

Patricia Mullin

Regional Councillor's Report, Ward 2

City of Mississauga • 300 City Centre Dr. • Mississauga, ON • L5B 3C1
Office: 905-896-5200 • Fax: 905-896-5463

RESOLUTION 0078-2009

adopted by the Council of
The Corporation of the City of Mississauga
at its meeting on April 8, 2009

0036-2009 **Moved by:** **Seconded by:**
 P. Mullin **C. Corbasson**

WHEREAS the Ontario Power Authority is currently proceeding with a procurement process for the construction of an approximately 850 MW combined-cycle natural gas-fired generating facility in the Southwest Greater Toronto Area;

AND WHEREAS the Request for Proposals regarding this procurement states that the proposed facility will be located in Etobicoke, Mississauga, or Oakville, with a restriction being that it may not be located at the site of the retired Lakeview Thermal Generating Station in Mississauga;

AND WHEREAS it appears there are four qualified applicants arising from the first phase of the Request for Proposals, who will be eligible to compete in the second phase of the procurement process, and some or all of these are or may be contemplating the construction of the generating facility in the Clarkson area of Mississauga, such as Sithe Global Power Southdown ULC which has identified its proposed location as the Southdown Station, located in the Clarkson area;

AND WHEREAS the Ministry of the Environment conducted Phases I, II and III of an air quality study for the Clarkson area airshed, and in the Phase III study, the Ministry recognized the value of proceeding with Phase IV being the establishment of the Clarkson Airshed Advisory Committee as a means by which to achieve better air quality in the Clarkson area and to get commitments from industry in the area to "go beyond compliance";

AND WHEREAS the Clarkson Airshed is stressed, with key contaminants being particulate matter less than or equal to 10 microns in size, particulate matter less than or equal to 2.5 microns in size, nitrogen oxides, and volatile organic compounds;

AND WHEREAS the introduction of a natural gas-fired generating facility in the Clarkson area will only exacerbate the existing stressed Clarkson Airshed, causing even greater risk of negative health impacts upon the people who reside and work in the Clarkson area;

AND WHEREAS the Province of Ontario has indicated through recent changes to the *Planning Act* under Bill 51, and now through Bill 150, that undertakings related to energy may be, or in the case of those undertakings described in Bill 150

continued on page 2

Dear Neighbours:

RE: Electrical Generation and the Clarkson Air Shed – Individual Actions Can Make a Difference

The Ministry of the Environment conducted a 22 month air quality study which proved that we already have a taxed airshed. Due to the health issues related to the taxed airshed, the Ministry of the Environment proposed working with local industries to reduce their pollution from existing levels. To our amazement the Ontario Power Authority (OPA) has proposed an 850 megawatt natural gas facility in our community. This would increase pollution significantly. The OPA began the process in October of 2008 and the proposed facility will be chosen by August 2009.

There are four possible facilities:

Registered Participant	Facility Name	Location of Site
Invernergy Canada Development Partnership	Avon Energy Centre	445 Hazelhurst Rd., Mississauga
Northland Power Inc.	Royal Windsor Energy Centre	2400 + 2430 Royal Windsor Dr., Mississauga
Portlands Energy Centre L.P/TransCanada.	Oakville Generating Station	1500 Royal Windsor Dr., Oakville
Southdown Station Partnership (a partnership of Sithe Global Power Southdown ULC and Sithe Global Power Southdown II ULC)	Southdown Station	759 – 797 Winston Churchill Blvd., Mississauga

Only one of these facilities will be selected.

There have been a number of public meetings where the OPA has heard loud and clear that the Clarkson community is very concerned about local air quality and does not want a power plant in this community. MPP Charles Sousa hosted a meeting with Minister Gerretsen, the Minister of the Environment, where Mayor McCallion, myself and several Residents Associations strongly voiced our opposition. I will also continue to work with our Medical Officer of Health who is also watching the proposal closely.

The Mayor and Members of Council have unanimously supported my resolution (at left and continued on page 2) clearly indicating our strong objection to a gas generation plant going into our area.

WHAT CAN WE DO AS RESIDENTS!

