Glossary

ABNs	acid-base neutral compounds
APEC	area(s) of potential environmental concern, as defined in O. Reg. 153/04, “the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through (a) identification of past or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activity”
As	arsenic, a hydride-forming metal
AST	above ground storage tank
B-HWS	boron (hot water soluble)
BTEX	benzene, toluene, ethylbenzene, and xylenes
CN^-	cyanide
COPC	contaminant(s) of potential concern
CPs	chlorophenols
Cr	chromium
Cr (VI)	hexavalent chromium
CSM	conceptual site model
EC	electrical conductivity
ECA	Environmental Compliance Approval
ERIS	Environmental Risk Information Services
ESA	environmental site assessment
FIP	fire insurance plan
FOI	freedom of information
ha	hectare(s)
Hg	mercury
km	kilometre(s)
L	litre(s)
m	metre(s)
Metals	O. Reg. 153/04 regulated metals as per Protocol for Analytical Methods Used in the Assessment of Properties under Part XV.1 of the *Environmental Protection Act*
mASL	metres above sea level
mBGS	metres below ground surface
MND	Ministry of Northern Development
MoM	Ministry of Mines
MNR	Ministry of Natural Resources (formerly MNRF)

MECP	Ministry of the Environment, Conservation and Parks
NPRI	National Pollutant Release Inventory
N/S	not specified in Table 2, Schedule D, of O. Reg. 153/04
Na	sodium
OCs	organochlorine pesticides
O. Reg. 153/04	Ontario Regulation 153/04 Records of Site Condition, as amended
O. Reg. 347	R.R.O. 1990, Regulation 347 General – Waste Management, as amended
ORP	other regulated parameter(s) per Protocol for Analytical Methods Used in the Assessment of Properties under Part XV.1 of the *Environmental Protection Act*
PAH	polycyclic aromatic hydrocarbon
PCA	potentially contaminating activity, as defined in O. Reg. 153/04, “a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a Phase One study area”
PCB	polychlorinated biphenyl
PHC	petroleum hydrocarbon
PIN	property identification number
QA	quality assurance
QC	quality control
QP_{ESA}	Qualified Person for ESAs per O. Reg. 153/04
RA	risk assessment
RSC	Record of Site Condition
SAR	sodium adsorption ratio
Sb	antimony, a hydride-forming metal
SCS	Site Condition Standard
Se	selenium, a hydride-forming metal
THM	trihalomethane
TSSA	Technical Standards and Safety Authority
UST	underground storage tank
VOC	volatile organic compound(s)

1 Executive Summary

Starlight Investments CDN AM Group GP LP (the Client) retained Grounded Engineering Inc., to complete a Phase One Environmental Site Assessment for the municipal address of 1315 Silver Spear Road, Mississauga, Ontario (Property). It is proposed that a 0.92 m wide parcel of land along the northern property boundary will be conveyed to the City of Mississauga for road-widening. The Property location is presented in Figure 1.

This Phase One ESA has been prepared in accordance with Ontario Regulation (O.Reg.) 153/04.

Based on records review, the Property was first developed for residential land use in 1969. At the time of the site reconnaissance, the Property continued to be in residentialResidential use. It was occupied by an eight-storey residential apartment building with a separate one-level parking structure and an asphalt parking lots on the north and east portions. The Property was heated by a gas-fired boiler.

The Phase One ESA has identified the following PCAs contributing to APECs on the Property:

- **On-Site:**
  - Importation of fill material of unknown quality on the Property.
  - Use of de-icing substances (salt) on the Property and on the adjacent roadways.

No off-site PCAs were found to contribute to APECs on the Property.

Given the groundwater was identified beyond 12 mbgs, an RSC is not required for the Property and based on the low environmental concerns identified onsite, it is recommended that a limited investigation to assess if the soils within the conveyance lands have been impacted by the onsite PCAs be completed prior to conveyance.

2 Introduction

Starlight Investments CDN AM Group GP LP (the Client) retained Grounded Engineering Inc., to complete a Phase One Environmental Site Assessment for 1315 Silver Spear Road, in Mississauga, Ontario (Property). The Property location is presented in Figure 1.

For the purposes of this report, Burnhamthorpe Road East is referenced in an east-west orientation and as such, project north is towards Burnhamthorpe Road East.

The Property is currently occupied by an eight-storey residential apartment building with a detached one-level above-grade parking structure and asphalt parking lots on the north and west portions. The Phase One Property is presented in Figure 2. The Property is currently in Residential use, as defined by O. Reg. 153/04.

Starlight Investments CDN AM Group GP LP has indicated that the Property will be developed with a mid-rise residential building with four underground parking levels adjacent to the existing eight-storey residential building and parking structure. Grounded understands that the proposed property use will remain Residential, as defined by O. Reg. 153/04. As part of the redevelopment, Grounded understands that a 0.92 m wide parcel of land along the northern property boundary will be conveyed to the City of Mississauga, as proposed road-widening.

Municipal Address	1315 Silver Spear Road, Mississauga, ON
Legal Description	Block A Plan 750
PIN(s)	13326-0009 (LT)
Assessment Roll Number	21050300781820000000
Area	0.84 ha
Current Land Use	ResidentialResidential
Property Owner Information	IMH 1315 Silver Spear Ltd.
Entity Who Requested Phase One	Starlight Investments CDN AM Group GP LP

3 Scope of Investigation

The Phase One ESA was completed in support of a municipal Approvals of conveyance lands, although the Property would not be changing to a more sensitive land use.

This Phase One ESA has been prepared in accordance with Ontario Regulation (O.Reg.) 153/04 and includes the following components:

- Records review of historical and current occupancies and activities on the Property and Phase One Study Area.
- Interviews with available personnel with knowledge of the historical and current activities on the Property.
- Site reconnaissance of the Property and Study Area to identify potential environmental concerns based on observations of current uses, and potentially contaminating activities at the Property and in the Study Area.
- Evaluation of information from records review, interviews and site reconnaissance and synthesis into a CSM.

4 Records Review

Below is a summary of the records review undertaken by Grounded as part of this Phase One ESA. The records review provides Property information regarding the physical setting, history of development, and property use in connection with the Site and adjacent properties.

The following information sources were used to obtain these records:

- A chain-of-title search for the Property was completed, a copy of which is included as Appendix C.
- ERIS was retained to complete a city directory search for the Site and properties within the Phase One Study Area. The search completed by ERIS is provided in Appendix C.
- An ERIS standard report was obtained for the Site and lands within a 250-m radius of the Site. A copy of the ERIS report is provided in Appendix E. Searches of databases and records not included in the ERIS report were conducted specifically for the Property, as referenced in the applicable sections below.
- Freedom of information requests were submitted to the MECP as well as to the City of Mississauga for a search of environmental records for the subject property. Copies of the requests, the response, and any documents obtained are included in Appendix F.
- Information and records were requested from the TSSA. Copies of the request, the response, and any documents obtained are included in Appendix F.
- Aerial photographs of the Property and surrounding Study Area were obtained from ERIS and Google Earth. Copies of the aerial photographs are provided in Appendix G.

4.1 General

The PCAs inferred in the Study Area from the review of the following information sources, if any, are summarized in Table 2.

4.1.1 Phase One Study Area Determination

The Phase One Study Area includes the properties that are, wholly or partly, located within a 250-m radius from the Property boundary.

The Study Area is presented in Figure 3.

4.1.2 First Developed Use Determination

The determination of the date of the first developed use of the Property is based on review of the available historical records as summarized in the Table of Current and Past Uses (Table 1).

Review of the available data indicates that the first developed use of the Property likely occurred in the late 1960’s with the current residential building with associated parking.

4.1.3 Fire Insurance Plans

There were no FIPs available for review for the Property and Study Area. However, select property use reports were obtained for the Property (Appendix B). Adequate information was provided by other sources and the absence of FIPs does not affect the validity of the Phase One ESA and the CSM.

The findings of the site records are summarized below:

Title	COPE Report – 1994 Treehaven Co Ltd 1315 Silver Spear Rd Mississauga ON L4Y 2W6 Reference No. 100400088
Report Date	June 16, 2009
Prepared By	Insurers' Advisory Organization
Prepared for	Treehaven Co Ltd
Description of Data, Analysis or Findings	▪ At the time of inspection, the Property was occupied by an eight-storey apartment building with no basement. ▪ The report states the building was constructed in 1969. ▪ The building was heated by a central heat boiler and cooled by window air conditioners.

Title	Siteplan Report – 1970 Woodhill Motel & Restaurant (Malton) Ltd 1315 Silver Spear Mississauga ON L4Y2X1
Report Date	November 24, 1970
Prepared By	Unknown
Prepared for	Unknown
Description of Data, Analysis or Findings	▪ The report showed the Property in a configuration similar to present day.

Title	Survey for Rating Fire-Resistive Risks Report – 1970 Woodhill Motel & Restaurant (Malton) Ltd 1315 Silver Spear Road Mississauga ON L4Y 2X1
Report Date	November 30, 1970
Prepared By	Canadian Underwriters' Association
Prepared for	Woodhill Motel & Restaurant (Malton)
Description of Data, Analysis or Findings	▪ At the time of inspection, the Property was occupied by an eight-storey apartment building with no basement.

