Glossary

ABNs	acid-base neutral compounds
APEC	area(s) of potential environmental concern, as defined in O. Reg. 153/04, “the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through (a) identification of past or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activity”
As	arsenic, a hydride-forming metal
AST	above ground storage tank
B-HWS	boron (hot water soluble)
BTEX	benzene, toluene, ethylbenzene, and xylenes
CN ⁻	cyanide
COPC	contaminant(s) of potential concern
CPs	chlorophenols
Cr	chromium
Cr (VI)	hexavalent chromium
CSM	conceptual site model
EC	electrical conductivity
ECA	Environmental Compliance Approval
ERIS	Environmental Risk Information Services
ESA	environmental site assessment
FIP	fire insurance plan
FOI	freedom of information
ha	hectare(s)
Hg	mercury
km	kilometre(s)
L	litre(s)
m	metre(s)
Metals	O. Reg. 153/04 regulated metals as per Protocol for Analytical Methods Used in the Assessment of Properties under Part XV.1 of the <i>Environmental Protection Act</i>
mASL	metres above sea level
mBGS	metres below ground surface
MND	Ministry of Northern Development
MoM	Ministry of Mines
MNR	Ministry of Natural Resources (formerly MNRF)

MECP	Ministry of the Environment, Conservation and Parks
NPRI	National Pollutant Release Inventory
N/S	not specified in Table 2, Schedule D, of O. Reg. 153/04
Na	sodium
OCs	organochlorine pesticides
O. Reg. 153/04	Ontario Regulation 153/04 Records of Site Condition, as amended
O. Reg. 347	R.R.O. 1990, Regulation 347 General – Waste Management, as amended
ORP	other regulated parameter(s) per Protocol for Analytical Methods Used in the Assessment of Properties under Part XV.1 of the <i>Environmental Protection Act</i>
PAH	polycyclic aromatic hydrocarbon
PCA	potentially contaminating activity, as defined in O. Reg. 153/04, “a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a Phase One study area”
PCB	polychlorinated biphenyl
PHC	petroleum hydrocarbon
PIN	property identification number
QA	quality assurance
QC	quality control
QP _{ESA}	Qualified Person for ESAs per O. Reg. 153/04
RA	risk assessment
RSC	Record of Site Condition
SAR	sodium adsorption ratio
Sb	antimony, a hydride-forming metal
SCS	Site Condition Standard
Se	selenium, a hydride-forming metal
THM	trihalomethane
TSSA	Technical Standards and Safety Authority
UST	underground storage tank
VOC	volatile organic compound(s)

1 Executive Summary

1315 Bough Beeches Boulevard Limited (the Client) retained Grounded Engineering Inc., to complete a Phase One Environmental Site Assessment for the Eastern Portion of 1315 Bough Beeches Boulevard, Mississauga, Ontario (Property). The Property location is presented in Figure 1.

This Phase One ESA has been prepared in accordance with Ontario Regulation (O.Reg.) 153/04.

Based on records review, the Property was first developed for agricultural land use prior to 1939 and included historical uses as an orchard. At the time of the site reconnaissance, the Property was in residential land use. It was occupied by a surficial asphalt parking lot and landscaped berms on the eastern portions of the Property.

The Phase One ESA has identified the following PCAs contributing to APECs on the Property:

- **On-Site:**
 - Importation of fill material of unknown quality on the Property.
 - Use of de-icing substances (salt) on the Property and on the adjacent roadways.
 - An orchard was present on the Property from approximately 1939 to 1975.

Based on the results of the Phase One ESA, a Phase Two ESA completed in accordance with O.Reg.153/04 is recommended to investigate the APECs identified. Therefore, a Phase Two ESA is required prior to the filing of an RSC.

2 Introduction

1315 Bough Beeches Boulevard Limited (the Client) retained Grounded Engineering Inc., to complete a Phase One Environmental Site Assessment for the Eastern Portion of 1315 Bough Beeches Boulevard in Mississauga, Ontario (Property). The Property location is presented in Figure 1.

The Property is currently developed with a surficial asphalt parking lot and landscaped berms on the eastern portions of the Property. The Phase One Property is presented in Figure 2. The Property is currently in Residential, as defined by O. Reg. 153/04.

1315 Bough Beeches Boulevard Limited has indicated that the Property will be developed with one thirteen-storey building. An 84 m² parcel of the Property at the intersection of Bough Beeches Boulevard and Rathburn Road East will be conveyed to the City for the purposes of a sight triangle. Grounded understands that the proposed property use is residential, as defined by O. Reg. 153/04.

Municipal Address	Eastern Portion of 1315 Bough Beeches Boulevard
Legal Description	Part 2, Part of Lot 5, Concession 9 and Parts 1, 2, 3, 4, part of Lot 5, Concession 9
PIN(s)	Part of 03303-0034, Part of 03303-0033, and Part of 03303-0035
Assessment Roll Number	21050300962500000000
Area	0.327 ha
Current Land Use	Residential
Property Owner Information	1315 Bough Beeches Boulevard Limited
Entity Who Requested Phase One	1315 Bough Beeches Boulevard Limited

3 Scope of Investigation

The Phase One ESA includes the following components:

- Records review of historical and current occupancies and activities on the Property and Phase One Study Area.
- Interviews with available personnel with knowledge of the historical and current activities on the Property.
- Site reconnaissance of the Property and Study Area to identify potential environmental concerns based on observations of current uses, and potentially contaminating activities at the Property and in the Study Area.
- Evaluation of information from records review, interviews and site reconnaissance and synthesis into a CSM.

4 Records Review

Below is a summary of the records review undertaken by Grounded as part of this Phase One ESA. The records review provides Property information regarding the physical setting, history of development, and property use in connection with the Site and adjacent properties.

The following information sources were used to obtain these records:

- An ERIS standard report was obtained for the Property and lands within a 250-m radius of the Property. A copy of the ERIS report is provided in Appendix E. Searches of databases and records not included in the ERIS report were conducted specifically for the Property, as referenced in the applicable sections below.
- A chain-of-title search for the Property was completed, a copy of which is included as Appendix C.
- ERIS was retained to complete a city directory search for the Property and properties within the Phase One Study Area. The search completed by ERIS is provided in Appendix CD.
- Freedom of information requests were submitted to the MECP for a search of environmental records for the subject property. Copies of the requests, the response, and any documents obtained are included in Appendix F.
- Information and records were requested from the TSSA. Copies of the request, the response, and any documents obtained are included in Appendix F.
- Aerial photographs of the Property and surrounding Study Area were obtained from ERIS and the City of Mississauga. Copies of the aerial photographs are provided in Appendix G.

4.1 General

The PCAs inferred in the Study Area from the review of the following information sources, if any, are summarized in Table 2.

4.1.1 Phase One Study Area Determination

The Phase One Study Area includes the properties that are, wholly or partly, located within a 250-m radius from the Property boundary.

The Study Area is presented in Figure 3.

4.1.2 First Developed Use Determination

The determination of the date of the first developed use of the Property is based on review of the available historical records as summarized in the Table of Current and Past Uses (Table 1).

Review of the available data indicates that the first developed use of the Property likely occurred prior to 1939, where the Property was first observed to be in agricultural use.

4.1.3 Fire Insurance Plans

There were no FIPs available for review for the Property and Study Area. Adequate information was provided by other sources and the absence of FIPs does not affect the validity of the Phase One ESA and the CSM.

There were two reports available for review for the overall property located at 1315 Bough Beeches Boulevard, which includes the Phase One Property:

Title and File No.	Site plan Report – 2000 1315 Bough Beeches Boulevard Mississauga ON L4W4A1
Report Date	Unknown
Prepared By	Unknown
Prepared For	Unknown
Description of Data, Analysis, or Findings	<ul style="list-style-type: none"> The property was occupied with a 20-storey residential high-rise apartment building with one level of underground parking. Grounded Note: The building and underground parking at 1315 Bough Beeches Boulevard does not extend onto the Phase One Property.

Title and File No.	Inspection Report – 2003 1315 Bough Beeches Boulevard Ltd. 1315 Bough Beeches Boulevard Mississauga ON L4W4A1
Report Date	October 15, 2003
Prepared By	Insurers' Advisory Organization Inc.
Prepared For	Mrs. Pearl Berens (owner)
Description of Data, Analysis, or Findings	<ul style="list-style-type: none"> The property was occupied with a 20-storey residential high-rise apartment building with one level of underground parking. Grounded Note: The building and underground parking at 1315 Bough Beeches Boulevard does not extend onto the Phase One Property.

4.1.4 Chain-of-Title

A chain-of-title dating back to 1828 was available for review for the Property. The search identified that the Property was transferred from the Crown in 1828. The Property is subsequently owned by private individuals from 1828 to 1972 and by corporate entities from 1972 to Present. The Property is currently owned by 1315 Bough Beeches Boulevard Limited since 1988.

The chain-of-title, where available, is presented in Appendix C and summarized in Table 1.

4.1.5 City Directories

Available City Directories were reviewed for the Property and adjacent properties.

The Property uses inferred from the city directories, when available, are summarized in Table 1. The full search results for the Property and the Study Area can be found in Appendix D.

4.1.6 Environmental Reports

No environmental reports were available for review for the Property.

4.2 Environmental Source Information

The environmental sources listed below were searched as part of the Phase One ESA. A copy of the ERIS report is included in Appendix E and the regulatory information requests and responses are provided in Appendix F.

Source of Information	Response
Environmental Risk Information Services Ltd. (ERIS)	The ERIS report tabulates the results of a search of provincial, federal, and private source databases (as required by Paragraph 7, Section 3 (2) of O. Reg. 153/04), which are considered relevant in the identification of possible environmental risks. The ERIS Report identified two (2) records of environmental interest pertaining to the Property and 94 records of environmental interest pertaining to properties within the Study Area.
Ministry of the Environment, Conservation and Parks (MECP) PCB Storage Sites and Waste Disposal Sites	The MECP PCB Storage Sites and Waste Disposal Sites were searched through ERIS database. There were no PCB Storage Sites or Waste Disposal Sites identified on the Property or within the Study Area.
Technical Standards and Safety Authority (TSSA)	A response from the TSSA indicated that there are no records of fuel storage tanks in their database for the Property and adjacent properties. The TSSA response and list of addresses searched is provided in Appendix F
Areas of natural significance maintained by the Ministry of Natural Resources	See Section 4.3.4 for details on the Natural Heritage Inventory.
Freedom of Information (FOI)	A response from the MECP to the FOI request has not been received as of the date of this report.

The PCAs inferred in the Study Area from the review of the following environmental sources, if any, are summarized in Table 2.

4.3 Physical Setting Sources

The PCAs inferred in the Study Area during the review of the following physical setting sources, if any, are summarized in Table 2.

4.3.1 Aerial Imagery

Aerial photographs and satellite imagery were reviewed as part of the Phase One ESA. The developmental chronology of the Property and the Study Area is summarized below and presented in Appendix G.

Year	Source	Property	Study Area
1939	ERIS	The Property appeared to be occupied by an orchard.	The surrounding area appeared to be used for agricultural purposes. A woodlot appears to the northwest of the Property. Dixie Road was located southwest of the Property.
1946	ERIS	No significant changes to the Property.	No significant changes to the Study Area.
1954	Aerial Photo from the City of Mississauga	No significant changes to the Property.	Multiple residential buildings associated with the surrounding agricultural lands appear along present-day Dixie Rd.
1966	Aerial Photo from the City of Mississauga	No significant changes to the Property.	Increased development of apparent residential buildings is noted along present-day Hickory Dr.
1975	Aerial Photo from the City of Mississauga	The orchard may have been removed from the Property.	A shopping mall appeared to the southeast of the Property similar to the current configuration. Further development is noted to the west of the Property.
1985	Aerial Photo from the City of Mississauga	The Property appeared to have been redeveloped with a surficial parking lot and landscaped berms associated with the residential building at the address, similar to the current configuration.	The adjacent property to the west at 1315 Bough Beeches Boulevard was developed with a residential building, asphalt parking, and tennis courts similar to the current configuration. The area to the north of the Property appeared to be developed with residential suburbs. Construction appeared to be ongoing to the south of the Property.
1995	Aerial Photo from the City of Mississauga	No significant changes to the Property.	The majority of the Study Area appeared similar to the present. The area southwest, across Dixie Rd., still appeared to be under construction.
2005	Satellite Image from the City of Mississauga	No significant changes to the Property.	The area southwest, across Dixie Rd., appeared similar to the present configuration.
2015	Satellite Image from the City of Mississauga	No significant changes to the Property.	No significant changes to the Study Area.
2023	Satellite Image from the City of Mississauga	No significant changes to the Property.	No significant changes to the Study Area.