I encourage you to voice your views by contacting and/or writing to the politicians listed below and send a copy of your letter to my office:

Pat Mullin,
City of Mississauga,
300 City Centre Dr.,
Mississauga L5B 3C1

The Honourable George Smitherman,
Minister of Energy and Infrastructure
900 Bay St., 4th Fl.
Toronto M7A 2E1
416-327-6758

The Honourable John Gerretsen,
Minister of Environment
135 St. Clair Ave. W., 12th Fl.
Toronto M4V 1P5
416-314-6790

Mr. Charles Sousa,
Mississauga South M.P.P.
120 Lakeshore Rd. W., Units 1 & 2
Mississauga L5H 1E8
416-327-6611

The Honourable Dalton McGuinty,
Premier of Ontario
Main Legislative Building
Room 281
Toronto M7A 1A1
416-325-1941

Area residents are volunteering their time to collect the petition to be presented in the Ontario Legislature and to Premier McGuinty. Please take the time to sign the petition at the following locations:

Charles Sousa, M.P.P.
120 Lakeshore Rd., W., Ste 1 & 2
Mississauga L5H 1E8

Paul Szabo, M.P.

Pat Mullin

Pat Mullin
City and Regional Councillor, Ward 2

... continued from cover article **RESOLUTION**

will be, decided by the Provincial Government and not by local municipal and other authorities;

AND WHEREAS the *Environment Protection Act* states in subsection 3(1) that its purpose is to provide for the protection and conservation of the natural environment, and the Act goes on to charge the Minister of the Environment with responsibility for the administration and enforcement of this Act;

AND WHEREAS the *Environmental Bill of Rights*, 1993 sets out the following principles in its preamble:

The people of Ontario recognize the inherent value of the natural environment.

The people of Ontario have a right to a healthful environment.

The people of Ontario have as a common goal the protection, conservation and restoration of the natural environment for the benefit of present and future generations.

While the government has the primary responsibility for achieving this goal, the

people should have the means to ensure that it is achieved in an effective, timely, open and fair manner.

AND WHEREAS the residents of Clarkson and of Mississauga, who are also people of Ontario, have a right as well to a healthful environment, and the City recognizes that the Government of Ontario has taken on the responsibility and the authority both through recent legislative activity, as well as historically having assumed the mandate for achieving the goal of providing a healthful environment for the people of Ontario under the *Environment Protection Act*;

NOW THEREFORE BE IT RESOLVED THAT:

1. The City of Mississauga believes that the Clarkson airshed is too stressed to sustain the introduction of any new industrial activity or undertaking of any kind, including a natural gas-fired power generating facility, within the Clarkson area which will cause emissions into the environment, irrespective of whether the nature and volume of such emissions may

comply with any existing Provincial regulations or standards.

2. The City of Mississauga calls upon the Province of Ontario to impose a moratorium on granting approvals, whether through a certificate of approval or through any other process, for the construction and operation of any new industrial activity or undertaking of any kind in the Clarkson area of Mississauga.
3. The City of Mississauga calls upon the Government of the Province of Ontario, the Minister of Energy and Infrastructure, the Minister of the Environment and the Ontario Power Authority to assure the residents of the City of Mississauga that in the current and any future procurement process for the construction of a natural gas-fired power generating facility in the Southwest Greater Toronto Area, the restricted locations will be extended to include the Clarkson area so that no such power generating facility will be constructed in the Clarkson airshed study area.

Peel Region and the Provincial and Federal Governments' Funding Responsibilities – "At a Glance"

The Region of Peel is responsible for providing a broad range of services to residents and businesses in Mississauga, Brampton and Caledon. Those services include water treatment and distribution, sewage treatment, garbage collection, Regional roads, paramedic services, policing, child care, social housing, conservation, public health, Ontario Disability Support, Ontario Works and other services essential to the well-being of the community.

Some of these services, once the responsibility of the Province of Ontario, fall within the Region's responsibilities today. The Province's share of funding these services is based on approaches that no longer support the actual costs of providing them to a rapidly growing population, leaving the Region to absorb additional costs. In 2008, the Provincial Government began the process of uploading some of these costs. However, these uploads won't be complete until 2018.

The table at right provides a brief overview of the programs for which cost sharing arrangements exist, the theoretical funding and actual funding allocations, and brief comments about the funding arrangements.

