

Municipal Class Environmental Assessment Study: Credit River Erosion Control Project Behind Kenninghall Blvd and Plainsman Rd

What?

The City of Mississauga (the City) is undertaking a Schedule B Municipal Class Environmental Assessment (Class EA) Study for erosion control and restoration along the Credit River behind Kenninghall Blvd and Plainsman Rd.

Why?

The City recognizes that erosion along this section of the Credit River may pose a risk to infrastructure and properties.

How?

- The study has examined this section of the river and associated natural resources to assess previously identified erosion sites, identify new erosion issues and potential risks, and explore opportunities for restoration and improvements.
- Through the Class EA process, various alternative solutions are being developed and evaluated by the Study Team and refined through public and agency consultation (see below). The Study Team will then select a preferred alternative and proceed with design of the recommended works.
- At the end of the study, a Project File report documenting the study process will be available for public review.

Public Consultation

- Consultation is an essential part of the Class EA process. The City would like anyone with an interest in the Study to have an opportunity to provide input and help inform the decision-making process.
- Online public engagement has been arranged to allow local residents, landowners and interested members of the public an opportunity to review and comment on the project findings to date, the alternative solutions being considered, the evaluation process, the preliminary preferred solution, and the next steps
- An online Public Information Centre will be made available on the City's project website below beginning **February 20, 2026**:

www.mississauga.ca/projects-and-strategies/environmental-assessments/credit-river-erosion-control-behind-Kenninghall-Boulevard-and-Plainsman-Road

- Feedback is encouraged and comments are requested by **March 31, 2026**. A comment form is available on the project website above. Input gathered through the public consultation will be used to support the EA

This notice signals the Notice of Public Information Centre for this Municipal Class Environmental Assessment, a study which will define the problem, identify/evaluate alternative solutions, and determine a preferred design in consultation with regulatory agencies and the public. The study is being undertaken in accordance with the planning and design process for Schedule 'B' projects, as outlined in the "Municipal Class Environmental Assessment" document (as amended in 2023), which is approved under the Ontario Environmental Assessment Act.

Personal information is collected under the authority of the Environmental Assessment Act and will be used in the assessment process. With exception of personal information, all comments shall become part of the public records. Questions about this collection should be directed to the Project Manager listed above.

This notice first issued on **February 20, 2026**.