4.3.2 Topography, Hydrology, Geology

The MNRF and MNDM database were searched to obtain topographic and geological maps of Ontario for review. The maps are provided in Appendix H and the information obtained are summarized below:

Physiographical Records	Information
Topographic Maps	The approximate elevation of the Property is 149.5 mASL and is relatively flat, with a slight slope towards the southwest.
Hydrological Maps	The nearest body of water is Little Etobicoke Creek, located approximately 850 m to the southwest of the Property. Lake Ontario is located approximately 7.1 km southeast of the Property. Surface water flow is expected to flow to the municipal catch basins located on the Property and the adjacent roadways. Groundwater is expected to flow southwest, towards Little Etobicoke Creek, and ultimately southeast to Lake Ontario.
Geological Maps	<u>Overburden:</u> Glaciolacustrine deposits of Late Wisconsin age, massive to laminated silts and clays, may contain poorly sorted diamicton layers. <u>Bedrock:</u> Georgian Bay Formation comprised of shale, limestone, dolostone, and siltstone. <u>Depth to Bedrock:</u> Based on the bedrock contour map of the area (Rogers et al., 1961), bedrock is located approximately 23 m below ground surface.

4.3.3 Fill Materials

The Property contains a berm on the eastern boundaries, likely built up during the development of the high-rise tower on the larger property. The development and subsequent landscaping likely resulted in the importation of fill material of unknown quality.

4.3.4 Water Bodies, Areas of Natural Significance and Groundwater Information

Maps from MNRF were reviewed to determine if water bodies were present on the Property and within the Study Area. The MNRF Natural Heritage Information Centre database for ANSIs was also reviewed as part of the Phase One ESA. The maps are provided in Appendix H and the information is summarized below:

Conservation Authority	A response from the Credit Valley Conservation Authority indicates that the Property is located within its jurisdiction but does not fall within a regulated area.
Water Bodies	<p>Property:</p> <ul style="list-style-type: none"> ▪ There were no water bodies located on the Property. <p>Study Area:</p> <ul style="list-style-type: none"> ▪ There were no water bodies located within the Study Area.

Wetlands	<p>Property:</p> <ul style="list-style-type: none"> ▪ There were no Provincially Significant, Non-Provincially Significant, or Unevaluated wetlands located on the Property. <p>Study Area:</p> <ul style="list-style-type: none"> ▪ There were no Provincially Significant, Non-Provincially Significant, or unevaluated wetlands located within the Study Area.
ANSIs	<p>List of ANSIs searched:</p> <ul style="list-style-type: none"> ▪ An area reserved or set apart as a provincial park or conservation reserve under the <i>Provincial Parks and Conservation Reserves Act, 2006</i>. ▪ An area of natural and scientific interest (life science or earth science) identified by the Ministry of Natural Resources as having provincial significance. ▪ A wetland identified by the MNRF as having provincial significance. ▪ An area designated by a municipality in its official plan as environmentally significant, however expressed, including designations of areas as environmentally sensitive, as being of environmental concern and as being ecologically significant. ▪ An area designated as an escarpment natural area or an escarpment protection area by the Niagara Escarpment Plan under the <i>Niagara Escarpment Planning and Development Act</i>. ▪ An area identified by the MNRF as significant habitat of a threatened or endangered species. ▪ An area which is habitat of a species that is classified under section 7 of the <i>Endangered Species Act, 2007</i> as a threatened or endangered species. ▪ Property within an area designated as a natural core area or natural linkage area within the area to which the Oak Ridges Moraine Conservation Plan under the <i>Oak Ridges Moraine Conservation Act, 2001</i> applies. ▪ An area set apart as a wilderness area under the <i>Wilderness Areas Act</i>. <p>Property:</p> <ul style="list-style-type: none"> ▪ There were no ANSIs located on the Property. <p>Study Area:</p> <ul style="list-style-type: none"> ▪ There were no ANSIs identified wholly or partly within the Study Area.
Well-Head Protection Area	The Property is not located within an area designated in the official plan of the municipality as a well-head protection area or another area designated in the official plan as an area for the protection of groundwater.
Municipal Drinking Water System	The Property and the properties within the Study Area are supplied by a municipal drinking water system, as defined in the Safe Drinking Water Act, 2002.
Potable Wells	There were no wells on the Property that supply water used for human consumption or an agricultural use; however, water wells are present in the Study Area.

4.3.5 Well Records

The MECP well records database was accessed online and through ERIS search. The well records located on the Property and in the Study Area were identified. The comprehensive well record is provided in Appendix I and is summarized below:

Well Records	<p>Property:</p> <ul style="list-style-type: none">No wells were identified on the Property in the well records, however one monitoring well was identified on the Property during the site visit. <p>Study Area:</p> <ul style="list-style-type: none">Two (2) test holes were identified in the Study Area.Two (2) domestic use wells were identified in the Study Area.
Stratigraphy	<ul style="list-style-type: none">Brown silty sand silt to approximately 1.5 mbgsGrey silty clay to approximately 6 mbgsGrey clay to approximately 7.6 mbgs
Depth to Bedrock	Bedrock was encountered at approximately 17 mbgs.
Depth to the Water Table	5.7 mbgs

5 Site Operating Records

There were no site operating records provided or available for review.

6 Interviews

Interviewee(s)	Maria Gutierrez, Superintendent of the building on 1315 Bough Beeches Boulevard, of which the Phase One Property is a portion of though does not include the building or underground parking garage.
Date of Interview	July 16, 2025
Location and Methods of Interview	In person
Justification for Selection	Ms. Gutierrez has been superintendent since 2008.
Relevant Information concerning Potentially Contaminating Activities	<ul style="list-style-type: none"> ▪ The larger Property is currently in use as a residential apartment building. ▪ The Property has been used as a residential apartment since 1973. ▪ To their knowledge the Property has not been used, past or present, for: <ul style="list-style-type: none"> ▪ industrial operations ▪ on-site dry cleaning, ▪ fuel distribution or storage, ▪ vehicle servicing and/or maintenance ▪ No bulk storage of chemicals or hazardous products at the Property. ▪ One (1) AST that services the generator in the underground parking structure at 1315 Bough Beeches Boulevard. This is not on the Phase One Property. ▪ Property is not considered a waste generator with the MECP. ▪ Property not a registered PCB storage facility. ▪ No knowledge of spills or leaks of any kind at the Property. ▪ No knowledge of wastewater produced at the Property. ▪ No knowledge of air emissions produced at the Property. ▪ No knowledge of any public agency investigations at the Property.
Assessment of the Validity of Information from Interviewee	The information gleaned from the interviewee was consistent with the background information reviewed as part of this Phase One ESA.

The PCAs inferred from the interview conducted for the Property, if any, are summarized in Table 2.

7 Site Reconnaissance

A site reconnaissance of the Property consisted of detailed non-destructive visual assessment of the Property including exterior and interior portions of any existing buildings on-site, documentation of any areas of potential environmental concern and illustration of relevant structures. Property features are displayed in Figure 2 and site photographs are presented in Appendix J. The results of the site reconnaissance are provided below.

The PCAs inferred in the Study Area during the site reconnaissance, if any, are summarized in Table 2.

7.1 General Requirements

Date and Time of Investigation	December 10, 2025 12 pm to 3 pm
Weather Condition	Rain and snow, -1°C
Duration of Investigation	3 hrs
Was the Facility Operating at the Time of Investigation?	Yes, the Property is a parking lot for the adjacent residential high-rise building.
Name and Qualifications of the Person Conducting the Investigation	Kristen Shaver, M.Sc., P.Geo., QP _{ESA}

7.2 Specific Observations at Phase One Property

The Property was occupied by an asphalt visitors parking lot for the adjacent residential building, and a berm on the eastern boundary of the Property.

7.2.1 General Description

UNDERGROUND UTILITIES	
Hydro	Underground hydro entered the Property via Rathburn Road East from the southeast.
Gas	Gas line entered 1315 Bough Beeches Boulevard via Rathburn Road East however it was not present on the Phase One Property.
Communication	Buried communication line entered the Property via Rathburn Road East from the southeast
Electrical/Outdoor Lighting	Within the site, there were buried electrical lines in the central and north central portions of the property that supported outdoor lighting.

Storm Sewer	Catch basins were observed on the Property and the sewer main was located along Bough Beeches Boulevard.
Sanitary Sewer	Manholes were observed on the Property near the entrance to site off Bough Beeches Boulevard and the sewer main was located along Bough Beeches Boulevard.
Water Source	The Property was serviced with municipal water.

EXTERIOR FEATURES	
Wells	One monitoring well was observed on the Property.
Sewage Works	Property was serviced by municipal sewage works. No other sewage works were observed.
Ground Surface	The ground surface of the Property was predominantly covered in an asphalt parking lot, landscaped areas and trees.
Railway Lines and Spurs	No railway lines or spurs were present on the Property or within the Study Area.
Stained Soil, Vegetation or Pavement	No stained soil, vegetation or pavement were observed at the Property.
Stressed Vegetation	No stressed vegetation was observed at the Property.
Areas where fill and debris materials appear to have been placed or graded	The Phase One Property was included by a berm on the eastern portion, which was likely placed during re-grading activities related to the development of the Property.
Unidentified Substances (Outside Buildings)	No evidence of unidentified substances that could influence the environmental conditions at the Property was observed.

7.2.2 Enhanced Investigation Property

The Property is not considered to be an Enhanced Investigation Property.

7.3 Investigation of the Phase One Study Area

The site investigation includes an inspection of the Study Area. The adjacent properties were identified below during the investigation.

Relative Direction	Adjacent Property Use	Study Area		
		Water Wells	Water Bodies	ANSI
North	Residential neighbourhoods	Serviced by a municipal drinking water system	None Observed	None Observed
South	Rathburn Rd. E. and Rockwood Mall	Serviced by a municipal drinking water system	None Observed	None Observed
West	1315 Bough Beeches Boulevard Residential building, Dixie Rd. and residential neighbourhoods	Serviced by a municipal drinking water system	None Observed	None Observed
East	Bough Beeches Blvd. and residential apartment building and	Serviced by a municipal drinking water system	None Observed	None Observed

7.4 Written Description of Investigation

The qualified person confirms that the investigations carried out pursuant to sections 13 and 14 of O. Reg. 153/04. The details of each investigation and any findings that are relevant to the existence of an area of potential environmental concern are provided in Table 2 and in the above sections.

8 Review and Evaluation of Information

Through the evaluation of the Phase One records review, operating records for the Property, information gleaned from interviews, and the observations from the site reconnaissance, we provide the following summary of:

- the current and historical uses of the Property
- potentially contaminating activities identified on-site and within the Study Area
- resulting areas of potential environmental concern at the Property

This information is synthesized into the Phase One Conceptual Site Model.

8.1 Current and Past Uses

A Table of Current and Past Uses of the Property, in a form approved by the Director with description of the current and past uses of the Property back to its first developed use, is provided in Table 1.

8.2 Potentially Contaminating Activity

PCAs identified on the Property or in the Study Area are summarized in Table 2 and a rationale for whether each PCA contributes to an APEC is also provided in Table 2, attached and its approximate location is shown on Figure 4.

8.3 Areas of Potential Environmental Concern

Based on review of the PCAs and site conditions, one or more PCAs are contributing to on-site APECs. A table of Areas of Potential Environmental Concern in a form approved by the Director is provided in Table 3 and shown on Figure 5.

8.4 Phase One Conceptual Site Model

Through analysis and interpretation of available information gathered during the Phase One ESA, a CSM was developed for the Phase One Property, which is provided in Appendix K.

9 Conclusions

A Phase One ESA was conducted for the property located at the Eastern Portion of 1315 Bough Beeches Boulevard in Mississauga, Ontario. It is understood that this Phase One ESA will be used to support the proposed redevelopment of the Property, if required.

9.1 Whether Phase Two Environmental Site Assessment Required Before Record of Site Condition Submitted

Based on the results of the Phase One ESA, a Phase Two ESA is required to support the filing of an RSC. We recommend completing a Phase Two according to O.Reg.153/04 to investigate the APECs identified in this Phase One ESA.

9.2 Record of Site Condition Based on Phase One Environmental Site Assessment Alone

An RSC cannot be filed based on this Phase One ESA alone.

9.3 Signatures

The Phase One ESA was conducted by Kristen Shaver, M.Sc., P.Geo., QP_{ESA} under the supervision of Freesia Waxman, M.A.Sc., P.Eng., QP_{ESA}. The Phase One ESA has been conducted in accordance with Ontario Regulation 153/04.

We trust that this report meets your requirements.

For and on behalf of our team,

Kristen Shaver, M.Sc., P.Geo., QP_{ESA}
Project Geoscientist

Freesia Waxman, M.A.Sc., P.Eng., QP_{ESA}
Associate

11 Limitations and Restrictions

The assessment should not be considered a comprehensive investigation that eliminates all risks of encountering environmental problems. The information presented in this report is based on information collected during the completion of the Phase One Environmental Site Assessment by Grounded Engineering Inc. It was based on the conditions on the Phase One Property at the time of the site inspection supplemented by a review of historical information to assess the environmental conditions regarding the Phase One Property.

The Report is time-dependent. The Report was prepared on the date noted above and is representative of conditions at that time. We have not inspected site conditions since that date. We cannot comment and make no representations regarding any other changes that may have occurred to the site or surrounding lands, and the impact that these changes may have had on the condition of the property, and/or the conclusions and recommendations of the Report. No use or reliance upon the report shall occur after 12 months from the date of the Report.

Sampling and analysis of soil, groundwater or any other material was not carried out as part of the Phase One Environmental Site Assessment. As a result, the presence and/or extent of any adverse environmental impact cannot be confirmed. The potential for environmental liability and/or environmental impact is an opinion as a result of the scope of this assessment.

