## EXECUTIVE SUMMARY

HDR Corporation and the City of Mississauga (the City) retained Matrix Solutions Inc. to complete a corridor-wide Limited Phase I environmental site assessment (ESA) in support of engineering services for the Lakeshore Transportation Studies (the project). This corridor-wide Limited Phase I ESA has been completed for the Lakeshore Bus Rapid Transit (BRT) Study.

The Limited Phase I ESA was conducted in general accordance with the Canadian Standards Association Standard Z768 01 (R2016) *Phase I Environmental Site Assessment* (CSA 2001). In addition, the general methodology for conducting Phase I ESAs provided in Ontario Regulation 153/04, as amended, has also been followed. Furthermore, due to the linear infrastructure nature of this study, Matrix has also incorporated aspects of the Ontario Ministry of Transportation process for conducting a Contamination Overview Study (COS) as provided in *Environmental Guide for Contaminated Property Identification and Management* (MTO 2006).

For the purposes of this corridor-wide Limited Phase I ESA, the Phase I Property (the site) is assumed to be the land within the proposed right-of-way (RoW) along the project route, and the site boundary is assumed to be the proposed RoW outline. The Phase I study area encompasses a 250 m buffer, which includes the properties wholly and partially located within 250 m from the boundaries of the site. The 250 m buffer is added to either side of the road to account for surrounding properties that could potentially impact the site. The majority of the Phase I study area is located in a fully developed area in Mississauga. A very limited area at the eastern end of the study area (along the Etobicoke Creek) is located within the City of Toronto. The land use within the study area is a mixture of residential (mainly on the north side of Lakeshore Road East) and commercial and industrial properties (mainly along Lakeshore Road East and to the south side). Open spaces and/or parklands are present along Etobicoke Creek on the south side of Lakeshore Road East.

The Limited Phase I ESA provides a general overview of the site and study area to identify current and historical potentially contaminating activities (PCAs) and areas of potential environmental concern (APECs) within the study area. The assessment of PCAs and APECs have been conducted on a broad level when compared with property-specific or individual Phase I ESAs, due to the scope of the corridor-wide Limited Phase I ESA (i.e., assessment of a large number of properties rather than one single property). APECs have been identified as properties and/or areas of potential environmental concern within the study area, which have been assigned with a risk ratings “high” or “medium” potential for contamination. The findings of the Limited Phase I ESA will provide a baseline of understanding for the planning of property acquisition, dewatering/groundwater management, and excess soil management work in the future design and planning stages and to identify appropriate environmental work and mitigation measures recommended for completion during the detailed design and construction phases of the project.

The Limited Phase I ESA includes a review of historical records available for the properties within the study area and a drive-by, windshield site visit to make observations of the properties within the study area

from public roadways and lands. The site visit did not include property-specific inspections and/or building inspections. No interviews have been conducted for any properties within the study area.

Based on the review of available historical information and observations made during the site visit, 69 properties and/or areas within the Phase I study area have been identified as having a “high” potential for soil and groundwater contamination, including gas stations or service centres, dry-cleaning facilities, vehicle repair garages, and industrial or manufacturing sites. Sixteen properties and/or areas within the study area have been identified as having a “medium” potential for soil and groundwater contamination, including light industrial, commercial and/or institutional facilities. The remaining properties in the study area, which were never developed or were developed but only used for agricultural (excluding orchards, nurseries, tree farms, and golf courses), residential, or parkland uses, were rated as having a “low” potential for contamination. In addition, 30 significant spill incidents, representing 11 spill locations, and 2 historical fill areas are also considered as having a “high” potential for soil and/or groundwater contamination. The properties or areas rated “high” and “medium” potentials for contamination, significant spill, and historical fill locations represent APECs in the study area. In addition to the APECs, potential impacts from de-icing salt applications during the winter season and unrecorded spill incidents on the site and other municipal roadways are also considered as potential environmental concerns to impact the nearby soil and groundwater quality.

The Limited Phase I ESA was prepared in accordance with the scope described in our proposal to HDR Corporation and the City of Mississauga. Matrix Solutions Inc. has exercised reasonable skill, care, and diligence in assessing the information obtained during the preparation of the Limited Phase I ESA. The findings provided in this report are based upon analysis of documents and records provided by third parties. Matrix has assumed that this information is factual and accurate. Matrix accepts no responsibility for any deficiency, misstatement, or inaccuracy contained in this report as a result of omissions or misinterpretations contained in this information. The scope of work for this Limited Phase I ESA does not include an intrusive or subsurface investigation for hazardous substances, and therefore, these substances may be present through any of the study area regardless of the assigned contamination ratings.

# 1 INTRODUCTION

HDR Corporation and the City of Mississauga (the City) retained Matrix Solutions Inc. to complete a corridor-wide Limited Phase I Environmental Site Assessment (ESA) in support of engineering services for the Lakeshore Transportation Studies for Lakeshore Road East and Royal Windsor Drive (the project). The project includes the following parts:

- Lakeshore Bus Rapid Transit (BRT) Study: Transit Project Assessment Process (TPAP) and preliminary design for a 2 km section of Lakeshore Road from Etobicoke Creek to East Avenue.
- Lakeshore Complete Streets Study: Schedule C Class Environmental Assessment (EA) study and preliminary design for Lakeshore Road and Royal Windsor Drive from East Avenue to the Oakville border.
- New Credit River Active Transportation (AT) Bridge Study: Schedule B Class EA study and preliminary design for an active transportation bridge crossing over the Credit River north of Lakeshore Road.

Matrix has completed this corridor-wide Limited Phase I ESA for the Lakeshore BRT Study of the project.

For the purposes of this corridor-wide Limited Phase I ESA, the Phase I Property (the site) is assumed to be the land within the proposed right-of-way (RoW) along the project route, and the site boundary is assumed to be the proposed RoW outline. The Phase I study area encompasses a 250 m buffer, which includes the properties wholly and partially located within 250 m from the boundaries of the site. The 250 m buffer is added to either side of the road to account for surrounding properties that could potentially impact the site.

The corridor-wide Limited Phase I ESA provides a general overview of the site and study area to identify current and historical potentially contaminating activities (PCAs) and areas of potential environmental concern (APECs) within the study area. The assessment of PCAs and APECs have been conducted on a broad level when compared with property specific or individual Phase I ESAs, due to the scope of the corridor wide Limited Phase I ESA (i.e., assessment of a large number of properties rather than one single property). Individual APECs (i.e., properties of potential environmental concern) have been identified within the study area, which have been assigned with a risk rating of “high” or “medium” potential for contamination.

The findings of the Limited Phase I ESA will provide a baseline of understanding for the planning of property acquisition, dewatering/groundwater management, and excess soil management work in the future design and planning stages and to identify appropriate environmental work and mitigation measures recommended for completion during the detailed design and construction phases of the project.

## 1.1 Scope of Work

This corridor-wide Limited Phase I ESA was conducted in general accordance with the Canadian Standards Association (CSA) Standard Z768 01 (R2016) *Phase I Environmental Site Assessment* (CSA 2001). In addition, the general methodology for conducting Phase I ESAs provided in Ontario Regulation 153/04, as amended (O. Reg. 153/04), has also been followed. Due to the linear infrastructure nature of this study, Matrix has also incorporated aspects of the Ontario Ministry of Transportation (MTO) process for conducting a Contamination Overview Study as provided in *Environmental Guide for Contaminated Property Identification and Management* (MTO 2006).

This corridor-wide Limited Phase I ESA includes a review of historical records available for the properties located within the study area and a drive-by, windshield site visit to make observations of the properties within the study area (including the site) from public roadways and lands. The site visit did not include property-specific inspections and/or building inspections.

Table A lists information sources obtained and reviewed as part of the records review.

**TABLE A Summary of Records Review**

Record	Source	Extent of Records Review	
		Phase I Property	Phase I Study Area
Environmental Risk Information Service (ERIS) Database Search Report	ERIS; Order No. 21060100043; June 6, 2021	X	X
Fire Insurance Plans	Opta Information Intelligence	X	X
Chain of Title	Not obtained or provided by the City of Mississauga	-	-
City Directories	LGI Copy Services Canada (LGICS) - 1958, 1959/62, 1969-71, 1979, 1989, and 2000	X	X
Technical Standards and Safety Authority (TSSA) Tank Records	TSSA	X	X
Previous Environmental Reports	800 Hydro Road: CH2M HILL (2001); EXP (2020a, 2020b, 2018a, 2018b); O'Connor Associates (2007, 2004) 1440 Lakeshore Road East: Arcadis (2018, 2017a, 2017b); Terraprobe (2007, 2006)	X	X
Areas of Natural Significance	Ontario Ministry of Natural Resources and Forestry (GIS) application	X	X
Aerial Photographs	City of Mississauga - 1931, 1946, 1960, 1975, 1985, 1997, 2005, 2010, and 2015 (copies of photographs are not included in the report due to copyright; (City of Mississauga 2021a). ERIS - 1931, 1946, 1960.	X	X

Record	Source	Extent of Records Review	
		Phase I Property	Phase I Study Area
Topographic Maps	<i>The Atlas of Canada - Toporama</i> ; Natural Resources Canada (2021)	X	X
Physiographic Maps	<i>The Physiography of Southern Ontario</i> ; Chapman and Putnam (1984)	X	X
Geological Maps	<i>Quaternary geology of Ontario (southern sheet)</i> ; Barnett et al. (1991)	X	X
Well Records	Ontario Ministry of the Environment, Conservation and Parks Water Well Information System (MECP 2021a)	X	X

Due to the nature of the corridor-wide Limited Phase I ESA, (i.e., assessment of a large number of properties instead of a single property for a standard Phase I ESA), the standard scope of a CSA Phase I ESA (i.e., for a single property) has been modified to fit the needs for the assessment of a large number of properties. The following tasks, which are included in a CSA Phase I ESA for a single property, are not included in the corridor-wide Limited Phase I ESA:

- A chain-of-title search for any of the properties within the study area was not obtained.
- Freedom of Information (FOI) requests were not made to the Ontario Ministry of the Environment, Conservation and Parks (MECP) or the City for information for the site or properties within the study area.
- The site visit for the corridor-wide Limited Phase I ESA was a drive-by site visit, and observations of properties were made on features readily visible from public roadways and lands. No property-specific inspections and/or building inspections were conducted.
- No interviews with the property owners were conducted.

