

CITY OF MISSISSAUGA – NOTICE OF STUDY COMMENCEMENT

Municipal Class Environmental Assessment Study:
Cooksville Creek Erosion Control Project at Camilla Road

WHAT?

- The City of Mississauga is undertaking a Schedule B Municipal Class Environmental Assessment (Class EA) Study for erosion control and restoration of Cooksville Creek at Camilla Road.

WHY?

- Through its ongoing erosion monitoring program, the City of Mississauga recognizes that this section of Cooksville Creek needs rehabilitation to address existing erosion issues and provide an opportunity to naturalize the site.

HOW?

- The study will examine the creek and associated natural resources to identify existing erosion problems, potential future risks, and opportunities for restoration and environmental enhancement.
- Through the Class EA process, multiple alternative solutions will be developed and evaluated by the Study Team and refined through public and agency consultation (see below). The Study Team will then select a preferred alternative and proceed with design of the recommended works.
- At the end of the study, a Project File documenting the study process will be available for public review.
- Over the coming months, Study Team members will be visiting the site to document existing conditions to support the evaluation of alternative solutions.

GET INVOLVED!

- Consultation is an important part of the Class EA process. Public input and comment are invited for incorporation into the planning and design of this project.
- A Public Information Centre (PIC) will be held to present the study findings, the alternative solutions being considered, and to answer any questions you may have. Details regarding the PIC will be advertised publicly as the study progresses.
- Project information will be made available to the public on the City's project website: <http://www.mississauga.ca/cooksvillecamillastudy>
- If you have any questions or comments regarding the study or wish to be added to the study mailing list, please contact:

Anthony DiGiandomenico, P.Eng.

COVID-19 Community Engagement Update: While we continue to respond to this pandemic, we are working hard to deliver essential services and projects to keep our city moving and safe. While we can't connect in person at this time, we still want to connect! Opportunities to connect with the Study Team are noted above.

This notice signals the commencement of the Class EA, a study which will define the problem, identify/evaluate alternative solutions, and determine a preferred design in consultation with regulatory agencies and the public. The study is being undertaken in accordance with the planning and design process for Schedule 'B' projects, as outlined in the "Municipal Class Environmental Assessment" document (October 2000, amended in 2015), which is approved under the Ontario *Environmental Assessment Act*.

Personal information is collected under the authority of the *Environmental Assessment Act* and will be used in the assessment process. With exception of personal information, all comments shall become part of the public records. Questions about this collection should be directed to the Project Manager listed above.

This notice was first issued October 28, 2021.