In assessing the environmental conditions and history of the Phase One Property, Grounded Engineering Inc. has relied on information provided by others, as noted in this report, and has assumed that the information provided by those individuals is factual and accurate. Grounded Engineering Inc. accepts no responsibility for any deficiency or inaccuracy in this report resulting from the information provided by those individuals.

If new information regarding the environmental condition of the Phase One Property is identified during future work, or outstanding responses from regulatory agencies indicate outstanding issues on file with respect to the Phase One Property, Grounded Engineering Inc. should be notified so that we may re-evaluate the findings of this assessment and provide amendments.

The authorized user of this report is 1315 Bough Beeches Boulevard Limited, for whom this report has been prepared. Grounded Engineering Inc. maintains the copyright and ownership of this document. Reproduction of this report in any format or medium requires explicit prior authorization from Grounded Engineering Inc.

TABLES

TABLE 1: 13303-0034 (LT)
CURRENT AND PAST USES OF THE PHASE ONE PROPERTY
(Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Prior to 1828	Crown	Undeveloped, most likely used as agricultural land	Agriculture or Other	No further information available.
1828 to 1850	Kings College			
1850 to 1864	James Aikins, James C. Aikins			
1864 to 1876	Moses H. Aikins			
1876 to 1902	George Chadwick			
1902 to 1910	Robert Chadwick			
1910 to 1937	William R. Chadwick			
1937 to 1940	Percy Tizzard	Agricultural land	Agriculture or Other	1939 AP showed the Property was occupied by an orchard.
1940 to 1949	Margaret E. Scott			1946 AP showed the Property was occupied by an orchard.
1949 to 1963	Oscar H. Hansen			1954 AP showed the Property was occupied by an orchard.
1963 to 1967	Oscar H. Hansen, Werner Hansen			1966 AP showed the Property was occupied by an orchard.
1967	Oscar H. Hansen			No further information available.
1967 to 1972	Werner Hansen			No further information available.
1972	Dix-Tor Investments Limited (in trust), Zouzelka Construction Limited (in trust)			No further information available.
1972 to 1979	Dix-Bur Investments Limited			1975 AP showed that the orchard was no longer observed.
1979 to 1981	Heron Bay Investments Ltd., Alderdale Investments Ltd., Barry Naiberg Limited, Scarpia Investments Ltd., Ricadel Investments Ltd., Heriot Bay Investments Ltd., c.o.b. New Generations Homes			1981 CD the Property was not listed.
1981 to 1988	Silver Rose Construction Limited (50%), Pastorina Holdings Limited (50%)			1985 CD the Property was listed as Multi Tenant Residential. 1985 AP the Property appeared to have been redeveloped with a surficial parking lot and landscaped berms associated with the residential building at the address, similar to the current configuration.
1988 to Present	1315 Bough Beeches Boulevard Limited	Residential high-rise building	Residential	1991 CD the Property was listed as being used for multi tenant residential
2000 to 2007	Rogers Cable Inc. (Easement)			1995 AP the Property appeared to be in a similar configuration to present.
2007 to 2021	Coinmatic Canada Inc. (Lessee)			1996 CD the Property was listed as being used for multi tenant residential. 2000 Report the report noted the address was a high rise residential building, however the Phase One Property was used as surficial parking and landscaped areas. 2001 CD the Property was listed as being used for multi tenant residential. 2003 Report the report noted the address was a high rise residential building, however the Phase One Property was used as surficial parking and landscaped areas. 2005 SI the Property appeared to be in a similar configuration to present. 2008 CD the Property was listed as being used for multi tenant residential. 2012 CD the Property was registered to Claridge House, Residential Property Managers. 2015 SI the Property appeared to be in a similar configuration to present. 2021 CD the Property was listed as being used for multi tenant residential. 2023 SI the Property appeared to be in a similar configuration to present. 2024 CD the Property was listed as being used for multi tenant residential.
2021	Rogers Communications Inc. (Lessee)			

Notes:
AP is aerial photograph
CD is city directory
CoT is Chain of Title
ERIS is the ERIS report
FIP is fire insurance plan
HM is Historic Map
OBM is Ontario Base Map
REPORT is previous reports prepared / review for the Property
SI is satellite imagery
SR is site reconnaissance
UST is Underground Fuel Storage Tank

TABLE 2:
SUMMARY OF POTENTIALLY CONTAMINATING ACTIVITIES WITHIN PHASE ONE STUDY AREA
(Refer to Table 2, Schedule D, O. Reg. 153/04)

Location of PCA	Figure 4 Legend	PCA	Leads to an APEC?	Source	Description	Rationale
Phase One Property	30 A	30 - Importation of Fill Material of Unknown Quality	Yes (APEC 1)	Aerials Site Visit	A current residential high-rise building with a one level underground parking garage currently occupies a portion of the address 1315 Bough Beeches Blvd. Raised berms were observed during the site visit on the Property.	Due to the historical development at the municipal address and observations made during the site visit, it is the opinion of the QP that this PCA will likely cause an APEC on the Property.
Phase One Property	Other1 A	Other1 - De-Icing	Yes (APEC 2)	Site Visit	The property contains an asphalt parking lot. Private and municipal walkways were observed adjacent to the Property boundaries. Bough Beeches Boulevard runs along the northeastern portion of the Property, and Rathburn Road East runs along the southeastern portion of the Property.	It is likely that salt has been applied to the parking lot, private walkways, municipal sidewalks, and roadways adjacent to the Property. Therefore, it is the opinion of the QP that this PCA will likely cause an APEC on the Property.
Phase One Property	40 A	40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Yes (APEC 3)	Aerials	An orchard was noted on the Property in the 1939, 1946, 1954, and 1966 aerial images.	Due to the potential for the application of pesticides, it is the opinion of the QP that this PCA will lead to an APEC on the Property.
1500 Grazia Ct. 34 m east	28 A	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	Site Visit	Fill and vent pipes were observed around the underground parking structure of the high-rise residential building.	Based on the cross-gradient location from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
1315 Bough Beeches Boulevard 73 m West	28 B	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	Site Visit	One (1) AST and associated fill and vent pipes were observed in the underground parking garage of the residential building on the Phase One Property.	During the site visit, an AST was observed in the parking garage. The tank appeared to be in good condition, with no sign or known history of spills, no staining or corrosion on the floor or around the fill and vent pipes above. Based on the visual inspection, and cross gradient location, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
1490 Rathburn Rd. E. 103 m southeast	28 C	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	ERIS Site Visit	Fill and vent pipes were observed in the parking lot adjacent to the building of this residential apartment building. A generator of waste class 252 (waste oil & lubricants) was registered to Lifestyle Retirement Communities in 2014 and 2015.	Based on the cross-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
Intersection of Dixie Rd. & Rathburn Rd. E. 129 m southwest	Other2 A	Other2 - Spills	No	ERIS	A spill of unknown volume of oil was noted in 2011. Oil sheen and white powder were observed in Little Etobicoke Creek.	Based on the down-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
4141 Dixie Rd. 217 m south	31 A	31 - Ink Manufacturing, Processing and Bulk Storage	No	CD ERIS	Black Photo Corporation was registered as producing photoprocessing wastes from 1990 to 2001 and the City Directory in 2012. Arthur's Creative Services was registered as a miscellaneous publisher in 1989. Maysoft Engineering & Printing was registered as a newspaper and periodical publisher in 1990 and in the City Directory in 2001, 2008, 2012, 2017. International News was noted in the City Directory in 2008, 2017, 2021.	Based on the down-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
4251 Dixie Rd. (Currently part of 4222 Dixie Rd.) 222 m northwest	10 A	10 - Commercial Autobody Shops	No	CD	Green Auto Valve Machine Shop noted in the 1970-71 City Directory.	Based on the cross-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
4141 Dixie Rd. 226 m south	37 A	37 - Operation of Dry Cleaning Equipment (where chemicals are used)	No	CD	Award Cleaners noted in the City Directory in 2001, 2008, 2012, 2017, 2021, 2023, 2024.	Based on the down-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
1359 Rathburn Rd. E. 237 m southwest	28 D	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	Site Visit	Fill and vent pipes were observed around the underground parking structure of this high-rise residential building.	Based on the cross-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
1360 Rathburn Rd. E. 242 m southwest	31 B	31 - Ink Manufacturing, Processing and Bulk Storage	No	CD	City Directory noted the building was registered to Toronto Star Ltd Corp in 1991.	Based on the down-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
4266 Dixie Rd. 243 m northwest	28 E	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	ERIS	A generator of waste class 252 was noted from 2003 to 2006 and registered to Volturmo Excavating Company Limited.	Based on the cross-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
1343 Rathburn Rd. E. 248 m southwest	Other2 B	Other2 - Spills	No	ERIS	A spill of unknown volume of hydraulic oil to the grass and catch basin was noted in 2018.	Based on the down-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.

TABLE 3:
TABLE OF AREAS OF POTENTIAL ENVIRONMENTAL CONCERN
(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1	Entire Property	30 Importation of Fill Material of Unknown Quality	Onsite	Metals As, Sb, Se B-HWS CN- Cr(VI) Hg PAHs PHCs BTEX VOCs	Soil & Groundwater Soil & Groundwater Soil Soil & Groundwater Soil & Groundwater Soil & Groundwater Soil & Groundwater Soil & Groundwater Soil & Groundwater
APEC 2	Entire Property	Other1 De-Icing	Onsite	Na Cl- EC SAR	Groundwater Groundwater Soil Soil
APEC 3	Entire Property	Pesticides (including Herbicides, Fungicides and Anti-Fouling 40 Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Onsite	Metals Sb Cr (VI) Hg As, Se, Sb OCs	Soil Soil Soil Soil Soil Soil

Notes:

1 - Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,

- (a) identification of past or present uses on, in or under the phase one property, and
- (b) identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