If further investigation is determined to be necessary for any of the properties or APECs during the later stage of the project, the above-listed items may be assessed as part of the property-specific/individual Phase I ESAs.

The Limited Phase I ESA scope does not include collecting samples of air, soil, groundwater, surface water, or building materials. Also note that a Phase I ESA does not constitute a hazardous materials survey or designated substances survey.

## 1.2 Methodology

Information gathered from the historical records review and site visits was used to identify PCAs and properties or APECs (properties or areas of potential environmental concern) in the study area. The APECs within the study area have been assigned with a risk rating of “high” or “medium” potential for contamination in accordance with the MTO (2016). The remaining properties, which have not been

identified as APECs, have been assigned with a risk rating of “low” potential for contamination. The properties or APECs with risk ratings of “high” and/or “medium” have been assigned property identification numbers, which are referenced throughout this report.

The rationale for risk rating assignments is provided in the following subsections.

### **1.2.1 High Potential for Contamination**

Properties with a high potential for contamination include:

- properties with confirmed soil and groundwater contamination based on the review of historical records
- current and historical industrial facilities; the potential for contamination is high due to the industrial processes and materials involved
- current or historical waste disposal sites and waste receiving and transfer sites; potential environmental impacts related to waste disposal/handling/transfer sites can be more severe and may extend to neighbouring properties
- some commercial operations, such as dry cleaners, vehicle and equipment repair, automobile wrecking yards, or fuel service stations due to the chemical, fuel, and/or material usage, storage, and handling on these properties
- properties with PCAs, as defined in Table 2, Schedule D of O. Reg. 153/04 (provided in Appendix A); these PCAs must be identified and evaluated when preparing Phase I ESAs for filing a Record of Site Condition.
- certain agricultural properties, such as historical orchards, due to the concern of large-scale pesticide/herbicide applications
- high potential for soil contamination within the railway corridor beneath and or adjacent to railway tracks, as railway ties are impregnated with creosote, and railways are often developed on poor quality fill
- properties with visible transformers, potential fill material of unknown quality, and where significant spills have been reported

### **1.2.2 Medium Potential for Contamination**

Properties with medium potential for contamination include:

- historical and/or current commercial facilities, unless evidence suggests a “high” or “low” potential for contamination
- light industrial facilities, such as warehouses, shipping and receiving operations, light assembly and vehicle and equipment storage
- nurseries, tree farms, and golf courses which may involve the application of pesticides/herbicides
- institutional facilities, such as churches, public schools, large office buildings, nursing homes, and community centres due to the concern of potential use or storage of larger quantities of chemicals (including generator/heating oils), unless specific sources of information suggest that they have “high” or “low” potential

### 1.2.3 Low Potential for Contamination

Properties with low potential for contamination include:

- properties where land uses consist of undeveloped lands, open spaces, and residential properties
- in general, agricultural properties (except for orchards, nurseries, and golf courses):
  - ✦ Agricultural equipment use, storage, and repair may increase the potential for contamination if present.
  - ✦ In addition, certain pesticides and fertilizers applied on agricultural lands can accumulate in surficial soil.

### 1.2.4 Road Salt Impacts and Undocumented Spills

The site consists of the road corridor along Lakeshore Road East within the proposed RoW. Road salts used for de-icing during the winter season along Lakeshore Road East and other municipal roadways within the study area have the potential to impact the soil and groundwater quality in the vicinity. Road salt impacts due to winter de-icing purposes are not considered contaminants as per O. Reg. 153/04. In addition, potential unrecorded spills on the roadways during vehicular traffic may also have the potential to impact the soil and groundwater quality along the road corridors. The potential impacts from de-icing salt impacts and undocumented spills at the site and along other municipal roads are not considered as factors in the risk rating assignment; however, appropriate assessment, management, and/or reuse of the excess soil with salt and petroleum-relevant impacts will be needed.

## 2 SITE OVERVIEW

### 2.1 Site Location and Study Area Limits

For the purposes of this corridor-wide Limited Phase I ESA, the Phase I Property (the site) is assumed to be the land within the proposed RoW along the project route and the site boundary is assumed to be the proposed RoW outline. A 250 m buffer (the Phase I study area; the study area) is added to either side of the road to account for surrounding properties that could potentially impact the site.

The study area consists of an approximately 2 km road corridor along Lakeshore Road East from Etobicoke Creek to East Avenue, in a fully developed area in Mississauga. A very limited area at the eastern end of the study area (along Etobicoke Creek) is located within the City of Toronto. Figure 1 illustrates the site location and study area limits.

### 2.2 Land Use

The study area is located in a well-developed area in Mississauga. Land use within the study area includes a mixture of residential (mainly on the north side of Lakeshore Road East) and commercial and industrial properties (mainly along Lakeshore Road East and to the south side). Open spaces and/or parkland are present along the Etobicoke Creek on the south side of Lakeshore Road East.

### 2.3 Topography and Drainage

According to the *Atlas of Canada - Toporama* (NRCan 2021), the topography within the study area is generally flat, with a generally downward slope to the southeast toward Lake Ontario. The ground elevations within the study area range from approximately 90 m to 80 m above mean sea level (amsl; along the southern end of the study area).

The majority of the study area is situated within the Credit River watershed, while a limited area the eastern end is located within the Etobicoke Creek watershed. Etobicoke Creek flows through the eastern end of the study area, while Applewood Creek and an unnamed tributary of Serson Creek run across the middle section of the study area. All three surface water features drain into Lake Ontario.

Based on the topography and surface drainage features of the area, the regional groundwater flow is easterly/southeasterly toward Lake Ontario. Locally, surface water runoff and groundwater flow are influenced by ground topography, flowing from elevated areas to the valleys of the Etobicoke and Applewood creeks.

The topography and surface drainage features in the area is provided on Figure 2.

## 2.4 Geology and Hydrogeology

The study area is located within the Iroquois Plain physiographic region (Chapman and Putnam 1984), which is comprised mostly of permeable sands and situated along the shoreline of the current Lake Ontario. According to the *Quaternary geology of Ontario (southern sheet)* (Barnett et al. 1991), the quaternary deposit in the vicinity of the study area consists of Glaciomarine deposits of sand, gravelly sand, and gravel (nearshore and beach deposits). Underlying the overburden deposits within the study area are shale, limestone, dolostone, and siltstone of the Georgian Bay Formation (OGS 1991).

A review of the MECP Water Well Information System (WWIS; MECP 2021a) database indicate the geology underlying the study area is characterized by thin overburden soil of sand, gravel, and clay underlain by shale bedrock. Overburden thickness ranges from 0 m (i.e., bedrock exposed at ground surface) to greater than 10 m within the study area.

Potable water in the area is municipally serviced with water obtained from Lake Ontario. A review of the MECP WWIS records for the study area (MECP 2021a) did not identify any existing potable water wells within the study area. A water supply used for industrial purposes (i.e., non-potable) has been identified in the study area. Therefore, the aquifer underlying the study area is not considered as a potable water source.

## 2.5 Significant Natural Environmental Features

According to the natural heritage information available from the Ontario Ministry of Natural Resources and Forestry (MNRF) website (MNRF 2021), a limited area at the western end of the study area along the Etobicoke Creek is situated within the Greenbelt Plan Designation Area. There are no Areas of Natural and Scientific Interest (ANSI), Provincially Significant Wetlands (PSWs), or natural heritage systems present within the study area. Unevaluated wetlands are present in the park area to the west/southwest of Etobicoke Creek (south of Lakeshore Road East).

A review of *Schedule 3 - Natural System* of the Mississauga Official Plan (City of Mississauga 2021b) indicated several small areas on the southside of Lakeshore Road East, along Etobicoke Creek, Applewood Creek, and the unnamed tributary of Serson Creek, are classified as “Significant Natural Area and Natural Green Spaces.”

According to the MECP *Source Water Protection Atlas* (MECP 2021b), there are no Wellhead Protection Areas located within or in the vicinity (within a 1 km radius) of the study area. The majority of the study area is located within a surface water Intake Protection Zone 2 (IPZ-2).

## 3 PREVIOUS ENVIRONMENTAL REPORTS

The City provided HDR and Matrix with several previous environmental reports for two properties/facilities with municipal addresses of 1400 Lakeshore Road East (Property ID #52) and 800/985

Hydro Road (Property ID #7). Historical presence of soil and/or groundwater contamination was confirmed on both properties/facilities. Table 7 provides a summary of the information collected for these properties/facilities. Details of the reports reviewed and information collected are provided in the following sections.

