Phase One Environmental Site Assessment

1720 Sherwood Forrest Circle Mississauga, Ontario

Revision 1

Prepared For:

Argo Development Corporation 4900 Palladium Way, Unit 105 Burlington, Ontario L7M 0W7

DS Project No: 23-162-100 **Date**: October 19, 2023

Executive Summary

i

DS Consultants Ltd. (DS) was retained by Argo Development Corporation to complete a Phase One ESA of the Property located at 1720 Sherwood Forrest Circle, Mississauga, Ontario, herein referred to as the "Phase One Property" or the "Site". It is DS's understanding that this Phase One ESA has been requested for pre-purchase due diligence purposes and in support of the proposed redevelopment of the Phase One Property.

The Phase One Property is an irregular shaped 4.7 hectares (11.5 acres) parcel of land situated within a residential neighbourhood in the City of Mississauga, Ontario. The Phase One Property is located at in the southwest corner of the intersection of Mississauga Road and Dundas Street West.

It is understood that the intended future residential property use is not considered to be a more sensitive property use than the historic senior resident home and convent, as defined under O.Reg. 153/04 (as amended); therefore, the filing of a Record of Site Condition (RSC) with the Ontario Ministry of Environment, Conservation and Parks (MECP) is not mandated under O.Reg. 153/04.

The Phase One ESA was completed to satisfy the intent of the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04 (as amended). The objective of the Phase One ESA is to identify the presence or absence of potentially contaminating activities (PCAs) on the Phase One Property and/or within the Phase One Study Area, and to determine if the PCAs identified within the Phase One Study Area are likely to result in an Area of Potential Environmental Concern (APEC) on the Phase One Property. The information obtained by the Phase One ESA will be used to assess whether further investigation in the form of a Phase Two ESA is merited. It should be noted that this Phase One ESA does not include any sampling or testing and is based solely on a review of readily available data, and observations made during the Phase One Site Reconnaissance.

The scope of work completed as part of the Phase One ESA included a review of reasonably ascertainable records and reports regarding historical and current use, regulatory information, occupancy, and activities for the Phase One Property, interviews with available individuals with knowledge of the current and former site activities, an inspection of the Phase One Property and activities on the adjacent properties and an evaluation of the information obtained with respect to potential concerns associated with the activities identified. The information obtained by the Phase One ESA will be used to assess whether further investigation in the form of a Phase Two ESA is merited. It should be noted that this Phase One ESA does not include any sampling testing and is based solely on a review of readily available data, and observations made during the Phase One Site Reconnaissance.

Based on the records reviewed as part of the Phase One ESA, DS presents the following findings:

- ◆ The Phase One Property is inferred to have been used for agricultural and residential purposes circa 1877. By 1955 the Site was primarily used for residential purposes, when the senior retirement home and convent that operated on the Site was built. The Site continue to operate the convent and senior retirement home until circa 2022.
- The existing building on Site is a multi-level structure with three (3) wings (Site Building A), spanning between 1 to 3 storeys and contains one level of basement. A detached domestic garage is located approximately 25 metres north of Site Building A. The Carmelite Sisters of Canada have owned the Phase One Property since 1952. The Site has been vacant since 2022.
- The topography of the Phase One Property is generally flat with a surface elevation of 116 metres above sea level (masl). Based on the Geotechnical Investigation completed by Terraprobe Inc. in 2017, the depth to groundwater ranged from 5.5 to 14.8 metres below ground surface (mbgs). The shallow groundwater flow direction within the Phase One Study Area is easterly towards Credit River.
- ◆ Based on the Ministry of Natural Resources and Forestry (MNRF) the eastern portion of the Phase One Property is within an ANSI (life science) called "Credit River at Erindale", and the Phase One Property could provide a viable habitat to threatened species (the Eastern Meadowlark, the Barn Swallow and the Bank Swallow) and endangered species (Henslow's Sparrow). The Phase One Property is considered under O.Reg 153/04 (as amended) as environmentally sensitive..
- ♠ Based on a review of the OGS Earth database, the Phase One Property is within a sand plains physiographic region. The surficial geology within the Phase One Study area is described as "till, clay to silt-textured till (derived from glaciolacustrine deposits of shale" towards the north of the Site, and "fine-textures glaciolacustrine deposits, silt and clay, minor sand and gravel, interbedded silt and clay and gritty, pebbly flow till and rainout deposits" towards the south of the Site. The bedrock is described as "Shale, limestone, dolostone, siltstone of the Georgian Bay Formation; Blue Mountain Formation; Billings Formation; Collingwood Member; Eastview Member". Based on a review of Ministry of Mines, Forestry and Natural resources bedrock topography database, the bedrock in the Phase One Study Area is anticipated to be encountered at an approximate depth of 18 mbgs.
- Potentially contaminating activities were identified on the Phase One Property as follows:
 - Fill material may have been used for grading purposes in the vicinity of the Site Building A. The Terraprobe Inc. 2017 Geotechnical Investigation reported that fill material was encountered below the topsoil/pavement layer and ranged in depth between 1.5 and 2.5 mbgs (PCA-1).
 - One fuel oil UST was formerly present on Site. The UST had a 22,700 L (5,000 gallons) capacity. The UST was removed off-Site in 1995. No details of soil or groundwater sampling being completed upon removal of the UST were available (**PCA-2**). Fill

material may have been used to backfill the void at the location of the former fuel oil UST (**PCA-11**).

- Based on the 1877 County Atlas of Peel, an orchard was observed at the western portion of the Site (**PCA-3**).
- Seasonal application of de-icing salts for vehicle and pedestrian safety is anticipated on the laneway, sidewalks, driveway, and parking areas present on the Phase One Property (PCA-4).
- Based on the 1975 aerial photographs two former structures present on Site (Former Site Building C and D) were demolished. Fill material of unknown quality may have been imported to the site to backfield the demolished structures (**PCA-9**, **PCA-10**).
- Based on the 1954, 1966 and 1975 aerial photographs, portion of the orchard located on the west adjacent properties was within the western portion of the Site (**PCA-12**).

Table E-1: Summary of APECs Identified on Phase One Property

142102	Location of APEC Locati					
APEC	on Phase One Property	PCA	Location of PCA	COPCs	Media Potentially Impacted	
APEC-1	Central and Southern Portions of the Site	#30: Importation of Fill Material of Unknown Quality	On Site PCA-1	PHCs, BTEX, Metals, As, Sb, Se, B-HWS, CN-, electrical conductivity, Cr (VI), Hg, low or high pH, SAR, PAHs	Soil	
APEC-2	Central portion of the Site, 10 m east of Site Building A	#28: Gasoline and associated products storage in fixed tanks	On-Site PCA-2	PHCs, BTEX, PAHs	Soil and groundwater	
APEC-3	Northern portion of Site	#40: Pesticides (including herbicides, fungicides and anti- fouling agents) manufacturing, processing, bulk storage and large- scale applications.	On-Site PCA-3	OCPs, Metals, As, Sb, Se, CN-	Soil	
APEC-4	Northern and	#N/S: Application of	On-Site	EC, SAR	Soil	
	central portions of Site	De-Icing Agents ¹	PCA-4	Na, Cl-	Groundwater	
APEC-5	Central portion of the Site, approx. 25 m south of Site Building A	#30: Importation of Fill Material of Unknown Quality	On Site PCA-9	PHCs, BTEX, Metals, As, Sb, Se, B-HWS, CN-, electrical	Soil	
APEC-6	Central Portion of the Site, approx. 50 m south of Site Building A	#30: Importation of Fill Material of Unknown Quality	On Site PCA-10	conductivity, Cr (VI), Hg, low or high pH, SAR, PAHs	Soil	

APEC	Location of APEC on Phase One Property	PCA	Location of PCA	COPCs	Media Potentially Impacted
APEC-7	Central portion of the Site, 10 m east of Site Building A	#30: Importation of Fill Material of Unknown Quality	On Site PCA-11		Soil
APEC-8	Western Portion of the Site	#40: Pesticides (including herbicides, fungicides and anti- fouling agents) manufacturing, processing, bulk storage and large- scale applications.	On-Site PCA-12	OCPs, Metals, As, Sb, Se, CN-	Soil

N/S - not specified in Table 2, Schedule D, of O.Reg. 153/04

1 - The area is subject to the application of de-icing salts for road safety purposes. Per Section 49.1 (1) of O.Reg. 153/04 (as amended) "If an applicable site condition standard is exceeded at a property solely because of one of the following reasons, the applicable site condition standard is deemed not to be exceeded for the purpose of Part XV.1 of the Act": "...that a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both". Any potential impacts associated with sodium and/or chloride in groundwater will be deemed not to exceed the MECP Site Conditions Standards for the area identified in APEC-4.

The PCAs identified in Table E-1 above are considered by the Qualified Person (QP) to be contributing to Areas of Potential Environmental Concern on the Phase One Property. The Potential Contaminants of Concern (PCOCs) identified by the QP include PHCs, VOCs, BTEX, Metals, As, Sb, Se, B-HWS, CN-, electrical conductivity, Cr (VI), Hg, low or high pH, SAR, PAHs and OCPs.

Based on the findings of this Phase One ESA, it is concluded that a Phase Two ESA is required to investigate the aforementioned APECs and to assess the environmental soil and groundwater conditions on the Phase One Property. If a Record of Site Condition is required, it cannot be filed based on the findings of the Phase One ESA.

This Executive Summary is intended to be read in conjunction with the accompanying report and is subject to the same limitations provided under Section 7.3.

1.0 Introduction

DS Consultants Ltd. (DS) was retained by Argo Development Corporation to complete a Phase One ESA of the Property located at 1720 Sherwood Forrest Circle, Mississauga, Ontario, herein referred to as the "Phase One Property" or the "Site". It is DS's understanding that this Phase One ESA has been requested for pre-purchase due diligence purposes and in support of the proposed redevelopment of the Property.

It is understood that the intended future residential property use is not considered to be a more sensitive property use than the historic senior resident home and convent, as defined under O.Reg. 153/04 (as amended); therefore, the filing of a Record of Site Condition (RSC) with the Ontario Ministry of Environment, Conservation and Parks (MECP) is not mandated under O.Reg. 153/04.