The Region has also joined other municipalities and stakeholders to request that the Federal Government revise Employment Insurance (EI) requirements to provide unemployed Ontario workers with the same EI benefits as provided in other provinces, and to enhance child care and benefits.

The Region is committed to providing the highest quality of services possible to its residents while ensuring those services are delivered efficiently.

Region of Peel and Ontario Government Funding Responsibilities – 'At a Glance'			
Program	Legislated Share % (Provincial / Municipal)	Actual Share % (Provincial / Municipal)	Commentary
A	B	C	D
Ontario Works:			
Social Assistance Payments	80 / 20	80 / 20	This is the only Social Services cost shared program with the provincial subsidy uncapped. To be fully uploaded by 2018.
Administration	50 / 50	25 / 75	The 2009 budgeted shortfall is \$7.8 million which the Province should be funding.
Employment	80 / 20	60 / 40	Provincial funding is capped.
Homelessness	80 / 20	33 / 67	Funding is based on a per diem and capped.
Total Ontario Works (Blended Average)	73 / 27	64 / 36	
Ontario Disability Support Program (ODSP):			
	80 / 20	80 / 20	To be fully uploaded by 2011. The 2009 regional cost is about \$29.4 million.
Children's Services:			
Fee Subsidy	85 / 14	80 / 20	Funding capped program.
Administration	66 / 34	55 / 45	Funding capped program.
Special Needs & Support Services	84 / 16	66 / 34	Funding capped program.
Agency Funding (Wage Subsidy)	85 / 14	84 / 16	Funding capped program.
Total Children's Services (Blended Average)	84 / 16	77 / 23	The Province has not announced an extension of the 'Best Start' funding past 03-31-10. It's currently 100% provincial funding at \$19.3 million or about 27% of the gross Children's Services budget. It would need to be phased out if Province does not continue funding.
Social Housing			
	N/A	N/A	The Social Housing program is not positioned as a program that should be cost shared. The current gross budget is \$107 million with Provincial funding of \$5.5 million (or 5.1%).
GTA Pooling			
	N/A	100% Municipal	This will be fully uploaded by 2013. The current Regional cost is \$40.5 million.
Emergency Medical Services (Paramedics)			
	50 / 50 of net eligible expenditure	50 / 50 of net eligible expenditure	Capital expenditure is funded 100% by Peel. Reserve contributions for Capital not funded by the Province were \$6.4M for 2008.
Long-Term Care			
Facility Operations	\$146 per diem Provincial Funding	\$146 per diem Provincial Funding	The Region funded an additional \$114 per diem above and beyond the Provincial Funding for 2008. Funding increases from the Province have not kept pace with the increase in wages and general inflation. Capital expenditure is funded 17% by the province on average. A marginal nominal amount of the facility operations are funded from revenues generated from preferred accommodation fees.
Adult Day Services	N / A	57% Province / 16% client fees / 27% Region	Adult Day Services Program costs are shared with the Province with no legislated arrangement on actual cost shared percentage between Province and Region of Peel. Funding increases from the Province have not kept pace with the increase in wages and general inflation.
Aging at Home	100% Province	100% Province	
Total Long-Term Care (Blended Average)	N / A	58% Province / 3% Client Fees / 39% Region	
Public Health			
Cost-Shared Programs	75 / 25 of net eligible expenditure	65 / 35	Includes Mandatory Programs and Vector Borne illness programs. Funding capped programs.
Healthy Babies Healthy Children (HBHC)	100% of eligible costs	100% of eligible costs	Ministry of Children and Youth Services (MCYS) does not fund overhead costs such as rent. Un-funded overhead costs were \$0.7M in 2008. Furthermore, funding provided by MCYS is not sufficient to deliver full scope of service as mandated by the Province. Program has been scaled back to stay within the funding parameters.
Other 100% Provincially Legislated Programs	100% Province	100% Province	Programs included are Smoke Free Ontario (SFO), Infectious Disease Control, CINOT expansion, Workplace Diabetes, Community Diabetes, Case Management and Small Drinking Water Systems. Furthermore, funding provided for SFO by the Ministry of Health Promotion is not sufficient to deliver full scope of service as mandated by the Province.
Total Provincially Mandated Programs (Blended Average)	77 / 23	70 / 30	
Municipal Priority Public Health Programs	N / A	100% Municipal	Programs included are Seniors' Dental and Youth Violence Prevention.
Transit for Disabled (Transhelp)			
	Announced annually	06 / 94	Funding responsibility is based on 2009 approved budget and the announced DGT funding. The percentage split no different for 2008 actuals. The DGT usually commits to their funding promises.