### 3.1 1400 Lakeshore Road East (Property ID #52)

The following reports were reviewed:

- *Post Development Monitoring, 2005 Monitoring Program, Arsenal Lands, 1400 Lakeshore Road East, Mississauga, Ontario* (Terraprobe 2006)
- *Ground Water Quality Investigation, Vicinity of MW3, Arsenal Lands, Mississauga, Ontario.* (Terraprobe 2007)
- *Gamma Radiation Survey, 1352 Lakeshore Road East, Mississauga* (Arcadis 2017a)
- *Field Investigation Summary and Recommendation Letter: Environmental Due Diligence Investigation - 1352-1400 Lakeshore Road East, Mississauga, ON* (Arcadis 2017b)
- *Due Diligence Risk Assessment, 1352-1400 Lakeshore Road East, Mississauga, Ontario* (Arcadis 2018)

A review of these reports indicated the following:

- The property with an address of 1400 Lakeshore Road East contains two parcels, based on the City website (1400 and 1440 Lakeshore Road East), which is part of a large tract of land utilized by the Department of National Defence as a training area prior to the Second World War. The property was then used by Canadian Arsenals (denoted as “Arsenal Land” in the later years). Canada Post was also identified as a former occupant for this property.
- One or more of metal and inorganic parameters exceeding MECP Table 1 Site Condition Standard (SCS) were historically (2005) identified in soil at the northwest portion of the property. Metal, inorganic and/or volatile organic compound parameters exceeding the applicable site standards were historically (2005, 2007, and/or 2016) in groundwater and/or surface water.
- The 2016 gamma radiation survey was conducted at the soil containment facility that the City might acquire, which is located immediately south of a parcel of land at 1352 Lakeshore Road East. According to the property parcel data available on the City’s online interactive map, 1352 Lakeshore Road is part of the property parcel with an address of 1400 Lakeshore Road East, and the soil containment facility is part of the property parcel with an address of 1440 Lakeshore Road East.

The 2016 gamma radiation survey indicated readings ranging from 6 to 15  $\mu\text{R}/\text{hour}$  at ground surface and 6 to 14  $\mu\text{R}/\text{hour}$  at 1 m height above the ground in the survey area. The readings observed on lands that might be conveyed to the City (i.e., north of soil containment facility) ranged from 6 to 8  $\mu\text{R}/\text{hour}$  at both ground surface and 1 metre height aboveground, which was comparable to the background in southern Ontario typically ranges from 3 to 15  $\mu\text{R}/\text{hour}$ .

### 3.2 800 and 985 Hydro Road (Property ID #7)

The following reports were reviewed:

- *Final Report, Phase II Environmental Site Assessment, Former Lakeview GS Switching Station, 800 Hydro Road, Mississauga, Ontario* (CH2M HILL 2001)
- *Supplementary Phase II Environmental Site, Former Lakeview Switching Station, 800 Hydro Road, Mississauga, Ontario* (O'Connor Associates 2004)
- *Phase III Environmental Site Assessment and Remedial Excavations and Drainage System Flushing, Former Lakeview Switching Station, 800 Hydro Road, Mississauga, Ontario* (O'Connor Associates 2007)
- *Due Diligence and Phase I Environmental Site Assessment* (EXP 2018b)
- *Due Diligence and Phase II Environmental Site Assessment* (EXP 2018a)
- *Phase One Environmental Site Assessment, 985 Hydro Road, Mississauga, Ontario* (EXP 2020b)
- *985 Hydro Road, Mississauga, Ontario, Phase Two Environmental Site Assessment* (EXP 2020a)

A review of these reports indicated the following:

- The property with an address of 985 Hydro Road was historically associated with the addresses 1082 Lakeshore Road East and 800 Hydro Road.
- The property was first developed as the former Ontario Power Generation Lakeview Coal Generating Station in the 1950s, which ceased operations in 2005 and was decommissioned between 2006 and 2008.
- A large number of environmental subsurface investigations, including remediation programs, have been previously completed on the property. The 2020 Phase I ESA (EXP 2020b) has identified 24 PCAs that were considered to contribute to APECs on the property.

- A large number of underground storage tanks containing liquid fuel, waste oil, and ignition oil were present from 1960s to 2003. A response from the Technical Standards and Safety Authority (TSSA) Fuels Safety Division also confirmed that there were seven expired underground fuel storage tanks at 800 Hydro Road. The property is currently vacant so the tanks are assumed to be decommissioned.

## 4 RECORDS REVIEW

### 4.1 Ontario Ministry of the Environment, Conservation and Parks and Municipal Freedom of Information Requests

Based on the proposed scope for the corridor-wide Limited Phase I ESA, Freedom of information (FOI) requests to the MECP and the City were not conducted for any of the properties within the study area. FOI requests under the Freedom of Information and Protection of Privacy Act (FOIPPA) conducted by the MECP and local municipalities are based on a specific address. There is no address number associated with the site, and there are a large number of properties within the study area.

### 4.2 Chain-of-title

According to the proposed scope of the corridor-wide Limited Phase I ESA (i.e., assessment of a large number of properties rather than a single property), chain-of-title searches were not conducted for any of the properties within the study area. The City did not provide chain-of-title records for any properties.

### 4.3 Environmental Risk Information Service Database Search

Matrix obtained a custom report from Environmental Risk Information Service (ERIS; Report Number 21060100043; June 6, 2021) for records for the properties within the study area. Appendix B includes a summary of the complete list of databases reviewed by ERIS and a copy of the ERIS report.

Properties located within the study area are listed in 33 databases including Anderson's Waste Disposal Sites (ANDR), Certificates of Approval (CA), Commercial Fuel Oil Tanks (CFOT), Compliance and Convictions (CONV), Delisted Fuel Tanks (DTNK), Environmental Activity and Sector Registry (EASR), Environmental Registry (EBR), Environmental Compliance Approval (ECA), ERIS Historical Searches (EHS), List of Expired Fuels Safety Facilities, Fuel Storage Tank (FST), Fuel Storage Tank - Historic (FSTH), Ontario Regulation 47 Waste Generators Summary (GEN), Greenhouse Gas Emissions from Large Facilities (GHG), TSSA Historic Incidents (HINC), Fuel Oil Spills and Leaks (INC), Landfill Inventory Management Ontario (LIMO), Non-Compliance Reports (NCPL), National PCB Inventory (NPCB), National Pollutant Release Inventory (NPRI), Inventory of PCB Storage Sites (OPCB), Orders (ORD), Pesticide Register (PES), Pipeline Incidents (PINC), Private and Retail Fuel Storage Tanks (PRT), Permit to Take Water (PTTW), Ontario Regulation 347 Waste Receivers Summary (REC), Record of Site Condition (RSC), Retail Fuel Storage Tanks (RST), Scott's Manufacturing Directory (SCT), Ontario Spills (SPL), Wastewater Discharger Registration Database (SRDS), and Waste Disposal Sites - MOE CA Inventory (WDS).

The industrial and commercial facilities listed in the ERIS databases may use, store, and handle various types of chemicals/fuels in their associated industrial or commercial operations and, therefore, are considered having a “medium” to “high” potential for contamination.

Properties identified in the following databases are generally considered as having a “high” potential for contamination due to the manufacturing processes, material usage, storage, and handling activities involved. The properties/areas that are identified in these ERIS databases are presented on Figures 3a to 3c and summarized in Tables 1 to 6.

- various tank databases including CFOT, DTNK, FST, FSTH, PRT, and RST, which involve liquid fuel/fuel oil usage, storage, and handling
- List of Expired Fuels Safety Facilities databases, including expired/former private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas etc.; note the potential for soil and/or groundwater contamination on the propane filling stations, which is included in the List of Expired Fuels Safety Facilities data, is not considered “high” since no liquid fuel storage and handling is involved
- ANDR, WDS, and REC databases including landfill, dump, and/or waste receiver sites
- NPCB and OPCB databases for PCB usage, storage, and handling, unless evidence suggest a “medium” potential for contamination
- SCT database for manufacturing facilities

In addition, properties that are or were used for industrial purposes and/or where the MECP defined PCAs are or were conducted are considered as having a “high” potential for contamination.

The properties listed in the ERIS databases for commercial uses (except for those discussed earlier, which are considered as having a “high” potential) are generally considered as having a “medium” potential for contamination, unless evidence suggests a “high” or “low” potential.

Listings in the SPL, HINC, INC, and PINC databases are spills/release incidents reported to the regulatory agencies. Depending on the nature of these spills, some incidents may represent a relatively high potential for soil and or groundwater contamination. Releases to air, such as natural gas leaks, are unlikely to result in soil or groundwater contamination. Oil spills released directly to catch basins or watercourses that may result in surface water contamination are possibly restricted to the sewer system and less likely to impact soil and groundwater. In addition, spills of small quantities (less than 25 L) are unlikely to cause significant impacts to soil and groundwater. Based on the review of the detailed spill records, a total of 30 spills records associated with 11 property locations were considered significant and may have an environmental impact to the soil and groundwater quality within the study area. These records are listed in Table 10.

ERIS provides a listing of unplottable records, which are records shown up during the database search however not geocoded due to lack of sufficient data on their exact locations. Matrix has reviewed these unplottable records and four unplottable records that were considered potentially significant are summarized and discussed in Table 11. None of the spills could be located or have potential to impact soil and/or groundwater quality in the study area.

#### **4.4 Ontario Ministry of the Environment, Conservation and Parks Water Well Records**

Potable water in the vicinity of the study area is municipally serviced with water from a surface water source (i.e., Lake Ontario). According to the MECP WWIS database (MECP 2021a), there are no existing private potable water wells within the study area. There are no municipal water supply wells or their associated Wellhead Protection Areas located within the study area.

One private water supply well (Well ID 4902286), used for “industrial” purposes, has been identified in the study area and is shown on Figure 2. The water supply well was drilled in 1967 with a diameter of approximately 20 cm and a well depth of approximately 25 m. The static water level is reported approximately 9.1 m below ground surface (bgs). Based on the well record, the well obtains water from approximately 10.5 m bgs (pumping level). A summary of the key information for the industrial water supply well as obtained from the MECP WWIS database (MECP 2021a) is provided in Appendix C. The location of the industrial water supply well is presented on Figure 2.