The Phase One ESA was completed to satisfy the intent of the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04 (as amended). The objective of the Phase One ESA is to identify the presence or absence of potentially contaminating activities (PCAs) on the Phase One Property and/or within the Phase One Study Area, and to determine if the PCAs identified within the Phase One Study Area are likely to result in an Area of Potential Environmental Concern (APEC) on the Phase One Property. The information obtained by the Phase One ESA will be used to assess whether further investigation in the form of a Phase Two ESA is merited. It should be noted that this Phase One ESA does not include any sampling or testing and is based solely on a review of readily available data, and observations made during the Phase One Site Reconnaissance.

1.1 Phase One Property Information

The information for the Phase One Property is provided in the following Table.

Table 1-1: Phase One Property Information

Criteria	Information	Source
Legal Description	PT LT 3, RANGE 1 SDS TT , AS IN TT168777 & TT69053 EXCEPT TT141752 ; MISSISSAUGA	Parcel Register
Property Identification Number (PIN)	13440-0314	Parcel Register
Municipal Address	1720 Sherwood Forrest Circle, Mississauga, Ontario	Client
Property Owner	Carmelite Sisters of Canada	Parcel Register
Phase One Property Contact Information	Tony Vella Argo Development Corporation Mobile: 905-407-5570 Email: tony@argoland.com	Client

Criteria	Information	Source
Current Site Occupants	Unoccupied since 2022	Phase One Site Reconnaissance and questionnaire
Site Area	4.7 hectare (11.6 acres)	Land Registry Office
Centroid UTM Coordinates	Northing: 4821764.84 m N Easting: 608516.87 m E Zone: 17T	Google Earth Pro

1.2 Site Description

The Phase One Property is a 4.7 hectares (11.5 acres) parcel of land situated within a mixed residential and parkland neighbourhood in the City of Mississauga, Ontario. The Phase One Property is located at in the southeast corner of the intersection of Mississauga Road and Dundas Street West. A Site Location Plan is provided in Figure 1.

For the purposes of this report, Mississauga Road is assumed to be aligned in a north-south orientation, and Dundas Street West in an east-west orientation. A Plan of Survey for the Phase One Property dated dated May 31st, 2023, and prepared by R-PE Surveying Ltd., an Ontario Land Surveyor, has been provided under Appendix A.

The Phase One Property is currently occupied with one structure, a vacant Carmel Heights Seniors Residence, with a convent attached (Site Building A). Site Building A is located towards the western and central portions of the Site. The building is comprised of three (3) wings which range between 1 to 3 storeys and includes one (1) level of basement. The basement extends to the majority of the Site but the eastern most wing of Site Building A.

A detached domestic garage is located approximately 25 metres north of Site Building A. By the time of this Phase One investigation was completed the garage was vacant, but it seems it was used to park automobiles. Site Building A was built in 1955, with additions completed in 1963 and 1976. There is a driveway and parking area located west of the Site Building A. At the time of the investigation the Phase One Property and Site Building A were vacant. A Site Plan depicting the orientation of the building is provided in Figure 2

2.0 Scope of Investigation

The Phase One ESA was completed to satisfy the intent of the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04, as amended (Phase One ESA requirements). This included:

- A review of reasonably ascertainable records and reports regarding historical and current use, regulatory information, occupancy, and activities for the Phase One Property, including:
 - Physical setting information such as aerial photographs, topographic mapping, available historical maps and drawings;

- Company records (e.g., site plans, building plans, permit records, production and maintenance records, asbestos surveys, site utility drawings, emergency response and contingency plans, spill reporting plans and records, inventories of chemicals and their usage (e.g. WHMIS), environmental monitoring data, waste management records, inventory of underground and aboveground tanks, environmental audit reports) provided to DS;
- Geological and hydrogeological information in published government maps and/or reports;
- A review of information on file with Ecolog ERIS, a commercial database that provides information from numerous private, provincial, and federal environmental databases/registries;
- Review of fire insurance plans, municipal directory documentation and available environmental reports that are pertinent to the Phase One Property;
- Regulatory Information, including such as Permits or Certificates of Approval (pertaining to activities that may impact the condition of the property, orders, control orders, or complaints related to environmental compliance that may impact the condition of the property, and violations of environmental statutes, regulations, bylaws, and permits that may impact the condition of the property;
- Environmental source information including published and online records from Ministry of Environment, Conservation and Parks (MECP), Environment Canada, Technical Standards and Safety Authority (TSSA), and the City of Toronto; and
- The Ontario Ministry of Natural Resources (MNR) Natural Heritage Information Centre database and the Conservation Authority website for information specific to natural areas, such as locations of environmentally sensitive areas or species.
- Interviews with available individuals having knowledge of current and/or past site activities;
- An inspection of the Phase One Property, and the activities on the adjacent properties, including and assessment of the following:
 - The site operations, processes, and waste management currently carried out on the Phase One Property.
 - The neighbouring land uses (i.e. identification of environmentally sensitive neighbours, as well as an assessment of potential off-site sources of contamination);
 - The source of potable water for the Phase One Property and properties within the Phase One Study Area;
 - The potential presence of existing or former above-ground or underground fuel storage tanks (ASTs or USTs);
 - Possible cut and fill operations that may resulted in the importation of fill material of unknown quality;
 - The presence/absence of floor cracks, hydraulic hoists, elevators, sumps and drains;

- Areas suspected to contain evidence of surficial and sub-surface impacts (e.g. areas of staining);
- The potential presence of various Designated Substances and building materials including:
 - o Friable and non-friable asbestos
 - Urea formaldehyde foam insulation (UFFI)
 - o Chlorofluorocarbons (CFCs) in air conditioning and refrigeration equipment
 - o PCB-containing materials and electrical equipment
 - o Lead-based paint
 - o Mould
- The presence/absence of wells, pits and lagoons, drainage sumps and floor drains, sewage and wastewater disposal pipelines; and
- General site conditions, including topography and drainage, standing water, right-ofways, presence of underground utilities, evidence of stained or odorous soils, and stressed vegetation.
- Evaluation of the information and documentation of the results in the form of a Phase One ESA Report.

The objectives of the Phase One ESA are:

- 1. To assess the environmental condition of the Phase One Property to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in, or under the Phase One Property;
- 2. To identify potentially contaminating activities within the Study Area (i.e., areas within 250 m of the Property), and to assess if Areas of Potential Environmental Concern (APECs) exist on the Phase One Property;
- 3. To identify the Potential Contaminants of Concern associated with the PCAs identified; and
- 4. To provide a basis for subsequent investigation, if required, based on the findings of the Phase One ESA.

3.0 Records Review

3.1 General

3.1.1 Phase One Study Area Determination

Based on a review of the available historical records and the observations made during the Phase One Site Reconnaissance, no heavy industrial properties or other relevant potentially contaminating activities were observed which were considered to merit expanding the Phase One Study Area. As such the Phase One Study Area was defined by a 250 metres radius around the Phase One Property boundary, in accordance with O.Reg. 153/04 (as amended).

The properties within 250 m of the Phase One Property generally consist of residential and parkland, land uses. An assessment of the historical and current use of all properties within the Phase One Study Area was conducted to assess for the presence/absence of PCAs. A summary of the PCAs identified within the Phase One Study Area is provided under Section 6.2. A plan depicting the Phase One Study Area limits as well as the current land uses is presented in Figure 3.

3.1.2 First Developed Use Determination

The first developed use of the Phase One Property is considered under O.Reg. 153/04 (as amended) to be either the first use of the Phase One Property in or after 1875 that resulted in the development of a building or structure on the property, or the first potentially contaminating use or activity on the Phase One Property.

The determination of the first developed use of the Phase One Property was based on a review of available aerial photographs, historical maps, fire insurance plans, city directories, and interviews. Based on the information obtained, the first developed use of the Phase One Property was for residential purposes (rural homestead) and it occurred prior to 1944.

3.1.3 Fire Insurance Plans

Fire insurance plans were prepared between 1875 and 1923 and revised in some areas until the 1970s. A search of Fire Insurance Plans (FIPs) was undertaken by retaining Opta Information Intelligence (Opta). The search provided a copy of a "Multitask Narrative" Report from 1995 (1995 Multitask Narrative Report).. No FIPs were available for review for the Phase One Study Area.

The 1995 Multitask Narrative report was reviewed, and the pertinent information identified in the report indicated the following:

- The senior living facility was built in 1955 and had building additions in 1963 and 1967 and had two (2) operating elevators. During DS's site reconnaissance, the floor where the hydraulics of the elevators where located were in good condition. The concrete floor slab had no cracks and no staining.
- The senior residence and convent were heated by fuel oil. The UST was reported (but not confirmed) to be 22,700 L (5,000 gallons) in capacity (**PCA-2**).

Further discussion on the PCA(s) identified is presented under Section 6.2.

3.1.4 Chain of Title

A Chain of Title search was not provided by the Client at the time of the investigation. The Chain of Title will need to be obtained prior to the submission of a Record of Site Condition.

3.1.5 Environmental Reports

DS reviewed the following reports prepared for the Site. The reports were provided by the client to DS.

- "Geotechnical Investigation and Slopes Stability Assessment Proposed Carmel Heights Seniors Development, 1720 Sherwood Forrest Circle, Mississauga, Ontario," prepared for Mississauga Seniors Land Corporation Ltd, prepared by Terraprobe Inc, dated November 23, 2017 (2017 Terraprobe Geotechnical Investigation).
- "Phase 1 Environmental Site Assessment, 1720 Sherwood Forrest Circle, Mississauga, Ontario," prepared for Micor Development Inc, prepared by LandTek Limited, dated December 2018 (2018 LandTek Phase 1 ESA).

2017 Terraprobe Geotechnical Investigation

The geotechnical investigation was completed in July 2017 and it involved the advancement of seventeen (17) boreholes. The boreholes were advanced to depths ranging from 8.1 to 15.7 mbgs. Monitoring wells were instrumented in ten (10) of the boreholes with screen interval ranging between 5.5 to 14.2 mbgs. Fill material was encountered below the topsoil/pavement layer and ranged in depth between 1.5 and 2.5 mbgs. The native soil beneath the fill consisted of sand and gravel sand to sandy gravel with trace of silt and clay until boreholes termination. A clayey silt layer was encountered in all the boreholes at depth ranging between 4.6 to 9.7 mbgs. A pocket of silt was located in one (1) borehole from depths ranging of 6.1 to 7.6 mbgs. The groundwater levels collected on August 1, 2017 ranged from 5.5 to 14.8 mbgs.

