Amendment No. XX  
to  
Mississauga Official Plan

**PURPOSE**

The purpose of this Amendment is to permit maximum heights of 29 storeys and an FSI of 6.47.

**LOCATION**

The subject lands are located at the northwest corner of Agnes Street and Cook Street. The subject lands are located within the Downtown Cooksville Character Area, as identified in the Mississauga Official Plan.

**BASIS**

The Mississauga Official Plan came into effect on November 14, 2012, save and except for the outstanding site specific appeals to the Ontario Land Tribunal (OLT). The Mississauga Official Plan provides that within the City Structure, Intensification Areas are to be the principal location for future growth within the City. In this regard, the Subject Lands are located within the Downtown, within a Primary Major Transit Station Area and along an Intensification Corridor where transit-oriented development is encouraged.

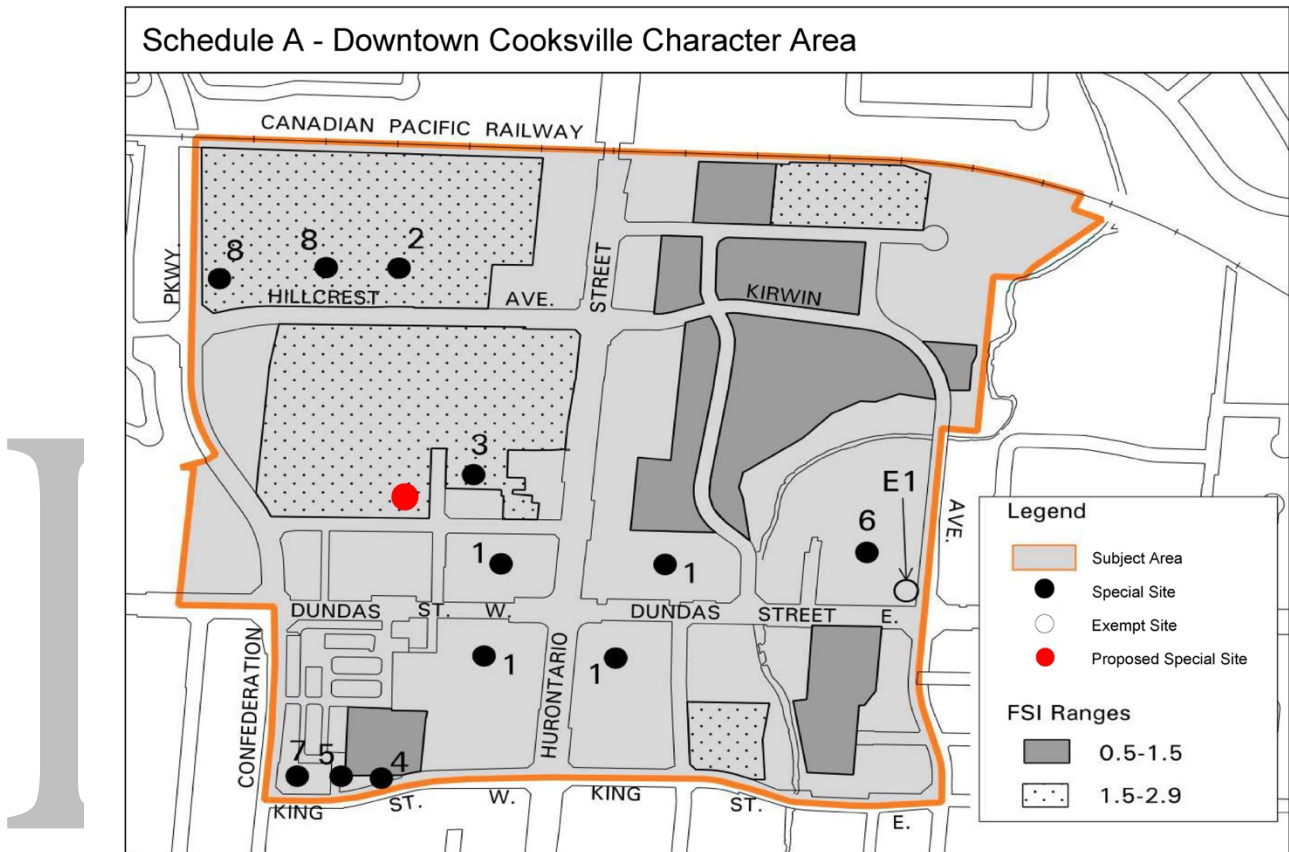

As per the Downtown Cooksville Character Area, a maximum building height of six storeys is permitted directly abutting the streetline, with additional height permitted 10 metres from the street line. A maximum density of 2.9 FSI is permitted. Residential High Density designated lands are subject to a height limit of 25 storeys. In order to specifically provide for this development within a Residential High Density designation, a Special Site policy is proposed to be added to the Official Plan to permit a maximum building height of 29 storeys and a Floor Space Index of 6.47. The site-specific permissions are incorporated in the enclosed implementing Official Plan Amendment.

The proposed Official Plan Amendment is acceptable from a planning perspective and should be approved for the following reasons:

1. The proposal meets the intent, goals and objectives of the Mississauga Official Plan and the current Residential High Density Designation.
2. The site is well served by a variety of existing and planned public transportation and active transportation options, community services, public open spaces, residential, commercial, retail and employment uses.
3. The proposed densities are appropriate for the site's location within a Regional Intensification Corridor and a Primary Major Transit Station Area and is within walking distance of planned higher order transit.
4. The proposed development provides new housing supply through the intensification of underutilized lands.