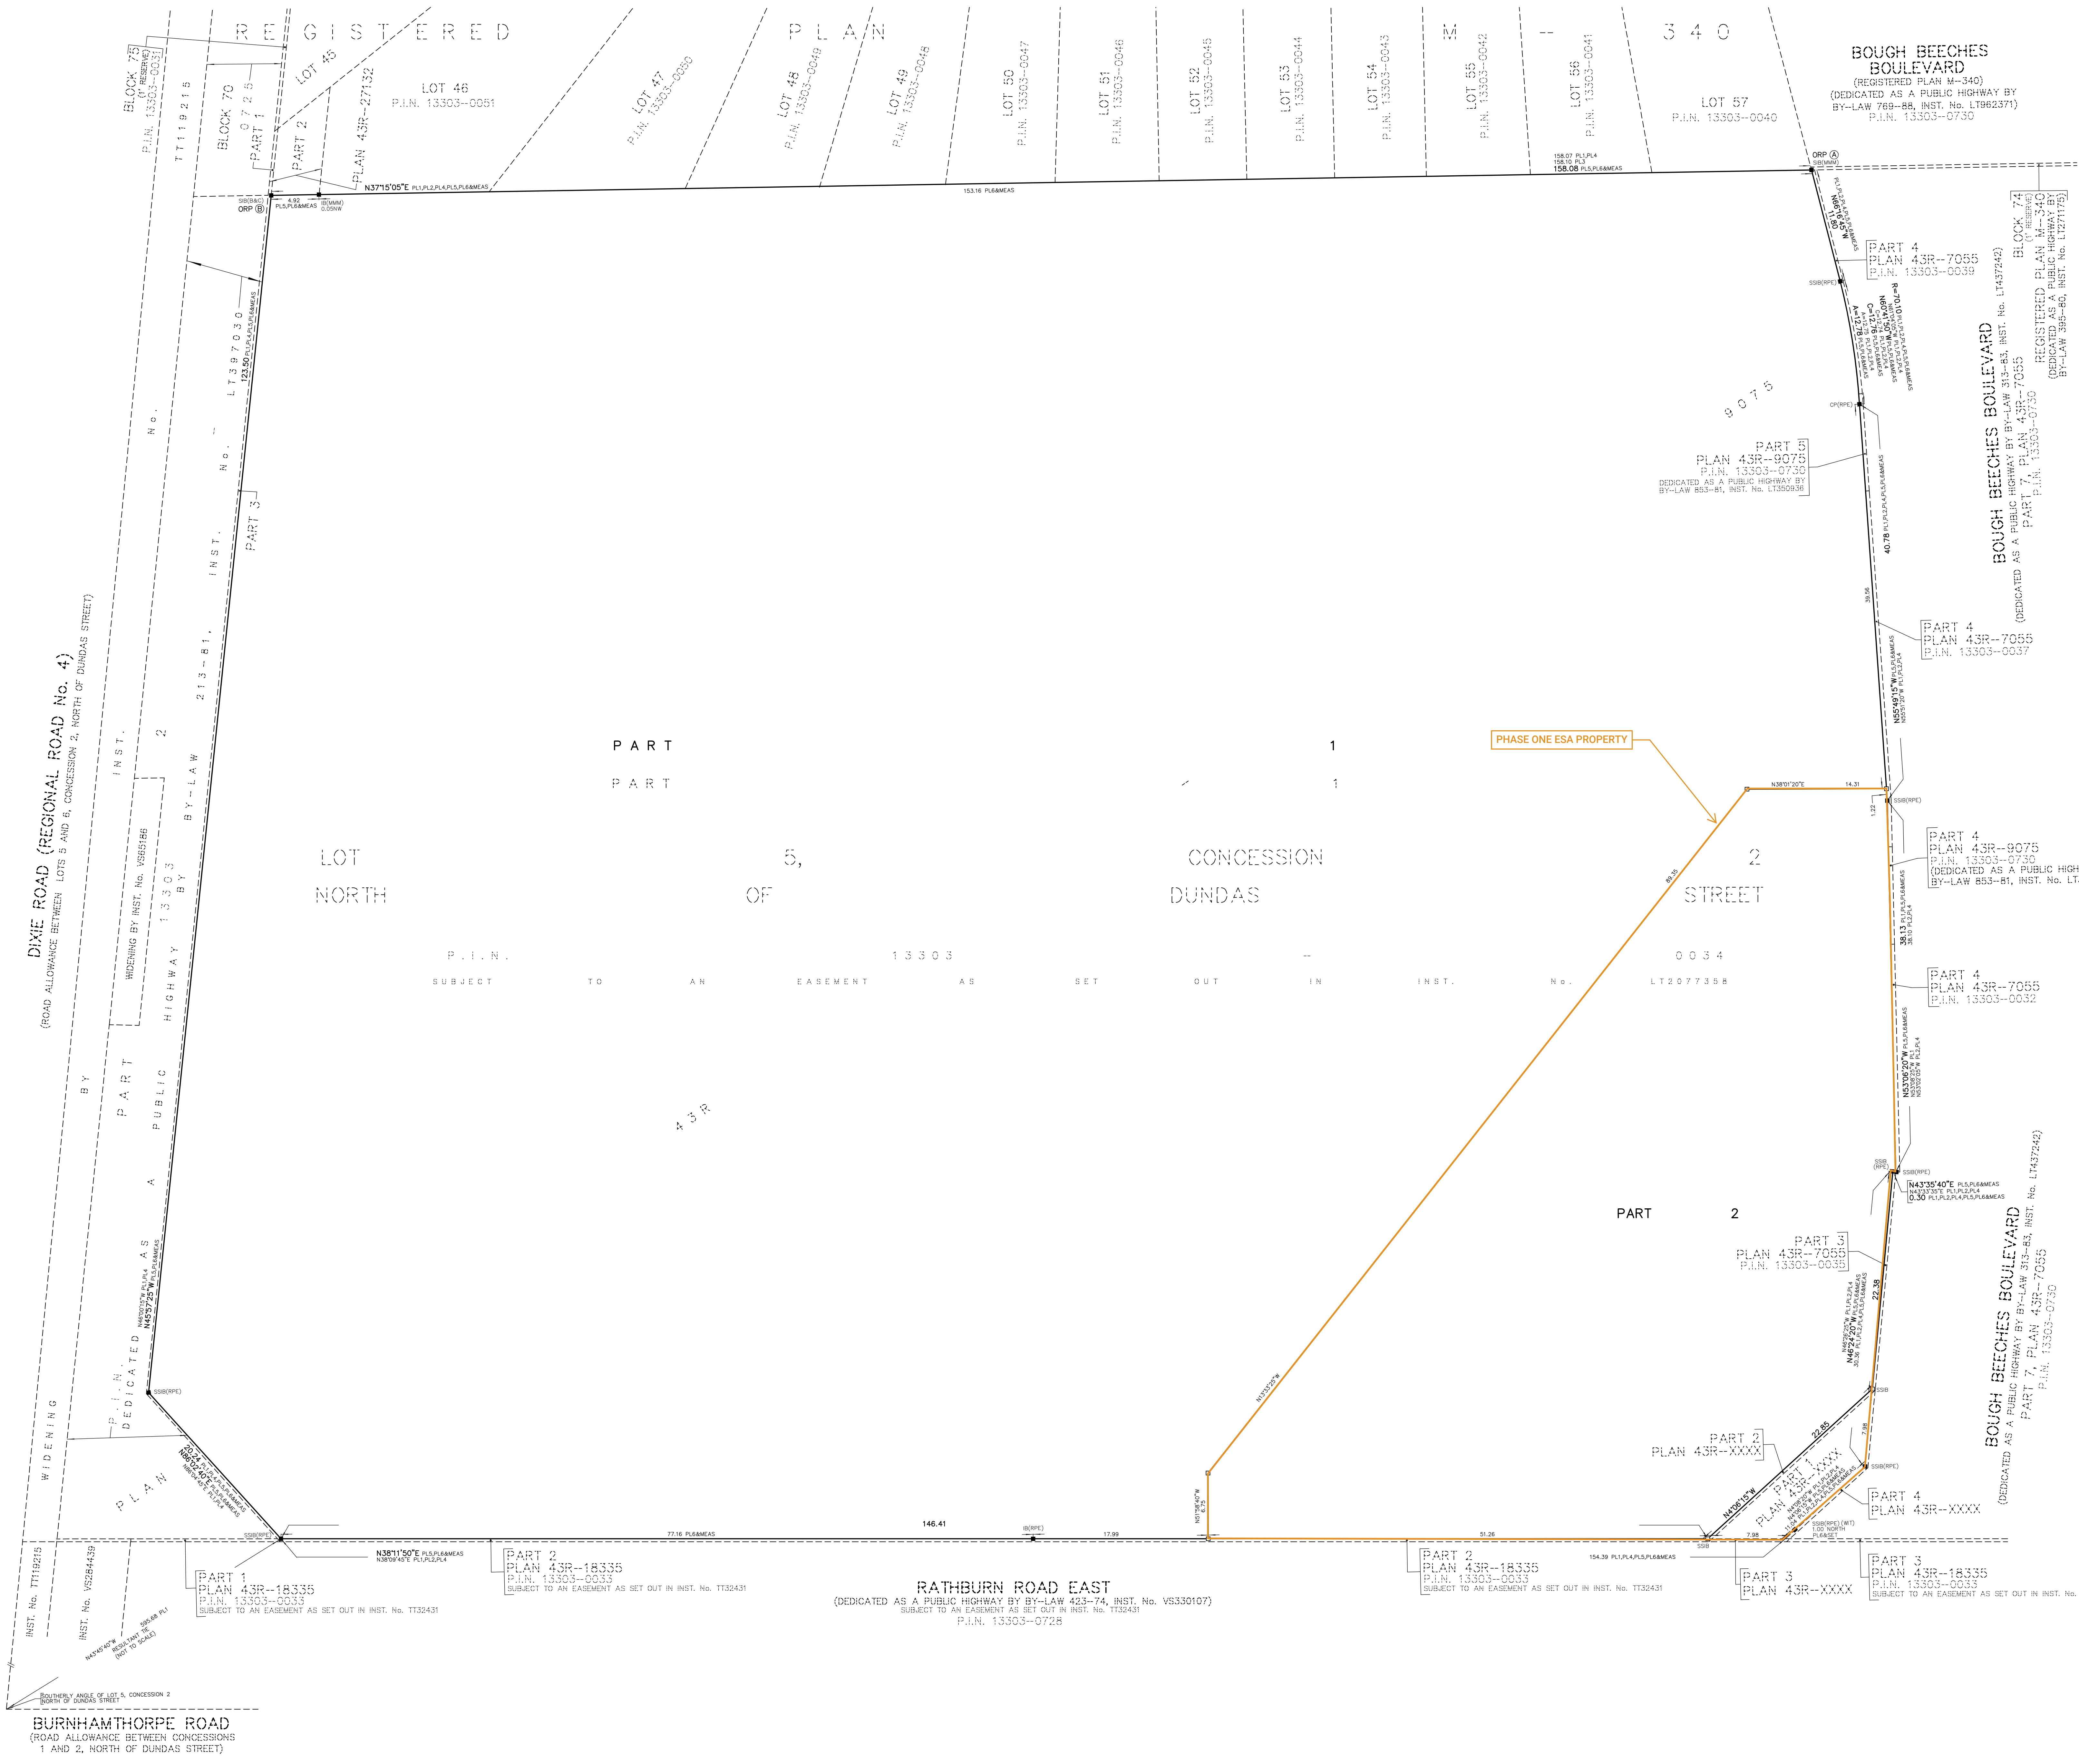

3 - when completing this column, identify all contaminants of potential concern using the Method Groups as identified in the Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs	Metals
CPs	As, Sb, Se
1,4-Dioxane	Na
Dioxins/Furans, PCDDs/PCDFs	B-HWS
OCs	Cl-
PHCs	CN-
PCBs	Electrical Conductivity
PAHs	Cr (VI)
THMs	Hg
VOCs	Methyl Mercury
BTEX	Low or high pH,
Ca, Mg	SAR

4 - when submitting a record of site condition for filing, a copy of this table must be attached

Terms and Conditions

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Verisk's records relating to the described property (hereinafter referred to as the "Property"). Verisk makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Verisk's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Verisk does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Verisk disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Verisk Reports or from any tortious acts or omissions of Verisk's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

The **IAO Risk•Score** and comments contained in this report are based on conditions and practices observed during our survey and other pertinent data supplied by management personnel at the risk.

Recommendations in this report are made to point out those areas where remedial action could have the beneficial effect of making the above premises safer, and thus more desirable from an underwriting standpoint.

Thank you for choosing IAO to perform this inspection. Please do not hesitate to contact us if we can be of any further assistance.

(1=Excellent & 9=Poor)

RISK ALERT ISSUED : Yes No If yes, describe (A risk alert is a telephone notification to the Inspection requestor, of a situation which could imminently cause a serious loss. A Critical Recommendation will be issued to address the situation.)

Committed to Service Excellence

IAO reports, prepared in compliance with commonly accepted risk control standards existing at the time services are rendered, are developed from an inspection of the premises and/or from data supplied by or on behalf of the Purchaser. IAO does not purport to list all hazards. While changes and modifications referred to in the reports are designed to upgrade protection and loss prevention of the premises, IAO assumes no responsibility for management and control of these activities. IAO will not be responsible to the Purchaser for any losses or damages, whether consequential or other, however caused, incurred or suffered, as a result of the services being provided.

Meaning of the IAO Risk-Score: The IAO Score is a grading of the risk inspected versus other risks in this class. Similar to the "Commercial" Fire Protection Grading system in design, there is range of 9 categories, with a grading or "score" of 1 being the most desirable. The IAO Score is based on a number of objective criteria pertaining to the risk at the time of our survey, tempered with the experienced judgement of our Loss Control Specialist. As a general guideline, the scores mean the following criteria:

1-3	Risks in this range are well maintained, with no apparent moral hazards or management problems. Undesirable features are non-existent and recommendations, if any, are minor. Risks in this category are excellent (no deficiencies) to better than average for their class.
4-6	The maintenance of Risks in this range is considered average. Moral hazards are not apparent, but there may be possible management problems (e.g. poor housekeeping). Undesirable features noted are correctable, and recommendations will vary from desirable to important. Risks in this category are considered average for their class.
7-9	Risks in this range tend to be poorly maintained. Moral hazards and management problems (e.g. poor housekeeping and maintenance, poor attitude) are evident. Significant undesirable conditions are present and cannot or will not be corrected. Critical Recommendations may be present. Risks in this category are significantly below average for their class with little or no indication for improvement.

3.0 REMARKS

This high rise apartment building is protected by automatic sprinklers in the underground parking level and the garbage chutes. It is located east of Dixie road and north of Burnhamthorpe road in Mississauga.

The contact was friendly and cooperative and appeared to be interested in loss prevention.

The partial automatic sprinkler system was neither tested nor evaluated on this inspection. A complete sprinkler report can be obtained upon written request to CGI Markham office.

4.0 RECOMMENDATIONS

Please note that these recommendations are classified as either **Critical**, **Important**, or **Desirable Improvement**. "**Critical**" recommendations are those aimed at correcting undesirable feature/s which, if left unattended, could cause a serious loss and should be rectified immediately. This class of recommendation is only used in extreme situations. "**Important**" recommendations are intended to highlight undesirable feature/s which if left unattended, could cause a serious loss and should be rectified as soon as possible. "**Desirable Improvement**" recommendations are those aimed at correcting an undesirable feature which can be improved when feasible, to help reduce the risk of a loss.

Listed below or None

03-1	<input type="checkbox"/> Critical <input checked="" type="checkbox"/> Important <input type="checkbox"/> Desirable Improvement
	All class 2A, water type, portable fire extinguishers, should be upgraded to class 2A10BC.

03-2	<input type="checkbox"/> Critical <input type="checkbox"/> Important <input checked="" type="checkbox"/> Desirable Improvement
	A current copy of the snow and ice removal contractor's liability insurance should be kept on file at all times.