2018 LandTek Phase 1 ESA

The Phase 1 ESA was completed in general accordance with the requirements described in CSA Standard Z768-01, as well as the document "Guideline: Professional Engineers Providing Services in Environmental Site Assessment, Remediation and Management (Association of Professional Engineers of Ontario, 1996). The summary of pertinent information is as follows:

- ◆ It was reported that according to Sister Mary Veronica, who was interviewed by LandTek, a fuel oil UST was removed off-Site in 1995. The UST was reported by Sister Mary Veronica to have been in good condition at the time of the removal. The historic UST was located centrally on the Phase One Property, west of the building on Site. No further details were available (PCA-2).
- During the Site Reconnaissance, Sister May Veronica reported that an asbestos survey was conducted on Site, however the documentation was not available for LandTek to review. The building was constructed in 1955, as such LandTek recommends a Designated Substance Survey (DSS) to be completed as the possibility building materials to contain ACMs, PCBs and LBPs is likely and observed during the Site Reconnaissance.

3.1.6 City Directories

DS retained ERIS to conduct a search on their internal available City Directories archives and databases for the Phase One Property and Phase One Study Area. ERIS retrieved the City Directories for the years 1960 to 2021 at approximate 5-year intervals.

The Phase One Property was first listed in the directories between 1990 to 2001 as multi tenant residential. In the directory of 2012 it was listed as "Carmel heights, continuing care retirement communities", and in the directories between 2017 to 2021, the Site was listed as "Carmel Heights Seniors Residencies". The adjacent properties were first listed in 1975 and generally appear to have been used for residential and commercial purposes. The following listings in the City Directories were noted by DS:

Table 3-1: Historical Occupants of Potential Environmental Concern within Phase One Study Area

Address	Location Relative to Phase One Property	Occupant	Inferred Property Use	Date Range	PCA ID No.
1620 Sherwood Forrest Circle	Approximately 90 m west of the Site	Stan Co Quality Painting	Commercial Painting	2017-2021	No PCA ¹

^{1 -} This property is a detached house and is not anticipated to have bulk storage of paint occurring on-Site. Rather it is the opinion of DS that this operation is likely a business whose home address is used, with operations occurring off-Site.

A complete summary of the City Directory listings reviewed has been included under Appendix B.

3.2 Environmental Source Information

3.2.1 Eris Report

DS contacted Environmental Risk Information Services Ltd. (ERIS), an environmental database and information service company, to request a search of government and private records for information pertaining to the Phase One Property and Phase One Study Area. ERIS searched 15 Federal databases, 37 Provincial databases and 10 private databases. A summary of the databases provide by ERIS is provided in the Table below:

Table 3-2: Summary of Environmental Databases Reviewed

Federal Government Source Databases	Private Source Databases
Contaminated Sites on Federal Land;	Anderson's Storage Tanks;
Environmental Effects Monitoring;	Anderson's Waste Disposal Sites;
Environmental Issues Inventory System;	Automobile Wrecking & Supplies;
Federal Convictions;	Canadian Mine Locations;
Fisheries & Oceans Fuel Tanks;	Canadian Pulp and Paper;
Indian & Northern Affairs Fuel Tanks;	Chemical Register;
National Analysis of Trends in Emergencies System	ERIS Historical Searches;
(NATES);	Oil and Gas Wells;
National Defense & Canadian Forces Fuel Tanks;	Retail Fuel Storage Tanks; and

National Defense & Canadian Forces Spills; National Defense & Canadian Forces Waste Disposal Sites; National Environmental Emergencies System (NEES); National PCB Inventory; National Pollutant Release Inventory; Parks Canada Fuel Storage Tanks; and Transport Canada Fuel Storage Tanks.	Scott's Manufacturing Directory.
Provincial Government Source Databases	
Abandoned Aggregate Inventory; Abandoned Mine Information System; Aggregate Inventory; Borehole; Certificates of Approval; Certificates of Property Use; Commercial Fuel Oil Tanks; Compliance and Convictions; Drill Hole Database; Environmental Activity and Sector Registry; Environmental Compliance Approval; Environmental Registry; Fuel Storage Tank; Fuel Storage Tank – Historic; Inventory of Coal Gasification Plants and Coal Tar Sites; TSSA Historic Incidents; TSSA Incidents; TSSA Pipeline Incidents; TSSA Variances for Abandonment of Underground Storage Tanks;	Inventory of PCB Storage Sites; Landfill Inventory Management Ontario; List of TSSA Expired Facilities; Mineral Occurrences; Non-Compliance Reports; Ontario Oil and Gas Wells; Ontario Regulation 347 waste Generators Summary; Ontario Regulation 347 Waste Receivers Summary; Ontario Spills; Orders; Permit to Take Water; Pesticide Register; Private and Retail Fuel Storage Tanks; Record of Site Condition; Waste Disposal Sites – MECP 1991 Historical Approval Inventory; Wastewater Discharger Registration Database; and Water Well Information System

The ERIS report indicated that there were two (2) listings for the Phase One Property, and twenty-eight (28) listings for the remaining properties within the Phase One Study Area. A copy of the ERIS report has been provided under Appendix C. A summary of the potentially contaminating activities identified in the ERIS report and other pertinent information is provided in the Table below:

Table 3-3: Summary of ERIS Report Findings on Phase One Property

Database/Date	Entry Details	PCA ID No.
ERIS Historical Searches (EHS)	One (1) listing was identified for ERIS Historical Searches on the Phase One Property. No environmental concerns were identified in the ERIS historical searches.	No PCA
Ontario Regulation 347 Waste Generator Summary (GEN)	One (1) waste generator was registered for the Phase One Property, listed for oil skimmings and sludges, in 2010. Due to the nature of the operation of a senior residence and convent, and associated waste products. It is anticipated that the amount of waste is minimal; as such, it represents no potential impact to the Phase One Property.	No PCA

Table 3-4: Summary of ERIS Report Findings within Phase One Study Area

Database/Date	Entry Details	PCA ID No.
Environmental Compliance Approval (ECA)	One (1) ECA was registered for The Corporation of the City of Mississauga, for municipal and private sewage works on Mississauga Road from Collegeway to Sawmill Valley Drive, approximately located 370 m north of the Site, 2005.	No PCA
ERIS Historical Searches (EHS)	Fourteen (14) listings were identified for ERIS Historical Searches within the vicinity of the Phase One Study Area. No environmental concerns were identified in the ERIS historical searches.	No PCA
Fuel Oil Spills and Leaks (INC)	A natural gas leak was reported at 26-3061 Sir John's Homestead, located approximately 100 m northwest of the Site, in 2012.	No PCA
Scott's Manufacturing Director (SCT)	Just For You Inc. located at 1596 Sherwood Forrest Circle, approximately 130 m west of the Site, was registered for men's and boy's cut and sew shirt manufacturing, textile bah and canvas mills, women's and girl's cut and sew blouse and shirt manufacturing, cut and sew clothing contracting, all other miscellaneous manufacturing, plastic bag and pouch manufacturing, clothing accessories and other clothing manufacturing, in 1990. 1596 Sherwood Forrest is a residential dwelling, the listing may be related to the mailing address of the listed company. It is anticipated that the waste produce is minimal; as such, it represents no potential adverse effects to the Phase One	No PCA
	F.W. Chambers located at 1807 Will Scarlett Drive, approximately 185 m southwest of the Site, was registered for measuring, medical and controlling devices manufacturing, industrial machinery, equipment and supplied wholesaler-distributors, in 1927. It is noted that the earliest available historical aerial photograph of 1944, do not show evidence of such operations. The address is vacant. Additionally, the listed address is currently a residential	No PCA
Ontario Spills (SPL)	dwelling. It is the opinion of DS that this operation is likely a business with operations occurring off-Site. Due to a transport accident, 60 L of transformer oil was spilled on a greenspace area near 2901 Mississauga Road,	PCA-5
	approximately 10 m east of the Site, in 2009. An unknown source spilled into Credit River at Dundas Street West and Mississauga Road, approximately 125 m north of the Site, in 1996.	PCA-6
	An unknown substance from an unknown source was spilled into the intersection of Sawmill Creek at Dundas Street West and Mississauga Road into the creek in 1999.	PCA-7
	A watermain leaked into Credit River located at Dundas Road and Mississauga Road, approximately 125 m north of the Site, in 2015.	No PCA

Database/Date	Entry Details	Entry Details		
	An unknown quantity of coolant was spilled to catch basin from a broken-down transit bus, at Dundas Street West and Mississauga Road, approximately 10 m north of the Site, in 2017.		No PCA	
	One water main leak was reported in 2015 in the intersection of Dundas Steet West and Mississauga Road.		No PCA	
wwis	Five (5) well were identified within the Phase One Study Area: 1 monitoring well 1 abandoned 1 unlisted use		No PCA	

3.2.2 Ministry of the Environment- Freedom of Information

A request was submitted to the MECP Freedom of Information and Protection of Privacy Office (Appendix D) to determine if there were any environmental incidents or violations associated with the Phase One Property; whether any Control Orders have been issued; whether there have been any other environmental concerns associated with the property such as complaints, inspections, etc.; whether any environmental investigations have been carried out regarding the subject property; and, to determine if the Ministry's Spills Action Centre's (SAC's) files contain any reported spills that had occurred in the site vicinity. Note that the SAC's database dates back only to 1988 and many of the occurrences on file have only been reported voluntarily. In addition, the MECP was requested to search their files (all years) regarding the following parameters: air emissions, water, sewage, wastewater and pesticides.

Files pertinent to this investigation would include, though are not limited to: regulatory permits, records; material safety data sheets; underground utility drawings; inventories of chemicals, chemical usage and chemical storage areas; inventory of aboveground storage tanks and underground storage tanks; monitoring data, including that done at the request of the MECP; historical and current waste management, receiver and generator records; process, production and maintenance documents related to areas of potential environmental concern; spills/discharge records; emergency and contingency plans; environmental audit reports; site plan of facility showing areas of production and manufacturing.