There are a large number of observation/monitoring wells and test holes within the study area. Geological information collected from a review of the MECP WWIS records is discussed in Section 2.4.

#### **4.5 Technical Standards and Safety Authority**

Technical Standards and Safety Authority (TSSA) Fuels Safety Division was requested in July 2021 to search their database for registered fuel storage tanks for selected properties within the study area. Selected properties were based on a review of the historical information and included industrial and commercial properties that may have a potential for the presence of a fuel storage tank. A response from July 9, 2021, indicated that one property at 1300 Lakeshore Road East had underground fuel storage, which had already been captured in the ERIS database records; a summary of the ERIS database records with potential petroleum storage tanks is provided in Table 1. A response from July 28, 2021, indicated that there were four expired underground fuel oil tanks, two expired liquid fuel tanks, and one private self serve fuel outlet at 800 Hydro Road. A copy of the correspondences is attached as Appendix D. Additionally, Matrix retained ERIS to provide information from additional fuel storage databases which covered the entire study area (see Section 4.4 for details).

## 4.6 Aerial Photographs

Matrix reviewed historical aerial photographs obtained from ERIS and available for the study area for the years 1931, 1946, and 1960. In addition, aerial photographs dated 1931, 1946, 1960, 1975, 1985, 1997, 2005, 2010, and 2015 obtained from the City's online interactive mapping (City of Mississauga 2021a) were also reviewed. Copies of aerial photographs from ERIS are provided in Appendix E. Images from the City's online mapping are not provided due to copyright limitations.

The aerial photograph review was conducted primarily to provide a general development history of the area, to verify the historical land uses and any changes in land uses, and to help identify the likelihood of potential contamination in relation to the properties within the study area. Information collected from the aerial photograph review is limited to some readily visible major features (such as buildings, parking and material storage areas, and large aboveground storage tanks [ASTs]); actual activities on specific properties may not be positively identified due to the quality and relatively small scale of the aerial photographs.

A summary of the aerial photographs is summarized in Table B.

**TABLE B Aerial Imagery Summary**

Year	Site and General Study Area	Commercial/Industrial Development/Redevelopment
1931	Lakeshore Road and Canadian National Railway (CN) rail line is visible in the photograph. The area south of Lakeshore Road is generally agricultural, while the area residential development is generally seen to the north of Lakeshore Road.	A possible orchard is seen west of Etobicoke Creek and south of Lakeshore Road, on the parcel of land denoted as “Arsenal Land” (Property ID #52) Northeast quadrant of Plain Road East and Brant Street, the facility appears to be a gas station (Property ID #117). Southwest quadrant of Plains Road East and Brant Street, the facility appears to be a gas station (Property ID #83). Commercial/industrial developments south of Plains Road East, north of the CN rail line and west of Brant Street (Property ID #97, 118-121).
1946	Further residential and some commercial/industrial developments are seen in the study area.	Possible landfilling activities are seen along the west side of Etobicoke Creek and south of Lakeshore Road. Details of the activities cannot be confirmed due to photograph quality. Industrial/commercial development is seen on “Arsenal Land” (Property ID #52), with a very large building and two smaller structures observed. Possible industrial/commercial development is seen in the area of 1180, 1200, and 1260 Lakeshore Road (Property ID #47, #48, and #50).
1960	Further residential development is seen north of Lakeshore Road.	The current industrial area south of Lakeshore Road, southwest of “Arsenal Land,” and along Rangeview Road is under construction, with a large area of soil disturbances observed. The possible landfilling activities seen along the west side of Etobicoke Creek and south of Lakeshore Road in the 1946 photograph is not observed. The area is vacant.
1975	The study area appears well developed with mostly residential properties to the north of Lakeshore Road and industrial properties to the south.	The majority of the industrial facilities along Rangeview Road and south of Lakeshore Road have been developed. The Ontario Power Generation Lakeview Coal Generating Station is visible (1082 Lakeshore Road, 800/985 Hydro Road, Property ID #7) The Lakeview Water Pollution Control Plant (Ontario Clean Water Agency) is visible (1300 Lakeshore Road East, Property ID #1) Commercial/industrial development is also seen immediately north of Lakeshore Road.

Year	Site and General Study Area	Commercial/Industrial Development/Redevelopment
1985	No significant visible change was noted other than further development of the area.	Shooting blocks are seen on the southwest portion of “Arsenal Land” (Property ID #52). No significant visible change in comparison to the 1975 aerial photograph, other than further industrial development south of Lakeshore Road.
1997	No significant visible change was noted other than further development of the area.	The large building and other structures are not visible “Arsenal Land” (Property ID #52), the area appears vacant.
2005	No significant visible change was noted other than further development of the area.	A commercial/industrial building is visible at the northwest corner of “Arsenal Land” (Property ID #52).
2010	No significant visible change was noted other than further development of the area.	The Ontario Power Generation Lakeview Coal Generating Station appears decommissioned (1082 Lakeshore Road, 800/985 Hydro Road, Property ID #7)
2015	No significant visible change was noted other than further development of the area.	The possible gas station on 1407 Lakeshore Road (currently townhouse development, Property ID# 53) appears decommissioned; the area appears vacant

## 4.7 Fire Insurance Plans

Matrix identified three industrial areas within the study area for the search of Fire Insurance Products (FIPs) by Opta Information Intelligence. Opta conducted the records search within a 250 m search radius of the provided addresses (1025 Rangeview Road, 1260 Lakeshore Road East, and 880 Lakeshore Road East). A copy of the available FIPs found by the search is provided in Appendix F. A summary of the FIPs is provided further in this section.

One fire map and four FIP reports were found for 1025 Rangeview Road:

- 1952 Volume: Toronto 19 Firemap: 1915A, Toronto Vol. 19 Plan: 2180 (1952), Sheet: 1915A (1952)
- (1993) Inspection Report - 1993, Boltron Tidman Inc., Reference No: 10462837
- (1993) COPE Report - 1993, Boltron Tidman Inc, Reference No: 10462837
- (2008) All Risk Report - 2008, 1718262 Ontario Limited
- (2007) Inspection Report - 2007, Boltron Bookbinding (2000) Ltd., - Unit 1 1025 Rangeview Rd, Mississauga ON

One fire map and five FIP reports were found for 1260 Lakeshore Road East:

- 1952, Volume: Toronto Volume 19 Firemap: 1917
- 1983, Siteplan Report - 1983, McKenna Holding Ltd.
- 1993, Inspection Report - 1993, McKenna Holding Ltd.
- 1993, COPE Report - 1993, McKenna Holding Ltd.
- 1994, Multirisk Report - 1994, Allan Gardner Marketing
- 2001, Inspection Report - 2001 Fabritec Canada Inc.

Three fire maps and three FIP reports were found for 880 Lakeshore Road East:

- (1952) Volume: Toronto Volume 19 Firemap: 1914
- (1952) Volume: Toronto Volume 19 Firemap: 1915
- (1952) Volume: Toronto Volume 19 Firemap: 1915A
- (1989) Inspection Report - 1989, Chantler and Chantler Inc., Reference No: 10208105
- (1989) COPE Report - Chantler and Chantler Inc., Reference No: 10208105
- (1989) Siteplan Report - 1989 Chantler Chantler Ltd.

A summary of properties of potential environmental concern (APECs) that were identified during the FIP review is provided in Table C.

**TABLE C Properties of Environmental Concern Identified Through Fire Insurance Products Review**

Property ID No.	Address	Occupant	Potential Environmental Concern/PCA
58	827-839 Lakeshore Road East	Rosewood Automotive	On the 1952 FIP map, the building is labelled “garage” with two underground storage tanks onsite.
6	909 Lakeshore Road East	AutoTex Service Centre Ltd. (former Gi Sug Lee Lee’s Gas Bar)	The property is labelled a service gas station, with three underground storage tanks observed to the south of the building on the 1952 FIP map.
39	1019 Lakeshore Road East	Krown Lakeshore (auto garage) Ontario Greenlight Motors Brothers Auto Sales	The building on the property was labelled “garage” with two underground storage tanks observed to the south of the building on the 1952 FIP map.
44	859 (857-859) Lakeshore Road East	Ontario Auto Group	The property was occupied by “Master Welding” with one underground storage tank observed to the south of the building on the 1952 FIP map.
40	1001 Lakeshore Road East	Watts Current - Lighting Store (former cleaners - 1952)	The building on the property is labelled “cleaners” on the 1952 FIP map.
50	1260 Lakeshore Road East	Fabritec Canada Inc.	The 2001 Inspection report indicates the occupant occupied approximately 100 m <sup>2</sup> space in this warehouse as storage of dry cleaners chemicals shipped from U.S. Stock of dry cleaners chemicals are stored in containers on skids with adequate spaces.
17	880 Lakeshore Road East	Chantler and Chantler Inc.	The 1989 Inspection Report indicates bulk storage of flammable inks and solvents are kept in a flammable room, and there is a liquids storage room onsite.

#### 4.8 City Directories

Matrix reviewed the city directories available for three industrial areas in the vicinity of 1025 Rangeview Road, 1260 Lakeshore Road East, and 880 Lakeshore Road East for the years 1958, 1959/62, 1969-71, 1979, 1989, and 2000 (one per decade) obtained from LGI Copy Services Canada (LGICS). The city directories from LGICS are attached as Appendix G.

LGICS would not provide access to information sources due to the circumstances resulting from the COVID-19 pandemic. While all additional measures were undertaken to provide accurate information where possible, some city directory searches yielded no results.

