

MONITORING WELL DECOMMISSIONING

TO: Marwan Kassay, PMP
FROM: Marty Barons, P.Eng., QP_{ESA}
SUBJECT: 958-960 East Avenue, Mississauga, ON
DATE: October 13, 2020

To whom it may concern,

WSP Canada Inc. (WSP) installed five (5) monitoring wells (BH18-1, BH18-2, BH18-4, BH18-5 and BH18-7) located on the property municipally identified as 958-960 East Avenue in Mississauga, Ontario. The monitoring wells were installed at part of a Geotechnical, Hydrogeological and Environmental Assessment completed at the Subject Property (Well ID Number 7325276). The monitoring wells were installed between November 1 and 9, 2018 by a licenced well technician in accordance to Ontario Regulation (O.Reg.) 903 R.R.O. 1990, made under the Ontario Water Resources Act.

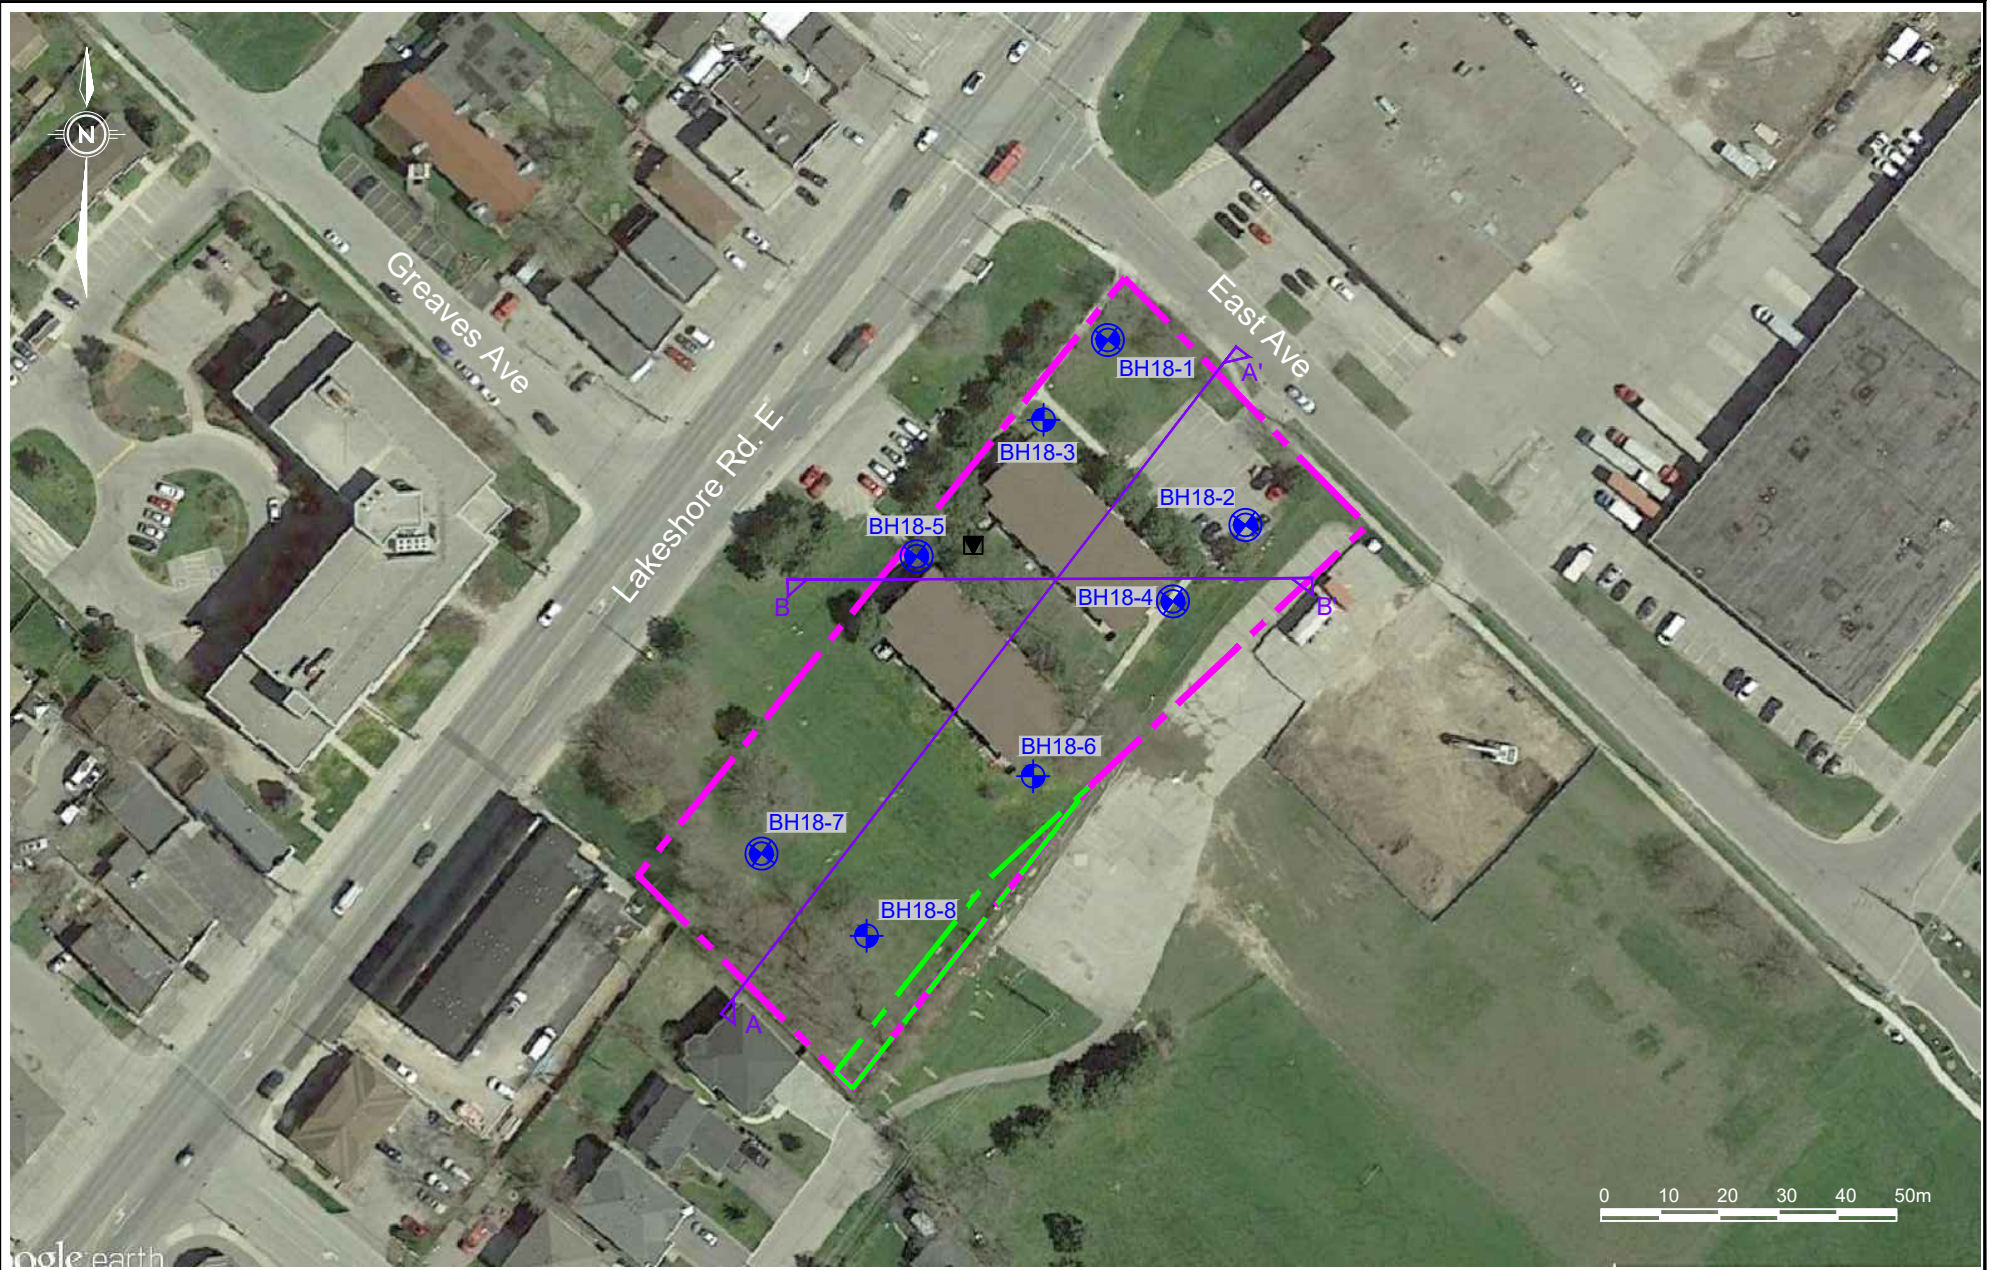

It is understood that prior to construction activities onsite, all monitoring wells are to be decommissioned under the supervision of a licensed well technician and the decommissioning well records are to be prepared and submitted to the Ministry of the Environment, Conservation and Parks (MECP). See attached for the current location of the existing monitoring wells on Site.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'M. Barons'.

Marty Barons, P.Eng., QP_{ESA}
Team Lead, Environmental Engineer