A response has been received from the MECP. The relevant information pertaining to the Phase One Property and Phase One Study Area can be found in the Table below:

Table 3-5: Summary of MECP FOI Report Findings

Address	Date	Entry Details	PCA ID No.
1720 Sherwood Forrest Circle	March 6, 2015	One Site inspection was completed by Ministry of the Environment (MOE) – Sector Compliance Branch on February 20, 2015 with the purpose of ensuring the compliance of the Site with O.Reg. 103/94, regulation that requires the source separation for the purpose of reuse or recycling of the following materials: aluminum food or beverage cans, glass bottles and jars for food or beverage, newsprint, polyethylene terephthalate bottles for food or beverage, steel food or beverage cans, as well as the categories of waste collected or accepted by the blue box waste management system of the municipality where the building is located. The Site inspection concluded that the Site was found to be in	No PCA
		compliance with 0.Reg 103/94 and no further action was required.	

3.2.3 Technical Standards and Safety Authority

The Technical Standards and Safety Authority (TSSA) maintain records related to storage tanks for petroleum related products. The TSSA was contacted to review records related to the Property and Study Area. The following addresses were included in the inquiry:

- 1720 Sherwood Forrest Circle
- 1745 Dundas Street West
- 1550 The Collegeway
- 2901 Mississauga Road

- 1596 Sherwood Forrest Circle
- 26-3061 Sir John's Homestead
- 1900 Dundas Street West
- 1807 Will Scarlett Drive

According to the response received on May 29, 2023, from Kimberly Gage of TSSA, no records were found for the Phase One Property or within the Phase One Study Area. the following records were identified on the Phase One Property and properties located in the Study Area:

A copy of the correspondence with the TSSA has been appended under Appendix D.

3.2.4 Areas of Natural and Scientific Interest (ANSI)

The Natural Heritage Areas database published by the Ministry of Natural Resources (MNR) was reviewed in order to identify the presence/absence of areas of natural significance including provincial parks, conservation reserves, areas of natural and scientific interest, wetlands, environmentally significant areas, habitats of threatened or endangered species, and wilderness areas.

A review of these databases indicated that the Phase One Property is within a Regional Life Science ANSI called "Credit River at Erindale".

The database also indicated the American Eel and Henslow's Sparrow as endangered species, and the Lake Sturgeon, Eastern Meadowlark, Bank Swallow and Bobolink as threatened within 1 km of the Site.

The American Eel is a type of fish with snake-like body and fins that extend along its back, around the tail and along its underside, it found in both salt and fresh water.

The Henslow's Sparrow is a bird that leaves in open fields with tall grasses, lowering plants, and a few scattered shrubs.

The Lake Sturgeon is a large freshwater fish, weighing up to 180 kg and reaching over 2 m long. It lives almost exclusively in freshwater lakes and rivers with soft bottoms of mud, sand or gravel. They are usually found at depths of five to 20 metres. However, they will spawn in deeper water where habitat is available. They also are known to spawn on open shoals in large rivers with strong currents.

The Eastern Meadowlark is a medium-sized, migratory songbird that breeds primarily in moderately tall grasslands, but is also found in orchards, weedy borders, airports, shrubby overgrown fields, or other open areas; small trees, shrubs or fence posts are used as elevated song perches.

The Bank Swallow is small songbird that nest in burrows in natural and human-made settings where there are vertical faces in silt and sand deposits. Many nests are on banks of rivers and lakes, but they are also found in active sand and gravel pits or former ones where the banks remain suitable.

The Bobolink is medium sized songbird found in grasslands and hayfields that often nests on the ground in dense grasses.

The northern and western portion of the Site is covered by forest and brush areas. No hayfields or grasslands, and no standing bodies of water were present on Site, and the closest body of water is Credit River, located 100 m north of the Site. As a result, the Phase One Property could provide a viable habitat for the Henslow's Sparrow, the Eastern Meadowlark, the Barn Swallow and the Bank Swallow. If required, an environmental specialist could be retained to undertake a site-specific ecological assessment, however at this time further assessment is not warranted.

The City of Mississauga Official Plans were reviewed and according to Map Schedule 3, the Site is within 30 m of a "Significant Natural Area and Natural Green Space" located just north of the Phase One Property.

As defined in Section 1 (1) of O.Reg. 153/04, an area of natural significance is:

- "An area of natural and scientific interest (life science or earth science) identified by the Ministry of Natural Resources as having provincial significance".
- "An area identified by the Ministry of Natural Resources as significant habitat of a threatened or endangered species"; or
- "An area which is habitat of a species that is classified under section 7 of the Endangered Species Act, 2007 as a threatened or endangered species".

Due to the presence on an ANSI (life science) within the Phase One Property, and that the Site could provide a viable habitat to threatened and endangered species. The Phase One Property is considered under O.Reg 153/04 (as amended) as environmentally sensitive.

3.2.5 Credit Valley Conservation (CVC)

According to the CVC online mapping system, no body of water is present on the Phase One Property. The closest body of water is Credit River is located 100 m east of the Site. The northern portion of the Site is within the Regulated area, O.Reg. 160/06: "Credit Valley Conservation Authority: Regulation of Development, Interference with Wetlands and Alterations to Shorelines and Watercourses". The Phase One Property is located in the Credit River Watershed.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs and Historical Mapping

Aerial Photographs for the years 1944, 1954, 1966, 1975, 1985 and 1992 were obtained from the City of Mississauga Online Mapping and reviewed as part of this assessment. The County Atlas of Peel was reviewed in order to provide a more historical image from the year 1877. Google Earth was used to review satellite imagery from the years 2005, 2014 and 2021. A summary of pertinent information obtained from the aerial photographs reviewed is presented in the Table below. The supporting documents have been appended under Appendix E.

Table 3-6: Summary of Aerial Photographs

Location	Observations	PCA ID No.	
1877			
Phase One Property	According to the County Atlas of Peel from 1877, the Phase One Property is owned by W. J. Devlan. The Phase One Property appeared to be part of an agricultural lot, with no buildings or structures present on the Site.	No PCA	
	An orchard appears to be located on the northern portion of the Site.	PCA-3	
North, East and West of the Site	The north, east and west neighbouring properties are undeveloped and free of structures. Credit River is located approximately 100 m east of the Site.	No PCA	
South of the Site	The same orchards observed toward the northern portion of the Site		
	1944		
Phase One Property	A building (Former Site Building B) is observed towards the centre of the Phase One Property, and a Second structure (Former Site Building C), possibly a barn, is observed south of Former Site Building B. A laneway is located north of the building. The southern portion of the Site appears to be used for agricultural purposes. A forest cover is located on the eastern portion of the Site.	No PCA	
	An orchard is still observed on the northern portion of the Site.	PCA-3	
North, South, East, West of the Site	No significant changes.	No PCA	
1954			
Phase One Property	The orchard observed in the 1877 County Atlas and 1944 aerial photograph is no longer visible on the northern portion of the Site.	No PCA	

Location	Observations	PCA ID No.	
	A new orchard located on the west adjacent properties seems to be within a small area on the eastern portion of the Site.	PCA-12	
West of the Site	An orchard appears to be operating in the east adjacent property.	PCA-13	
North, South and East of the Site	No significant changes.	No PCA	
	1966		
Phase One Property	The Phase One has been redeveloped. Former Site Building B observed in the aerial of 1944 and 1954 has been demolished, instead, on the same area, Site Building A and square shape structure (Former Site Building D) northwest adjacent of Former Site Building C. has been built.	PCA-1	
North, South, East, West of the Site	No significant changes.	No PCA	
	1975		
Phase One Property	An addition to Site Building A was built towards the east of the footprint observed in 1966.	No PCA	
Thase one Property	Former Site Building B and C have been demolished.	PCA-9 PCA-10	
East of the Site	2901 Mississauga Road has been developed with a residential dwelling.	No PCA	
North, South and West of the Site	No significant changes.	No PCA	
	1985		
Phase One Property	Site Building A appears to have its present-day configuration. The orchard present on the eastern portion of the Site is no longer visible, instead the access road connecting Site Building A and Sherwood Forrest Circle has been constructed.	No PCA	
East of the Site	No significant changes.		
West of the Site	The orchard observed in the 1954, 1966 and 1975 aerial photographs is no longer visible. Instead, the area has been developed with residential dwellings.	No PCA	
North and South of the Site	The neighbouring south, east and west properties have been developed with residential dwellings.	No PCA	
_	1992		
Phase One Property	No significant changes.	No PCA	
North, South, East and West of the Site	No significant changes.	No PCA	
DI 0 5	2005		
Phase One Property	No significant changes.	No PCA	
North, South, East and West of the Site	No significant changes.	No PCA	
Dhago One Drawart	No significant changes	No DC A	
Phase One Property North, South, East and West of the Site	No significant changes. No significant changes.	No PCA No PCA	
2021			
Phase One Property	No significant changes.	No PCA	
North, South, East and West of the Site	No significant changes.	No PCA	

3.3.2 Topography, Hydrology, Geology

The topography of the Phase One Property is generally flat with a surface elevation of 116 metres above sea level (masl). The Site is generally flat with a surface elevation of approximately 116 masl, the eastern boundary of the of the Site slopes towards Credit River with a surface elevation range from 110 to 115 masl. Based on the Geotechnical Investigation completed by Terraprobe 2017, the depth to groundwater ranged from 5.5 to 14.8 mbgs. The shallow groundwater flow direction within the Phase One Study Area is inferred to flow easterly towards Credit River.

The Site is situated within a sand plains physiographic region. The surficial geology within the Phase One Study area is described "till, clay to silt-textured till (derived from glaciolacustrine deposits of shale" towards the north of the Site, and "fine-textures glaciolacustrine deposits, silt and clay, minor sand and gravel, interbedded silt and clay and gritty, pebbly flow till and rainout deposits" towards the south of the Site. The bedrock is described as "Shale, limestone, dolostone, siltstone of the Georgian Bay Formation; Blue Mountain Formation; Billings Formation; Collingwood Member; Eastview Member". Based on a review of Ministry of Mines, Forestry and Natural resources bedrock topography database, the bedrock in the Phase One Study Area is anticipated to be encountered at an approximate depth of 18 mbgs.

3.3.3 Fill Materials

Based on the Geotechnical Investigation completed by Terraprobe Inc. (2017), fill material was encountered below the topsoil/pavement layer and ranged in depth between 1.5 and 2.5 mbgs. The environmental quality of the fill material is unknown (**PCA-1**)

3.3.4 Water Bodies and Areas of Natural Significance

During the site visit, standing water was not observed on the Property. The nearest body of water to the Phase One Property Credit River, located 100 m east of the Site. Environmentally Significant Areas are natural areas that have been identified as significant and worthy of protection on three criteria – ecology, hydrology and geology. Municipalities has developed policies to protect natural heritage features. The Region uses Environmentally Significant Areas as a means to protect natural areas like wetlands, fish habitat, woodlands, habitat of rare species, groundwater recharge and discharge areas, and Areas of Natural and Scientific Interest.

