November 4, 2011

Dear Resident:

**Re: Second Line West Structure over Highway 401 - Public Meeting**

The Ministry of Transportation Ontario (MTO) conducted a Class Environmental Assessment for the ultimate expansion of Highway 401, from the Highway 410/403 interchange to east of the Credit River. The public was invited to two information centres where MTO staff were available to discuss concerns and answer questions. A Transportation Environmental Study Report (TESR) was filed for public review and input in August 2005 and the final clearance was obtained in 2007. The TESR recommended several improvements including permanent removal of the Second Line West structure over Highway 401. Phase 1 of the construction is underway and includes the expansion of Highway 401 from the Highway 410/403 interchange to east of the Mavis Road interchange. Phase 2 includes the expansion of Highway 401 from east of the Mavis Road interchange to east of the Credit River. The MTO is currently working on the detailed design of Phase 2 including the permanent removal of the Second Line West structure (location map attached). The Phase 2 construction is tentatively scheduled to commence in 2013.

The City of Mississauga is inviting local residents to a public meeting on **Wednesday, November 16, 2011**, to provide updates on the MTO's on-going highway widening initiative, including the removal of the Second Line West structure over Highway 401. In addition, staff will present information pertaining to the proposed installation of a pedestrian and cyclist connection facility across the proposed widened Highway 401. The location and times are as follows:

**Meadowvale Village Community Hall, 6970 Second Line West  
Wednesday, November 16, 2011  
7:00 p.m. to 9:00 p.m.**

Should you have any questions or require additional information, please do not hesitate to contact the undersigned.

Sincerely,

Steve Barrett
