Councillor's Report

Spring/Summer 2006

300 City Centre Drive, Mississauga, Ontario L5B 3C1 • Tel: 905-896-5100 • Fax: 905-896-5463 • E-mail: carmen.corbasson@mississauga.ca

Dear Ward 1 Resident,

I am pleased to bring you my spring/summer 2006 edition of the Ward 1, Councillor's Report.

I have highlighted issues and information that I believe will be of interest to you and that are currently affecting our community.

If you require my assistance or have any questions, please feel free to contact me directly or my staff, Helena and Kareen, who are very pleased to assist you. You can always stay up-to-date by visiting my Ward 1 website at www.mississauga.ca/ward1 or send me an e-mail at carmen.corbasson@mississauga.ca

The City of Mississauga is constantly improving the online experience of residents and making it easier to access information about City services quickly and easily. Visit the City's website at www.mississauga.ca today.

Once again, I would like to thank you for your ongoing support of my efforts at the municipal and regional levels of government. It has been a privilege to represent you for the past 11 years.

Regards

Carmen Corbasson
Councillor, Ward 1

The Gypsy Moth in Ward 1

In January of this year, the City began moving forward with its plan to conduct an aerial spray to help control the population explosion of Gypsy Moth. It's been a long process, and at times a difficult one, but with the full support of City Council and resident associations such as The Credit Reserve and the Gypsy Moth Task Force, along with the hard work of staff, Mississauga's aerial spray control program became a reality on May 17, 2006 - the City's first Gypsy Moth aerial spray day.

In total, six sprays were conducted over 11 zones throughout Mississauga. The spray zones were grouped into three areas and each area received two applications of the insecticide *Bacillus thuringiensis* subspecies *kurstaki* (Btk). There were two spray zones located in Ward 1 - Mineola East and Mineola West.

The aerial sprays took place between May 17 and May 31, 2006. The weather was not always co-operative and a few sprays had to be cancelled, but despite these

Story continues at top of page 2

EASTERN POWER UPDATE

In August 2005, Eastern Power (Greenfield South Limited) submitted Site Plan Approval and Release of 'H' Holding Provision applications to permit the construction of a 280 megawatt dual fuel (natural gas/oil) power generating facility for lands located at 2315 Loreland Avenue.

The proposal consists of three oil storage tanks, associated spill containment dyke, cooling towers and a power house enclosing a natural gas turbine, steam turbine and associated electrical generators, control room, motor control centres, water treatment station and auxiliary facilities.

The development applications are currently in process awaiting a formal resubmission of materials for City and agency review.

Subsequent to the submission of development applications, Eastern Power submitted an Environmental Screening and Review Report to the Ministry of Environment (MOE). The City of Mississauga has reviewed the provided materials and requested the MOE elevate the environmental review to an Individual Site Environmental Assessment, the intent of which is to ensure that sufficient information is available to implement appropriate measures to mitigate any negative impacts through the required development applications or other approvals required by the MOE. The Minister of Environment has not yet responded to the City's request.

In March 2006, City of Mississauga Council approved City-wide Official Plan Amendment and Zoning By-law Amendments regarding power generating facilities. Although under appeal to the Ontario Municipal Board, the effect of these amendments would be to allow power generating facilities only on lands designated industrial in the Official Plan and zoned to permit power generating facilities. Power generating facilities would also be permitted on the Lakeview Power Generating Station site and cogeneration facilities on the two hospital sites and the University of Toronto at Mississauga campus lands. Any other locations for power generating facilities would require applications for Official Plan Amendment and Zoning By-law Amendment.

Additional information regarding the Eastern Power development applications may be obtained from John Hardcastle at 905-615-3200 ext. 5525 or by e-mail at john.hardcastle@mississauga.ca. Information pertaining to the City-wide Official Plan Amendment and Zoning Amendments may be obtained from Mary Bracken at 905-615-3200 ext. 5536 or by e-mail at mary.bracken@mississauga.ca.

Mississauga Senior Games

The Mississauga Senior Games is an annual event that encourages seniors to participate in recreational and social activities with seniors from around the community. This is a great way to get active and meet friends from all over Mississauga. The events, which are organized by seniors in conjunction with Mississauga Recreation and Parks, are designed with seniors in mind and promotes fun and fair play.

The Mississauga Senior Games will take place on Tuesday, June 20 at 11 a.m. For questions and registration information call 905-858-1313.

