File No.219-M20

City of Mississauga  
Planning & Building Department  
300 City Centre Drive  
Mississauga, Ontario  
L5B 3C1

To Whom It May Concern:

**RE: List of Low Impact Features  
Green Development Strategy  
900 Mississauga Heights Drive  
City of Mississauga**

Skira & Associates Ltd. confirms that the site plan for the proposed 900 Mississauga Heights Drive incorporates the following Low Impact Development (LID) measures in accordance with the Green Development Strategy adopted by the City of Mississauga.

- The topsoil depth within the landscape areas of individual lots will be increased from a typical 150mm to 300mm to increase runoff retention and promote infiltration in the landscape areas.
- Implementation of a longitude swales along the west side of the private road for pretreatment of runoff.
- Implementation of goss traps on all road catchbasins.
- Implementation of permeable pavement surfaces at all catchbasins to promote initial treatment for minor storms and provide 5mm collection and infiltration.
- Implementation of oil/grid interceptor to complete treatment train the connected runoff for quality control.

Trusting that this information is satisfactory.

Yours truly,

**SKIRA & ASSOCIATES LTD.**