From 1958 to 2000, addresses between 825-1385 Lakeshore Road East were a mix of residential, commercial, and industrial properties. Auto garages, manufacturing companies, and dry-cleaning facilities dating back to 1958-1962 were listed in the city directories for this stretch of Lakeshore Road East. The city

directories listed an auto wholesale company as a former occupant of 1260 Lakeshore Road East prior to the current occupant McKenna Logistics. From 1970/71 to 2000, all addresses between 850-1085 Rangeview Road were either industrial or commercial properties. The city directories listed a tire services company as a former occupant of 1083 Rangeview Road prior to the current occupant Leda Disaster Restoration Specialists. Based on the city directories, Lakefront Promenade was not listed as a street until 1989 and from 1989 to 2000, all addresses between 775-930 Lakefront Promenade were industrial or commercial properties. In summary, the city directories review confirmed that many of the properties in the study area that are currently industrial or commercial properties have seen no changes in property type from 1958 to 2000.

Properties/areas of potentially environmental concern identified by the review of available city directories are summarized and discussed in Tables 1 to 6.

## 5 INTERVIEWS

According to the proposed scope of the corridor-wide Limited Phase I ESA scope (i.e., assessment of a large number of properties rather than a single property), interviews were not conducted for any of the properties within the study area.

## 6 STUDY AREA RECONNAISSANCE

### 6.1 Drive-by Windshield Survey

Matrix personnel conducted the site visit on June 14, 2021. Selected site visit photographs are included in Appendix H, and the general site visit details are provided in Table D.

**TABLE D Site Visit Details**

Aspect	Details
Site Assessor	Chloe Zhang, M.A.SC., P. Geo. QP <sub>ESA</sub> Justine Chin-Cheong, B.Sc., E.I.T.
Date	June 14, 2021
Weather	Sunny, 19°C

The site visit included a visual drive-by windshield survey of the properties within the study area. The driving route included the surrounding roads along Lakeshore Road East between East Avenue and Brow Drive, and local municipal roadways to observe the properties within the study area from public roadways and publicly accessible lands. All local municipal roads within the study area were accessed unless they had restricted access or were residential roads.

Site visit observations included noting any limitations associated with the visit, the presence or absence of buildings and infrastructure on the properties, the potential presence of any hazardous materials or any unidentified substances, the presence of storage containers and tanks, the sources of potable water,

and the potential presence of any special attention substances. Photographs and field notes were also taken during the site visit to assist with documenting the observed conditions.

The study area is located in a well-developed area in the City. Land use within the study area north of Lakeshore Road East is primarily residential, with commercial, institutional, and industrial developments present primarily on the south side of and along Lakeshore Road East. Drilled and dug wells were not observed on the residential properties during the windshield survey. Multiple transformers were observed on properties during the site visit.

Properties/areas that have been identified having potential environmental concerns during the site visits have been rated accordingly as “high” and “medium” potential for contamination. These properties/areas of potential environmental concern are summarized and discussed in Table 1 to 6.

### **6.1.1 Site Visit Limitations**

The drive-by inspection did not include any building inspections or on-site property inspections of any of the properties within the study area. Therefore, observations and evaluation of the properties located within the study area by Matrix were limited to features and conditions that were readily visible from publicly accessible roadways.

This Limited Phase I ESA site visit did not include any testing, sampling, or analysis to confirm the presence or absence of potential substances of environmental concern.

## **7 FINDINGS AND RECOMMENDATIONS**

Based on the review of available historical information and observations made during the site visit, 69 properties within the study area have been identified as having a “high” potential for soil and groundwater contamination, including gas stations/service centres, dry cleaning facilities, possible vehicle repair garages, and industrial or manufacturing sites. A list and summary of the properties designated with a “high” potential are provided and described in Table 8. Sixteen properties within the study area have been identified as having “medium” potential for soil and groundwater contamination and these properties are provided in Table 9. The details of these properties/facilities/areas are summarized in the referenced tables. The remaining properties in the study area, which were never developed or were developed but only used for agricultural, residential, or parkland uses, were rated as having a “low” potential for contamination.

In addition to the properties rated “high” or “medium,” 30 significant spill records (representing 11 spill locations; SPL-1 to SPL-11) and two historical fill areas (HF-1 and HF-2) are also considered as having a “high” potential for soil and/or groundwater contamination. The significant spill records are summarized in Table 10, while the historical fill records are summarized in Table 2 and Table 8.

The properties/areas rated as “high” and “medium” potentials for contamination, significant spill, and historical fill locations represent APECs in the study area and are illustrated on Figures 3a to 3c. In addition to the APECs shown on Figures 3a to 3c, potential impacts from de-icing salt applications during winter season and unrecorded spill incidents on the site and other municipal roadways are also considered as potential environmental concern to impact the soil and groundwater quality in the vicinity.

## 7.1 Limitations

The Limited Phase I ESA was prepared in accordance with the scope described in our proposal to HDR Corporation and the City of Mississauga. Matrix Solutions Inc. has exercised reasonable skill, care, and diligence in assessing the information obtained during the preparation of the Limited Phase I ESA. The findings provided in this report are based upon analysis of documents and records provided by third parties. Matrix has assumed that this information is factual and accurate. Matrix accepts no responsibility for any deficiency, misstatement, or inaccuracy contained in this report as a result of omissions or misinterpretations contained in this information. The scope of work for this Limited Phase I ESA does not include an intrusive or subsurface investigation for hazardous substances, and therefore, these substances may be present through any of the study area regardless of the assigned contamination ratings.

The report was prepared for HDR Corporation and the City of Mississauga. The report may not be relied upon by any other person or entity without the written consent of Matrix Solutions Inc., HDR Corporation, and the City of Mississauga. Any uses of the report by a third party, or any reliance on decisions made based on it, are the responsibility of that party. Matrix Solutions Inc. is not responsible for damages or injuries incurred by any third party as a result of decisions made or actions taken based on the report.

9	851-865 Rangeview Road	Multi-tenant Industrial. Occupants include various manufacturing facilities: Roby Industries of Canada Ltd. (plastics products), Romac Products Limited (special dies and tools, jigs and fixtures, and industrial molds), GS Medical Packaging Inc. (plastic bag and pouch), Four Four Four Ltd. (Other paperboard container), Gordon Piller Inc. & Metagenics Canada Inc. (Pharmaceuticals and pharmacy supplies wholesaler-distributors)	Plastic product manufacturing  Dies and tool manufacturing  Paper board processing	136, 140, 154, 157 /City Directory/ Site Visit	40: Plastics (including Fibreglass) Manufacturing and Processing  34: Metal Fabrication  45: Pulp, Paper and Paperboard Manufacturing and Processing	Metals, VOCs

Property ID No.	Address	Occupant/Site Description	Risk Rating Rationale	ERIS Number/ Information Source	PCA No. and Description	PCOCs
10	880 Rangeview Road	Multi-tenant Industrial. Occupants include various manufacturing facilities: H.B. Fuller Canada Inc. (Paints, varnishes, lacquers, enamels, and allied products), Filamat Composites Inc. (plastic product), and Green Turtle Technologies Ltd. (commercial and service industry machinery)	Paints and related product manufacturing  Plastic product manufacturing  Dies and tool manufacturing	132/City Directory/ Site Visit	39: Paints Manufacturing, Processing and Bulk Storage  40: Plastics (including Fibreglass) Manufacturing and Processing  34: Metal Fabrication	Metals, VOCs
11	890 Rangeview Road	Canada Post (former Needle-Bobbin Ltd.)	Clothing factory	117/City Directory /Site Visit	54: Textile Manufacturing and Processing	Metals, VOCs
12	885 Rangeview Road	Focused on Food Craft Services (former Parker-Hannifin [Canada] Inc., hydraulic equipment supplier)	Hydraulic equipment manufacturing	123/City Directory /Site Visit	34: Metal Fabrication	Metals, VOCs
13	895 Rangeview Road	Oplenac Serbian Cultural Association (former Bioderma Skin Enrichment Prods and Holistic Skin Care Ltd.)	Cosmetics manufacturing	115/City Directory /Site Visit	13: Cosmetics Manufacturing, Processing and Bulk Storage	Metals, VOCs
14	930 Lakefront Promenade	Wonderland Food and Equipment (former Pride Pak Canada Ltd.)	Fresh fruit and vegetable processor  Large transformer observed onsite	107/Site Visit	18: Electricity Generation, Transformation and Power Stations	PCBs, PHCs
15	830-832 Lakeshore Road East	Mediacom Inc. (commercial printing)  511 Foods Ltd	Commercial printing  Paper processing	152/City Directory /Site Visit	31: Ink Manufacturing, Processing and Bulk Storage  45: Pulp, Paper and Paperboard Manufacturing and Processing	VOCs, metals
16	852 (848-872) Lakeshore Road East	Wood Studio of Matthew Leite (Former Bay Auto Wreckers Hamilton, Access Metal Service)	Auto wrecking  Metal fabrication	137/City Directory /Site Visit	49: Salvage Yard, including automobile wrecking 34: Metal Fabrication	PHCs, VOCs, metals
17	880 Lakeshore Road East	Chantler Packaging Inc.	Plastic bag and pouch manufacturing	122/FIP (1989)/ Site Visit	40: Plastics (including Fibreglass) Manufacturing and Processing  34: Metal Fabrication	Metals, VOCs
18	875 Lakeshore Road East	Holland Marine Products (former Able Lock Service Ltd.)	Hardware and electric machinery	127/City Directory /Site Visit	34: Metal Fabrication  18: Electricity Generation, Transformation and Power Stations	Metals, VOCs, PHCs, PCBs
19	896 Lakeshore Road East	A & U Hanus Food Products Ltd.	Food manufacturing	113/City Directory /Site Visit	N/A, Industrial/Manufacturing Activities	PHCs
20	920 Lakeshore Road East	ABC Fire Door Testing and Manufacturing (former Barry Manufacturing Co. Ltd.)	Metal doors, sash, frames, molding, and trim.	104/City Directory /Site Visit	34: Metal Fabrication	Metals, VOCs
21	945 (939-947) Lakeshore Road East	A stained-glass Store (former Interior Manufacturing Group Inc.)  A commercial plaza is observed in the area with multiple parcels from 939 to 947 Lakeshore Rd E, occupant include restaurants, grocery store, printing shops and other retail stores.	Wood and metal interior furniture manufacturing  Glass manufacturing	96/City Directory/ Site Visit	34: Metal Fabrication  59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products  29: Glass Manufacturing	Metals, VOCs
22	974 Lakeshore Road East	Interior Manufacturing Group Inc.	Wood and metal interior furniture manufacturing	90/City Directory/ Site Visit	34: Metal Fabrication  59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Metals, VOCs