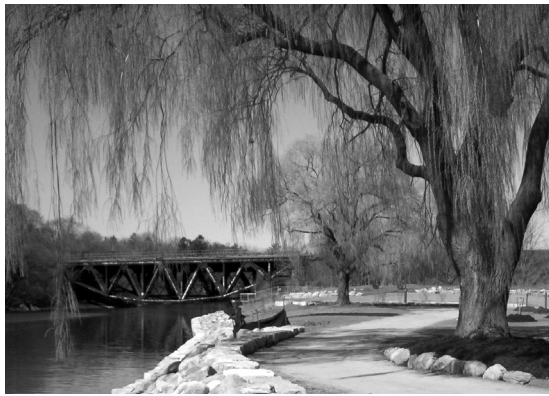

Story continued from front page...

initial set backs, the aerial spray program was completed successfully. Residents received ongoing updates through the spray process, road closures were minimized as much as possible, and all areas received good coverage of Btk.

It is still too early to know the full success of the spray program. Throughout the summer months, Forestry staff will be conducting inspections of leaf out and tree mortality rates in spray areas, and in the fall, they will once again be conducting egg mass inspections. The data from these inspections will help determine the overall success of Mississauga's Gypsy Moth aerial spray program in reducing the Gypsy Moth population. Residents will be informed of the results once they are known.

The aerial spray was just the first step of many Integrated Pest Management (IPM) controls that will be used to help control Gypsy Moth. With the spray completed, it's time to move into the next steps - installing burlap skirts and placing sticky bands around tree trunks, using pheromones to confuse male moths and leaving wooded habitat around trees, shrubs and garden plants to encourage natural predators. These additional steps are crucial in helping to lower population levels back into the normal range. I strongly urge you to take a moment and inspect your trees, and if you have Gypsy Moth caterpillars, begin to implement some IPM control measures and do your part to help reduce the Gypsy Moth population in Mississauga.

Detailed information on IPM controls can be found by visiting the Gypsy Moth website at www.mississauga.ca/pestmanagement, e-mailing gypsy.moth@mississauga.ca or by calling the City's Forestry Unit at 905-615-4100.

Port Credit Memorial Park

Port Credit Memorial Park is a 6.64 hectare park located on the bank of the Credit River in the village of Port Credit and is being redeveloped as part of an ongoing plan to revitalize the village of Port Credit and create a network of multipurpose waterfront parks. When complete, Port Credit Memorial Park will be a multi-functional, all season park that celebrates the Credit River and the evolution and heritage of Port Credit.

Features of the park will include: a reconstructed shoreline, extensive pathway systems, a village pavilion, basketball keys, a skateboard facility, an accessible playground, picnic facilities, heritage displays, special event features, improved landscaping and open green space.

The site has been under construction since spring of 2005 and is scheduled to be complete by late summer of 2006.

For more information please contact Sharon Chapman, Project Manager, Community Services Department, City of Mississauga at 905-615-3200 x 5370.

Lakeview Waste Water Treatment Plant Update

The Lakeview Wastewater Treatment Facility is located on the shore of Lake Ontario and treats 70 per cent of the wastewater generated by Peel residents and discharges safe, clean, treated water back into Lake Ontario.

In 2004, construction work began on the facility as a key component of Peel's dedication to odour reduction in South Peel. The main objectives of upgrading the facility are to:

- Reduce the impact of odours on the community
- Raise Lakeview's daily wastewater treatment capacity (from 392 ML to 448 ML per day)

This summer, the final phase out of Zimpro, the most significant odour causing process at Lakeview, will begin.

The schedule is as follows:

- Reduce the Zimpro process to 50 per cent: **complete**
- Shut down the Zimpro Hyan Reactors and Gas Flairs: **July 2006**
- Phase out the final portion of the Zimpro process: **early 2007**

Eliminating this process is an important step in the Region of Peel's commitment to reducing odours in your community.

Lakeview Construction Update:

- Contractor parking lot, guard house and engineers site trailer: **complete**
- Construction of new access driveway: **complete**
- Two new primary settling tanks: **complete**
- New thermal oxidation building: **complete**
- New solids handling building: **complete**
- Upgrading to secondary clarifiers: **complete**
- Upgrading transformer stations: **complete**
- Construction and installation of incinerator 4: **in service**
- Construction of new headworks facility: **in progress**
- Construction of liquid treatment process: **in progress**
- Construction of new biosolids complex and unloading facility: **in progress**

For more information, visit peelregion.ca.

Working Towards a More Accessible Mississauga

In its third year, the City of Mississauga's Accessibility Plan has made progress towards increasing the participation of persons with disabilities in our community.

In 2005, City staff working with members of the Accessibility Advisory Committee developed an Accessibility Design Handbook that contains accessibility criteria that will assist project designers to incorporate accessibility into their designs. This handbook is the property of the City of Mississauga and is located on the City's website at www.mississauga.ca.

We have made progress since the first Accessibility Plan that was adopted in 2003 and will continue our work. Each achievement such as the handbook is an example that much can be done to make Mississauga a barrier free City.