N.B. - All figures in column C represents 2008 Actuals unless stated otherwise.
 - DGT - Dedicated Gas Tax
 - Funding capped program - refers to a maximum funding by \$\$ value available from the Province

Lakeshore Road Sewers

Early in 2008, the first phase of the relocation of the Bexhill sewage pumping station began. This included the installation of a sewer pipe through Birchwood Park, from Lakeshore Road up to Clarkson Road. Restoration of that phase was completed in September. These sewers will connect the new sewage pumping station in Jack Darling Park with the wastewater treatment plant.

The second phase of the sewer installation has now begun on the south side of Lakeshore Road between Jack Darling Park and Birchwood Park. A temporary pedestrian signal at the intersection of Lakeshore Road and Owenwood Drive was recently installed to provide a safe location for school children and other pedestrians to cross Lakeshore Road. Complete restoration of all roads and sidewalks should be complete in November.

Jack Darling Park

The third phase of the sewer installation connects the sewers near the existing Bexhill sewage pumping station with the new pumping station in Jack Darling Park. Construction has just begun, and may cause some short term disruptions to the waterfront pathway in Jack Darling Park. Restoration of this phase will be complete in spring 2009.

At the beginning of September the expansion of the Lorne Park Water Treatment Plant (WTP) began. Significant steps were taken to minimize the footprint of the expansion. Retrofits will be made to portions of the WTP with new technologies that save space and further improve the quality of Peel's drinking water.

Recently, the leash free dog area in Jack Darling Park was closed and a temporary area was opened further south in the park. Upon construction completion, the leash free area will be restored and will include a year-round washroom facility. The leash free area is expected to be restored by 2012, and the WTP construction complete by 2013.

New Water Main

In order to meet the growth demands in Peel and upgrade the current infrastructure, a new water main is being constructed from the Lorne Park WTP to the Herridge Reservoir and Pumping Station. Eighty per cent of the length of the water main is being installed using tunnelling techniques. This method was chosen during the Environmental Assessment stage because it is much less disruptive to a developed community.

The construction of this water main has three phases. Phases one and two are now underway, and include the construction of the water main from Jack Darling Park to the intersection of Southdown and South Sheridan Way. Intermediate tunnel shafts are necessary to provide ventilation in the tunnels and remove the rock. These shafts will be located at Birchwood Park, the northeast corner of Southdown and Lakeshore, and the northwest corner of Southdown and South Sheridan Way.

The third phase will begin in November, with construction of the water main tunnel under the QEW travelling north up to the reservoir. All three phases of this project should be complete in early 2010.

For more information and updates on each of the projects, please visit www.lorneparkprojects.ca.

More space, privacy and Internet access for Sheridan Villa residents

Many exciting things are happening at Sheridan Villa long-term care home these days. The centre continues renovations to create a more modern and spacious environment for the residents and Adult Day Service clients.

Many residents have already moved into their new living space. They are enjoying brighter, more private rooms and a renovated dining area.

Helen Kostopolous, who has lived at Sheridan Villa since 2002, is thrilled with the fresh, modern look of her room. "I like my beautiful new room. We have new furniture and chairs and a big closet. I am so happy," says Helen.

Residents and families will soon be able to spend time in the new main lobby, and enjoy the renovated Café and Tuck Shop.

Sheridan Villa has been providing services for the Peel community for more than 30 years. The centre is one of the five long-term care homes owned and operated by the Region of Peel. For more information about services offered at Sheridan Villa, please call the centre at 905-791-8668 or visit www.ltcpeel.ca.

Helen Kostopolous is proud to display her favourite items in the memory box outside her room. This is a new feature that has been added to each room as part of renovations.

Grace Hall, who will celebrate her 103rd birthday in June, is thrilled with her new space. "I love my new room. I think I have the best room and the best view," says Grace.

Household Hazardous Waste – Where Does Yours Go?

Have you ever wondered how to properly dispose of that half empty can of paint left over from when you painted your kitchen, or the partially full pesticide bottle that's been sitting in your shed for the past few years? You'll be pleased to know that you have several options to dispose of them in an environmentally safe manner.