	▪ No tanks were reported as the Property was heated by a natural gas-fired hot water boiler. ▪ Although the site was reportedly owned by Woodhill Motel & Restaurant (Malton), the descriptions within the report suggest that the building was operating as a residential apartment.

The site records reviewed confirmed that no tanks were present on the Property and it has been heated by a gas-fired hot water boiler since the building was constructed.

4.1.4 Chain-of-Title

Chain(s)-of-title dating back to transfer from Crown was available for review for the Property. The search identified that the Property was transferred from the Crown in 1810. The Property was subsequently owned by private individuals from 1810 to 1959 and by corporate entities from 1959 to present. The Property is currently owned by IMH 1315 Silver Spear Ltd. since 2012.

The chains-of-title, where available, are presented in Appendix C and summarized in Table 1.

4.1.5 City Directories

Available City Directories were reviewed for the Property and adjacent properties.

The Property uses inferred from the city directories, when available, are summarized in Table 1. The full search results for the Property and the Study Area can be found in Appendix D.

4.1.6 Environmental Reports

The following reports were provided for review for the Property. The findings of the reports are summarized below:

Title	Hydrogeological Review Report, 1315 Silver Spear Road, Mississauga, Ontario
Report Date	May 5, 2025
Prepared By	Grounded Engineering Inc.
Prepared for	Starlight Investments
Description of Data, Analysis or Findings	▪ Grounded was retained to provide hydrogeological engineering design advice for the proposed development. ▪ The property use at the time was residential. ▪ Five (5) boreholes (referred to herein as BH101 and 102, 201 to 203) were advanced to a maximum depth of 22.9 mbgs on March 27 to 28, 2024 (BH101 and 102) and March 10 to 12, 2025 (BH201 to 203) and installed with monitoring wells except for BH203. ▪ The stratigraphic units encountered were an upper cohesionless glacial till consisting of sandy silt to silty sand at 147.0 masl, a sands and silts unit

	encountered at 143.2 masl, and a lower glacial till consisting of silty sand encountered at 134.5 masl. ▪ The design groundwater table was determined to be at 133.0 masl (13.6 mbgs) and expected to flow south towards Lake Ontario.

Title	Asbestos Reassessment, 1315 Silver Spear Road, Mississauga, Ontario
Report Date	October 26, 2023
Prepared By	Pinchin Ltd.
Prepared for	Starlight Group Property Holdings Inc.
Description of Data, Analysis or Findings	▪ An asbestos reassessment was conducted to meet the requirements of Section 8 of O.Reg. 278/05 "Designated Substance – Asbestos on Construction Projects and in Buildings and Repair Operations made under the Ministry of Labour's (MOL) Occupational Health and Safety Act (OHSA). ▪ The reassessment was limited to the specific areas and suites where asbestos-containing materials (ACMs) were identified during the Hazardous Building Materials Assessment conducted in 2017, as follows: o Chrysotile in vinyl floor tiles in suite 307, 405. ▪ ACMs were observed to be in fair or poor condition or as debris. ▪ The report recommended the following: o Perform detailed intrusive assessment and remove ACMs prior to future renovation or demolition o Update Asbestos Management program and Asbestos Inventory report o Perform reassessment on an annual basis

Title	Hydrogeological Investigation, 1315 Silver Spear Road, Mississauga, Ontario
Report Date	December 4, 2017
Prepared By	Terraprobe Inc.
Prepared for	Starlight Investments
Description of Data, Analysis or Findings	▪ Terraprobe was retained to assess the groundwater conditions and dewatering requirements for proposed construction activities ▪ Five (5) boreholes (referred to herein as TER-BH1 to 5) were advanced to a maximum depth of 12.6 mbgs on June 5 to 7, 2017 and three (3) monitoring wells (BH1, 2, and 4) installed. ▪ The stratigraphic units encountered were a cohesionless glacial till consisting of sandy silt to sand to 2.3 mbgs and a sand unit to 12.6 mbgs. ▪ The groundwater table was observed at 132 masl (15 m bgs) and expected to flow south towards Lake Ontario.

Title	Hazardous Building Materials Assessment, 1315 Silver Spear Road, Mississauga, Ontario
Report Date	June 21, 2017
Prepared By	Pinchin Ltd.
Prepared for	Starlight Group Property Holdings Inc.
Description of Data, Analysis or Findings	▪ The Hazardous Building Materials Assessment was prepared to fulfill Owner's requirements under Ontario Ministry of Labour (MOL) Regulation 278/05 (O.Reg 278/05) regarding asbestos and included additional hazardous materials (lead, silica, mercury, PCBs, and mold) to fulfill Section 30 of the Ontario OHSA, Revised Statutes of Ontario 1990. ▪ Assessed areas included parking garages, all accessible common areas, commercial retail units, and a representative number of tenant suites (5-10%). ▪ The findings included: ○ Asbestos-containing materials (ACMs) – confirmed in vinyl floor tile ○ Lead – insignificant concentrations noted ○ Silica –present in concrete, mortar, masonry, ceramics, grout, stone, and plaster ○ Mercury – vapour was present in fluorescent lamps ○ PCBs – present in caulking ○ Mold – not present

Title	Phase One Environmental Site Assessment, 1315 Silver Spear Road, Mississauga, Ontario
Report Date	June 15, 2017
Prepared By	Pinchin Ltd.
Prepared for	Starlight Group Property Holdings Inc.
Description of Data, Analysis or Findings	▪ The Phase One ESA was completed in support of filing a Site Plan Approval with the City of Mississauga. ▪ The Phase One ESA was generally completed in accordance with O. Reg. 153/04. ▪ At the time of the site inspection completed on May 25, 2017, the Property was occupied by an eight-storey residential building. The Property was reportedly heated by a natural gas-fired boiler system. ▪ The report included a brief summary of a 2011 Phase I and II ESA by CCI, 2012 Phase I ESA, and 2016 Phase I ESA update by Pinchin. There were no significant potential environmental concerns reportedly identified in any of the reports. ○ The CCI report flagged a Certificate of Approval (CofA) at 4005 Hickory Drive, located approximately 50 m north of the Property, for a mobile groundwater treatment system used for the collection, transmission, treatment and disposal of groundwater that had become contaminated with PHCs and PAHs. Therefore, two (2) boreholes (CCI-BH1 and 2) to a

	maximum depth of 11.6 mbgs were advanced along the north boundary to address potential contamination. ○ It should be noted that the CCI report compared analytical results to O.Reg. 511/09 Table 3 RPI CT standards, however, Pinchin concluded the soil and groundwater samples met applicable site condition standards for the property (O.Reg.153/04 Table 3 RPI CT). ○ **Grounded Comment:** The Phase I and II Environmental Site Assessments conducted by CCI in 2012 and 2016 Phase I Update by Pinchin were not provided to Grounded for review. ▪ The report noted regrading and minor fill placement may have previously occurred during initial development activities. ▪ There were no significant potential environmental concerns reportedly identified in the report.

Title	Phase I Environmental Site Assessment (ESA) Update and Phase II ESA, 1315 Silver Spear Road, Mississauga, Ontario
Report Date	September 21, 2011
Prepared By	Construction Control Inc.
Prepared for	CAP REIT Limited Partnership
Description of Data, Analysis or Findings	▪ The Phase I and II ESA was completed to support the environmental status of the subject property. ▪ The Phase I ESA was generally completed in accordance with CSA Standards Z769-00. ▪ At the time of the site inspection completed on February 7, 2007, the Property was occupied by an eight-storey residential building. The Property was reportedly heated by a natural gas-fired boiler system. ▪ The report included a brief summary of a 1999 and 2004 Phase I ESA by CCI. There were no significant potential environmental concerns reportedly identified in any report. ○ No evidence of USTs or ASTs were observed on site. ○ The 1999 ESA flagged suspected asbestos containing insulation in the boiler room. ○ The 2004 ESA confirmed the insulative material had been replaced with fibreglass insulation. ○ No indications of staining in or outside of the building. ○ A magnetic survey was conducted in June 1999 to confirm UST presence on site. The results showed no magnetic anomalies that resembled USTs. ○ **Grounded Comment:** The Phase I Environmental Site Assessments conducted by CCI in 1994 and 2004 were not provided ▪ It should be noted that there were no significant potential environmental concerns reportedly identified in the Phase I report. The Phase I update in 2011 flagged a mobile groundwater treatment system at 4005 Hickory Drive that was used to treat PHCs and PAHs based on the Environmental Registry containing a listing for a Certificate of Approval.

	▪ Two (2) boreholes (CCI-BH1 and 2) to a maximum depth of 11.6mbgs were advanced on September 2, 2011 along the north boundary to determine whether the PHC and PAH contaminated groundwater had migrated from 4005 Hickory Drive. ○ **Grounded Comment:** Neither Certificates of Analysis or a borehole location plan were provided as part of the report. ▪ Stratigraphy encountered included a sandy silt to sand till and a brown to grey clayey silt till. ▪ No odours, staining, or product were noted. ▪ There were no soil or groundwater exceedances against O.Reg. 511/09 Table 3 RPI CT. ○ **Grounded Comment:** When compared to O.Reg. 153/04 Table 3 RPI CT, there were no exceedances.