For more information about the City's Accessibility Plan or the Accessibility Design Handbook, please contact Diana Simpson Accessibility Coordinator at 905-615-3608, TTY 905-615-3411 or accessibility.info@mississauga.ca.

City on the Move

The offices of the Mayor, Members of Council and City Manager as well as the Council Chambers will be undergoing renovations from late June to November 2006. The offices will be temporarily moving to 950 Burnhamthorpe Road West.

The building at 950 Burnhamthorpe is the location of the Provincial Offences Courthouse and is west of the Civic Centre. In this newsletter a map is included to help you find the temporary office location.

We look forward to the completion of these renovations as they will improve accessibility, upgrade technology and accommodate the many changes the City has experienced through the years as well as those planned for the near future.

In the meantime, our ward office will continue to serve your needs at the temporary 950 Burnhamthorpe location. You can reach us at the same telephone number. We thank you for your patience during these renovations. If you would like more information and updates on construction please visit www.mississauga.ca or call 905-615-3200 ext.7950.

Fram Slokker Port Credit - North Shore Development

In April of 2006, F.S. Port Credit Limited (FRAM/Slokker Canada) submitted revised Official Plan Amendment and Rezoning applications to permit a mixed-use commercial/residential development at 15 Hurontario Street. The latest development proposal continues to propose a 22 storey residential condominium apartment building containing a total of 220 units as well as a 16 storey senior's retirement building with a maximum 150 units and a private recreation centre.

In exchange for approval of the development applications, FRAM/Slokker Canada is proposing a \$3.57 million dollar public benefits package which consists of the following components. The developer is proposing to convey at no charge to the City, a half acre parcel at the northeast corner of Park and Hurontario Streets. The effect of the conveyance is to enlarge the existing Lion's Park located to the east of the site and provide a location for the historic Gray House which is proposed to be restored for public use. In addition, the applicant is proposing a joint venture project with the City to construct a

new Port Credit Branch library and Lion's Community Hall on the conveyed parcel, construct a new pool building, renovate the existing outdoor pool and upgrade other facilities in Lion's Park. Part of the public benefits plan also involves the sale of the former lawn bowling lands at market value to the developer. The proceeds of this sale would then be used towards the City's financial contribution for improvements in Lion's Park. The developer is also proposing to provide up to \$4 million dollars to the Port Credit Village Ratepayers Assoc. (PCVRA) towards the development of privately-operated community amenities within the development.

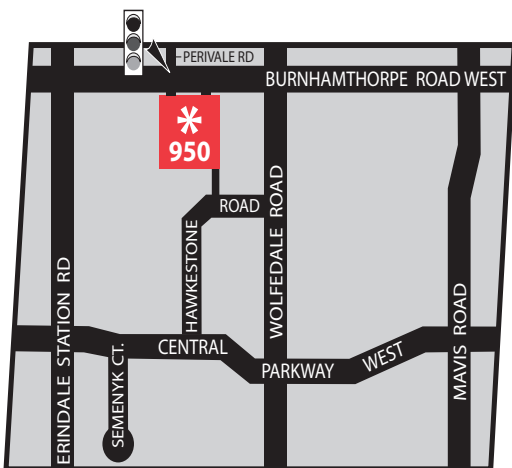

The revised development proposal and public benefits plan were presented at a community meeting held on April 24, 2006. City staff and various agencies are currently reviewing the revised development proposal and a public meeting is tentatively scheduled for late June 2006.

High Tech Defibrillators on Fire Trucks and Ambulances

Mississauga Fire & Emergency Services is participating in a five year study with Sunnybrook Women's College Hospital. Approximately 35 new, state-of-art defibrillators will be installed at no cost on our fire trucks and ambulances. Defibrillators are designed to be easily used in crisis situations to treat heart attack victims and can cost more than \$5000 per unit.

The study scheduled to begin in August will examine data collected by emergency services across the GTA and nine other locations in Canada and the United States to determine the effectiveness of CPR currently performed in the field by fire fighters and paramedics.

Currently all City of Mississauga buildings are equipped with lifesaving defibrillator units thanks to a partnership with St. John Ambulance Mississauga Branch. These devices are used in our facilities approximately five times a year and in two cases have saved lives.

CMHC Residential Rehabilitation Program

(RRAP - Homeowner)

Canada Mortgage and Housing Corporation (CMHC) provides financial aid to low-income homeowners to repair their homes. This program is specifically targeted at those individuals who reside in substandard dwellings and cannot afford to pay for the necessary work to bring their homes to a safer and healthier standard. If your home requires major repair, you could be eligible for RRAP assistance to bring it up to minimum health and safety standards to prolong its use.