Household hazardous waste must never be disposed in your garbage or recycling containers, or poured down the drain as it can negatively impact our environment.

Instead, consider taking it to one of the Region's Community Recycling Centres for safe disposal, free of charge. Our recycling centres accept a wide variety of household hazardous waste products, such as: paint, pesticides, motor oil, pharmaceuticals, cleaners, chlorine, pool chemicals and much more. For a full list of accepted items, refer to your *2009/2010 Waste Management Guide* or visit www.peelregion.ca/waste.

Recently, the Government of Ontario introduced "Do What You Can" – a program which allows you to take back certain hazardous waste material to the retailer you purchased it from. To find out what material you can take back, and for your nearest participating retailer, visit www.dowhatyoucan.ca.

Proper disposal of household hazardous waste helps keep our air, water and soil clean. Please do what you can to help.

West Nile Virus Update

Following the initial outbreak when West Nile Virus (WNV) first emerged in Ontario, there has been a decrease in the number of humans with WNV. In fact, we have not recorded a human WNV case in Peel since 2007. While WNV activity recorded for 2008 in Peel was higher than in previous years, there was only one positive bird and no positive mosquito batches in Ward 2.

With spring approaching, Peel Public Health will be monitoring the location of positive mosquito batches as well as any human WNV cases. In addition, Peel Health will continue its efforts to decrease numbers of mosquitoes by larviciding municipal roadside catch basins and surface water sites located on public property. A public education campaign will continue raising awareness about WNV and prevention measures.

To reduce mosquito breeding sites on your property:

- Recycle/dispose of containers that hold water
- Drain pool covers
- Ensure eaves troughs, flowerpots, window boxes drain properly
- Change the water in bird baths and wading pools weekly
- Drill drainage holes in recycling and trash containers
- Turn over wheelbarrows, canoes, toys and plastic wading pools
- Cover rain barrels with a screen to prevent mosquitoes from breeding

To prevent mosquito bites and reduce the risk of WNV illness:

- Wear light-coloured clothing with long sleeves, pants, and hat
- Apply a mosquito repellent

For more information about WNV and how to protect yourself, call Region of Peel - Public Health at 905-799-7700 or visit www.peel-bugbite.ca.

Emerald Ash Borer detected in Peel Region

The emerald ash borer (EAB), a highly destructive beetle that attacks and kills ash trees, has been detected in Peel Region. This beetle is not harmful to humans or pets. To control its spread, a Ministerial Order prohibiting the movement of firewood of all species and untreated ash tree material has been issued to Peel Region and wider GTA area.

Peel's Community Recycling Centres accept ash tree material and firewood for proper disposal. Regular drop-off fees will apply. You may continue to set out brush and tree trimmings as yard waste on your scheduled yard waste collection day. If you suspect an ash tree on your property is infested, contact a certified arborist to confirm.

To learn more about EAB, visit www.peelregion.ca/EAB.

Blue Box Program

Some of you may remember when the Region of Peel started recycling in the late 1980s...back when we accepted only a few items such as paper and plastic and they had to be separated into blue and grey recycling boxes.

We've certainly come a long way since those formative years. Now we accept a wide array of material in our Blue Box Program and you can mix all recyclable material in one recycling box.

The Region also boasts a state-of-the-art recycling facility where recyclable material is separated automatically and manually. Once separated, the material is sorted according to type (e.g. aluminum, glass, paper etc.) and sold to companies that recycle it into new products.

The companies that purchase our recyclable material rely on material that is free of non-recyclable material so it can be fully recycled. This is why it is critical that you place only recyclable items in your recycling container, and sometimes it's not as obvious as you may think.

You can find a list of acceptable recyclable material in your *2009/2010 Waste Management Guide* or online at www.peelregion.ca/waste. Our website contains a waste disposal search engine that I'm very proud of, and I encourage you to use it. Just type in an item and click "Search" to find out whether you should place it in your recycling container, green bin or garbage, or take it to a Community Recycling Centre for disposal.

Yard Waste Collection

Did you know that yard waste plays an important role in the Region's waste diversion programs? Yard waste and green bin material are collected by the Region of Peel, mixed together and converted into compost that can be purchased at Peel's Community Recycling Centres.