03-3	<input type="checkbox"/> Critical <input type="checkbox"/> Important <input type="checkbox"/> Desirable Improvement

5.0 OCCUPANCY INFORMATION (IBC Occupancy Code 6621)

The Insured is

<input type="checkbox"/> Owner Occupant	<input checked="" type="checkbox"/> Non-occupant building owner	<input type="checkbox"/> Tenant
Name of building owner(if not Insured):		Number of years bldg. Owned: 20
Number of years at this location:20	Area occupied (sq. m): 0	Business hours: Open 24 hours, 7 days a week
Days per week: 7 days	Annual Revenue (optional):	Payroll (optional):
Previous loss history past 3 years <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Undetermined		Previous loss history past 6 years <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Undetermined
Explain loss history: A fire occurred in a penthouse apartment unit, approximately 2 years ago, when a black neon light was knocked over. Physical damage was confined to the unit and smoke damage to the immediate vicinity.		
Insured Values: Property: \$20250000		Contents: \$N/A
Combustibility of Occupancy: L2		Susceptibility of Occupancy: S2-Slight Damage

Occupancy : <input type="checkbox"/> Major Tenant OR <input checked="" type="checkbox"/> Insured IBC Industry Code:6621		or <input type="checkbox"/> refer to Occupancy Specific Supplement:
Occupancy Description: The risk is a 20 storey apartment building, with 1 underground parking level, and 275 units. There is no mercantile presence. A swimming pool (see Supplement) is situated on the grade floor in a structure attached to the building by a corridor. There are emergency telephones on all floor common areas and speakers for a central PA sytem in each unit. All doors are fire rated and have automatic self closers affixed. Emergency stairwell doors were all closed at the time of inspection, and housekeeping was very good throughout. A superintendents maintenance room is located on the grade level and this was found to be safe. A laundry room is also situated on the grade level with 15 washers and 15 dryers and these appear safe and the ducting is cleaned annually.

Committed to Service Excellence

IAO reports, prepared in compliance with commonly accepted risk control standards existing at the time services are rendered, are developed from an inspection of the premises and/or from data supplied by or on behalf of the Purchaser. IAO does not purport to list all hazards. While changes and modifications referred to in the reports are designed to upgrade protection and loss prevention of the premises, IAO assumes no responsibility for management and control of these activities. IAO will not be responsible to the Purchaser for any losses or damages, whether consequential or other, however caused, incurred or suffered, as a result of the services being provided.

RE: CITY DIRECTORY RESEARCH
1315 Bough Beeches Boulevard
Mississauga, ON L4W 4A1

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

1225-1375 of Bough Beeches Boulevard
4100-4300 of Dixie Road
ALL of Northern Hickory Road
4200-4300 of Poltava Crescent
1350-1500 of Rathburn Road E

Search Notes:

Mississauga, Ontario, is last listed in 1958.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2024

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-May 2025

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2025

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2023

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2025

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2025

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Apr 2025

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Jun 30, 2025

Drill Hole Database:Provincial [DRL](#)

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Aug 2024**Delisted Fuel Tanks:**Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023**Environmental Activity and Sector Registry:**Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011 - Jun 30, 2025**Environmental Registry:**Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Jun 30, 2025**Environmental Compliance Approval:**Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011 - Jun 30, 2025**Environmental Effects Monitoring:**Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007***ERIS Historical Searches:**Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Aug 31, 2024**Environmental Issues Inventory System:**Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2024

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Jan 2025

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Dec 31, 2024

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Apr 2024

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2025

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

Government Publication Date: Dec 31, 2023

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-May 31, 2025

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Feb 2024

National Pollutant Release Inventory - Historic:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2025

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

Government Publication Date: 1800-Aug 2024

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Jun 30, 2025

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011 - Jun 30, 2025

Ontario PFAS Spills:

Provincial

PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024

NPRI Reporters - PFAS Substances:

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Feb 2024

Potential PFAS Handlers from NPRI:

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Feb 2024

Pipeline Incidents:

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Potential PFAS Handlers from EASR:

Provincial

PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

Government Publication Date: Jun 30, 2024

Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Jun 30, 2025

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-Jun 2025

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2025

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-May 2025

Wastewater Discharger Registration Database:

Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks:

Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2024

Variances for Abandonment of Underground Storage Tanks:

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011 - Jun 30, 2025

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

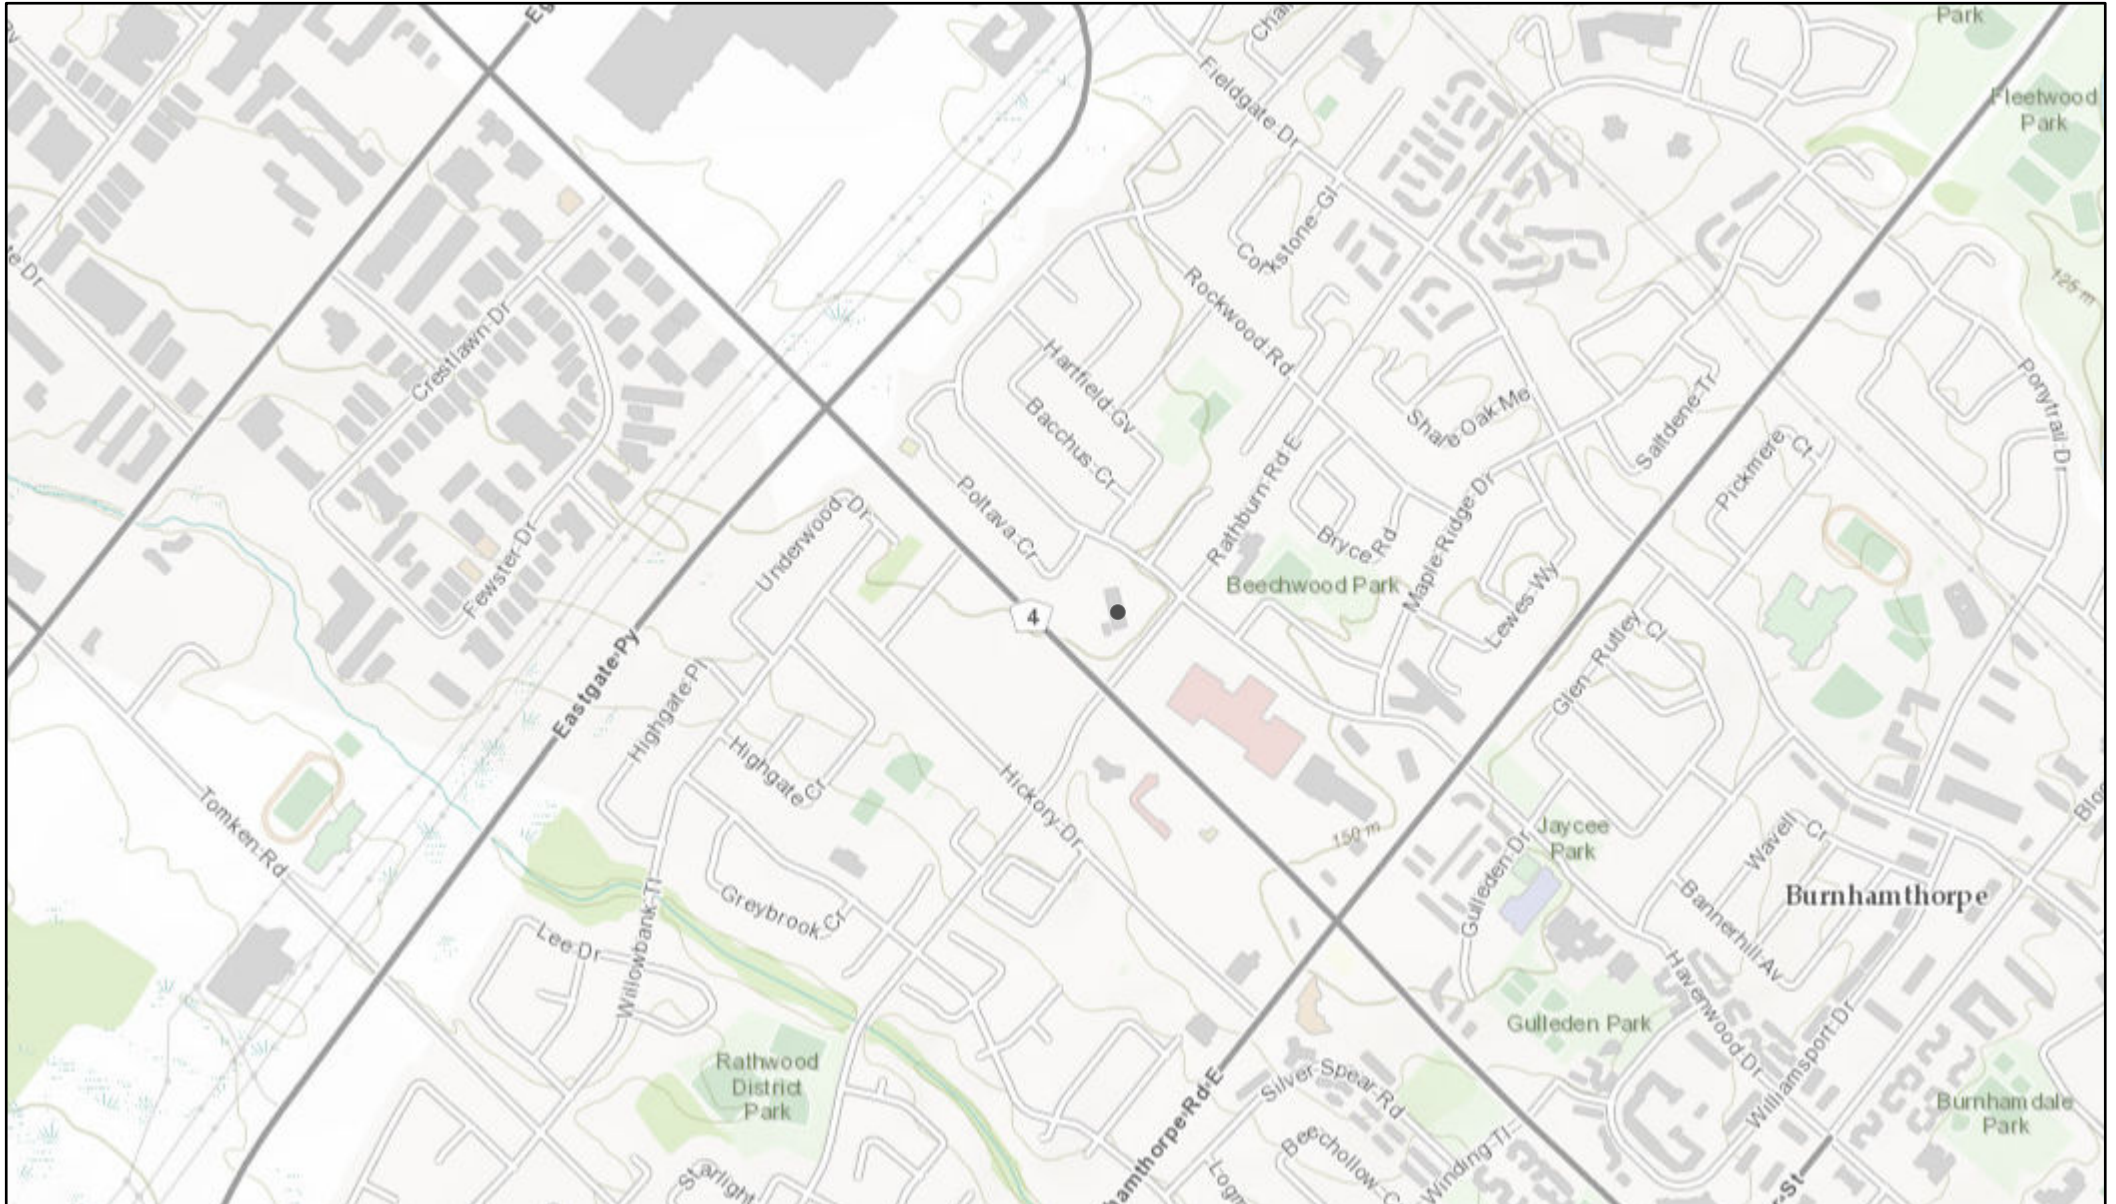

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

NO RECORD FOUND IN CURRENT DATABASE

Hello,

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

- We confirm that there are no records in our current database of any fuel storage tanks at the subject address(es).

Accessing the applications

1. Click [Request a Public Record](#) - TSSA and click "need a copy of a document"
2. Select the appropriate application, download it, complete it in full and save it (Note: you will have to upload the application)
3. Proceed to page 3 of the application and click the "TSSA Service Prepayment Portal" link under payment options (the link will take you the secure site where you can pay for the request via credit card)

Accessing the Service Prepayment Portal

1. Select new or existing customer (*if you are an existing customer, you will need your account number & postal code to access your account)
2. Under "Program Area" select **Public Information** and click continue
3. Enter application form number (found on the bottom left corner of the application form) and click continue
4. Complete the primary contact information section
5. Complete the fee section
6. Upload your completed application
7. Upload supporting documents (if required) and click continue

Once all steps have been successfully completed you will receive your payment receipt via email. TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided. If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at publicinformationsservices@tssa.org.

Kind regards,

Kimberly Gage | Public Information Agent

Good Afternoon,

I am conducting a Phase One ESA and would like to request a record search for the following addresses, all in Mississauga, Ontario:

- 1315 Bough Beeches Boulevard
- 1359 Rathburn Road East
- 4035 Dixie Road
- 1500 Rathburn Road East
- 4228 Poltava Crescent
- 4242 Poltava Crescent
- 4244 Poltava Crescent
- 4246 Poltava Crescent
- 4199 Dixie Road
- 1360 Rathburn Road East

Regards,

Logan Jung-Ritchie

Ministry of the Environment, Conservation and Parks

Freedom of Information Request for Property Information

Instructions

Use this form to:

- submit and pay for a new FOI request for access to records/information about a property
- pay for a deposit or a final fee on an existing FOI request

Fields marked with an asterisk (*) are mandatory.