Residential Rehabilitation Assistance Program

(RRAP Disabled)

CMHC offers financial aid to both homeowners and landlords to complete accessibility modifications to homes occupied or for the intended occupancy by low-income persons with disabilities. Dwellings must meet minimum health and safety standards and the work must be for housing and reasonably related to the disabled occupants disability.

EnerGuide For Low-Income Households

(EGLIH)

Canada Mortgage and Housing Corporation (CMHC), with the assistance of Natural Resources Canada (NRCan), are providing financial assistance to improve energy efficiency of housing, occupied by low-income households. The program is intended to reduce the energy costs of housing by providing assistance to cover energy retrofit work on houses and rental units. It is not intended that the program cover the cost of an entire energy retrofit of a house but, rather, to focus on those energy retrofits that provide the greatest energy savings within the maximum assistance available and, at the same time, lead to enduring energy improvements in the housing stock.

The City of Mississauga is an approved CMHC agent and is able to assist you directly with your application for these programs and provide information regarding your eligibility for them:

Smart Commute Mississauga

In November 2005, the City of Mississauga, Region of Peel and the Mississauga Board of Trade teamed up to form Smart Commute Mississauga, a Transportation Management Association (TMA) that provides transportation options, programs and services to assist commuters in finding more convenient and less stressful means of travelling to and from work.

Designed to reduce traffic congestion, take action on climate change through transportation efficiency, the Smart Commute initiative can help commuters in the Greater Toronto Area (GTA) and Hamilton find carpool matches and make commuting easier, healthier and more enjoyable, this service matches commuters up with others in their area.

Created in partnership with Pathway Intelligence Inc., this website based service includes a searchable database of potential commuters within a 250 kilometre radius, stretching from downtown Toronto to the Greater Golden Horseshoe. To sign up, commuters can visit www.smartcommute.ca and fill out a simple questionnaire about the time, origin and destination of their commute. Smart Commute will then provide suggested matches based on your response.

Tips, suggestions and ideas on other commute options such as teleworking, transit, cycling, walking and flexible work hours are also offered on the website.

Smart Buses are Now On the Road in Mississauga!

In the fall of 2005, Mississauga Transit implemented the Smart Bus pilot project on 30 buses serving the Hurontario Street corridor.

Smart Bus features include:

- Automatic Vehicle Location (AVL) systems, which use Global Positioning System (GPS) technology. This allows real-time communication of schedule adherence to Operations Supervisors
- Automatic Passenger Counting (APC), which capture passenger patterns (to improve route service planning)
- Traffic Signal Pre-emption (TSP) technology, which allow buses to extend or advance the green light at traffic signals.

These technologies provide Mississauga Transit with the information they need to plan and deliver better customer service, improving schedule reliability and service planning. All Smart Buses can be identified by the yellow sticker on the front of the bus, as well as the black box located above the driver.

Mississauga ... by the numbers

 Mississauga's population grew 13% over the past 5 years	 42% do not have English or French as their mother tongue
 47% of Mississaugans have moved in that same time	 Mississauga attracts world wide investments due in part to the fact that we are twice as ethnically diverse as New York City
 23,000 new homes built in 5 years	 78% of us usually drive alone to work in a car, van or truck
 Nearly half our residents are immigrants	 11% are regular transit commuters
 40% of Mississaugans are visible minorities	 7% are passengers (car pools etc.)
 1 in 5 residents are recent immigrants	 3.3% walk or ride a bicycle to work

Build your City of Mississauga Career at www.mycitycareer.ca

Starting a career at the City of Mississauga could be just a few clicks away. The City of Mississauga has introduced mycitycareer.ca, the new website where you can view all city job opportunities and apply for them all in one place. The City is moving to an online recruiting system where applications for City jobs will only be accepted online.

See a job that interests you? Simply start a personal profile and submit your resume. Don't see anything right now? Having a personal profile enables you to save resumes for future use. Saved resumes can also be updated as new skills and work experiences are acquired. You can also subscribe to CareerAlert, a service that will e-mail employment opportunities to you that match the criteria you designate when subscribing. Visit www.mycitycareer.ca to build your City career.

Did you know?

Click n' Ride

Did you know that you can now plan your Mississauga Transit route with the click of a mouse?

Mississauga Transit is proud to be the first transit system in the Greater Toronto Area (GTA) to offer online trip planning capabilities through Click n' Ride, a system that lets users plan their transit trip online 24 hours a day, 7 days a week.

Trip plans can be customized using a number of factors, including origin and destination points, address, key landmarks, days of the week, departure and arrival times, quickest and most accessible routes, fewest number of transfers, or least amount of walking.

For more information, or to try out Click n' Ride for yourself, visit www.mississaugatransit.com.