This year's yard waste collection program began the week of March 30 and ends the week of Nov. 30 on your regularly scheduled collection day.

Summer yard waste collection will occur every other week on your scheduled collection day during July, August and September. You may view your summer yard waste collection schedule on page 6 of your *2009/2010 Waste Management Guide* or online at www.peelregion.ca/waste.

Yard waste is collected every other week because the amount of yard waste generated declines during the dry summer months. Collecting yard waste every other week during these months is an attempt to find the right balance between service levels and operating costs. Less collection trucks on the road means lower costs and reduced diesel emissions during the peak smog season.

You can reduce the amount of yard waste you generate by following these easy tips:

- Don't over-water your lawn. A healthy lawn only requires half an inch of water (including rainfall), twice per week, to stay healthy.
- Leave your grass clippings on the lawn to return water and nutrients to the soil. Grass clippings are a nitrogen fertilizer, and when they decompose they release nutrients back to the lawn.
- If your lawnmower collects grass clippings, you may place them in your backyard composter.

Tip - Shredded paper should be placed in your yard waste container or green bin.

Organics Recycling – Your Participation Counts

The Region of Peel's Organics Recycling Program has passed its two year mark and I'm pleased that many of you have embraced the program.

Through your participation, the Region of Peel collected approximately 37,000 tonnes of organic material in 2008. That equates to 1,072 truck loads of organic material that would have otherwise been sent to landfill.

We all know why Blue Box Program items such as pop cans and plastic tubs should be kept out of landfill, but it is just as important to recycle your food waste. Food waste that ends up in landfill produces methane gas as it decomposes and methane is one of the most potent greenhouse gases. For this reason alone it is important to dispose your food waste in your green bin so that it can be recycled into compost.

Our Organics Recycling Program continues to have close to 50 per cent participation. Although this is a great participation level for the early years of the program, I know we can do better. If you're not already participating in the program, I urge you to get started. Participating in the program is an easy way to do something good for the environment and our community.

For information on the Region's Organics Recycling Program, call 905-791-9499 or visit www.peelregion.ca/waste.

Tip - Consider using newspaper to line your kitchen container and green bin. Or, place several sheets of newspaper on the counter, scrape your food waste onto the newspaper and wrap it into a small package before tossing it in your green bin. Newspaper absorbs excess moisture, minimizes odours and best of all – it's free.

Electronic Waste Disposal

The Government of Ontario recently introduced a new program that makes it easier for you to recycle your electronic waste.

The Waste Electrical and Electronic Equipment (WEEE) program aims to increase the number of old computers, television sets and fax machines diverted from landfill over the next five years.

Through the program, residents may drop off certain electronic items to participating retail stores and municipal depots in Ontario, free of charge. Finding a location is easy. Visit www.dowhatyoucan.ca, select "electronics" and enter your postal code or municipality (Peel or Mississauga) to find out the nearest location for you to bring your unwanted electronic goods.

During the first phase of the program, participating retailers and municipalities will accept the following items for free:

- Monitors
- Televisions
- Desktops
- Laptops
- Printers
- Fax machines
- Computer peripherals

You may continue to drop off any electronic equipment (not just the items listed above) at any of Peel's Community Recycling Centres (CRCs); however, drop-off fees will apply.

Regional staff are currently working to make Peel part of the WEEE program, which would allow you to drop off electronic equipment at our CRCs, free of charge. Visit www.peelregion.ca/waste for up-to-date information on the Region's waste management programs and services.

Get Involved: Connect Ideas to Actions

Incidents of serious violent crimes continue to rise in Peel Region every year. While our community is still one of the safest places in the world to live, if we continue to accept the escalation of violence as inevitable, we will never stem its growth. It's time now to join together to find ways to make our community a safer and better place to live and work.

A new interactive website – www.connect2ENDviolence.ca – has been created and is supported by the Region of Peel, Peel District School Board, Dufferin-Peel Catholic District School Board, Peel Police Services Board and Peel Regional Police. It's a place where people in the community can pose questions, provide input and connect with others who want to make a difference.

Visit www.connect2ENDviolence.ca often and get involved. Working together we can connect problems with solutions and connect ideas to actions; working together we can make a difference.
