportunity to showcase a national corporate campus strategy by enhancing the whole site to mirror a cultural change within its workplace. Within its interior can be found 'living walls', a Canadian technology that uses massive four story walls of plants to clean the air and provide humidity control within the public space.

The new building is targeted to achieve Leadership in Energy and Environmental Design (LEED) Silver certification.

Greening Corporate Grounds

Earlier this year, the Credit Valley Conservation, an organization dedicated to conserving, protecting and restoring the natural environment on a watershed basis, and Evergreen, a not-for-profit organization dedicated to making cities more liveable, launched the Greening Corporate Grounds (GCG) Program. This new initiative assists corporations, businesses and institutions in Mississauga and Brampton to green their corporate and institutional lands.

As part of this program, ecological experts work with participants on their grounds and will provide related educational resources such as workshops, seminars and fact sheets. Other available support include: a site concept plan, technical advice to hired or in-house landscape personnel, maintenance guidelines, assistance with planting and maintenance events and program recognition.

Some Mississauga companies who have already successfully participated in this program are IMAX Corporation, Fielding Chemical Technologies Inc. and Teck Cominco Metals Ltd., to name a few. If your company is interested in taking a greener approach visit: www.evergreen.ca or www.creditvalleyca.ca.

mississauga livinggreen

As an environmentally responsible community, the City of Mississauga is committed to environmental protection, conducting its corporate operations in an environmentally responsible manner and promoting awareness of environmental policies, issues and initiatives.

The City is developing a green building standards program for all new City building construction and major redevelopments, starting with the future developments of a new fire station and fire training facility that will be designed to meet Leadership in Energy and Environmental Design (LEED) Silver standards, as well as the green roofs that can be found atop the Mississauga Transit Garage located on Central Parkway.

In leading by example, the City encourages developers to incorporate green development techniques such as green roofs, bio-swales, permeable pavement and energy and water efficiency measures.

The City has also invested in renewable power sources by installing solar

photovoltaic power generators at the Hershey Centre. The solar panels will be able to generate 25 kilowatts of electricity, which is equivalent to the power required to light a typical fire station for one year.

As part of the Living Green pillar in the City's new strategic plan, Mississauga will continue to lead and encourage environmentally responsible approaches, conserve, enhance and connect natural environments and promote a green culture. For more information on the City's green strategies and initiatives visit: www.mississauga.ca/portal/discover/ourfuturegreen and www.mississauga.ca/environment.