A review of the MNRF database indicated that the Site may provide a viable habitat for the Henslow's Sparrow, the Eastern Meadowlark, and the Bank Swallow (threatened and endangered species). In addition, the northern portion of the Site in within a Life Science ANSI.

As defined in Section 1 (1) of O.Reg. 153/04, an area of natural significance is:

"An area of natural and scientific interest (life science or earth science) identified by the Ministry of Natural Resources as having provincial significance".

- "An area identified by the Ministry of Natural Resources as significant habitat of a threatened or endangered species"; or
- "An area which is habitat of a species that is classified under section 7 of the Endangered Species Act, 2007 as a threatened or endangered species".

Per Section 41 of O.Reg. 153/04 (as amended), a property is considered to be environmentally sensitive under the following circumstances:

- The Site is within an area of natural significance.
- The Site includes or is adjacent to an area of natural significance of part of such an area, or
- ♦ The Site includes land that is within 30 metres of an area of natural significance or part of such an area.

Based on the presence of an area of natural significance within the Phase One Property, the Phase One Property is considered under O.Reg. 153/04 (as amended) to be environmentally sensitive. Additional details are provided in Section 3.2.4 above.

3.3.5 Well Records

Water well records were also searched as part of the ERIS database query. No wells records were found for the Phase One Property. Five (5) records were available within the Phase One Study Area.

Additional detail regarding the well construction, lithology encountered, and well purpose is included in the ERIS report provided under Appendix C.

3.4 Site Operating Records

Not applicable - the Phase One Property is used for residential purposes. No operating records were available.

4.0 Interviews

4.1 Personnel Interviewed

The following persons with the knowledge of the Property were interviewed or provided the required information.

Table 4-1: Summary of Personnel Interviewed

Date	Name	Affiliation	Method of Interview
May 16, 2023	Sr. M. Veronica Dobson	Carmelite Sisters of Canada	Online Questionnaire

4.2 Interviewee Rationale

Carmelite Sisters of Canada is the current occupant and owner of the Site and has been responsible for Site operations since 1952. Sr. M. Veronica Dobson is considered to be the most knowledgeable

person regarding the historical site operations. The Phase One Interview was conducted by Marina Nadj, MES under the supervision of Mr. Patrick Fioravanti, B.Sc., P.Geo., QP_{ESA} .

4.3 Results of Interview

The following summarizes the information that was provided by the site representative, based on their knowledge of site activities.

- ♦ Sr. M. Veronica Dobson indicated that the Phase One Property has been owned by Carmelite Sisters of Canada, since 1952.
- According to Sr. M. Veronica Dobson, Site Building A was historically used as a senior resident home and convent.
- Sr. M. Veronica Dobson mentioned that an UST was removed (former UST present on-Site, storing fuel oil for the furnace), and explained that no leaks were found in the UST or the soil. The UST was reported to be in good condition at the time of the removal (PCA-2).
- ◆ Sr. M. Veronica Dobson was not aware of any spill on the Phase One Property but mentioned that salt is stored for use in winter to melt the ice (**PCA-4**).
- No information was available for the Property if cited for violations of any provincial or federal environmental laws or regulations.
- No information for individuals with additional knowledge of the Property was available to interview.
- No soil or ground water remediation has been completed at the Property.

DS compared the information obtained through the Phase One Interview with the information obtained from the historical records for the Site. The information provided by the interviewee was corroborated by the historical records, as such DS has no concern regarding the accuracy of the information provided.

5.0 Site Reconnaissance

5.1 General Requirements

Table 5-1: Site Reconnaissance Notes

Information	Details
Date of Investigation:	May 12 th , 2023
Time of Investigation:	12 pm
Weather Conditions:	28°C - Sunny
Duration of Investigation:	2.0 hours
Facility Operation:	Vacant

Information	Details
Name and Qualification of Person(s) conducting the assessment	Madineh Ghazili, M. Sc. under the supervision of Rick Fioravanti, B.Sc, P.Geo, QP _{ESA}
Limitations	No limitations

5.2 Specific Observations at Phase One Property

The Site Reconnaissance involved a visual assessment of the Phase One Property for the purpose of identifying potential PCAs, and associated APECs. Photographs of the Phase One Property were taken at the time of the Site Reconnaissance, and have been included under Appendix F.

Table 5-2: Summary of Site Reconnaissance Observations

General				
i.	Description of structures and other improvements, including the number and age of buildings	An irregular in shape building (Site Building A) is located towards the western and central portions of the Site. The building is comprised of three (3) wings which range between 1 to 3 storeys and includes one (1) level of basement. The basement extends to the majority of the Site but the eastern most wing of Site Building A that has a crawling space. A detached domestic garage is located approximately 25 metres north of Site Building A. By the time of this Phase One investigation was completed the garage was vacant, but it seems it was used to park automobiles. Site Building A was built in 1955, with additions completed in 1963 and 1976. There is a driveway and parking area located west of the Site Building A		
ii.	Description of the number, age and depth of below-ground structures	Site Building A has a basement which comprise approximately 70% of the building. The wing of the building facing southwest is the only portion of Site Building which has no basement.		
iii.	Details of all tanks, above and below ground at the Phase One Property, including the material and method of construction of the tank, tank age, tank contents, tank volume, and whether in use or not	Ona fuel oil UST was historically located on Site, approximately 10 east of Site Building A. It was reportedly removed in 1995. No records to confirm removal were provided.		
iv.	Potable and non-potable water sources	The Site was serviced by the Municipality of Peel.		
Underground Utilities and Corridors				
i.	Type and location of underground utility and service corridors, such as sewer, water, electrical or gas lines located on, in or under the Phase One Property.	Electrical cables were present on the underground at parking lot servicing Site Building A. The cables run from Site Building A towards the lighting polls. The locations of the sewers underground utilities were unknown.		
Features of Structures and Buildings at the Phase One Property				

		One main entry at the north façade of Site Building A.
i.	Entry and exit points	Three (3) exit doors were observed in the basement, one on the front and two facing the back of the building.
ii.	Details of existing and former heating systems, including type and fuel source	The Site was previously heated with fuel oil. The UST used to be situated outside Site Building A (PCA-2).
iii.	Details of cooling systems, including type and fuel source, if any	Various air conditioning units were observed at the outside of Site Building A. Units were also observed inside various rooms of the building.
iv.	Details of any drains, pits and sumps, including their current use, if any, and former use	None observed.
v.	Details of any unidentified substances	None observed.
vi.	Details, including locations of stains or corrosion on floors other than from water, where located near a drain, pit, sump, crack or other potential discharge location	None observed.
vii.	Details, including locations, of current and former wells, including all wells described or defined in or under the Ontario Water Resources Act and the Oil, Gas and Salt Resources Act	The 2017 Terraprobe Inc. Geotechnical Investigation indicated that ten (10) monitoring wells were installed on Site. During the Site reconnaissance they were not observed.
viii.	Details of sewage works, including their location	None observed.
ix.	Details of ground surface, including type of ground cover, such as grass, gravel, soil or pavement	The surface of the Phase One Property consists of asphalt and concrete at the surroundings of Site Building A, the domestic garage and the parking areas. The northern and western portion of the Site are covered by vegetation, and the remaining areas are covered by grass and brush.
Х.	Details of current or former railway lines or spurs and their locations	None observed.
xi.	Areas of stained soil, vegetation or pavement	None observed.
xii.	Stressed vegetation	None observed.
xiii.	Areas where fill and debris materials appear to have been placed or graded	Based on the Geotechnical Investigation completed by Terraprobe Inc. (2017), fill material was encountered below the topsoil/pavement layer and ranged in depth between 1.5 and 2.5 mbgs. The environmental quality of the fill material is unknown (PCA-1).
xiv.	Potentially contaminating activity	Based on the Geotechnical Investigation completed by Terraprobe 2017, fill material was encountered below the topsoil/pavement layer and ranged in depth between 1.5 and 2.5 mbgs. The environmental quality of the fill material is unknown (PCA-1). The Site used to be heated with fuel oil. The UST was reportedly situated outside Site Building A (PCA-2). Fill material may have been used to backfill the void
XV.	Details of any unidentified substances found at the Phase One Property	at the location of the former fuel oil UST (PCA-11). None observed.

vii.

Mould

Enhanced Investigation Property In order to be classified as an enhanced investigation property, the Phase One Property must be used or have been used in whole or in part for any of the following uses: Any industrial use As a garage Where subsection 13(3) applies to the Phase One As a bulk liquid dispensing facility, including Property, provide the documentation referred to in a gasoline outlet subsection 13(3) For the operation of dry cleaning equipment There is no indication in the historical records of the Phase One Property being used for any of the aforementioned uses; as such the Phase One Property is not considered an enhanced investigation property. **Hazardous Materials** DS has completed a hazardous materials and designated substances survey of the subject Site, the findings of which are enclosed under a separate report. The following table is intended to provide a high-level summary of the potential presence/absence of hazardous materials. For detailed description the hazardous materials and designated substances survey report should be reviewed. Asbestos and asbestos-containing materials were used as insulation and construction materials until being phased out in the late 1970s. Based on the age Asbestos containing materials of the site building, which was constructed prior to 1980s, there is a potential for asbestos insulation and asbestos-containing construction materials to be present in the site building. The use of lead as a base in paints and plumbing solder was phased out in the late 1970s. Based on the age of the building prior to 1970s, there is a potential Lead containing materials for lead solder and paint to be present in the site building. Prior to the mid- to late-1970s, PCBs were used in the manufacture of electrical equipment, including iii. fluorescent light ballasts. The Property was PCB materials and equipment constructed prior 1970s, it is moderate potential that PCB may have been used in the buildings on Site. Urea-Formaldehyde Foam Insulation (UFFI) was introduced in Canada during the 1970s and was banned in 1980. No record of UFFI was available for iv. Urea Formaldehyde Foam Insulation the subject building. No older foam insulation was (UFFI) noted in the building; therefore, the potential for UFFI to be present on the property is considered to Equipment containing ODS was limited to the aircondition units observed on the west side of Site Ozone Depleting Substances (ODS) Building A. During the site inspection no material containing Herbicides and Pesticides herbicides or pesticides were observed to be stored vi.

