Re: Addendum to Arborist Report and Tree Protection Hoarding Review

**Kings Mill Development Inc. (The Vic) Phase 2
150 Rutledge Road
Mississauga, Ontario
SBK Project No.: 21-5677**

Strybos Barron King Ltd. has been to the site on September 2, 2022 and again on February 22, 2023 to perform a review of the tree protection hoarding measures on site which were established and approved per the original arborist report provided by SBK dated 2010. (A copy of the original report accompanies this letter)

Upon review, all repairs to the previously installed hoarding have been made and new fencing is in place along the development conservation limit and the perimeter. All tree groupings that were proposed for preservation as per the previous report for this area were found on site upon the review and will remain preserved.

The recently updated V100 plan for this application show the limits of construction, proposed building location and footprint, and the location of the existing installed tree protection hoarding and all vegetation to be preserved. The trees to be preserved also include the boulevard street trees that were planted with the construction of the retirement residence at the southeast block.

We trust that this addresses any concerns regarding the protection of existing vegetation being preserved. SBK will review the hoarding periodically throughout the design approvals and the construction process so that it is maintained.

If you require any further information, please do not hesitate to contact our office.

Sincerely,

STRYBOS BARRON KING LTD.

Matthew Regimbal, *Associate*
Senior Landscape Technologist
ISA Certified Arborist ON- 1758A