Are you: *

- Submitting a new FOI Request for Property Information
- Paying a deposit or final fee for an existing FOI Request for Property Information

Section 1 – Description of Records Requested

Time Period for Records Requested

From (yyyy/mm/dd) *

1828/01/01

To (yyyy/mm/dd) *

2025/07/28

Type of Record(s) *

- All environmental records relating to the identified property/site exclusive of Environmental Approvals and Registrations
- Environmental Approvals and Registrations (e.g. Environmental Compliance Approvals; Certificate of Approval; Renewable Energy Approvals; Environmental Activity and Sector Registry Registrations)

Select only if you are seeking access to an Approval or Registration that is not publicly available or if you are also seeking supporting documents relating to the Approval or Registration.

Operator and vendor Pesticide Licenses from September 4, 2018, final Approvals and Registrations are publicly available on the Access Environment website at:

<https://www.accessenvironment.ene.gov.on.ca/AEWeb/ae/GoSearch.action?search=basic&lang=en>.

Records of Site Condition (RSC) records are publicly available on the Brownfields Environmental Site Registry (BSER).

- RSC records between 2004 to June 30, 2011 are available at:
<https://www.lrcsde.lrc.gov.on.ca/besrWebPublic/generalSearch>
- RSC records filed after July 2011 are available at:
https://www.lrcsde.lrc.gov.on.ca/BFISWebPublic/pub/earchFiledRsc_search?request_locale=en

- Other Specific Document(s)

List any record(s) that should be excluded from the scope of your request (e.g. email correspondences; records originating from your organization/business; records already in your possession, prior year(s) annual reports for approvals)

Please provide any additional relevant information relating to your request. For example, does your request relate to any other ministry business? Please note that this information is being requested only in order to provide contextual information to the Access and Privacy Office and will not in any way affect or expedite the status of any related ministry business identified.

Section 2 – Requester Information

Last Name *	First Name *	Middle Initial
<input type="text" value="Shaver"/>	<input type="text" value="Kristen"/>	<input type="text"/>

Business/Organization Name (if applicable or indicate "N/A") *

Project/Reference Number (if applicable)

Are you submitting this request on behalf of a client? *

Yes No

Mailing Address

Unit Number	Street Number *	Street Name *
<input type="text"/>	<input type="text" value="49"/>	<input type="text" value="Mobile Drive"/>

PO Box	City/Town *	Province *	Postal Code *
<input type="text"/>	<input type="text" value="Toronto"/>	<input type="text" value="ON"/>	<input type="text" value="M4A 1H5"/>

Telephone Number *	ext.	Email Address *
<input type="text" value="647-370-3140"/>	<input type="text"/>	<input type="text" value="kshaver@groundedeng.ca"/>

Is there an alternate contact (e.g. office admin)? *

Yes No

Section 3 – Current Property Address Information

Is the property a:

Park Lake First Nation Band Wind Farm Federal Land Island Unsurveyed Land

Are you requesting information about multiple addresses? *

Yes No

Property Address

Unit Number	Street Number	Street Name
<input type="text"/>	<input type="text" value="1315"/>	<input type="text" value="Bough Beeches Boulevard"/>

Full Lot Number	Concession	Geographic Township
<input type="text"/>	<input type="text"/>	<input type="text"/>

City/Town/Village *

Closest Intersection

Bough Beeches Boulevard and Rathburn Road East

Section 4 – Previous Property Address Information

Do you want the ministry to search all prior historical addresses for this property/site for the time period of the records requested? *

Yes No

Section 5 – Supporting Documents

Please upload any documents (e.g. Maps) that are relevant to your FOI request.

The total size of all attachments must not be more than 8 MB.

Bedrock Geology Report

Bedrock Geology units found within 2000 m of
1315 Bough Beeches Boulevard

Page 1
Order No.
25070900326

ID: 13249 | **Unit Name:** |

Type (All): 55b | **Type (Primary):** 55b | **Type (Secondary):** | **Type (Tertiary):** | **Rock Type (Primary):** Shale, limestone, dolostone, siltstone | **Strata (Primary):** Georgian Bay Formation; Blue Mountain Formation; Billings Formation; Collingwood Member; Eastview Member | **Super Eon (Primary):** | **Eon (Primary):** PHANEROZOIC (Present to 542.0 Ma) | **Era (Primary):** PALEOZOIC (251.0 Ma to 542.0 Ma) | **Period (Primary):** ORDOVICIAN (443.7 Ma to 488.3 Ma) | **Epoch (Primary):** UPPER ORDOVICIAN | **Province (Primary):**

Bedrock Geology Report Metadata

Ontario Geological Survey 2011. 1:250 000 scale bedrock geology of Ontario; Ontario Geological Survey, Miscellaneous Release-Data 126 Revision1

ONTARIO MINISTRY OF NORTHERN DEVELOPMENT, MINES AND FORESTRY

ID - Unit ID **Unit Name** - Generalized geological unit classification

Type (All) - The geological unit number(s) or code(s) for all rock types present in an individual polygon.

Type (Primary) - The primary geological unit number or code for the primary rock type in an individual polygon

Type (Secondary) - The secondary geological unit number or code for the secondary rock type, if present, in an individual polygon

Type (Tertiary) - The tertiary geological unit number or code for the tertiary rock type, if present, in an individual polygon

Rock Type (Primary) - Rock type or sub-unit description

Status (Primary) - The Stratigraphic unit. Divided into:

Supergroup (two or more groups and lone formations)
Group (two or more formations)
Formation (primary unit of lithostratigraphy)
Member (named lithologic subdivision of a formation)
Bed (named distinctive layer in a member or formation)

Super Eon (Primary) - A name given to the largest defined unit of geological time, divided into Eons. Unique values which this field may contain (Domains) are:

PRECAMBRIAN (0.542 Ga to <3.85 Ga)

Eon (Primary) - A name given to a defined unit of geological time, divided into Eras. Unique values which this field may contain (Domains) are:

ARCHEAN (2.5 Ga to <3.85 Ga)
PROTEROZOIC (0.542 Ga to 2.50 Ga)
PHANEROZOIC (Present to 542.0 Ma)

Era (Primary) - A name given to a defined unit of geological time, divided into Periods. Each era on the scale is separated from the next by a major event or change. Unique values which this field may contain (Domains) are:

MESOARCHEAN (2.8 Ga to 3.2 Ga)	MESOPROTEROZOIC (1.0 Ga to 1.6 Ga)
NEO-TO MESOARCHEAN (2.5 Ga to 3.2 Ga)	EARLY PALEOZOIC TO NEOPROTEROZOIC (443.7 Ma to 1.0 Ga)
NEOARCHEAN (2.5 Ga to 2.8 Ga)	NEO-TO MESOPROTEROZOIC (0.542 Ga to 1.6 Ga)
PALEOPROTEROZOIC (1.6 Ga to 2.5 Ga)	PALEOZOIC (251.0 Ma to 542.0 Ma)
MESO-TO PALEOPROTEROZOIC (1.0 Ga to 2.5 Ga)	MESOZOIC (65.5 Ma to 251.0 Ma)

Period (Primary) - A name given to a defined unit of geological time, divided into Epochs. Unique values which this field may contain (Domains) are:

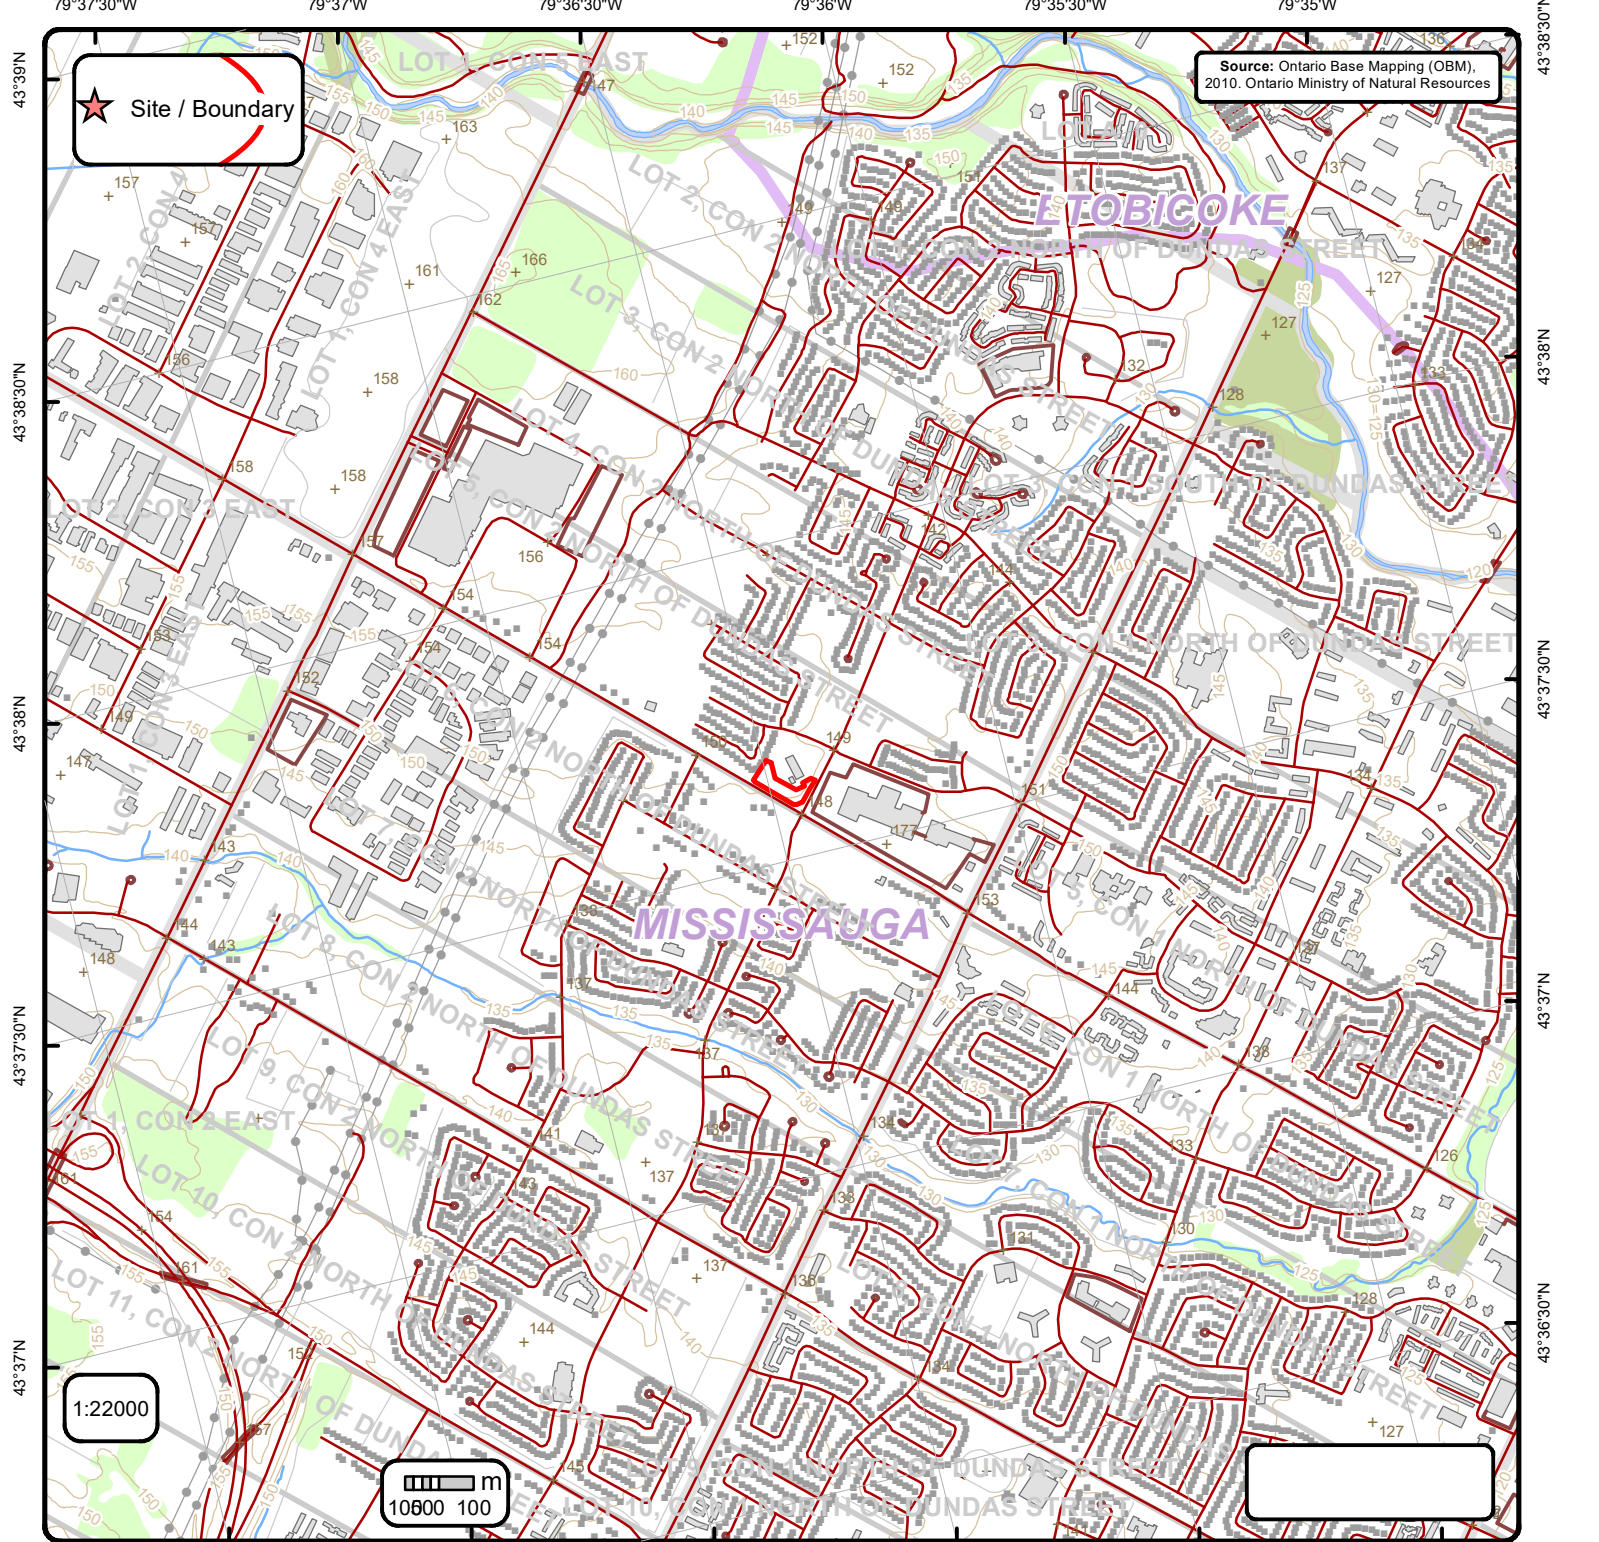

CAMBRIAN (488.3 Ma to 542.0 Ma)
ORDOVICIAN (443.7 Ma to 488.3 Ma)
SILURIAN (416.0 Ma to 443.7 Ma)
DEVONIAN (359.2 Ma to 416.0 Ma)
MISSISSIPPIAN TO DEVONIAN (318.1 Ma to 416.0 Ma)
JURASSIC (145.5 Ma to 199.6 Ma)
CRETACEOUS AND JURASSIC (65.5 Ma to 199.6 Ma)

Epoch (Primary) - A name given to a defined unit of geological time. Unique values which this field may contain (Domains) are:

LOWER ORDOVICIAN	UPPER SILURIAN
MIDDLE ORDOVICIAN	LOWER DEVONIAN
UPPER ORDOVICIAN	MIDDLE DEVONIAN
MIDDLE AND LOWER SILURIAN	UPPER DEVONIAN
UPPER SILURIAN TO LOWER DEVONIAN	LOWER CRETACEOUS AND MIDDLE JURASSIC

Province (Primary) - The Geological Province the geological unit is in. Unique values which this field may contain (Domains) are:

SUPERIOR
SOUTHERN
SUPERIOR
GRENVILLE

Surface Geology Report Metadata

Ontario Geological Survey 2010. Surficial geology of southern Ontario;
Ontario Geological Survey, Miscellaneous Release - Data 128 - Revised.
ONTARIO MINISTRY OF NORTHERN DEVELOPMENT, MINES AND FORESTRY

ID - ID applied to the Unit

Unit Name - Name of deposit

Deposit Type Code - The geological unit number taken from the original map legend.

Deposit Age - to show the age when the sediments were deposited, e.g., Wisconsinan, postglacial or recent.

Map Number - Original map series number, eg., 'M2402' or 'P1973'. Each sgu_point feature is tagged to its original map.

Map Name - Usually NTS area where mapping was completed, e.g., 'Golden Lake'

Source Map Scale - The scale at which the original map was captured, e.g., '1:50 000'

Primary Material - This attribute provides the user with information regarding the most prevalent material present within a given area.

Primary Material Modifier - This attribute provides the user with a more refined description of the lithological classification of the primary material.

Secondary Material - This attribute provides the user with information regarding subordinate materials present within a given area.

Primary General - This attribute provides the user with an interpretation of the depositional environment within which the primary material was deposited.

Primary General Modifier - This attribute provides the user with a refined interpretation of the primary genetic modifier.

Veneer - This attribute provides the user with information regarding the type of material that forms a thin, discontinuous veneer over the primary material.

Sub Episode - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

Sub Episode - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

Phase - A diachronic stratigraphic unit in a lower order than Subepisode, and the proposed sequence-stratigraphic classification is listed in the following table in the eastern and northern Great Lakes area (Karrow et al. 2000)

Stratus Modifier - This attribute provides the user information regarding the stratigraphic position of the mapped unit (i.e., whether the unit occurs primarily on the surface or in the subsurface).

Provenance - This attribute provides the user with information regarding the provenance of a particular till unit (i.e. direction or lobe from which the till is derived).

Carbon Content - This attribute provides the user with information regarding the carbonate content of till.

Formation - This attribute provides the user with information regarding the formation to which a given primary material belongs (e.g., Tavistock Till, Port Stanley Till, Scarborough Formation). This attribute is seamless and allows the user to create a map based on formation.

Permeability - This attribute provides the user with basic information about permeability of the sediments in a ranking of high, medium and low.

Material Description - Material or sediment description, e.g., 'sand and silty fine sand', 'silty sand and gravel' and 'silty till with low stone content'.

Description: Berm on the northeastern portion of the Property with the asphalt parking lot to the west and Bough Beeches Boulevard to the east.

