

Road Resurfacing Program

**THIS DOCUMENT CONTAINS IMPORTANT INFORMATION
PLEASE TAKE THE TIME TO READ**

Project Overview

The street in front of your home/business is scheduled for resurfacing by the City of Mississauga under the Road Resurfacing Project.

Inspection shows the need for road repaving and the replacement of any damaged curbs and sidewalks. This work is part of Council-approved Capital Works Program to renew aging City roads and sidewalks for current and future needs.

Two weeks prior to the commencement of construction, you will receive a hand-delivered **Construction Notice**, which will provide a more detailed overview of the construction process.

What to Expect Before Construction

Work will take place in front of your property, on the boulevard, sidewalk and street. Where necessary, this work can include removing and replacing sections of your driveway, sidewalks and grassed boulevards.

The City encourages you to delay any construction activity or renovations to your private driveway and/or landscape work until construction has been completed by the City.

In preparation of the road resurfacing program, please remove any decorative objects including, planter boxes, light fixtures, sprinkler heads that are located within the City's Right of Way.

Work crews will mark sidewalks and curbs requiring replacement and the locations of underground utilities such as gas and water so that the construction work does not interfere with these utilities.

Once construction work begins, there is potential for temporary disruption to cable, internet and/or telephone service, as telecommunication providers do not mark/locate their buried service lines. In some instances, temporary overhead cables are placed to avoid service cuts during construction.

The City understands the importance of internet connection and will make every effort to minimize disruption. Once the project is complete, the cables will be buried accordingly. Should you require any further information please see contact information below:

Bell Customer Service: 1-866-310 BELL (2355) <https://support.bell.ca>

Driveway Widening – Boulevard Portion Only

If you are interested in applying for an Access Modification Permit (curb widening), information and instruction, on completing the form, will be provided on **the Construction Notice**. Applications are subject to approval based on the Zoning By-law. A fee will be charged based on the amount of work required. No widening will take place on patterned concrete and/or lock stone driveways or streets with ditches.