DS Consultants Ltd. 2023-10-19

at the building.
None observed.

viii.	Mercury	Based on the age of the building, there is potential for mercury to be present in fluorescent lights observed in the building. Mercury with small quantity could be present inside the electrical switches or thermostats observed in the units of the building.
ix.	acrylonitrile, arsenic, benzene, coke oven emissions, ethylene oxide, isocyanates, silica, vinyl chloride	These items were not observed at the Property. The presence of the special attention items in building/construction materials were investigated through observations made by DS and does not necessarily imply adverse impact to the environmental condition of the property. DS concurrently with this Phase One ESA is preparing a designated substances hazardous materials survey, including building materials sampling. The results of sampling will be provided in a separate report.
х.	Pits and Lagoons	None observed
xi.	Air Emissions	None observed.
xii.	Radioactive Materials & Radon Gas	Based on local geological formations in the area, it is unlikely the site is exposed to natural sources of radiation such as radon or uranium. Manmade sources of radioactive materials were not observed during the site inspection. A radiometric survey was not conducted during this investigation.

5.3 Written Description of Investigation

The site reconnaissance included a visual inspection of the Phase One Property to confirm current conditions and identify any current land uses or activities, which may have or may cause environmental impacts. The adjoining and neighbouring properties were observed from the Phase One Property and publicly accessible areas.

At the time of the Site Reconnaissance the land use within the Phase One Study Area was primarily residential and parkland, as described in the table below:

Table 5-3: Summary of Site Reconnaissance Observations within Phase One Study Area

Observation	Details
Phase One Property	The Phase One Property by the time of the Site reconnaissance was occupied by one building, Site Building A and one domestic garage, that seems it was used to park automobiles. Both structures were vacant.
	One driveway connecting Sherwood Forrest Circle with Site Building A, and a paved parking area were present north and west of Site Building A. Likewise one sidewalk/trail connecting Dundas Street West with the parking lot on Site is present towards the north of the Site. The application of de-icing agents/products on the sidewalks, laneway, driveway, and parking areas, are likely to be an occurring activity performed during the winter seasons (PCA-4).
	DS assessed the area where the former fuel oil UST was located, evidence of disturbed ground was not observed, due to the masonry floor and concrete ground surface encountered at the area. Fill

Observation	Details		
	material may have been used to backfill the void at the location of the former fuel oil UST (PCA-11).		
	The orientation of the Site Building is depicted on Figure 2.		
North Adjacent Property	Dundas Street West is located north adjacent to the Site. The north neighbouring properties were used for residential purposes at the time of Site reconnaissance.		
South Adjacent Property	The south adjacent properties were used for residential purposes at the time of the Site reconnaissance.		
East Adjacent Property	Mississauga Road is located east adjacent to the Site. All properties east of Mississauga Road were vacant land with the exception of 2904 Mississauga Road which was occupied by a residential dwelling.		
West Adjacent Property	The west adjacent properties were used for residential purposes at the time of the Site reconnaissance.		
Water Bodies	No water bodies are present on Site. Credit River is located 100 m east of the Site.		
Areas of Natural Significance	A review of the MNRF database indicated that the Site may provide a viable habitat for the Henslow's Sparrow, the Eastern Meadowlark, the Barn Swallow and the Bank Swallow (threatened and endangered species). In addition, the northern portion of the Site in within a Life Science ANSI.		
	As defined in Section 1 (1) of O.Reg. 153/04, an area of natural significance is:		
	"An area of natural and scientific interest (life science or earth science) identified by the Ministry of Natural Resources as having provincial significance".		
	 "An area identified by the Ministry of Natural Resources as significant habitat of a threatened or endangered species "; or 		
	"An area which is habitat of a species that is classified under section 7 of the Endangered Species Act, 2007 as a threatened or endangered species".		
	Based on the above definitions, the Phase One Property is located within an area of natural significance.		

Two elevators were observed inside Site Building A. The hydraulic rooms were on the basement of the building. DS observed the concrete slab to be in good conditions with no cracks and staining. Photographs illustrating the Phase One Property and adjacent properties are provided under Appendix F. A summary of the potentially contaminating activities observed is provided in Section 6.2. A visual depiction of the PCAs identified within the Phase One Study Area is provided under Figure 4.

6.0 Review and Evaluation of Information

6.1 Current and Past Uses

The current and past uses of the Phase One Property have been inferred based on the information provided in the aerial photographs, city directories and conversations with the site representative. The Phase One Property was inferred to have been used for agricultural and residential purposes circa 1877, by 1955 the site become primarily used for residential purposes, when the senior retirement home and convent was built. The Site continue to operate the convent and senior retirement home (residential property use) until 2022, year the Site was vacated. the has remained vacant since 2022.

6.2 Potentially Contaminating Activity

According to the Table 2, Schedule D, O. Reg. 153/04 as amended, potentially contaminating activities are activities that may be contributing to areas of potential environmental concern on the Phase One Property. The PCAs identified on the Phase One Property and within the Phase One Study Areas are summarized in the table below and are illustrated on Figure 4.

Table 6-1: Summary of PCAs

PCA ID No.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Contributing to APEC (Y/N)
PCA-1	#30 – Importation of fill material of unknown quality	Fill material may have been used for grading purposes in the vicinity of the Site Building A. Terraprobe 2017 Geotechnical Investigation reported that fill material was encountered below the topsoil/pavement layer and ranged in depth between 1.5 and 2.5 mbgs.	Yes-APEC-1
PCA-2	#28 – Gasoline and associated products storage in fixed tanks	One fuel oil UST was formerly present on Site. The UST was reported to have had a 22,700 L (5,000 gallons) capacity. The UST was reportedly removed off-Site in 1995. No additional details were available.	Yes – APEC-2
PCA-3	#40 – Pesticides (including herbicides, fungicides and anti-fouling agents) manufacturing, processing, bulk storage and large-scale applications	Based on the 1877 County Atlas of Peel, an orchard was observed at the northern portion of the Site.	Yes-APEC-3
PCA-4	#N/S: Application of deicing agents	Seasonal application of de-icing salts for vehicle and pedestrian safety is anticipated on the laneway, sidewalks, driveway and parking areas present on the Site.	Yes – APEC-4
PCA-5	#N/S: Transformer Oil Spill	60 L of transformer oil was spilled on a greenspace area near 2901 Mississauga Road, approximately 10 m north of the Site, in 2009.	No – PCA is down-gradient from the Site.

PCA ID No.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Contributing to APEC (Y/N)
PCA-6	#N/S: Unknown Spill	An unknown source spilled into Credit River at Dundas Road and Mississauga Road, approximately 125 m north of the Site, in 1996.	No – PCA is down-gradient from the Site.
PCA-7	#N/S: Unknown Spill	An unknown substance from an unknown source was spilled into the intersection of Sawmill Creek at Dundas Road and Mississauga Road into the creek in 1999.	No – PCA is down-gradient from the Site.
PCA-8	#40 – Pesticides (including herbicides, fungicides and anti-fouling agents) manufacturing, processing, bulk storage and large-scale applications	Based on the 1877 County Atlas of Peel, an orchard was observed at the south adjacent properties.	No – Due to low mobility of potential contaminants.
PCA-9	#30: Importation of Fill Material of Unknown Quality	Based on the 1975 aerial photographs Former Site Building C may have been demolished. Fill material of unknown quality may have been imported to the site to backfield the demolished structure.	Yes – APEC-5
PCA-10	#30 – Importation of fill material of unknown quality	Based on the 1975 aerial photographs Former Site Building D may have been demolished. Fill material of unknown quality may have been imported to the site to backfield the demolished structure.	Yes - APEC-6
PCA-11	#30 – Importation of fill material of unknown quality	The Site used to be heated with fuel oil. The UST was reportedly situated outside Site Building A. The UST was removed circa 1995. Fill material may have been used to backfill the void at the location of the former fuel oil UST.	Yes - APEC-7
PCA-12	#40 – Pesticides (including herbicides, fungicides and anti-fouling agents) manufacturing, processing, bulk storage and large-scale applications	Based on the 1954, 1966 and 1975 aerial photographs, portion of the orchard located on the west adjacent properties was within an area on the western portion of the Site.	Yes - APEC-8
PCA-13	#40 – Pesticides (including herbicides, fungicides and anti-fouling agents) manufacturing, processing, bulk storage and large-scale applications	Based on the 1954, 1966 and 1975 aerial photographs, an orchard was located on the east adjacent properties.	No – Due to low mobility of potential contaminants.

N/S - not specified in Table 2, Schedule D, of O.Reg. 153/04

6.3 Areas of Potential Environmental Concern

The table of APECs presented in the form as approved by the Director is provided below, in accordance with clause 16(2)(a), Schedule D, O.Reg. 153/04.

Table 6-2: Summary of APECs

APEC	Location of APEC on Phase One Property	PCA	Location of PCA	COPCs	Media Potentially Impacted
APEC-1	Central and Southern Portions of the Site	#30: Importation of Fill Material of Unknown Quality	On Site PCA-1	PHCs, BTEX, Metals, As, Sb, Se, B-HWS, CN-, electrical conductivity, Cr (VI), Hg, low or high pH, SAR, PAHs	Soil
APEC-2	Central portion of the Site, 10 m east of Site Building A	#28: Gasoline and associated products storage in fixed tanks	On-Site PCA-2	PHCs, BTEX, PAHs	Soil and groundwater
APEC-3	Northern portion of Site	#40: Pesticides (including herbicides, fungicides and anti- fouling agents) manufacturing, processing, bulk storage and large- scale applications.	On-Site PCA-3	OCPs, Metals, As, Sb, Se, CN-	Soil
APEC-4	Northern and	#N/S: Application of De-Icing Agents ¹	On-Site PCA-4	EC, SAR	Soil
	central portions of Site			Na, Cl-	Groundwater
APEC-5	Central portion of the Site, approx. 25 m south of Site Building A	#30: Importation of Fill Material of Unknown Quality	On Site PCA-9	PHCs, BTEX, Metals, As, Sb, Se, B-HWS, CN-, electrical	Soil
APEC-6	Central Portion of the Site, approx. 50 m south of Site Building A	#30: Importation of Fill Material of Unknown Quality	On Site PCA-10	conductivity, Cr (VI), Hg, low or high pH, SAR, PAHs	Soil
APEC-7	Central portion of the Site, 10 m east of Site Building A	#30: Importation of Fill Material of Unknown Quality	On Site PCA-11		Soil
APEC-8	Western Portion of the Site	#40: Pesticides (including herbicides, fungicides and antifouling agents) manufacturing, processing, bulk storage and large- scale applications.	On-Site PCA-12	OCPs, Metals, As, Sb, Se, CN-	Soil

N/S - not specified in Table 2, Schedule D, of O.Reg. 153/04

^{1 -} The area is subject to the application of de-icing salts for road safety purposes. Per Section 49.1 (1) of O.Reg. 153/04 (as amended) "If an applicable site condition standard is exceeded at a property solely because of one of the following reasons, the applicable site condition standard is deemed not to be exceeded for the purpose of Part XV.1 of the Act": "...that a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both". Any potential impacts associated with sodium and/or chloride in groundwater will be deemed not to exceed the MECP Site Conditions Standards for the area identified in APEC-4.

