

Attention: Fire Route Applicants

Enclosed is a fire route application package for the designation of Fire Access Route as required in By-law #1036-81, as amended.

The application package consists of:

1. An application form which is to be completed in full and accompanied by the processing fee as described in the Fees and Charges By-law #0156-2019.

NOTE: At the time of composing this information package, our processing fee is \$226.01 + \$29.38 HST = **\$255.39**. Please call us at 905-896-5908 in order to make a credit card payment.

2. A sample plan.
3. A pdf drawing template (legal sized paper) that the access route is to be inserted into (a copy of the pdf is also available on Mississauga's website).

NOTE: The fire route plan may take the form of either a simplified (and legible) version of the previously approved site development plan or a redrawn facsimile. The plan is not required to be at any specific scale. However, a relative scale between site components must be maintained.

Using the sample plan as a guide, the drawing is to indicate the building outline, principal entrances, hydrants, fire department connections, fire access route, parking which abuts the fire route, municipal streets and the municipal address.

The application form, the plan and processing fee are to be submitted to this department by email at: fire.prevention@mississauga.ca.

Processing will be conducted by staff, a drawing number assigned and the location, type and quantity of signage indicated on the plan.

Once completed, a copy of the official Fire Access Route plan will be returned to the property owner (or owner's representative) so that the installation in conformance with this plan can begin.

Should any further information or assistance be required, please do not hesitate to contact this department at 905-896-5908.

Encl.