4.2 Environmental Source Information

The environmental sources listed below were searched as part of the Phase One ESA. A copy of the ERIS report is included in Appendix E and the regulatory information requests and responses are provided in Appendix F.

Source of Information	Response
Environmental Risk Information Services Ltd. (ERIS)	The ERIS report tabulates the results of a search of provincial, federal, and private source databases (as required by Paragraph 7, Section 3 (2) of O. Reg. 153/04), which are considered relevant in the identification of possible environmental risks. The ERIS Report identified no records of environmental interest pertaining to the Property and 50 records of environmental interest pertaining to properties within the Study Area. It should be noted that the ERIS report identified a 68L diesel fuel spill on September 26, 1991 at the intersection of Burnhamthorpe Rd W and Dixie Road. It was reported that no environmental impact was anticipated. Based on this and the age of the spill, it is the opinion of the QP that this minor historical spill does not result in a PCA.
Ministry of the Environment, Conservation and Parks (MECP) PCB Storage Sites and Waste Disposal Sites	The MECP PCB Storage Sites and Waste Disposal Sites were searched through ERIS database. There were no PCB Storage Sites or Waste Disposal Sites identified on the Property or within the Study Area.
Technical Standards and Safety Authority (TSSA)	A response from the TSSA indicated the following records related to fuel storage tanks were available in their database for adjacent properties. ▪ 1 active ASTs at 1279 Burnhamthorpe Road East, located 50 m north of the Property ▪ 5 active and 5 expired USTs at 4011 Dixie Road, located 205 m northeast of the Property The TSSA response and list of addresses searched is provided in Appendix F.

Source of Information	Response
Areas of natural significance maintained by the Ministry of Natural Resources	See Section 4.3.4 for details on the Natural Heritage Inventory.
Freedom of Information (FOI)	A response from the MECP to the FOI request has not been received as of the date of this report.

One site within the Study Area was identified to have a Record of Site Condition (RSC):

- 4005 Hickory Drive located 50 m north – RSC ID 12309. Commercial land use to Residential land use. File Date: 2007/03/29

The PCAs inferred in the Study Area from the review of the following environmental sources, if any, are summarized in Table 2.

4.3 Physical Setting Sources

The PCAs inferred in the Study Area during the review of the following physical setting sources, if any, are summarized in Table 2.

4.3.1 Aerial Imagery

Aerial photographs and satellite imagery were reviewed as part of the Phase One ESA. The developmental chronology of the Property and the Study Area is summarized below and presented in Appendix G.

Year	Source	Property	Study Area
1954	Mississauga Maps	The Property appeared to be undeveloped.	The surrounding area appeared to be used for agricultural purposes and developed with a few small buildings. Little Etobicoke Creek was located approximately 480 m to the west of the Property. Burnhamthorpe Road East was located immediately north of the Property.
1968	City of Toronto Aerial Photographs	No significant changes.	The area southwest of the Property appeared to be developed with residential houses and roads. The adjacent building southeast of the Property appeared to have been in construction. Silver Spear Road appeared to be present immediately south of the Property. An apparent gas station was located north of Burnhamthorpe Rd E and Dixie Rd.

Year	Source	Property	Study Area
1969	City of Toronto Aerials Photographs	The Property appeared to be developed with a residential building and parking lot, in similar configuration to present-day.	A high-rise residential building appeared to be located to the southeast of the Property.
1975	Mississauga Maps	No significant changes.	A commercial plaza appeared to be constructed northeast of Burnhamthorpe Rd E and Dixie Rd.
1985	Mississauga Maps	No significant changes.	The area north of Burnhamthorpe Rd E appeared to be developed with residential buildings. The Burnhamthorpe Library appeared to be constructed in similar configuration to present-day.
1995	Mississauga Maps	No significant changes.	No significant changes.
2005	Mississauga Maps	No significant changes.	The gas stations located north of Burnhamthorpe Rd E and Dixie Rd appeared in similar configuration to present-day.
2013	Mississauga Maps	No significant changes.	No significant changes.
2023	Mississauga Maps	No significant changes.	No significant changes.

4.3.2 Topography, Hydrology, Geology

The MNRF and MNDM database were searched to obtain topographic and geological maps of Ontario for review. The maps are provided in Appendix H and the information obtained is summarized below:

Physiographical Records	Information
Topographic Maps	The approximate elevation of the Property is 145 mASL and is relatively flat, with a slight slope towards the west.
Hydrological Maps	The nearest body of water is Little Etobicoke Creek, located approximately 480 m to the west of the Property. Lake Ontario is located approximately 6.5 km south of the Property. Surface water flow is expected to flow to the municipal catch basins located on the Property or the adjacent roadways. Groundwater is expected to flow south/southwest, towards Little Etobicoke Creek, and ultimately south to Lake Ontario.

Physiographical Records	Information
Geological Maps	Overburden: Late Wisconsinan Halton Till, comprised of clayey silt to silt. Bedrock: Georgian Bay Formation comprised of shale, limestone, dolostone, and siltstone. Depth to Bedrock: Bedrock was not encountered during the subsurface investigations but was inferred during the 2024 Grounded investigation. Based on the 2024 investigation, bedrock was inferred at 23 mbgs and well records indicated bedrock at an approximate depth of 20 mbgs.

4.3.3 Fill Materials

It is possible that historical fill of unknown quality was imported to the Property during development for backfilling and regrading in the late 1960s.

4.3.4 Water Bodies, Areas of Natural Significance and Groundwater Information

Maps from MNRF were reviewed to determine if water bodies were present on the Property and within the Study Area. The MNRF Natural Heritage Information Centre database for ANSIs was also reviewed as part of the Phase One ESA. The maps are provided in Appendix H and the information is summarized below:

Conservation Authority	A response from the Toronto and Region Conservation Authority indicates that the Property is located within its jurisdiction, but does not fall within a regulated area.
Water Bodies	**Property:** ▪ There are no water bodies located on the Property. **Study Area:** ▪ There are no water bodies located within the Study Area.
Wetlands	**Property:** ▪ There are no Provincially Significant, Non-Provincially Significant, or Unevaluated wetlands located on the Property. **Study Area:** ▪ There are no Provincially Significant, Non-Provincially Significant, or unevaluated wetlands located within the Study Area.

ANSIs	List of ANSIs searched: ▪ An area reserved or set apart as a provincial park or conservation reserve under the *Provincial Parks and Conservation Reserves Act*, 2006. ▪ An area of natural and scientific interest (life science or earth science) identified by the Ministry of Natural Resources as having provincial significance. ▪ A wetland identified by the MNRF as having provincial significance. ▪ An area designated by a municipality in its official plan as environmentally significant, however expressed, including designations of areas as environmentally sensitive, as being of environmental concern and as being ecologically significant. ▪ An area designated as an escarpment natural area or an escarpment protection area by the Niagara Escarpment Plan under the *Niagara Escarpment Planning and Development Act*. ▪ An area identified by the MNRF as significant habitat of a threatened or endangered species. ▪ An area which is habitat of a species that is classified under section 7 of the *Endangered Species Act*, 2007 as a threatened or endangered species. ▪ Property within an area designated as a natural core area or natural linkage area within the area to which the Oak Ridges Moraine Conservation Plan under the *Oak Ridges Moraine Conservation Act*, 2001 applies. ▪ An area set apart as a wilderness area under the *Wilderness Areas Act*. **Property:** ▪ There were no ANSIs located on the Property. **Study Area:** ▪ There were no ANSIs identified wholly or partly within the Study Area.
Well-Head Protection Area	The Property is not located within an area designated in the official plan of the municipality as a well-head protection area or another area designated in the official plan as an area for the protection of groundwater.
Municipal Drinking Water System	The Property and the properties within the Study Area are supplied by a municipal drinking water system, as defined in the Safe Drinking Water Act, 2002.
Potable Wells	There are no wells on the Property or within the Study Area that supplies water used for human consumption or an agricultural use. There was a domestic well noted in the well records but upon review, the well was registered in 1966 and is likely no longer used for human consumption.

4.3.5 Well Records

The MECP well records database was accessed online and through ERIS search. The well records located on the Property and in the Study Area were identified. The comprehensive well record is provided in Appendix I and is summarized below:

Well Records	**Property:** ▪ Several monitoring wells from previous investigations were identified on the Property. **Study Area:** ▪ Four (4) monitoring wells, one (1) municipal well, one (1) domestic well, thirteen (13) unknown use wells were identified in the Study Area.

Stratigraphy	▪ 0 to 3 mBGS – brown gravel fill ▪ 3 to 12 mBGS – brown sand
Depth to Bedrock	Bedrock was encountered at approximately 20 mBGS.
Depth to the Water Table	Approximately 14.8 mBGS

5 Site Operating Records

There were no site operating records provided or available for review.

6 Interviews

Interviewee(s)	Danilo Eda, MetCap Living Resident Manager
Date of Interview	June 30, 2025
Location and Methods of Interview	In person
Justification for Selection	Mr. Eda has been a resident manager for this Property for over 7 years.

Relevant Information concerning Potentially Contaminating Activities	▪ Current operations at the Property include residential use
	▪ The Property has been used as a residential apartment for at least 30 years
	▪ To their knowledge the Property has not been used, past or present, for:
	  ○ industrial operations
	  ○ on-site dry cleaning,
	  ○ fuel distribution or storage,
	  ○ vehicle servicing and/or maintenance
	▪ No bulk storage of chemicals or hazardous products at the Property.
	▪ No knowledge of existing or historical underground/above grade tanks.
	▪ Property is not considered a waste generator with the MECP.
	▪ Property not a registered PCB storage facility .
	▪ No knowledge of spills or leaks of any kind at the Property.
	▪ No knowledge of wastewater produced at the Property.
	▪ No knowledge of air emissions produced at the Property.
	▪ No knowledge of any public agency investigations at the Property.

Assessment of the Validity of Information from Interviewee	The information gleaned from the interviewee was consistent with the background information reviewed as part of this Phase One ESA.

The PCAs inferred from the interview(s) conducted for the Property, if any, are summarized in Table 2.

7 Site Reconnaissance

A site reconnaissance of the Property consisted of detailed non-destructive visual assessment of the Property including exterior and interior portions of any existing buildings on-site, documentation of any areas of potential environmental concern and illustration of relevant structures. Property features are displayed in Figure 2 and site photographs are presented in Appendix J. The results of the site reconnaissance are provided below.

The PCAs inferred in the Study Area during the site reconnaissance, if any, are summarized in Table 2.

7.1 General Requirements

Date and Time of Investigation	11:30 am, June 30, 2025
Weather Condition	Sunny, 28 ˚C
Duration of Investigation	3 hours
Was the Facility Operating at the Time of Investigation?	Yes, operating as a residential apartment building.
Name and Qualifications of the Person Conducting the Investigation	Vivi Tran, EIT

7.2 Specific Observations at Phase One Property

One (1) building with a separated underground parking facility was observed on the Property. The building was built in 1969.

7.2.1 General Description

Building	1315 Siver Spear Road
GENERAL DESCRIPTION	
Above Grade Levels	8
Below Grade Levels	None
Building Use	Residential apartment

Building	1315 Siver Spear Road
Exterior Building Construction	Framing – Metal and concrete block brick Roof – Modified bitumen
Interior Building Construction	▪ Floors – Carpet, vinyl tile, ceramic tile and poured concrete ▪ Walls – Drywall, plaster, ceramic tiles, concrete block and poured concrete ▪ Ceilings – Drywall, plaster, suspended ceiling tiles, poured concrete and open web steel joist ▪ Lighting – Fluorescent and incandescent
Above Ground Storage Tanks (AST)	No obvious visual evidence of aboveground storage tanks (AST) were observed at the Property during the site visit.
Underground Storage Tanks (UST)	No obvious visual evidence of underground storage tanks (UST) were observed at the Property during the site visit.
Potable and Non-potable Water Sources	There were no water wells observed on the Site.
UNDERGROUND UTILITIES	
Hydro	Buried hydro entered the Property from the south via Silver Spear Rd. A pad-mounted transformer, likely non-PCB containing based on age, was observed on the southwest portion of the Property.
Gas	Gas line entered the Property via from the south via Silver Spear Rd.
Communication	Buried communication line entered the Property from the north via Burnhamthorpe Rd.
Electrical/Outdoor Lighting	Within the site, there were electrical lines underground that support outdoor lighting.
Storm Sewer	Catch basins were observed on the Property and along the Property boundary.
Sanitary Sewer	Manholes were observed along the Property boundary.
Water Source	The Property is serviced with Municipal water.
FEATURES AND STRUCTURES OF ON-SITE BUILDINGS	
Entry/Exits	Main entry/exit door was observed along the south side of building.
Heating & Cooling Systems	Natural gas-fired HVAC unit, baseboard heaters, AC window units and radiators.
Drains, Pits, Sumps Observed	Floor drains were observed in the compactor and laundry room.

Building	1315 Siver Spear Road
Unidentified Substances (Inside Buildings)	No evidence of unidentified substances that could influence the environmental conditions at the Site was observed.
Staining and Corrosion	Signs of corrosion were observed on the floors of the compactor room and boiler room. The corrosion is not considered to be a potentially contaminating activity.

EXTERIOR FEATURES	
Wells	Seven (7) monitoring wells from previous investigations were observed on the Property.
Sewage Works	Property was serviced by municipal sewage works. No other sewage works were observed.
Ground Surface	The ground surface of the Site is predominantly covered with asphalt-surfaced parking and landscaped areas.
Railway Lines and Spurs	No railway lines or spurs were present on-Site or within the Study Area.
Stained Soil, Vegetation or Pavement	No stained soil, vegetation or pavement were observed at the Site.
Stressed Vegetation	No stressed vegetation was observed at the Site.
Areas where fill and debris materials appear to have been placed or graded	No evidence of fill and/or debris materials placed or graded at the Site.
Unidentified Substances (Outside Buildings)	No evidence of unidentified substances that could influence the environmental conditions at the Property was observed.

7.2.2 Enhanced Investigation Property

The Property is not considered to be an Enhanced Investigation Property.

7.3 Investigation of the Phase One Study Area

The site investigation includes an inspection of the Study Area (Study Area). The adjacent properties were identified below during the investigation.

Relative Direction	Adjacent Property Use	Study Area		
		Water Wells	Water Bodies	ANSI
North	Community (Burnhamthorpe Rd), followed by Residential (residential apartments and single-family homes), followed by parkland (Golden Orchard Park)	Serviced by a municipal drinking water system	None Observed	None Observed
South	Community (Silver Spear Rd), followed by Residential (residential apartments and single-family homes)	Serviced by a municipal drinking water system	None Observed	None Observed
West	Institutional (Burnhamthorpe Library), followed by Commercial (including retail fuel outlets at 1349 Burnhamthorpe Rd and 4011 Dixie Rd) and automotive service centre (Jiffy Lube)	Serviced by a municipal drinking water system	None Observed	None Observed
East	Residential (residential apartments and single-family homes)	Serviced by a municipal drinking water system	None Observed	None Observed

7.4 Written Description of Investigation

The qualified person confirms that the investigations carried out pursuant to sections 13 and 14 of O. Reg. 153/04. The details of each investigation and any findings that are relevant to the existence of an area of potential environmental concern are provided in Table 2 and in the above sections.

8 Review and Evaluation of Information

Through the evaluation of the Phase One records review, operating records for the Property (if available), information gleaned from interviews, and the observations from the site reconnaissance, we provide the following summary of:

- the current and historical uses of the Property
- potentially-contaminating activities identified on-site and within the Study Area
- resulting areas of potential environmental concern at the Property

This information is synthesized into the Phase One Conceptual Site Model.

8.1 Current and Past Uses

A Table of Current and Past Uses of the Property, in a form approved by the Director with description of the current and past uses of the Property back to its first developed use, is provided in Table 1.

8.2 Potentially Contaminating Activity

PCAs identified on the Property or in the Study Area are summarized in Table 2 and a rationale for whether each PCA contributes to an APEC is also provided in Table 2, attached and its approximate location is shown on Figure 4.

8.3 Areas of Potential Environmental Concern

Based on review of the PCAs and site conditions, one or more PCAs are contributing to on-Site APECs. A table of Areas of Potential Environmental Concern in a form approved by the Director is provided in Table 3 and shown on Figure 5.

8.4 Phase One Conceptual Site Model

Through analysis and interpretation of available information gathered during the Phase One ESA, a CSM was developed for the Phase One Property, which is provided in Appendix K.

9 Conclusions

As there no change in land use to more sensitive land use, a RSC is not required per Section. 168.3.1 (1) (b) of the Act, Part IV Section 14 of O.Reg. 153/04.

It is understood that the site will undergo peer review to support the 0.92 m wide land conveyance at the north boundary of the Property. The Phase One ESA was conducted to support compliance with municipal policy for accepting conveyance lands.

Based on the Phase One ESA, APEC-causing environmental concerns were limited to potential use of fill and de-icing activities. Given the groundwater was identified beyond 12 mbgs, an RSC is not required for the Property and based on the low environmental concerns identified onsite, it is recommended that a limited investigation to assess if the soils within the conveyance lands have been impacted by the onsite PCAs be completed.

9.1 Signatures

The Phase One ESA was conducted by Sydney Ng, B.A.Sc., under the supervision of Suvish Melanta, P.Eng., QP_{ESA}. The Phase One ESA has been conducted in accordance with Ontario Regulation 153/04.

We trust that this report meets your requirements.

For and on behalf of our team,

GROUNDED ENGINEERING

Sydney Ng, B.A.Sc.

11 Limitations and Restrictions

The assessment should not be considered a comprehensive investigation that eliminates all risks of encountering environmental problems. The information presented in this report is based on information collected during the completion of the Phase One Environmental Site Assessment by Grounded Engineering Inc. It was based on the conditions on the Phase One Property at the time of the site inspection supplemented by a review of historical information to assess the environmental conditions regarding the Phase One Property.

The Report is time-dependent. The Report was prepared on the date noted above and is representative of conditions at that time. We have not inspected site conditions since that date. We cannot comment and make no representations regarding any other changes that may have occurred to the site or surrounding lands, and the impact that these changes may have had on the condition of the property, and/or the conclusions and recommendations of the Report. No use or reliance upon the report shall occur after 12 months from the date of the Report.

Sampling and analysis of soil, groundwater or any other material was not carried out as part of the Phase One Environmental Site Assessment. As a result, the presence and/or extent of any adverse environmental impact cannot be confirmed. The potential for environmental liability and/or environmental impact is an opinion as a result of the scope of this assessment.

In assessing the environmental conditions and history of the Phase One Property, Grounded Engineering Inc. has relied on information provided by others, as noted in this report, and has assumed that the information provided by those individuals is factual and accurate. Grounded Engineering Inc. accepts no responsibility for any deficiency or inaccuracy in this report resulting from the information provided by those individuals.

If new information regarding the environmental condition of the Phase One Property is identified during future work, or outstanding responses from regulatory agencies indicate outstanding issues on file with respect to the Phase One Property, Grounded Engineering Inc. should be notified so that we may re-evaluate the findings of this assessment and provide amendments.

The authorized user of this report is Starlight Investments CDN AM Group GP LP, for whom this report has been prepared. Grounded Engineering Inc. maintains the copyright and ownership of this document. Reproduction of this report in any format or medium requires explicit prior authorization from Grounded Engineering Inc.

TABLES

TABLE 1: 13326-0009 (LT)
CURRENT AND PAST USES OF THE PHASE ONE PROPERTY
(Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Prior to 1810	Crown	Undeveloped, likely agricultural	Agriculture or Other	No further information available
1810 to 1811	Abraham Markle	Undeveloped, likely agricultural	Agriculture or Other	No further information available
1811 to 1828	Levi Lewis	Undeveloped, likely agricultural	Agriculture or Other	No further information available
1828 to 1828	Daniel Lewis	Undeveloped, likely agricultural	Agriculture or Other	No further information available
1828 to 1839	Levi Lewis	Undeveloped, likely agricultural	Agriculture or Other	No further information available
1839 to 1860	Abraham Markle	Undeveloped, likely agricultural	Agriculture or Other	No further information available
1860 to 1892	William T. Shaver	Undeveloped, likely agricultural	Agriculture or Other	No further information available
1892 to 1907	Thomas Pallett	Undeveloped, likely agricultural	Agriculture or Other	No further information available
1907 to 1944	Arthur P. Pallett	Undeveloped, likely agricultural	Agriculture or Other	No further information available
1944 to 1959	James Oliver Pallett	Undeveloped, likely agricultural	Agriculture or Other	1954 AP - the Property appeared to be undeveloped and likely used for agricultural land.
1959 to 1963	A. Phenix & Sons Limited	Undeveloped, likely agricultural	Agriculture or Other	No further information available
1963 to 1969	Applewood Dixie Limited	Undeveloped, likely agricultural	Agriculture or Other	1968 AP - the Property appeared to be undeveloped and likely used for agricultural land.
1969 to 1969	Corby Realty Limited	Residential apartment building	Residential	1969 AP - the Property appeared to be developed with a residential apartment building.
1969 to 1975	Lyncrest Construction Company Limited	Residential apartment building	Residential	1970 PUR - the Property appeared to be constructed in similar configuration to present-day and reportedly a residential apartment building. 1970-1971 CD - the Property has multiple individual residential entries, indicating a multi-unit residential building.
1975 to 1999	Fair Rays Development Co. Ltd.	Residential apartment building	Residential	1975 AP - the Property appeared to be developed with a residential apartment building. 1975 CD - the Property has multiple individual residential entries, indicating a multi-unit residential building. 1981 CD - the Property has multiple individual residential entries, indicating a multi-unit residential building. 1985 AP - the Property appeared to be developed with a residential apartment building. 1985 CD - the Property has multiple individual residential entries, indicating a multi-unit residential building. 1991 CD - the Property is registered as "Multi Tenant Residential". 1994 PUR - the Property was reportedly an eight-storey apartment building. 1995 AP - the Property appeared to be developed with a residential apartment building. 1996 CD - the Property is registered as "Multi Tenant Residential".
1999 to 2000	1315 Silver Spear Road Inc.	Residential apartment building	Residential	No further information available
2000 to 2012	Capreit Apartments Inc.	Residential apartment building	Residential	2001 CD - the Property has multiple individual residential entries, indicating a multi-unit residential building. 2005 AP - the Property appeared to be developed with a residential apartment building. 2008 CD - the Property has multiple individual residential entries, indicating a multi-unit residential building.
2012 to Present	IMT 1315 Silver Spear Ltd.	Residential apartment building	Residential	2012 CD - the Property was registered under "Canadian Apartment Mgmt". 2013 AP - the Property appeared to be developed with a residential apartment building. 2017 CD - the Property was registered under "Canadian Apartment Mgmt" and "Starlight IMH". 2021 CD - the Property was registered under "Starlight IMH". 2023 AP - the Property appeared to be developed with a residential apartment building. 2023-2024 CD - the Property was registered under "Starlight IMH" and included multiple residential entries, indicating a multi-unit residential building.

Notes:
AP is aerial photograph
CD is city directory
PUR is property use report
For each owner, specify one of the following types of Property Use (as defined in O.Reg. 153/04) that applies:

TABLE 2:
SUMMARY OF POTENTIALLY CONTAMINATING ACTIVITIES WITHIN PHASE ONE STUDY AREA
(Refer to Table 2, Schedule D, O. Reg. 153/04)

Location of PCA	Figure 2/4 Legend	PCA	Leads to an APEC?	Source	Description	Rationale
Phase One Property	30 A	30 - Importation of Fill Material of Unknown Quality	Yes (APEC 1)	Aerials	Based on aerial photographs showing development activities in the late 1960s, it is likely that fill of unknown quality was brought onto the Property for grading and backfill purposes.	Due to the unknown quality of the fill material, it is the opinion of the QP that this PCA results in an APEC.
Phase One Property	Other1 A	Other1 - De-Icing	Yes (APEC 2)	Site Visit	The Property is bound by municipal roadways (Burnhamthorpe Rd E to the north and Silver Spear Rd to the south). The roadways have public sidewalks between the road and Property boundary. As well, the Property has a parking lot on the north portion. During the winter months, a de-icing substance (salt) may have been applied to the parking lot, surrounding roads, and sidewalks for safety purposes.	Due to the ongoing application of salts on and around the Property and the deep groundwater table, it is the opinion of the QP that this PCA results in an APEC that only affects soil.
Phase One Property	55 A	55 - Transformer Manufacturing, Processing and Use	No	Site Visit	A pad-mounted transformer was observed at the southwest corner of the Property. No staining was observed and the transformer and pad were in good condition.	Due to the pad and transformer being in good condition with no record of spills, it is the opinion of the QP that this PCA does not result in an APEC.
1279 Burnhamthorpe Road East 50 m north	Other2 A	Other2 - Spills	No	ERIS	The ERIS report indicated a 120L diesel spill to the roadway and catch basin on July 25, 2016. It was noted the spill was contained and cleaned.	Due to the cross gradient location and the spill being contained and cleaned, it is the opinion of the QP that this PCA does not result in an APEC.
1279 Burnhamthorpe Road East 50 m north	28 A	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	Other Records	TSSA records indicated an active AST.	Due to the cross gradient location, it is the opinion of the QP that this PCA does not result in an APEC.
3621 Beechollow Crescent 56 m south	Other2 B	Other2 - Spills	No	ERIS	The ERIS report indicated a 161L spill of 50ppm PCB transformer oil on July 31, 2018 due to Alectra Utilities equipment failure and was considered a minor environmental impact.	Due to the downgradient location and minor environmental impact, it is the opinion of the QP that this PCA does not result in an APEC.
1276 Silver Spear Road 62 m west	Other2 C	Other2 - Spills	No	ERIS	The ERIS report indicated a 207L PCB transformer oil spill on July 31, 2018 due to Alectra Utilities equipment failure.	Due to the downgradient location, it is the opinion of the QP that this PCA does not result in an APEC.
1349 Burnhamthorpe Road East 90 m northeast	28 B	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	CD Previous Reports ERIS Site Visit	The ERIS report indicated four double-walled gasoline USTs total ranging from 35,000L to 100,000L in volume. There were also records of five expired 22,700L gasoline USTs installed in 1978. City Directory confirmed Shell has been registered from 1981 to 2024.	Although the gas station boundary is 90 m away, the tanks were observed to be around 160 m northeast of the Property. CCI also advanced boreholes along the north boundary in the Phase II ESA and Pinchin confirmed that there were no soil or groundwater exceedances against Table 3 RPI CT in the Phase One ESA. Due to the distance, the deep groundwater table, and the testing completed by CCI and confirmed by Pinchin, it is the opinion of the QP that this PCA that this PCA does not result in an APEC.
3615 Dixie Road 185 m east	37 A	37 - Operation of Dry Cleaning Equipment (where chemicals are used)	0	CD ERIS	The ERIS report indicated 1400kg of PERC discharged from Courtesy Cleaners from 2004 to 2013. City Directory indicated Courtesy Cleaners at 3621 Dixie Road which is in the same plaza as 3615 Dixie Road and is considered the same property. Dixie Dry Cleaners was also registered at 3615 Dixie Road from 2021-2024.	Due to the distance and cross gradient location, it is the opinion of the QP that this PCA does not result in an APEC.
3659 Dixie Road 190 m east	28 C	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	CD ERIS Site Visit	The ERIS report indicated five 22,730L gasoline tanks installed in 1985 but expired in 1996.	Due to the distance and cross gradient location, it is the opinion of the QP that this PCA does not result in an APEC.
4011 Dixie Road 205 m northeast	28 D	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	CD ERIS Other Records Site Visit	The ERIS report indicated three 46,419L double-walled gasoline USTs installed in 1998. There were also records of four expired 10,000L USTs installed in 1989. Multiple entries were registered under Retail Fuel Storage Tanks but this was likely due to various owners registering the same tanks. City Directory indicated a service station was registered from 1970-2017. TSSA also confirmed 5 active USTs. The site visit confirmed the presence of USTs.	Although the gas station boundary is 190m away, the tanks were observed to be around 225m east of the Property. CCI also advanced boreholes along the north boundary in the Phase II ESA and Pinchin confirmed that there were no soil or groundwater exceedances against Table 3 RPI CT in the Phase One ESA. Due to the distance, the deep groundwater table, and the testing completed by CCI and confirmed by Pinchin, it is the opinion of the QP that this PCA that this PCA does not result in an APEC.
3576 Beechollow Crescent 215 m south	Other2 D	Other2 - Spills	No	ERIS	The ERIS report indicated a 155L spill of 50ppm PCB transformer oil on July 31, 2018 due to Alectra Utilities equipment failure.	Due to the downgradient location, it is the opinion of the QP that this PCA does not result in an APEC.

TABLE 3:
TABLE OF AREAS OF POTENTIAL ENVIRONMENTAL CONCERN
(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1	Entire Property	30 Importation of Fill Material of Unknown Quality	Onsite	Metals As, Sb, Se B-HWS CN- Cr(VI) Hg PAHs PHCs BTEX VOCs	Soil*
APEC 2	Entire Property	Other1 De-Icing	Onsite	EC SAR	Soil*

** Due to depth of groundwater identified beyond 12 mbgs, only soil is expected to be the media of impact*

Notes:
1 - Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,
(a) identification of past or present uses on, in or under the phase one property, and
(b) identification of potentially contaminating activity.
2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area
3 - when completing this column, identify all contaminants of potential concern using the Method Groups as identified in the Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs	Metals
CPs	As, Sb, Se
1,4-Dioxane	Na
Dioxins/Furans, PCDDs/PCDFs	B-HWS
OCs	Cl-
PHCs	CN-
PCBs	Electrical Conductivity
PAHs	Cr (VI)
THMs	Hg
VOCs	Methyl Mercury
BTEX	Low or high pH,
Ca, Mg	SAR

4 - when submitting a record of site condition for filing, a copy of this table must be attached

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Verisk's records relating to the described property (hereinafter referred to as the "Property"). Verisk makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Verisk's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Verisk does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Verisk disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Verisk Reports or from any tortious acts or omissions of Verisk's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Reference No. 10400088 / Building No. 01 ENTIRE BUILDING

(Surveyed By P.C. TOMLINSON on 94.09.29)

Please note that the information contained in this report was gathered during a physical inspection of the risk by an IAO Loss Control Representative.

If you wish to obtain building or contents rates for this risk, please refer to the Rate Card in the list of products available for this risk. Please call the IAO Help Desk or your local IAO Representative for help in obtaining a rate for this risk, or do it yourself by going to www.iao.ca and using the New X-rate to generate a new rate yourself.

IAO reports, prepared in compliance with commonly accepted risk control standards existing at the time services are rendered, are developed from an inspection of the premises and/or from data supplied by or on behalf of the Purchaser. IAO does not purport to list all hazards. While changes and modifications referred to in the reports are designed to upgrade protection and loss prevention of the premises, IAO assumes no responsibility for management and control of these activities. IAO will not be responsible to the Purchaser for any loss or damages, whether consequential or other, however caused, incurred or suffered, as a result of the service being provided.

------ CODING ------

Industry Code: 653 - Apartment Houses (10 storeys or less) - No Mercant
Construction Code: 1 - Fire Resistive
Risk Classification: NS - Non-Sprinklered
Protection Code: 1 - Non-Sprinklered, Fully Prot, Gr 1-2
Combustibility L2

------ BRIEF DESCRIPTION ------

THIS IS A 8 STOREY FIRE RESISTIVE BUILDING
WITH NO BASEMENT, OCCUPIED AS A 90 UNIT
APARTMENT BUILDING. EXP. N/C. MUNICIPAL
PROTECTION IS STD FOR FUS CLASS 2. PRIVATE
PROTECTION IS STD. HOUSKEEPING IS GOOD.
CIRCUIT BREAKERS ARE USED.

------ COMMENTS ------

THIS RISK IS AVERAGE IN CLASS
DESIRABLE IMPROVEMENTS: NONE.

CONSTRUCTION OF BUILDING

1. **TYPE OF CONSTRUCTION - Floors & Roof Carried on:**

(a) Skeleton Steel Framework	☑	(d) Bearing Walls & Steel Columns	☐
(b) Reinforced Concrete, Framework	☐	(e) Steel on Steel Walls & Roof	☐
(c) Bearing Walls & Partitions	☐	(f) Other Construction	☐

(Describe fully)

2. **WALLS** – State construction of external walls. HOLLOW TILE + [redacted] Cover.

If bearing walls give thickness of walls in inches at each floor 14"

3. **ROOF AND FLOOR — Materials**

Roof ☑	Floors ☑	(a) Concrete, reinforced – Poured in place 12 inches thick
Roof ☐	Floors ☐	(b) Concrete, on metal pan – Poured in place inches thick
Roof ☐	Floors ☐	(c) Concrete, Precast Units inches thick (Name of Manufacturer)
Roof ☐	Floors ☐	(d) Steel Deck, Construction #1 ☐ Otherwise ☐

If Construction #1 State method of attaching insulation to steel deck
Mechanical Fasteners ☐ Adhesive ☐ Otherwise ☐

If adhesive state trade name

Roof ☐ Floors ☐ (e) Other Materials – Describe and Show Thickness

(over)

ROOF AND FLOOR — Method of support

Roof ☐	Floors ☐	(a) Unprotected Steel Beams.
Roof ☐	Floors ☐	(b) Steel Beams Protected by ..... inches of .....
Roof ☐	Floors ☐	(c) Reinforced Conc. Beams – Poured in place.
Roof ☐	Floors ☐	(d) Precast Concrete Structural Units ..... inches thick ..... (Name of Manufacturer)
Roof ☐	Floors ☐	(e) Bearing Walls Only. No Supporting Steel.

If building is composed of more than one type of construction, identify sections of floor involving each type and indicate on plan.

(a) Is there any roof space exceeding 3 feet in height? No If so, for what purpose is it used?

How is access obtained thereto? If by trap or door, describe type

(b) Are all skylights of wired glass in metal frames? —

(c) Is there any wood in roof, louvres, ventilators or skylights; if so give details —

(d) Is there a wood roof laid over an incombustible one? — If so, how is it supported?

(e) If so, what is the maximum and minimum height of this above the incombustible roof? —

(f) Is the incombustible roof broken by texas, louvres, ventilator, trapdoor, skylight, stair, elevator, other shafts? —

Is so, what is the construction of the sides through roof space?

Is there any access or opening from these shafts to the roof space? Describe each separately.

(g) Is there a superstructure, water cooling tower, or Penthouse of any kind on the roof? YES. If so, given dimensions, construction and occupancy 200 SF

How is access obtained? Door on Roof.

(h) Is there a wood wearing floor? No If so, on which storeys?

(i) Is it laid directly on incombustible floor or with an airspace? Describe

4. **STEEL COLUMNS AND BEAMS** – Are they fireproofed? No If "Yes" state nature and thickness of such protection.

(a) Columns

(b) Beams.

FLOOR OPENINGS

5. **STAIRWAYS** – How many, and state from which floor to which? 3 FROM 1 TO 8

Is there an enclosure around them? YES If so, describe construction of enclosure, and the doors, and whether doors are self-closing MASONRY SHAFT UNLISTED BUT EFFECTIVE S.C F.D.

6. **ELEVATORS** – How many, and state from which floor to which? 2 FROM 1 TO 8

Is there an enclosure around them? YES If so, describe construction of of enclosure, and the doors, and whether doors are self-closing MASONRY SHAFT S.C. METAL DOORS.

7. **CHUTES, VENTS, DUMB WAITERS & BELT HOLES & OTHER FLOOR OPENINGS** – Give size, construction of enclosure (if any), type of door (if any), and whether self-closing, stating which floors are cut by each —

8. **HEATING AND VENTILATING DUCTS** – Are there any? No (a) Are ducts, which cut through floor, in masonry shafts

(b) Give construction of shaft (c) State whether separate duct to each floor without communication to other floors

(d) Do ducts open into roof space?

9. **HEIGHT** – State number of floors and whether there is a basement 8 STOREYS No BT.

10. **AREA** – Give ground floor dimensions 10,000 Sq Ft.

11. **INTERIOR FINISH –**

State separately for each floor, finish and method of attachment to walls and ceiling (If more than one type of finish is present on any one floor, state percentage of each type).

	Bast.	1st	2nd – 8th.	3rd	4th	5th	6th	
(a) Walls		P/B [redacted]	P/B					
(b) Ceilings		Conc.	Conc.					
(c) Partitions		HCB MLP	HCB MLP.					

State extent of any wood partitions, or partitions having wood supports in square feet separately for each floor:– —

(d) Is there any other inside or outside combustible finish or trim other than above? Describe fully —

12. **HEATING** – What is the system of heating the building? H.W. Where is heating plant located? ~~F.R~~ 1ST STY.

Is it in fire-resistive room with standard fire door? YES. Are there any stoves; if so, how many and where located No.

Do any heating devices vent otherwise than to brick or concrete chimney; if so, give details METAL INSUL. [redacted]

What fuel is used? GAS.

13. **ELECTRIC WIRING** – All wiring is in Rigid Conduit ☐ Otherwise ☑ B.X.

Are all circuits protected by type "S" tamper resisting fuses or non-interchangeable circuit breakers? YES.

14. **POWER** – Is any used? YES If so, what kind? ELECT. Total Horse Power? 2 - 3 HP MTRS

What used for? WATER PUMPS

If gasoline engine, state method of ignition, location and capacity of supply, tank, whether feed is pressure or gravity, quantity of gasoline in engine

15. **GASOLINE OR BENZINE, OR OTHER OILS** – Are any kept? If so, what quanity of each?

What used for?

16. **COMMUNICATIONS** – Does the building communicate with any other building No. (a) If so, give dimensions, height, construction and occupancy and indicate clearly on diagram

(b) If so, are buildings separated by solid wall? (c) If so, are all openings in this wall protected by self-closing U.L. labelled Class A fire doors?

(d) If not, describe type of doors on each opening

PUBLIC PROTECTION

17. **FIRE DEPARTMENT** – State distance to the nearest fire station ½ MILE

18. **HYDRANTS** – What is the distance to the nearest two hydrants? 20' + 250' Give size of main 8"

INTERNAL PROTECTION

19. Show number units for each floor:

	Basement	1st	2nd	3rd	4th	5th	6th	7th	8th	
Extgrs. 2½ Gal. Class A	—	3-2A	3-2A	3-2A	3-2A	3-2A	3-2A	3-2A	3-2A	
Extgrs Class B & C	—	1-4BC	—	—	—	—	—	—	—	
Stand Pipe & Hose	—	3	3	3	3	3	3	3	3	3

20. **WATCHMAN** – Is there a Watchman making rounds of the whole premises, nights, Sundays, holidays, and at all times when plant is not in operation, rounds being made not less than once an hour during the night, i.e. from 6 p.m. to 6 a.m., and every two hours during the day?

(a) Does he use a portable clock, electric detector, or report to central station?

(b) Give name of manufacturer of clock (c) Does it bear approval label of Underwriters' Laboratories

(d) Are the stations sufficient and so located that the Watchman must traverse each flat and every portion be visible to him?

21. **AUTOMATIC FIRE DETECTION SYSTEM** – If such system is present provide details on questionnaire obtainable from Canadian Underwriters' Association.

Manually operated Fire Alarm [redacted] UL listed equipment

RE: CITY DIRECTORY RESEARCH
1315 Silver Spear Rd
Mississauga,ON L4Y 2X1

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

ALL of Beechollow Crescent
1090-1420 of Burnhamthorpe Road E
3530-4090 of Dixie Road
ALL of Gulleden Drive
4000-4100 of Hickory Drive
ALL of Logmoss Crescent
ALL of Scottsburg Crescent
ALL of Silver Spear Road
ALL of Tynegrove Road
1350-END of Winding Trail

Search Notes:

Burnhamthorpe Road E is also known as 1090-1420 Burnhamthorpe Road E in Cooksville. Burnhamthorpe Road E is also known as 1090-1420 Burnhamthorpe Road E in Islington. Burnhamthorpe Road E is also known as 1090-1420 Burnhamthorpe Road E in Malton. Hickory Drive is also known as 4000-4100 Hickory Drive in Cooksville. Hickory Drive is also known as 4000-4100 Hickory Drive in Malton.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Borehole Geology Stratum

Geology Stratum ID:	218481739	**Mat Consistency:**	Loose
Top Depth:	2	**Material Moisture:**	
Bottom Depth:	5.5	**Material Texture:**	Fine to Medium
Material Color:	Grey	**Non Geo Mat Type:**	
Material 1:	Sand	**Geologic Formation:**	
Material 2:		**Geologic Group:**	
Material 3:		**Geologic Period:**	
Material 4:		**Depositional Gen:**	lacustrine
Gsc Material Description:			
Stratum Description:	SAND-FINE TO MEDIUM.GREY,LACUSTRINE,LOOSE, AGE GLACIAL. 010 007 0000000500065 **Note: Many records provided by the department have a truncated [Stratum Description] field.		

Geology Stratum ID:	218481738	**Mat Consistency:**	Loose
Top Depth:	0	**Material Moisture:**	
Bottom Depth:	2	**Material Texture:**	Fine to Medium
Material Color:	Brown	**Non Geo Mat Type:**	
Material 1:	Sand	**Geologic Formation:**	
Material 2:	Silt	**Geologic Group:**	
Material 3:		**Geologic Period:**	
Material 4:		**Depositional Gen:**	lacustrine
Gsc Material Description:			
Stratum Description:	SAND(85)-FINE TO MEDIUM,SILT(12). BROWN,LACUSTRINE,LOOSE, AGE GLACIAL.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2024

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Apr 2024

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2025

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2023

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2025

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2025

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Apr 2025

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - May 31, 2025

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Aug 2024

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011 - May 31, 2025

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - May 31, 2025

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011 - May 31, 2025

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Aug 31, 2024

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2024

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Jan 2025

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Dec 31, 2024

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Apr 2024

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2025

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

Government Publication Date: Dec 31, 2023

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-May 31, 2025

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Feb 2024

National Pollutant Release Inventory - Historic: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2025

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

Government Publication Date: 1800-Aug 2024

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - May 31, 2025

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011 - May 31, 2025

Ontario PFAS Spills: Provincial PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024

NPRI Reporters - PFAS Substances: Federal PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Feb 2024

Potential PFAS Handlers from NPRI: Federal PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Feb 2024

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Potential PFAS Handlers from EASR: Provincial PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

Government Publication Date: Jun 30, 2024

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - May 31, 2025

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-May 2025

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2025

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug-Feb 2025

Wastewater Discharger Registration Database: Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2024

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011 - May 31, 2025

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

25062700593

ID: 13249 | **Unit Name:** |
Type (All): 55b | **Type (Primary):** 55b | **Type (Secondary):** | **Type (Tertiary):** | **Rock Type (Primary):** Shale, limestone, dolostone, siltstone | **Strata (Primary):** Georgian Bay Formation; Blue Mountain Formation; Billings Formation; Collingwood Member; Eastview Member | **Super Eon (Primary):** | **Eon (Primary):** PHANEROZOIC (Present to 542.0 Ma) | **Era (Primary):** PALEOZOIC (251.0 Ma to 542.0 Ma) | **Period (Primary):** ORDOVICIAN (443.7 Ma to 488.3 Ma) | **Epoch (Primary):** UPPER ORDOVICIAN | **Province (Primary):**

Bedrock Geology Report Metadata

Ontario Geological Survey 2011. 1:250 000 scale bedrock geology of Ontario; Ontario Geological Survey, Miscellaneous Release-Data 126 Revision1

ONTARIO MINISTRY OF NORTHERN DEVELOPMENT, MINES AND FORESTRY

ID - Unit ID **Unit Name** - Generalized geological unit classification

Type (All) - The geological unit number(s) or code(s) for all rock types present in an individual polygon.

Type (Primary) - The primary geological unit number or code for the primary rock type in an individual polygon

Type (Secondary) - The secondary geological unit number or code for the secondary rock type, if present, in an individual polygon

Type (Tertiary) - The tertiary geological unit number or code for the tertiary rock type, if present, in an individual polygon

Rock Type (Primary) - Rock type or sub-unit description

Status (Primary) - The Stratigraphic unit. Divided into:

```
Supergroup (two or more groups and lone formations)
Group (two or more formations)
Formation (primary unit of lithostratigraphy)
Member (named lithologic subdivision of a formation)
Bed (named distinctive layer in a member or formation)
```

Super Eon (Primary) - A name given to the largest defined unit of geological time, divided into Eons. Unique values which this field may contain (Domains) are:

```
PRECAMBRIAN (0.542 Ga to <3.85 Ga)
```

Eon (Primary) - A name given to a defined unit of geological time, divided into Eras. Unique values which this field may contain (Domains) are:

```
ARCHEAN (2.5 Ga to <3.85 Ga)
PROTEROZOIC (0.542 Ga to 2.50 Ga)
PHANEROZOIC (Present to 542.0 Ma)
```

Era (Primary) - A name given to a defined unit of geological time, divided into Periods. Each era on the scale is separated from the next by a major event or change. Unique values which this field may contain (Domains) are:

```
MESOARCHEAN (2.8 Ga to 3.2 Ga)                MESOPROTEROZOIC (1.0 Ga to 1.6 Ga)
NEO-TO MESOARCHEAN (2.5 Ga to 3.2 Ga)         EARLY PALEOZOIC TO NEOPROTEROZOIC (443.7 Ma to 1.0 Ga)
NEOARCHEAN (2.5 Ga to 2.8 Ga)                 NEO-TO MESOPROTEROZOIC (0.542 Ga to 1.6 Ga)
PALEOPROTEROZOIC (1.6 Ga to 2.5 Ga)           PALEOZOIC (251.0 Ma to 542.0 Ma)
MESO-TO PALEOPROTEROZOIC (1.0 Ga to 2.5 Ga)   MESOZOIC (65.5 Ma to 251.0 Ma)
```

Period (Primary) - A name given to a defined unit of geological time, divided into Epochs. Unique values which this field may contain (Domains) are:

```
CAMBRIAN (488.3 Ma to 542.0 Ma)
ORDOVICIAN (443.7 Ma to 488.3 Ma)
SILURIAN (416.0 Ma to 443.7 Ma)
DEVONIAN (359.2 Ma to 416.0 Ma)
MISSISSIPPIAN TO DEVONIAN (318.1 Ma to 416.0 Ma)
JURASSIC (145.5 Ma to 199.6 Ma)
CRETACEOUS AND JURASSIC (65.5 Ma to 199.6 Ma)
```

Epoch (Primary) - A name given to a defined unit of geological time. Unique values which this field may contain (Domains) are:

```
LOWER ORDOVICIAN                    UPPER SILURIAN
MIDDLE ORDOVICIAN                   LOWER DEVONIAN
UPPER ORDOVICIAN                    MIDDLE DEVONIAN
MIDDLE AND LOWER SILURIAN           UPPER DEVONIAN
UPPER SILURIAN TO LOWER DEVONIAN    LOWER CRETACEOUS AND MIDDLE JURASSIC
```

Province (Primary) - The Geological Province the geological unit is in. Unique values which this field may contain (Domains) are:

```
SUPERIOR
SOUTHERN
SUPERIOR
GRENVILLE
```

Surface Geology Report Metadata

Ontario Geological Survey 2010. Surficial geology of southern Ontario; Ontario Geological Survey, Miscellaneous Release - Data 128 - Revised.

ONTARIO MINISTRY OF NORTHERN DEVELOPMENT, MINES AND FORESTRY

ID - ID applied to the Unit

Unit Name - Name of deposit

Deposit Type Code - The geological unit number taken from the original map legend.

Deposit Age - to show the age when the sediments were deposited, e.g., Wisconsinan, postglacial or recent.

Map Number - Original map series number, eg., 'M2402' or 'P1973'. Each sgu_point feature is tagged to its original map.

Map Name - Usually NTS area where mapping was completed, e.g., 'Golden Lake'

Source Map Scale - The scale at which the original map was captured, e.g., '1:50 000'

Primary Material - This attribute provides the user with information regarding the most prevalent material present within a given area.

Primary Material Modifier- This attribute provides the user with a more refined description of the lithological classification of the primary material.

Secondary Material - This attribute provides the user with information regarding subordinate materials present within a given area.

Primary General - This attribute provides the user with an interpretation of the depositional environment within which the primary material was deposited.

Primary General Modifier - This attribute provides the user with a refined interpretation of the primary genetic modifier.

Veneer - This attribute provides the user with information regarding the type of material that forms a thin, discontinuous veneer over the primary material.

Sub Episode - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

Sub Episode - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

Phase - A diachronic stratigraphic unit in a lower order than Subepisode, and the proposed sequence-stratigraphic classification is listed in the following table in the eastern and northern Great Lakes area (Karrow et al. 2000)

Stratus Modifier - This attribute provides the user information regarding the stratigraphic position of the mapped unit (i.e., whether the unit occurs primarily on the surface or in the subsurface).

Provenance - This attribute provides the user with information regarding the provenance of a particular till unit (i.e. direction or lobe from which the till is derived).

Carbon Content - This attribute provides the user with information regarding the carbonate content of till.

Formation - This attribute provides the user with information regarding the formation to which a given primary material belongs (e.g., Tavistock Till, Port Stanley Till, Scarborough Formation). This attribute is seamless and allows the user to create a map based on formation.

Permeability - This attribute provides the user with basic information about permeability of the sediments in a ranking of high, medium and low.

Material Description - Material or sediment description, e.g., 'sand and silty fine sand', 'silty sand and gravel' and 'silty till with low stone content'.

Photograph 17

Location: Phase One Study Area

Viewing: 3650 Dixie Rd

Description: Public Library (Burnhamthorpe Library) located adjacent west of the Property.

Photograph 18

Location: Phase One Study Area

Viewing: 1355 Silver Spear Rd

Description: Residential apartment building located adjacent east of the Property.

Photograph 19

Location: Phase One Study Area

Viewing: 1349 Burnhamthorpe Rd

Description: Gasoline and automotive service station (Shell Canada and Jiffy Lube) located approximately 130 m southwest of the site.

Photograph 20

Location: Phase One Study Area

Viewing: 4011 Dixie Rd

Description: Gasoline service station (Esso) located approximately 210 m southwest of the site.

APPENDIX K

File No. 24-040
July 18, 2025

Phase One Environmental Conceptual Site Model

1315 Silver Spear, Mississauga, Ontario

Phase One ESA including Figures of the Phase One Study Area, which identify the following:	**Phase One ESA Information:**
Existing buildings and structures	Existing buildings and structures are presented in Figure 2.
Water bodies located in whole or in part on the Phase One Study Area	All water bodies on the Phase One Property and Phase One Study Area are shown on Figure 3.
Areas of Natural Significance located in whole or in part on the Phase One Study Area	There were no Life Science ANSIs identified on the Property or within the Study Area. There were no Earth Science ANSIs identified on the Property or within the Study Area.
Roads (including names) within the Phase One Study Area	The roads within the Phase One Study Area are shown on Figure 3.
Use of properties adjacent to the Phase One Property	The current use of properties adjacent to the Phase One Property is shown on Figure 3.
Location of drinking water wells on the Phase One Property	There were no drinking water wells present on the Phase One Property.
Areas where any PCA has occurred, and locations of tanks in the Phase One Study Area	The locations of PCAs and tanks, if any, are shown on Figure 4.
APECs on the Phase One Property	The location of APEC(s) identified on the Phase One Property are shown on Figure 5. Details of the APECs are provided on Table 3.
Narrative Description and Assessments	
Any areas where Potentially Contaminating Activity (PCAs) on, or potentially affecting, the Phase One Property have occurred	**Table 2** provides a summary and assessment of the identified PCAs within the Phase One Study Area and at the Phase One Property, including which PCAs were determined to be contributing to an APEC at the Phase One Property. The location of APEC(s) identified on the Phase One Property are shown on Figure 5. Details of the APECs are provided on Table 3.
Any Contaminants of Potential Concerns (CoPCs)	CoPCs related to the identified PCAs and to be investigated in the resultant APECs are identified in Table 3.

The potential of underground utilities (if any present) to affect contaminant distribution and transport	Buried hydro, gas, communication, water and electrical run through the Property. Based on these observations and an anticipated groundwater level of 12 m below ground surface (bgs), there is no potential for underground utilities to affect the distribution and transportation of contaminants underneath the Property.
Available regional or site specific geological and hydrogeological information	Topography: The approximate elevation of the Property is 145 m above sea level (masl) and is relatively flat, with a slight slope towards the west. Hydrology: The nearest body of water is Little Etobicoke Creek, located approximately 480 m to the west of the Property. Lake Ontario is located approximately 6.5 km south of the property. Surface water flow is expected to flow to the municipal catch basins located on the Property or the adjacent roadways. Groundwater is expected to flow south/southwest, towards Little Etobicoke Creek, and ultimately south to Lake Ontario. Overburden: Late Wisconsinan Halton Till, comprised of clayey silt to silt. Bedrock: Bedrock was not encountered during the subsurface investigations but inferred during the 2024 Grounded investigation. Based on the 2024 investigation, bedrock was inferred at 23 mbgs and well records indicated bedrock at roughly 20 mbgs.
Any uncertainty or absence of information obtained in the Phase One ESA that could affect the validity of the CSM	There was no uncertainty or absence of information identified during the Phase One ESA that affects the validity of the CSM.
Intention to Rely on Exemptions	The Property is bound by municipal roadways (Burnhamthorpe Rd E to the north and Silver Spear Rd to the south). The roadways have public sidewalks between the road and Property boundary. As well, the Property has a parking lot on the north portion. The Qualified Person (QP) has determined, based on the Phase One Environmental Site Assessment, that a substance has been applied to surfaces of the roadway, sidewalks, driveway and parking area for the safety of vehicular and pedestrian traffic under conditions of snow or ice or both. The QP intends to rely on the exemption as outlined in O. Reg. 153/04 49.1 and as such, the applicable site

	condition standard is deemed to meet for the purpose of Part XV.1 of the *Act*.
