To Whom It May Concern:

**Re: Green Development Strategy  
0 King Street East  
City of Mississauga**

Skira & Associates Ltd. confirms that the site plan for the proposed 0 King Street East incorporates the following Low Impact Development (LID) measures in accordance with the Green Development Strategy adopted by the City of Mississauga.

- The topsoil depth within the landscape area of individual lots will be increased from a typical 150mm to 300mm to increase runoff retention to promote infiltration in the landscape areas.
- Implementation of goss traps on all road catchbasins.
- Implementation of permeable pavement surfaces at all driveways to promote initial treatment for minor storms and provide 5mm collection and infiltration.
- Implementation of oil/grit interceptor to complete treatment train the connected runoff for quality control.

Trusting that this information will be satisfactory.

Yours truly,

**SKIRA & ASSOCIATES LTD.**