The rationale used by the QP in assessing the information obtained through the course of this investigation to determine whether PCAs exist and/or are contributing to an APEC on the Phase One Property has been provided in the proceeding sections. In general, the potential for a PCA to be contributing to an APEC on the Phase One Property was assessed using the likelihood of the source to contaminate the Phase One Property, the possibility of the contaminants to migrate to the Phase One Property based on the hydraulic and geologic conditions, and the inherent properties of the contaminants of concern.

The contaminants of potential concern were determined based on the professional experience of the QP, common industry standards, literature reviews, and the inherent properties of the contaminant.

This investigation was conducted based on the assumption that all information provided to DS was factual and accurate. DS is not aware of any uncertainty factors which would affect the conclusions of this investigation.

6.4 Phase One Conceptual Site Model

A Conceptual Site Model was developed for the Phase One Property, located at 1720 Sherwood Forrest Circle, Mississauga, Ontario. The Phase One Conceptual Site Model is presented in Figures 3, 4, and 5 which visually depict the following:

- Any existing buildings and structures
- Water bodies located in whole, or in part, on the Phase One Study Area
- Areas of natural significance located in whole, or in part, on the Phase One Study Area
- Water wells at the Phase One Property or within the Phase One Study Area
- Roads, including names, within the Phase One Study Area
- Uses of properties adjacent to the Phase One Property
- Areas where any PCAs have occurred, including location of any tanks
- Areas of Potential Environmental Concern

6.4.1 Potentially Contaminating Activity Affecting the Phase One Property

All PCAs identified within the Phase One Study Area are presented on Figure 4 and discussed in Section 6.2 above. The PCAs which are considered to contribute to APECs on, in or under the Phase One Property are summarized in the table below:

Table 6-3: Summary of PCAs Contributing to APECs

PCA Item.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Rationale
PCA-1	#30: Importation of Fill Material of Unknown Quality	Fill material may have been used for grading purposes in the vicinity of the Site Building A. Terraprobe 2017 Geotechnical Investigation reported that fill material	PCA is on Site

PCA Item.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Rationale	
		was encountered below the topsoil/pavement layer and ranged in depth between 1.5 and 2.5 mbgs.		
PCA-2	#28: Gasoline and associated products storage in fixed tanks	One fuel oil UST was formerly present on Site. The UST was reported to have had a 22,700 L (5,000 gallons) capacity. The UST was reportedly removed off-Site in 1995. No additional details were available.	PCA is on Site	
PCA-3	#40: Pesticides (including herbicides, fungicides and anti-fouling agents) manufacturing, processing, bulk storage and large scale applications.	Based on the 1877 County Atlas of Peel, an orchard was observed at the northern portion of the Site.	PCA is on Site	
PCA-4	#N/S: Application of De- Icing Agents	Seasonal application of de-icing salts for vehicle and pedestrian safety is anticipated on the laneway, sidewalks, driveway and parking areas present on the Site.	PCA is on Site	
PCA-9	#30: Importation of Fill Material of Unknown Quality	Based on the 1975 aerial photographs Former Site Building C may have been demolished. Fill material of unknown quality may have been imported to the site to backfield the demolished structure.	PCA is on Site	
PCA-10	#30 – Importation of fill material of unknown quality	Based on the 1975 aerial photographs Former Site Building D may have been demolished. Fill material of unknown quality may have been imported to the site to backfield the demolished structure.	PCA is on Site	
PCA-11	#30 – Importation of fill material of unknown quality	The Site used to be heated with fuel oil. The UST was reportedly situated outside Site Building A. The UST was removed circa 1995. Fill material may have been used to backfill the void at the location of the former fuel oil UST.	PCA is on Site	
PCA-12	#40 – Pesticides (including herbicides, fungicides and anti-fouling agents) manufacturing, processing, bulk storage and large-scale applications	Based on the 1954, 1966 and 1975 aerial photographs, portion of the orchard located on the west adjacent properties was within an area on the western portion of the Site.	PCA is on Site	

N/S - not specified in Table 2, Schedule D, of O.Reg. 153/04

6.4.2 Contaminants of Potential Concern

The following contaminants of potential concern were identified for the Phase One Property: PHCs, VOCs, BTEX, Metals, As, Sb, Se, B-HWS, CN-, electrical conductivity, Cr (VI), Hg, low or high pH, SAR, PAHs and OCPs.

6.4.3 Underground Utilities and Contaminant Distribution and Transport

Underground utilities can affect contaminant distribution and transport. Trenches excavated to install utility services, and the associated granular backfill may provide preferential pathways for horizontal contaminant migration in the shallow subsurface.

It is anticipated that underground utilities and corridors exist under the Phase One Property to connect the buildings on the Phase One Property to municipal water and wastewater and supplied utilities. Plans were not available to confirm the depths of these utilities, however they are estimated to be installed at depths ranging from 2 to 3 metres below ground surface.

According to the 2017 Terraprobe Geotechnical Investigation report, the depth to groundwater at the Phase One Property is 5.5 to 14. 8 mbgs, therefore the utility corridors are expected to be well above the water table and would not act as preferential pathways for contaminant distribution and transport in the event that shallow subsurface contaminants exist at the Phase One Property.

6.4.4 Geological and Hydrogeological Information

The topography of the Phase One Property is generally flat with a surface elevation of 116 metres above sea level (masl). The Site is generally flat with a surface elevation of approximately 116 masl, the eastern boundary of the of the Site slopes towards Credit River with a surface elevation range from 110 to 115 masl. Based on the Geotechnical Investigation completed by Terraprobe 2017, the depth to groundwater ranged from 5.5 to 14.8 mbgs. The shallow groundwater flow direction within the Phase One Study Area is inferred to flow easterly towards Credit River.

The Site is situated within a sand plains physiographic region. The surficial geology within the Phase One Study area is described "till, clay to silt-textured till (derived from glaciolacustrine deposits of shale" towards the north of the Site, and "fine-textures glaciolacustrine deposits, silt and clay, minor sand and gravel, interbedded silt and clay and gritty, pebbly flow till and rainout deposits" towards the south of the Site. The bedrock is described as "Shale, limestone, dolostone, siltstone of the Georgian Bay Formation; Blue Mountain Formation; Billings Formation; Collingwood Member; Eastview Member". Based on a review of Ministry of Mines, Forestry and Natural resources bedrock topography database, the bedrock in the Phase One Study Area is anticipated to be encountered at an approximate depth of 18 mbgs.

6.4.5 Uncertainty and Absence of Information

DS has relied upon information obtained from federal, provincial, municipal, and private databases, in addition to records and summaries provided by ERIS. All information obtained was reviewed and assessed for consistency, however the conclusions drawn by DS are subject to the nature and accuracy of the records reviewed.

All reasonable inquiries were made to obtain reasonably accessible information, as mandated by 0.Reg.153/04 (as amended). All responses to database requests were received prior to completion

of this report, with the exception of the MECP FOI request. If the MECP FOI request produces information which may alter the conclusions of this report, an addendum will be provided to the Client. This report reflects the best judgement of DS based on the information available at the time of the investigation.

Information used in this report was evaluated based on proximity to the Phase One Property, anticipated direction of local groundwater flow, and the potential environmental impact on the Phase One Property as a result of potentially contaminating activities.

The QP has determined that the uncertainty does not affect the validity of the Phase One ESA Conceptual Site Model or the conclusions of this report.

7.0 Conclusions

DS conducted a Phase One ESA for the property located at 1720 Sherwood Forrest Circle, Mississauga, Ontario. The Phase One ESA was completed to satisfy the intent of the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04 (as amended). The objectives of the Phase One ESA were to identify the presence or absence of potentially contaminating activities (PCAs) on the Phase One Property and/or within the Phase One Study Area, and to determine if the PCAs identified within the Phase One Study Area are likely to result in an Area of Potential Environmental Concern (APEC) on the Phase One Property.

Based on the information obtained as part of this investigation, it is concluded that thirteen (13) PCAs were identified within the Phase One Property and the Phase One Study Area which, eight (8) of which were considered to be contributing to eight (8) APECs on, in or under the Phase One Property. Further investigation in the form of a Phase Two ESA will be required in order to meet the requirements of O.Reg.153/04 (as amended).

7.1 Phase Two Environmental Site Assessment Requirement

Further investigation in the form of a Phase Two ESA will be required in order to meet the requirements of O.Reg.153/04 (as amended).

7.2 RSC Based on Phase One Environmental Site Assessment

Record of Site Condition cannot be filed on the basis of the Phase One ESA due to the identification of APECs on the Phase One Property.

7.3 Limitations

This report was prepared for the sole use of Argo Development Corporation and is intended to provide an assessment of the environmental condition on the property located at 1720 Sherwood Forrest Circle, Mississauga, Ontario. The information presented in this report is based on information collected during the completion of the Phase One Environmental Site Assessment by DS

Consultants Ltd. The material in this report reflects DS' judgment in light of the information available at the time of report preparation. This report may not be relied upon by any other person or entity without the written authorization of DS Consultants Ltd. The scope of services performed in the execution of this investigation may not be appropriate to satisfy the needs of other users, and any use or reuse of this documents or findings, conclusions and recommendations represented herein, is at the sole risk of said users.