Property ID No.	Address	Occupant/Site Description	Risk Rating Rationale	ERIS Number/ Information Source	PCA No. and Description	PCOCs
23	981 (979-987) Lakeshore Road East	Fawn Heating & Cooling & Refrigeration Ltd. and Ryan's Raw (former Wrought Iron & More Inc.)	Heating and air-conditioning equipment and supplies Metal household furniture manufacturing	87/City Directory/ Site Visit	34: Metal Fabrication	Metals, VOCs
24	895 Lakefront Promenade	Construction Specialties Co.	Plastics products and fabricated structural metal manufacturing Large transformer observed onsite	101/City Directory/ Site Visit	34: Metal Fabrication 40: Plastics (including Fibreglass) Manufacturing and Processing 18: Electricity Generation, Transformation and Power Stations	Metals, VOCs, PHCs, PCBs
25	925 Lakefront Promenade	Multi-tenant industrial. Occupants include Lakefront Manufacturing Inc., Cleansweep Manufacturing (autobody shop), Lakefront Manufacturing Inc. (moto parts manufacturing), Lakefront Manufacturing Inc. (commercial printing),	Autobody shop Motor parts manufacturing Commercial printing	98/City Directory/ Site Visit	10: Commercial Autobody Shops 34: Metal Fabrication 31: Ink Manufacturing, Processing and Bulk Storage	PHCs, VOCs, metals
26	983 Rangeview Road	Contract Supply Corporation - wood furniture (former Rocket Sheet Metal)	Wood furniture manufacturing Metal fabrication	94/City Directory/ Site Visit	34: Metal Fabrication 59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Metals, VOCs
27	992-996 Rangeview Road	Interior Manufacturing Group Inc. - interiors and furnishings manufactured from wood and metal, (former Specialty Gaskets Inc. - industrial machinery and equipment)	Wood furniture manufacturing Metal fabrication	92/City Directory/ Site Visit	59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products 34: Metal Fabrication	Metals, VOCs
28	1008 Rangeview Road	Genco Marine/Noah's Marine Supplies (former Gerrie-Young Enterprises Ltd. - commercial printing and Temco Electric Manufacturing)	Commercial printing activities Electric manufacturing	82/City Directory/ Site Visit	31: Ink Manufacturing, Processing and Bulk Storage 34: Metal Fabrication 18: Electricity Generation, Transformation and Power Stations	PHCs, VOCs, metals, PCBs
29	1021 Rangeview Road	Toronto Fabricating & Mfg. Co (former Datasphere Sales Limited)	Wood and metal furniture manufacturing	86/City Directory/ Site Visit	34: Metal Fabrication 59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Metals, VOCs
30	1024 Rangeview Road	Currently vacant (former Stratos Industries Inc.)	Wood window and door manufacturing	79/City Directory/ Site Visit	59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Metals, VOCs
31	1025 Rangeview Road	Executive Desks Inc. Boltron Bookbinding	Wood furniture manufacturing	73/City Directory/ Site Visit	59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Metals, VOCs
32	1035 Rangeview Road	Gaspard LP (manufacturer and distributor of academic regalia, choir robes, judicial garments, and church vestments), former Desertet Pharmaceutical and Enns & Gilmore Ltd.	Textile manufacturing Metal fabrication	67/City Directory/ Site Visit	34: Metal Fabrication 54: Textile Manufacturing and Processing	Metals, VOCs
33	1044 Rangeview Road	Xtreme Tire Garage (former Nordic Systems Corporation)	Auto garage Industrial and commercial machinery	70/City Directory/ Site Visit	27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles 34: Metal Fabrication	PHCs, VOCs, metals

Property ID No.	Address	Occupant/Site Description	Risk Rating Rationale	ERIS Number/ Information Source	PCA No. and Description	PCOCs
34	1045 Rangeview Road	Wilcox Door Systems (former Dynamic Thermoplastics and P&R Reinforced Plastics)	Metal window and door manufacturing Plastic product manufacturing	55/City Directory/ Site Visit	34: Metal Fabrication 43: Plastics (including Fibreglass) Manufacturing and Processing	Metals, VOCs
35	1062 Rangeview Road	Long Branch Foundry Ltd.	Rolling, drawing, and extruding of copper aluminum extruded products	58/City Directory/ Site Visit	34: Metal Fabrication	Metals, VOCs
36	1072-1076 Rangeview Road	Kotyck Brothers Limited (former Pan Canada Magnetics)	Industrial machinery manufacturing Magnetic manufacturing	44, 45/City Directory/Site Visit	34: Metal Fabrication	Metals, VOCs
37	1083 Rangeview Road	Leda Disaster Restoration Specialists and General Contractors (former Enviro-Tire Services and System Group Management Services)	Auto garage Large transformer observed onsite	City Directory/Site Visit	27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles 18: Electricity Generation, Transformation and Power Stations	PHCs, VOCs, PCBs
38	1000-1006 Lakeshore Road East	A.J. Lanzarotta Wholesale Fruit and Vegetables Ltd (former Wiresmith Limited)	Metal products manufacturing	76/Site Visit	34: Metal Fabrication	Metals, VOCs
39	1009-1019 Lakeshore Road East (including 1011)	Krown Lakeshore (auto garage)	Liquid Fuel Storage and Handling Auto garage	FIP (1952)/Site Visit	28: Gasoline and Associated Products Storage in Fixed Tanks 27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	PHCs, VOCs, metals
40	1001 Lakeshore Road East	Watts Current - Lighting Store (former cleaners)	Possible former dry-cleaning facility	FIP (1952)/Site Visit	37: Operation of Dry-Cleaning Equipment (where chemicals are used)	VOCs
41	1036 Lakeshore Road East	Oasis Convention Center (former Culross Products - interlock metal roofing)	Metal roof manufacturing	62/City Directory/Site Visit	34: Metal Fabrication	Metals, VOCs
42	1050 Lakeshore Road East	IlSCO of Canada Ltd.	Wiring device manufacturing	49/City Directory/Site Visit	34: Metal Fabrication	Metals, VOCs
43	1059 Lakeshore Road East	Portrait Memorials Inc.	Other concrete product manufacturing	42/Site Visit	12: Concrete, Cement and Lime Manufacturing	VOCs, metals
44	859 (857-859) Lakeshore Road East	Ontario Auto Group	Liquid Fuel Storage and Handling Auto garage	FIP (1952)/Site Visit	28: Gasoline and Associated Products Storage in Fixed Tanks 27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	PHCs, VOCs, metals
45	1041 Lakeshore Road East	Currently vacant (former Willows Motor Court, 1958)	Possible former auto garage	City Directory/Site Visit	27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	PHCs, VOCs
46	1107 Lakeshore Road East	Cheron Dearle Designs Inc.	Curtain and linen mills	28/Site Visit	54: Textile Manufacturing and Processing	VOCs, metals
47	1180 Lakeshore Road East	Plasterform Inc.	Gypsum product manufacturing	19/City Directory/ Site Visit	N/A, Gypsum product manufacturing facility	VOCs, metals
48	1200 Lakeshore Road East	Cintube Ltd. (former Anchor Lamina Inc.)	Industrial and commercial machinery and equipment. Iron and steel mills. Metal fabricators.	12/City Directory/ Site Visit	3: Metal Treatment, Coating, Plating and Finishing 34: Metal Fabrication	VOCs, metals
49	1226-1230 Lakeshore Road East	Bluebird Self Storage (former Grohe Canada Inc.)	Plumbing, heating, and air-conditioning equipment and supplies	6/City Directory/ Site Visit	34: Metal Fabrication	VOCs, metals

