

NOTICE OF STUDY COMMENCEMENT

MUNICIPAL CLASS ENVIRONMENTAL ASSESSMENT STUDY BURNHAMTHORPE ROAD WEST IMPROVEMENTS

WHAT?

- The City of Mississauga has initiated a study to review the existing and future transportation needs of the Burnhamthorpe Road corridor.
- The study area, as shown on the key plan, includes Burnhamthorpe Road West from Loyalist Drive to the West City Limit including intersections and approaches.

WHY?

- The study will consider the City's planning principle to build a multi-modal city, which will support a successful, vibrant and active community with a reliance on a range of transportation modes including walking, cycling, transit and vehicles.

HOW?

- The project is being planned under Schedule C of the Municipal Class Environmental Assessment (October 2000, as amended in 2007, 2011 and 2015) process.
- The study will define the problem, identify alternative solutions, analyse, and evaluate each alternative based on the potential impacts to the natural, social and economic environments. In consultation with the public and external agencies, the preferred corridor improvements will be determined.
- At the end of the study, an Environmental Study Report documenting the entire Study process will be available for public review.

GET INVOLVED!

- A key component of this study is public and agency consultation.
- Two Public Information Centres (PICs) will be held to present the study progress and obtain public input.
- Public Information Centre details will be advertised closer to the consultation dates under a separate notice.
- To find out more about project announcements and other information please visit the project website:
