July 23, 2025

**Subject: Groundwater Discharge Permitting  
1225 Dundas Street East, Mississauga, ON**

---

Based on our current understanding of the site conditions and information available to date, we have reviewed the groundwater quality, anticipated volumes, and discharge requirements associated with the proposed development.

It is our professional opinion that the groundwater is treatable to meet the City of Mississauga Storm Sewer standards and can be maintained throughout the life of the building.

Details of the groundwater treatment system including specifications, treatment objectives, and system sizing will be provided upon request.

We trust this satisfies your current requirements. Please do not hesitate to contact our office with any questions at (519) 498-9649.

Sincerely,

**VEI CONTRACTING – WATER TREATMENT DIVISION**