Property ID No.	Address	Occupant/Site Description	Risk Rating Rationale	ERIS Number/ Information Source	PCA No. and Description	PCOCs
50	1260 Lakeshore Road East	McKenna Logistics (former Casino Auto Wholesale Ltd. and Fabritec Canada Ltd.)	Auto garage  Historical storage of dry-cleaning chemicals	7/Site Visit	27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles  37: Operation of Dry-Cleaning Equipment (where chemicals are used)	PHCs, VOCs
51	Marie Curtis Park west of Etobicoke Creek and south of Lakeshore Road	Marie Curtis Park (Former Marie Curtis landfill)	Waste Management	Site Visit	54: Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Metals, VOCs, PHCs, PCBs, PAHs
52	1400 and 1440 Lakeshore Road East ("Arsenal Land")  1350-1352 Lakeshore Road East	"Arsenal Land" owned by Toronto and the Region Conservation Authority (TRCA)  Small Arms Inspection Building (former occupants include Department of National Defence as a training area, Canadian Arsenals and Canada Post)	Historical land use confirmed historical soil and groundwater contamination (metals and VOCs). Elevated gamma survey readings Possible historical orchard	57/Historical Environmental Reports/Site Visit	N/A, Various historical industrial/commercial and arsenal activities.  40: Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Pesticides, metals, VOCs
53	1407 Lakeshore Road East	Currently vacant, former commercial/light industrial activities (could be a gas station or garage, details cannot be confirmed on the aerial photos due to quality)	Liquid Fuel Storage and Handling  Auto garage	Aerial photos	28: Gasoline and Associated Products Storage in Fixed Tanks  27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	PHCs, metals, VOCs
54	1195 Lakeshore Road East	Lakexie Dryclean and Alterations	Dry Cleaner	City Directory/Site Visit	37: Operation of Dry-Cleaning Equipment (where chemicals are used)	VOCs
55	1165-1181 Lakeshore Road East	Executive Dry Cleaners (1179 Lakeshore Rd E)	Dry Cleaner	Site Visit	37: Operation of Dry-Cleaning Equipment (where chemicals are used)	VOCs
56	973 Lakeshore Road East	Al's Car's Inspector and Auto Sales	Auto garage	Site Visit	27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	PHCs, VOCs
57	901 (899-901) Lakeshore Road East	Mattress to Door (Former Auto Conversion Ltd, 1970/71)	Auto garage	City Directory/Site Visit	27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	PHCs, VOCs
58	827-839 Lakeshore Road East	Rosewood Automotive	Auto garage  Liquid Fuel Storage and Handling	City Directory/FIP (1952)/Site Visit	28: Gasoline and Associated Products Storage in Fixed Tanks  27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	PHCs, VOCs, metals
59	825 Lakeshore Road East	E-Zee Wheels Auto Sales	Auto garage	City Directory/Site Visit	27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	PHCs, VOCs
60	1185 Lakeshore Road East	Executive Dry Cleaners (former Lakeview Cleaners - 1959/62 to 1969/70-71)	Dry Cleaner	City Directory/Site Visit	37: Operation of Dry-Cleaning Equipment (where chemicals are used)	VOCs
61	1100 Casson Avenue	Enersource Hydro Mississauga Inc.  Alectra Utilities Corp.	Electricity generator, transmitter, and distributor.	Site Visit	55: Transformer Manufacturing, Processing and Use	PHCs, PCBs
62	1258 Lakeshore Road East	Canadian Food for Children Former occupants include Universal Debit Systems, South Peel Rod & Gun Club (1989), Master Welding Ltd. (1969/62 to 1979), Port Credit Welding School and Equipment Consultation & Sales	Potential underground storage tank for the welding operations (underground water storage tank was observed on a Master Welding facility in the 1950s in the area)	City Directory/Site Visit	28: Gasoline and Associated Products Storage in Fixed Tanks	PHCs, metals

Property ID No.	Address	Occupant/Site Description	Risk Rating Rationale	ERIS Number/ Information Source	PCA No. and Description	PCOCs
63	1076 Lakeshore Road East	Allegion - security products (former Ingersoll Rand Architectural Hardware and IR Security and Technologies)	Metal products manufacturing Heating and air-conditioning equipment and supplies	39/City Directory/Site Visit	34: Metal Fabrication	Metals, VOCs
64	946 Lakeshore Road East	National Bait Inc. (former Cott Beverages)	Located in an industrial area with a large industrial type of building onsite	99/City Directory/Site Visit	N/A, Industrial facility	PHCs
77	1257 Lakeshore Road East	Apartments (current) South Peel Rod & Gun Club (former - 2000)	Potential fire range activities	City Directory	N/A, Lead containing bullet used in fire ranges	Metals
80	1381 Lakeshore Road East	Dixie Lake Plaza, occupants include restaurant, and Tattoo Studio and spa. Former occupants include Mississauga Tire Sales (1969/70-71), and Arrow Bus Lines (1959/62).	Potential auto garage Bus service facility	City Directory	27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles  52: Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	PHCs, VOCs
83	920 East Avenue	Arthur P. Kennedy/Lakeview Water Treatment Plant	Waste Management	Site Visit	54: Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	PHCs, VOCs, metals, PAHs, PCBs

Notes:

ERIS - Environmental Risk Information Services

HF - Historical Fill Area ID

N/A - not applicable

PAH - polycyclic aromatic hydrocarbon

PCA - potentially contaminating activity

PCB - polychlorinated biphenyls

PCOC - potential contaminant of concern

PHC - petroleum hydrocarbon

VOC - volatile organic compounds

**TABLE 9 Properties Designated as Medium Potential for Contamination**

Property ID No.	Address	Occupant/Site Description	Risk Rating Rationale	PCOCs

82	1079 Lakeshore Road East	Lakeside Montessori School	<ul style="list-style-type: none"> <li>Newly developed school observed on property during site visit. Historical records show that a house was on the property prior to the school being built.</li> </ul>	PHCs

Notes:  
 PCOC - potential contaminant of concern  
 PHC - petroleum hydrocarbon

**TABLE 10 Significant Spill Records of Concern**

Spill ID No.	Address	Occupant/Site Description	Incident Date	Spill Description	Possible Medium Impacted	ERIS Key (Map Key Location, Map Key No.)	PCOCs
SPL-1	1000 Lakeshore Road East	S. 21	2003-07-06	Fuel tank rupture of 91 L of gasoline onto ground from car hitting curb in plaza.	Land	SPL (76, 3)	PHCs
SPL-2	1019 Lakeshore Road East	Lada City Motors	1992-09-09	Fuel contaminated soil during excavation from underground tank leak. Quantity not listed.	Land	SPL (68, 1)	PHCs
SPL-3	1076 Westmount	PUC - Peel Region Waterworks	1998-01-16	Equipment failure - broken forcemain and third-party damage to residence. Contaminant and quantity spilled not listed.	Land	SPL (143, 1)	PHCs
SPL-4	1180 Lakeshore Road East	Purolator Manufacturing Ltd.	1990-07-20	Container overflow of 450 L of di-octyl phthalate to parking lot.	Land	SPL (19, 1)	Metals, VOCs
		The Corporation of the City of Mississauga	2005-07-19	1000 L raw unchlorinated sewage to ground.	Land	SPL (19, 24)	Metals, VOCs
SPL-5	1300 Lakeshore Road East	Ontario Clean Water Agency - Lakeview Water Pollution Control Plant (G.E. Booth - Wastewater Treatment Plant)	1997-08-16	Container overflow of 120 L raw sludge to land from a power interruption.	Land	SPL (21, 28)	Metals, PHCs, VOCs
			2012-05-07	Supersucked hydrovac pipe/hose leak of 100 L hydraulic oil to ground.	Land	SPL (21, 131)	Metals, PHCs, VOCs
			2015-10-11	1000 L furnace oil to asphalt.	Land	SPL (21, 152)	Metals, PHCs, VOCs
			2018-06-14	Aeration tank #7 crack leaked sludge. Receiving environment: groundwater.	Groundwater	SPL (21, 202)	Metals, PHCs, VOCs
			2003-04-10	75-gallon polymer spill to ground.	Land	SPL (21, 82)	Metals, PHCs, VOCs
			2006-02-17	27000 L of raw unchlorinated sewage.	Land	SPL (21, 92)	Metals, PHCs, VOCs
			2016-07-19	1000 L process water/ash spill.	Land and Surface Water	SPL (21, 156)	Metals, PHCs, VOCs
			2015-10-11	Liquid petroleum spill after driver over filled underground tank. Quantity not listed.	Land	INC	Metals, PHCs, VOCs
			1994-04-19	90 L of 15% ferric chloric leaked to ground due to equipment failure.	Land and Water	SPL (21, 9)	Metals, PHCs, VOCs
			1994-04-20	500 L of sewage sludge to ground when valve leaked.	Land	SPL (21, 10)	Metals, PHCs, VOCs
			1994-07-07	150 L sewage overflow to land.	Land	SPL (21, 13)	Metals, PHCs, VOCs
			1996-02-19	1000 L raw sludge overflow to parking lot and storm sewer.	Land	SPL (21, 23)	Metals, PHCs, VOCs
			1996-05-28	180 L raw sludge to asphalt from blending tank overflow.	Land	SPL (21, 25)	Metals, PHCs, VOCs
			1996-10-08	5000 L raw sewage to ground from tank overflow.	Land	SPL (21, 27)	Metals, PHCs, VOCs
			1998-09-10	90 L raw sewage to grass field.	Land	SPL (21, 30)	Metals, PHCs, VOCs
			1998-11-27	250 L sludge to ground and to storm.	Land	SPL (21, 31)	Metals, PHCs, VOCs
1999-02-03	450 L raw sludge to lot.	Land	SPL (21, 32)	Metals, PHCs, VOCs			
2001-11-14	800 L sewage to ground from #7 digester overflow.	Land	SPL (21, 46)	Metals, PHCs, VOCs			
1994-04-16	450 L raw sludge to ground - tank burped.	Land	SPL (21, 8)	Metals, PHCs, VOCs			
SPL-6	1417 Lakeshore Road East	Raminder Ghuman O/A Gas Stn	2013-08-14	Discovery of a petroleum product - gasoline - found off site odours at self-serve FS gasoline station	Land	INC (60, 19)	PHCs
	Esso Station at Lakeshore Boulevard and Deta Service Station	Esso Petroleum Canada	1991-09-06	Underground tank leak of gasoline from corrosion at an Esso service centre. Quantity not listed.	Land	SPL (66, 1)	PHCs
SPL-7	43rd Street and Lakeshore Boulevard, Etobicoke	City of Toronto - Marie Curtis Park	2007-05-05	Raw unchlorinated discharge or bypass of sewage to a watercourse and Marie Curtis Park.	Land and Surface Water	SPL (130, 2)	N/A
SPL-8	885 Rangeview Road	Private Owner/Transport Truck	2002-01-03	Unknown quantity of operating fluids released to ground from private vehicle fire.	Land	SPL (123, 1 & 2)	PHCs
SPL-9	925 Lakefront Promenade	Lakefront Manufacturing	1993-08-19	135 L oil leaking from Binto Rd and catch basin.	Land	SPL (98, 1)	PHCs
SPL-10	983 Rangeview Road	City Marine	2018-07-15	350 L waste oil leak from hose.	Land	SPL (95, 5)	PHCs
SPL-11	Lakeshore & Deta Road (North side of Lakeshore Road East)	Construction Trench	2013-08-14	Historical contamination from gas station.	Land	SPL (66, 2)	PHCs

Notes:

ERIS - Environmental Risk Information Services  
 INC - fuel oil spills and leaks  
 PCOC - potential contaminant of concern

SPL - Ontario Spills  
 PHC - petroleum hydrocarbon  
 VOC - volatile organic compound

**TABLE 11 Unplottable Environmental Risk Information Service Database Records**

ERIS Record Details	Risk Rating	ERIS Address/Occupants	Location
Unplottable FST record: active 2,273 L steel single wall UST installed in 1986.	N/A	Unplottable Record; "C P Rail Tom Clark", Mile 22.3 Galt Subdv Streetsville Mississauga ON CA	Cannot be located based on the ERIS record.
Unplottable RST record for "Fuel Oil" tank. No other information available.	N/A	Esso Home Heat Toronto	Cannot be located based on the ERIS record.
Unplottable RST record for "Petro-Canada Toronto" tank. No other information available.	N/A	Petro-Canada Toronto	Cannot be located based on the ERIS record.
Unplottable WDS record for "Petro-Canada Lubricants Inc. /"Clarkson Refinery": ECA (Environmental Compliance Certificate) for "ECA-WASTE DISPOSAL SITES," approval number "A220111," issued date "2015-11-10."	N/A	Unplottable Record for "Petro-Canada Lubricants Inc. /"Clarkson Refinery"	A quick internet search indicated Petro-Canada Lubricants Inc. is located outside of the study area along Lakeshore further to the west.

Notes:

- ERIS - Environmental Risk Information Services
- FST - fuel storage tank
- N/A - not applicable
- RST - retail fuel storage tanks
- UST - underground storage tank
- WDS - waste disposal sites - MOE CA Inventory

APPENDIX A  
List of the Ontario Ministry of the  
Environment, Conservation and Parks'  
Potential Contaminating Activities

**TABLE A1 List of Ontario Ministry of the Environment, Conservation and Parks’ Potentially Contaminating Activities**

PCA Number	Potentially Contaminating Activity (PCA)
1.	Acid and Alkali Manufacturing, Processing and Bulk Storage
2.	Adhesives and Resins Manufacturing, Processing and Bulk Storage
3.	Airstrips and Hangars Operation
4.	Antifreeze and De-icing Manufacturing and Bulk Storage
5.	Asphalt and Bitumen Manufacturing
6.	Battery Manufacturing, Recycling and Bulk Storage
7.	Boat Manufacturing
8.	Chemical Manufacturing, Processing and Bulk Storage
9.	Coal Gasification
10.	Commercial Autobody Shops
11.	Commercial Trucking and Container Terminals
12.	Concrete, Cement and Lime Manufacturing
13.	Cosmetics Manufacturing, Processing and Bulk Storage
14.	Crude Oil Refining, Processing and Bulk Storage
15.	Discharge of Brine related to oil and gas production
16.	Drum and Barrel and Tank Reconditioning and Recycling
17.	Dye Manufacturing, Processing and Bulk Storage
18.	Electricity Generation, Transformation and Power Stations
19.	Electronic and Computer Equipment Manufacturing
20.	Explosives and Ammunition Manufacturing, Production and Bulk Storage
21.	Explosives and Firing Range
22.	Fertilizer Manufacturing, Processing and Bulk Storage
23.	Fire Retardant Manufacturing, Processing and Bulk Storage
24.	Fire Training
25.	Flocculants Manufacturing, Processing and Bulk Storage
26.	Foam and Expanded Foam Manufacturing and Processing
27.	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles
28.	Gasoline and Associated Products Storage in Fixed Tanks
29.	Glass Manufacturing
30.	Importation of Fill Material of Unknown Quality
31.	Ink Manufacturing, Processing and Bulk Storage
32.	Iron and Steel Manufacturing and Processing
33.	Metal Treatment, Coating, Plating and Finishing
34.	Metal Fabrication
35.	Mining, Smelting and Refining; Ore Processing; Tailings Storage
36.	Oil Production
37.	Operation of Dry-Cleaning Equipment (where chemicals are used)
38.	Ordnance Use
39.	Paints Manufacturing, Processing and Bulk Storage
40.	Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications

PCA Number	Potentially Contaminating Activity (PCA)
41.	Petroleum-derived Gas Refining, Manufacturing, Processing and Bulk Storage
42.	Pharmaceutical Manufacturing and Processing
43.	Plastics (including Fibreglass) Manufacturing and Processing
44.	Port Activities, including Operation and Maintenance of Wharves and Docks
45.	Pulp, Paper and Paperboard Manufacturing and Processing
46.	Rail Yards, Tracks and Spurs
47.	Rubber Manufacturing and Processing
48.	Salt Manufacturing, Processing and Bulk Storage
49.	Salvage Yard, including automobile wrecking
50.	Soap and Detergent Manufacturing, Processing and Bulk Storage
51.	Solvent Manufacturing, Processing and Bulk Storage
52.	Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
53.	Tannery
54.	Textile Manufacturing and Processing
55.	Transformer Manufacturing, Processing and Use
56.	Treatment of Sewage equal to or greater than 10,000 litres per day
57.	Vehicles and Associated Parts Manufacturing
58.	Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners
59.	Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

<b>Client Name:</b> <b>Client Address:</b> <b>Client City:</b> <b>Client Postal Code:</b> <b>Project Description:</b>		Corporation of the Regional Municipality of Peel 10 Peel Centre Drive Brampton L6T 4B9 This project deals with the installation of an Odour Capture and Control System for the west end of the Lakeview Water Pollution Control Plant. Odorous air will be captured from 30 specific odour emission points at the west side of the plant, including sources on the hybrid anaerobic digestors, related biogas handling processes, the waste activated sludge building, storage tanks, grit wash room #1 and screen room #1. Provision is included for control of odours from grit channels at Plants #1 and 2. The control system is Best Available Control Technology (BACT) designed for greater than 99% destruction of odours. The remaining odour sources at this plant will be the subject of subsequent applications for installations.

#### Substance Release Report

**Category Type ID:** 1  
**Category Type Desc:** Stack / Point  
**Category Type Desc (fr):** Rejets de cheminée ou ponctuels  
**Grouping:** Total Air  
**Trans Code:** ASta  
**Chem:** Cadmium (and its compounds)  
**Chem (fr):** Cadmium (et ses composés)  
**Quantity:** 1.295  
**Unit:** kg  
**Basis of Estimate Cd:** E1  
**Basis of Estimate Desc:** E1- Site Specific Emission Factors - In use from 2003 and onward

**Category Type ID:** 13  
**Category Type Desc:** All Media  
**Category Type Desc (fr):** Rejets à tous les médias  
**Grouping:** Total All Media<1t  
**Trans Code:**  
**Chem:** Dioxins and furans - total  
**Chem (fr):** Dioxines et furanes - totales  
**Quantity:** .002  
**Unit:** g\_teq\_et  
**Basis of Estimate Cd:**  
**Basis of Estimate Desc:**

**Category Type ID:** 1  
**Category Type Desc:** Stack / Point  
**Category Type Desc (fr):** Rejets de cheminée ou ponctuels  
**Grouping:** Total Air  
**Trans Code:** ASta  
**Chem:** Carbon monoxide  
**Chem (fr):** Monoxyde de carbone  
**Quantity:** 607.3  
**Unit:** tonnes  
**Basis of Estimate Cd:** M1  
**Basis of Estimate Desc:** M1- Continuous Emission Monitoring - In use from 2003 and onward

Highways LB2 30M12			
<b>Historical Summary:</b>					
<p>Filling for Lake Shore Road over Etobicoke Creek. In April 1935 the Ontario Dept. Highways announced plans and began to secure tenders for the alteration of part of Lake Shore Road at Etobicoke Creek., Long Branch. They proposed to add fill, to straighten the course of the road, eliminate extra curves and replace the bridge. Piles of road material, tar barrels were to be removed, and the radial bridge just to the north of the site was to be dismantled. The project had a scheduled completion of August 1935. The end use would include parkland. A map exists, showing that the area to be filled lay immediately to the south of the then position of the highway, under the present highway area (Toronto Star April 5 1935 p. 34; April 6 1935 p. 17). When the site was cleared, workers burned grass and rubbish prior to filling, creating dense smoke which caused at least one highway accident (Toronto Star April 10 1935 p. 30). In early April 1936 the bridge was finished and so was most of the filling, but the engineers were waiting for the fill to settle before opening the bridge for traffic. Some 2' of fill was still to be applied (Toronto Star April 1 1936 p. 32).</p>

<b>Diameter (m):</b>					
<b>Historical Summary:</b>	<p>41st St Fill At the end of March 1950 the Long Branch Board of Health investigated complaints that raw garbage was being dumped illegally west of 41st St, on a property sold by the Department of Highways to a private individual. There were counterclaims that the fill material was not composed of raw garbage, which suggests that some kind of filling with waste materials was taking place ([Etobicoke Lakeshore] Advertiser 30 March 1950 p. 12).</p>