The information and conclusions presented in this report are professional opinions in accordance with generally accepted engineering and scientific practices based on a cursory historical search, visual observations and limited information provided by persons knowledgeable about past and current activities on this site. The work completed as per the scope of work is considered sufficient in detail to form a reasonable basis for the findings presented in this report. As such, DS Consultants Ltd. cannot be held responsible for environmental conditions at the site that was not apparent from the available information.

7.4 Qualifications of the Assessors

Marina Nadi, MES

Ms. Marina Nadj, MES, is an Environmental Specialist with DS Consultants Ltd. She obtained a Master of Environmental Science from University of Guelph. Marina holds a Post Graduate Certificate in Environmental Engineering Applications from Conestoga College. She has experience in conducting Phase One and Two Environmental Site Assessments, and in completing soil and groundwater contaminant programs in accordance with Ontario Regulation 153/04 to support the future filing of Record of Site Conditions.

John Gaviria-Ballen, B. Eng., EIT

Mr. Gaviria-Ballen is an Environmental EIT with DS Consultants Ltd. John holds a bachelor's degree in environmental engineering from Carleton University and a Post Graduate Certificate in Environmental Engineering Applications from Conestoga College. John is a registered Engineer in Training (EIT) with Professional Engineers of Ontario (PEO) and has been trained in conducting Phase One and Two Environmental Site Assessments, soil and groundwater remediation projects since 2019.

Mr. Patrick (Rick) Fioravanti, B.Sc., P.Geo., QP_{ESA}

Mr. Fioravanti is the Manager of Environmental Services with DS Consultants Limited. Patrick holds an Honours Bachelor of Science with distinction in Toxicology from the University of Guelph and is a practicing member of the Association of Professional Geoscientists of Ontario (APGO). Patrick has over ten years of environmental consulting experience and has conducted and/or managed hundreds of projects in his professional experience. Patrick has extensive experience conducting Phase One and Phase Two Environmental Site Assessments in support of brownfields redevelopment in urban settings, and been involved in numerous remediation projects, supported many risk assessments, and successfully filed Records of Site Condition with the Ministry of Environment, Conservation and Parks. He has conducted work across southern and eastern Ontario, and Quebec in his professional experience. Patrick is considered a Qualified Person to conduct Environmental Site Assessments as defined by Ontario Regulation 153/04 (as amended).

7.5 Signatures

DS Consultants Ltd. conducted this Phase One Environmental Site Assessment and confirms the findings and conclusions contained within this report.

Yours truly,

DS Consultants Ltd.

May 24, 2023 RE: CITY DIRECTORY RESEARCH 1720 Sherwood Forrest Circle Mississauga,ON L5K 1R1

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

1800-1890 of Deers Wold

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial AGR

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Oct 2022

Abandoned Mine Information System:

Provincial

AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Mar 2022

Anderson's Waste Disposal Sites:

Private

ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

AUWR

Order No: 23050500645

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Feb 28, 2022

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2021

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

<u>Chemical Register:</u> Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Feb 28, 2023

Compressed Natural Gas Stations:

Private CNC

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Feb 2023

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial

COAL

CONV

Order No: 23050500645

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Feb 2023

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Mar 31, 2023

<u>Drill Hole Database:</u> Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Oct 2022

Delisted Fuel Tanks:

Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Feb 28, 2022

Environmental Activity and Sector Registry:

Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Mar 31, 2023

Environmental Registry:

Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Mar 31, 2023

Environmental Compliance Approval:

Provincial FCA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Mar 31, 2023

Environmental Effects Monitoring:

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Dec 31, 2022

Environmental Issues Inventory System:

Federal

EIIS

Order No: 23050500645

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2021

List of Expired Fuels Safety Facilities:

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Federal Convictions: Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Mar 2023

Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

FRST

Order No: 23050500645

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank: Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information. Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are

not verified for accuracy or completeness. Government Publication Date: Feb 28, 2022

Fuel Storage Tank - Historic:

Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

NC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 21, 2022

Canadian Mine Locations:

Private

MINE

Order No: 23050500645

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2023

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2021

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal

NEBP

Order No: 23050500645

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal NPRI

Federal

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Nov 30, 2022

Ontario Oil and Gas Wells:

Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2021

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Mar 31, 2023

<u>Canadian Pulp and Paper:</u> Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Order No: 23050500645

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Mar 31, 2023

Provincial PINC Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Mar 31, 2023

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2020

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2023

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Feb 28, 2023

Scott's Manufacturing Directory:

Private

SCT

Order No: 23050500645

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Mar 2021; May 2021-Oct 2021

Wastewater Discharger Registration Database:

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2020

Private Anderson's Storage Tanks: **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2020

Variances for Abandonment of Underground Storage Tanks:

Provincial VAR

Provincial

SRDS

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Mar 31, 2023

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial **WDSH**

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

WWIS

Order No: 23050500645

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Jun 30 2022

Definitions

<u>Database Descriptions:</u> This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

<u>Detail Report</u>: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

<u>Distance:</u> The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

<u>Direction</u>: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

<u>Elevation:</u> The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

<u>Map Key:</u> The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

<u>Unplottables:</u> These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Order No: 23050500645

This email was sent from outside your organisation. This often happens in phishing attempts. Please only interact with this email if you know its source and that the content is safe.

Hello,

NO RECORD FOUND IN CURRENT DATABASE

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

We confirm that there are no records in our database of any <u>fuel storage tanks</u> at the subject address(es).

<u>This is not a confirmation that there are no records in the archives</u>. For a further search in our archives, please submit an application for release of public information (PI Form) through TSSA's new Service Prepayment Portal. The associated fee must be paid via credit card (Visa or MasterCard) through a secure site.

Please follow the steps below to access the new application(s) and Service Prepayment Portal:

- 1. Click Release of Public Information TSSA TSSA and click "need a copy of a document";
- 2. Select the appropriate application, download it and complete it in full; and
- 3. Proceed to page 3 of the application and click the link TSSA Service Prepayment Portal under payment options (the link will take you the secure site to pay for the release via credit card).

Accessing the Service Prepayment Portal:

- 1. Select new or existing customer (*if you are an existing customer, you will need your account # & postal code to access your account);
- 2. Select the program area: AD (Amusement Devices), BPV (Boilers and Pressure Vessels), ED (Elevating Devices), FS (Fuels Services), OE (Operating Engineers) or SKI (Ski Lifts) and click continue;
- 3. Enter the application form number (obtained from bottom left corner of application form) and click continue;
 - a. When selecting the application form number from the drop-down menu, please make sure you select the application that begins with "PI" (i.e. PI-FS, PI-BPV etc.);
- 4. Complete the primary contact information section;
- 5. Complete the fees section;
- 6. Upload your completed application; and
- 7. Upload supporting documents (if required) and click continue.

Once all steps have been successfully completed, you will receive your receipt via email.

Questions? Please contact TSSA's Public Information Release team at publicinformationservices@tssa.org.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Inspection Report Summary (Included in Final Report)

On February 20, 2015, Provincial Officers Oakley and Rahal of the Sector Compliance Branch - Ministry of the Environment, conducted an inspection of Carmel Heights Seniors Residence, multi-unit residential building located at 1720 Sherwood Forrest Circle.

The purpose of the inspection was to ensure that the multi-unit residential building was operating in accordance with Ontario Regulation 103/94. O. Reg. 103/94 requires the source separation for the purpose of reuse or recycling of the following materials: aluminum food or beverage cans, glass bottles and jars for food or beverage, newsprint, polyethylene terephthalate bottles for food or beverage, steel food or beverage cans, as well as the categories of waste collected or accepted by the blue box waste management system of the municipality where the building is located.

The multi-unit residential building is owned and managed by Carmel Heights Seniors Residence. Officers Oakley and Rahal met with Carmel DCJ Sister M Veronica on site.

In a conversation with the Sister Veronica it was indicated that the building contains 48 units. There are currently recycling receptacles provided in the building for the collection of paper products (newsprint, fine paper, cardboard, box board, magazines), as well as receptacles for the collection of container material (steel food/beverage cans, aluminum food/beverage cans, glass food/beverage cans). Nurses take recyclable material to the designated area and place in the proper bins. Recyclables are picked up weekly.

At the time of the inspection the site was found to be in compliance with regulation 103/94. No further action required.

Re: Site Inspection at 1720 Sherwood Forrest Circle

On February 20, 2015, I attended the above noted address for the purpose of conducting an inspection which focused on ensuring compliance with Ontario Regulation 103/94. I met briefly with staff, and discussed the requirements of the Regulation. From this meeting, it is my understanding that the above building consists of 6 or more dwelling units and is therefore subject to the requirements of Ontario Regulation 103/94.

During the inspection of the multi-unit residential building there were no issues identified.

I have enclosed links to the relevant guidance documents and web-based resources to assist you. If you have any questions after reviewing these materials, please contact me for assistance at 416-212-6669 or email at glen.oakley@ontario.ca.

Sincerely

Glen Oakley Ministry of the Environment Inspector #896 305 Milner Ave. Scarborough, Ont M1B 3V4

Inspection Report Summary

On February 20, 2015, Provincial Officers Oakley and Rahal of the Sector Compliance Branch - Ministry of the Environment, conducted an inspection of Carmel Heights Seniors Residence, multi-unit residential building located at 1720 Sherwood Forrest Circle.

The purpose of the inspection was to ensure that the multi-unit residential building was operating in accordance with Ontario Regulation 103/94. O. Reg. 103/94 requires the source separation for the purpose of reuse or recycling of the following materials: aluminum food or beverage cans, glass bottles and jars for food or beverage, newsprint, polyethylene terephthalate bottles for food or beverage, steel food or beverage cans, as well as the categories of waste collected or accepted by the blue box waste management system of the municipality where the building is located.

The multi-unit residential building is owned and managed by Carmel Heights Seniors Residence. Officers Oakley and Rahal met with Carmel DCJ Sister M Veronica on site.

In a conversation with the Sister Veronica it was indicated that the building contains 48 units. There are currently recycling receptacles provided in the building for the collection of paper products (newsprint, fine paper, cardboard, box board, magazines), as well as receptacles for the collection of container material (steel food/beverage cans, aluminum food/beverage cans, glass food/beverage cans). Nurses take recyclable material to the designated area and place in the proper bins. Recyclables are picked up weekly.

At the time of the inspection the site was found to be in compliance with regulation 103/94. No further action required.