APPENDIX K

Phase One Environmental Conceptual Site Model

Eastern Portion of 1315 Bough Beeches Blvd, Mississauga, Ontario

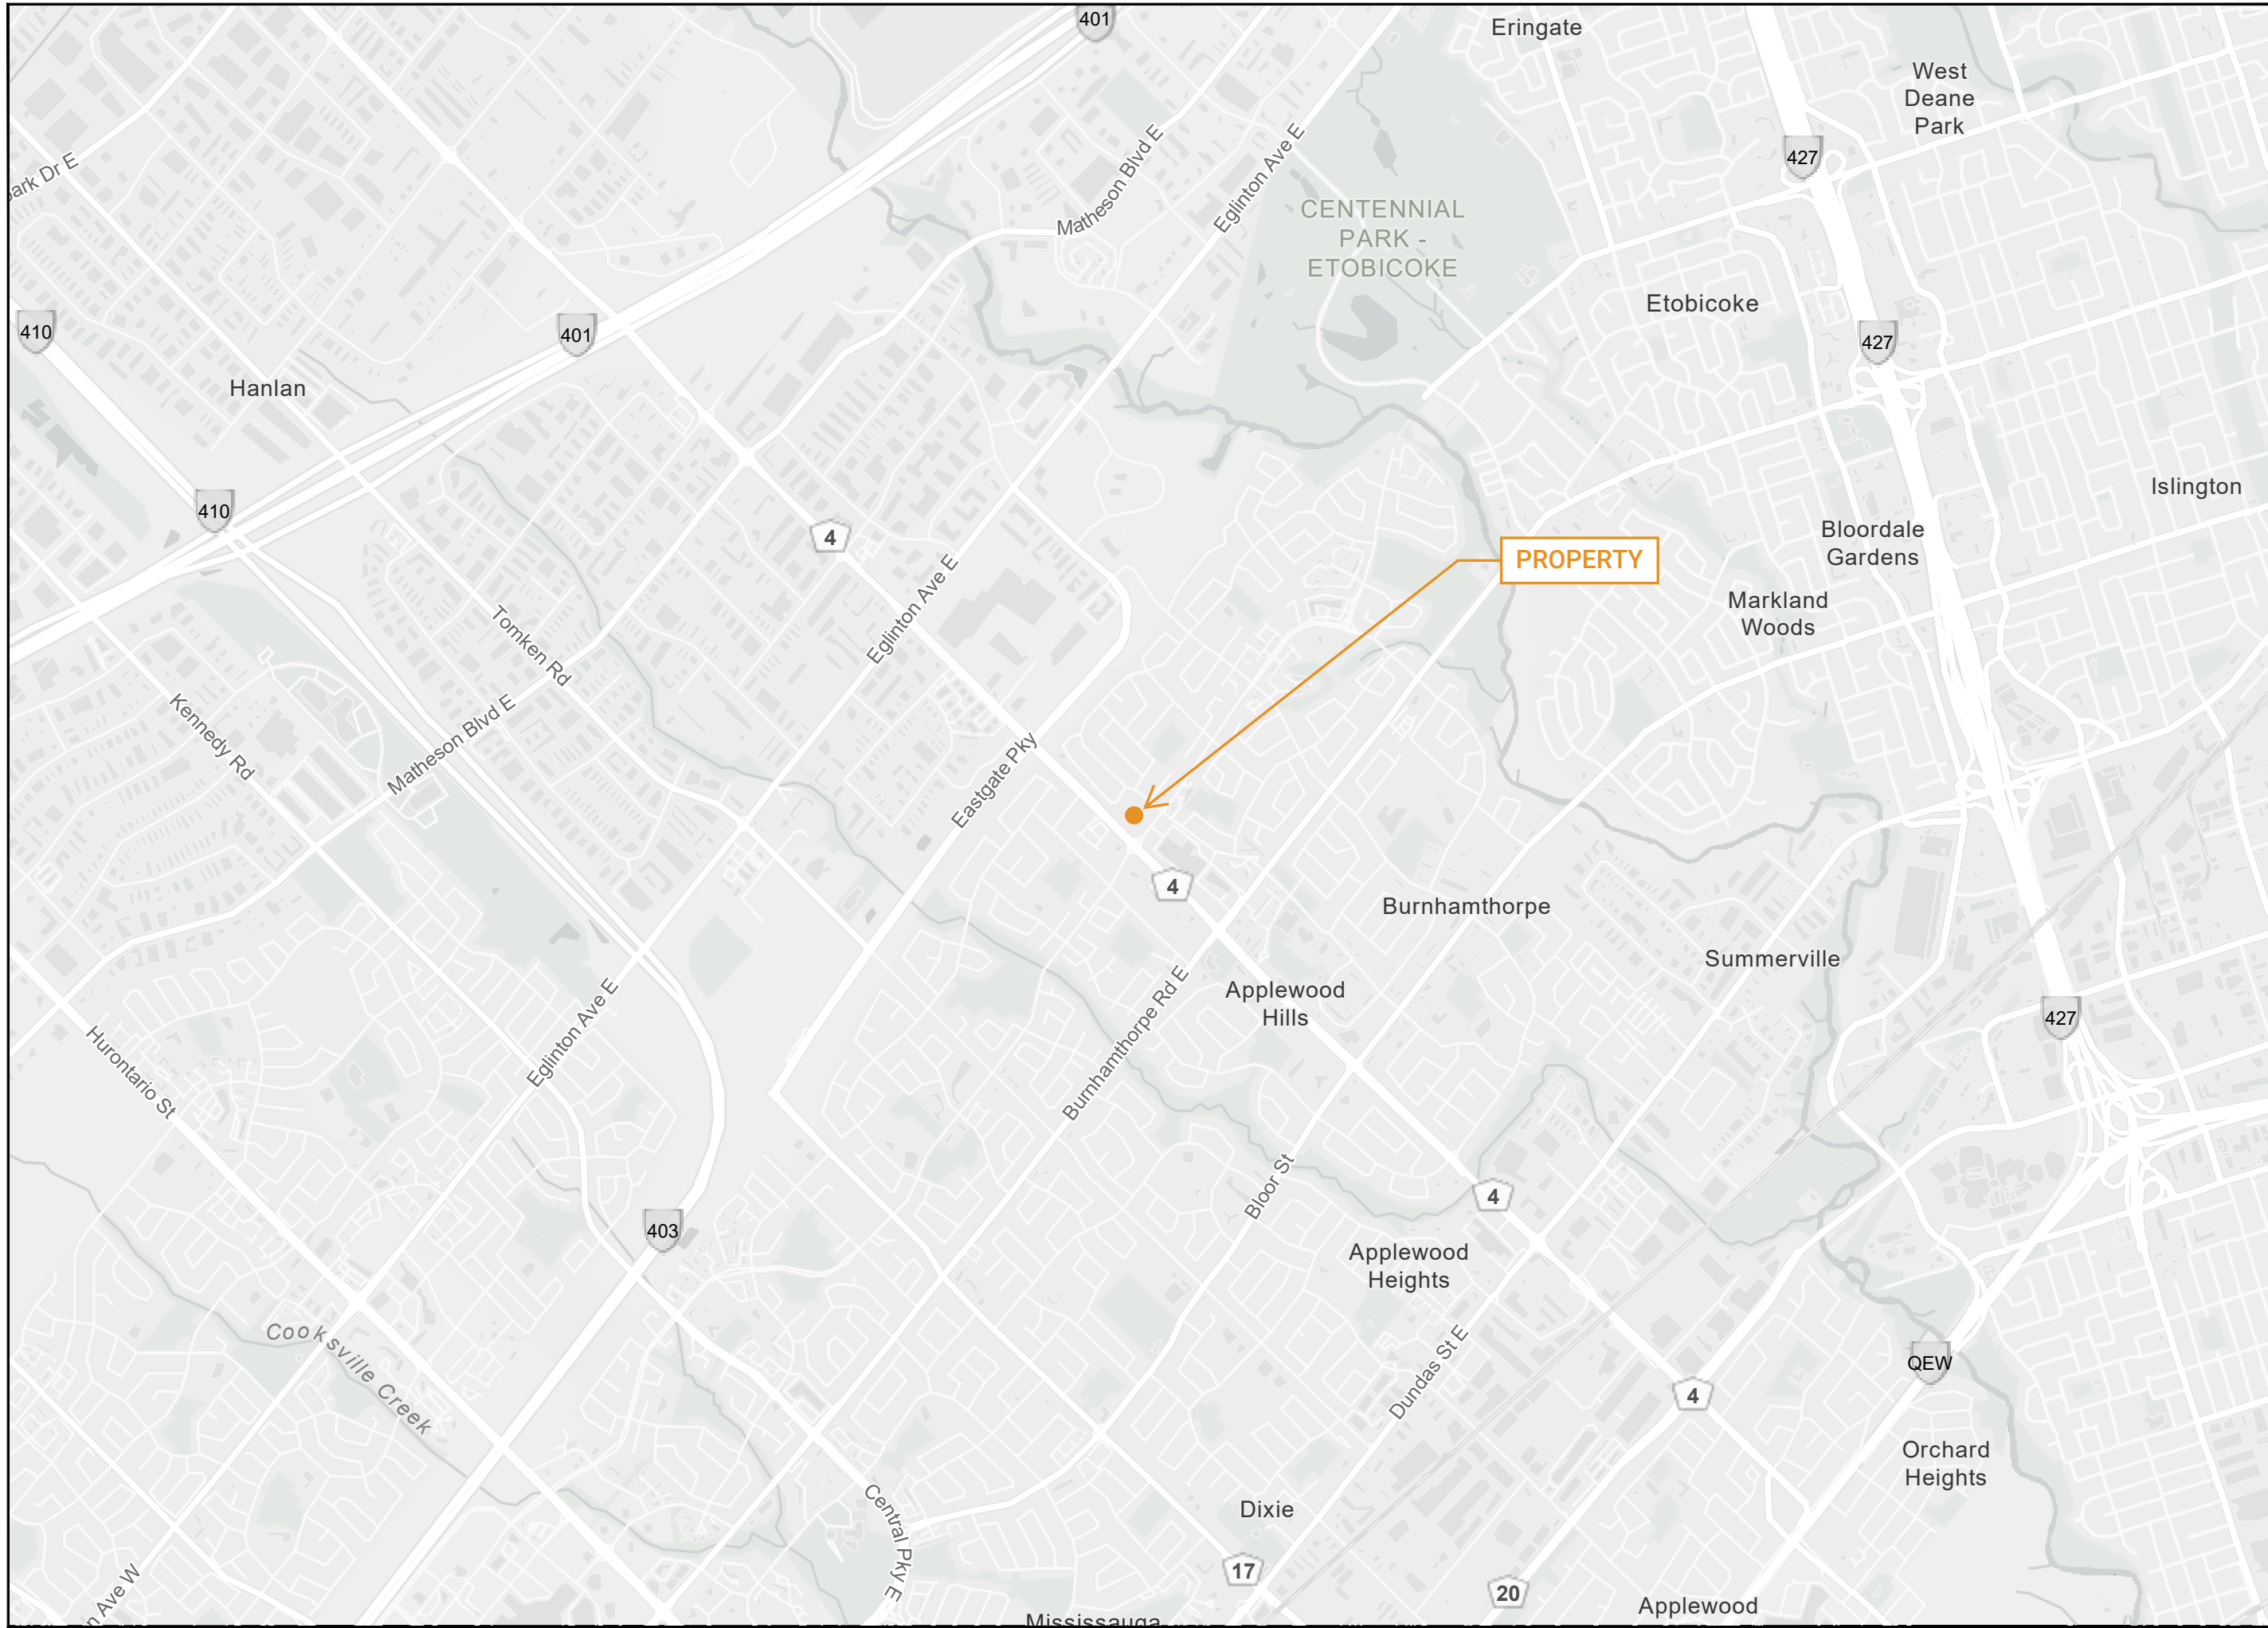

Phase One ESA including Figures of the Phase One Study Area, which identify the following:	Phase One ESA Information:
Existing buildings and structures	Existing buildings and structures are presented in Figure 2.
Water bodies located in whole or in part on the Phase One Study Area	All water bodies on the Phase One Property and Phase One Study Area are shown on Figure 3.
Areas of Natural Significance located in whole or in part on the Phase One Study Area	There were no Life Science ANSIs identified on the Property or within the Study Area.
Roads (including names) within the Phase One Study Area	The roads within the Phase One Study Area are shown on Figure 3.
Use of properties adjacent to the Phase One Property	The current use of properties adjacent to the Phase One Property is shown on Figure 3.
Location of drinking water wells on the Phase One Property	There were no drinking water wells present on the Phase One Property.
Areas where any PCA has occurred, and locations of tanks in the Phase One Study Area	The locations of PCAs and tanks, if any, are shown on Figure 4.
APECs on the Phase One Property	The location of APEC(s) identified on the Phase One Property are shown on Figure 5. Details of the APECs are provided on Table 3.
Narrative Description and Assessments	
Any areas where Potentially Contaminating Activity (PCAs) on, or potentially affecting, the Phase One Property have occurred	<p>Table 2 provides a summary and assessment of the identified PCAs within the Phase One Study Area and at the Phase One Property, including which PCAs were determined to be contributing to an APEC at the Phase One Property.</p> <p>The location of APEC(s) identified on the Phase One Property are shown on Figure 5. Details of the APECs are provided on Table 3.</p>
Any Contaminants of Potential Concerns (CoPCs)	CoPCs related to the identified PCAs and to be investigated in the resultant APECs are identified in Table 3.

<p>The potential of underground utilities (if any present) to affect contaminant distribution and transport</p>	<p>Buried hydro, communication, water and electrical run through the Property. Based on these observations and an anticipated groundwater level of 5.7 metres below ground surface (mbgs), it is unlikely for underground utilities to affect the distribution and transportation of contaminants underneath the Property.</p>
<p>Available regional or site specific geological and hydrogeological information</p>	<p><u>Topography:</u> The approximate elevation of the Property is 149.5 mASL and is relatively flat, with a slight slope towards the southwest.</p> <p><u>Hydrology:</u> The nearest body of water is Little Etobicoke Creek, located approximately 850 m to the southwest of the Property. Lake Ontario is located approximately 7.1 km southeast of the property. Surface water flow is expected to flow to the municipal catch basins located on the Property and the adjacent roadways. Groundwater is expected to flow southwest, towards Little Etobicoke Creek, and ultimately southeast to Lake Ontario.</p> <p><u>Overburden:</u> Glaciolacustrine deposits of Late Wisconsin age, massive to laminated silts and clays, may contain poorly sorted diamicton layers.</p> <p><u>Bedrock:</u> Georgian Bay Formation comprised of shale, limestone, dolostone, and siltstone. Based on the bedrock contour map of the area (Rogers et al., 1961), bedrock is located approximately 23 mbgs.</p>
<p>Any uncertainty or absence of information obtained in the Phase One ESA that could affect the validity of the CSM</p>	<p>There was no uncertainty or absence of information identified during the Phase One ESA that affects the validity of the CSM.</p>
<p>Intention to Rely on Exemptions</p>	<p>The Property is bound by municipal roadways to the north (Bough Beeches Boulevard) and south (Rathburn Road East). The roadways have public sidewalks between the road and the Property boundary. The Property features car parking.</p> <p>The Qualified Person (QP) has determined, based on the Phase One Environmental Site Assessment, that a substance has been applied to surfaces of the roadway, sidewalks, driveway and parking area for the safety of vehicular and pedestrian traffic under conditions of snow or ice or both.</p> <p>The QP intends to rely on the exemption as outlined in O. Reg. 153/04 49.1 and as such, the applicable site condition standard is deemed to meet for the purpose of Part XV.1 of the Act.</p>

TABLES

TABLE 2:
SUMMARY OF POTENTIALLY CONTAMINATING ACTIVITIES WITHIN PHASE ONE STUDY AREA
(Refer to Table 2, Schedule D, O. Reg. 153/04)

Location of PCA	Figure 4 Legend	PCA	Leads to an APEC?	Source	Description	Rationale
Phase One Property	30 A	30 - Importation of Fill Material of Unknown Quality	Yes (APEC 1)	Aerials Site Visit	A current residential high-rise building with a one level underground parking garage currently occupies a portion of the address 1315 Bough Beeches Blvd. Raised berms were observed during the site visit on the Property.	Due to the historical development at the municipal address and observations made during the site visit, it is the opinion of the QP that this PCA will likely cause an APEC on the Property.
Phase One Property	Other1 A	Other1 - De-Icing	Yes (APEC 2)	Site Visit	The property contains an asphalt parking lot. Private and municipal walkways were observed adjacent to the Property boundaries. Bough Beeches Boulevard runs along the northeastern portion of the Property, and Rathburn Road East runs along the southeastern portion of the Property.	It is likely that salt has been applied to the parking lot, private walkways, municipal sidewalks, and roadways adjacent to the Property. Therefore, it is the opinion of the QP that this PCA will likely cause an APEC on the Property.
Phase One Property	40 A	40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Yes (APEC 3)	Aerials	An orchard was noted on the Property in the 1939, 1946, 1954, and 1966 aerial images.	Due to the potential for the application of pesticides, it is the opinion of the QP that this PCA will lead to an APEC on the Property.
1500 Grazia Ct. 34 m east	28 A	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	Site Visit	Fill and vent pipes were observed around the underground parking structure of the high-rise residential building.	Based on the cross-gradient location from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
1315 Bough Beeches Boulevard 73 m West	28 B	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	Site Visit	One (1) AST and associated fill and vent pipes were observed in the underground parking garage of the residential building on the Phase One Property.	During the site visit, an AST was observed in the parking garage. The tank appeared to be in good condition, with no sign or known history of spills, no staining or corrosion on the floor or around the fill and vent pipes above. Based on the visual inspection, and cross gradient location, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
1490 Rathburn Rd. E. 103 m southeast	28 C	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	ERIS Site Visit	Fill and vent pipes were observed in the parking lot adjacent to the building of this residential apartment building. A generator of waste class 252 (waste oil & lubricants) was registered to Lifestyle Retirement Communities in 2014 and 2015.	Based on the cross-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
Intersection of Dixie Rd. & Rathburn Rd. E. 129 m southwest	Other2 A	Other2 - Spills	No	ERIS	A spill of unknown volume of oil was noted in 2011. Oil sheen and white powder were observed in Little Etobicoke Creek.	Based on the down-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
4141 Dixie Rd. 217 m south	31 A	31 - Ink Manufacturing, Processing and Bulk Storage	No	CD ERIS	Black Photo Corporation was registered as producing photoprocessing wastes from 1990 to 2001 and the City Directory in 2012. Arthur's Creative Services was registered as a miscellaneous publisher in 1989. Maysoft Engineering & Printing was registered as a newspaper and periodical publisher in 1990 and in the City Directory in 2001, 2008, 2012, 2017. International News was noted in the City Directory in 2008, 2017, 2021.	Based on the down-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
4251 Dixie Rd. (Currently part of 4222 Dixie Rd.) 222 m northwest	10 A	10 - Commercial Autobody Shops	No	CD	Green Auto Valve Machine Shop noted in the 1970-71 City Directory.	Based on the cross-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
4141 Dixie Rd. 226 m south	37 A	37 - Operation of Dry Cleaning Equipment (where chemicals are used)	No	CD	Award Cleaners noted in the City Directory in 2001, 2008, 2012, 2017, 2021, 2023, 2024.	Based on the down-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
1359 Rathburn Rd. E. 237 m southwest	28 D	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	Site Visit	Fill and vent pipes were observed around the underground parking structure of this high-rise residential building.	Based on the cross-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
1360 Rathburn Rd. E. 242 m southwest	31 B	31 - Ink Manufacturing, Processing and Bulk Storage	No	CD	City Directory noted the building was registered to Toronto Star Ltd Corp in 1991.	Based on the down-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
4266 Dixie Rd. 243 m northwest	28 E	28 - Gasoline and Associated Products Storage in Fixed Tanks	No	ERIS	A generator of waste class 252 was noted from 2003 to 2006 and registered to Volturmo Excavating Company Limited.	Based on the cross-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.
1343 Rathburn Rd. E. 248 m southwest	Other2 B	Other2 - Spills	No	ERIS	A spill of unknown volume of hydraulic oil to the grass and catch basin was noted in 2018.	Based on the down-gradient distance from the Property, it is the opinion of the QP that this PCA is unlikely to cause an APEC on the Property.

TABLE 3:
TABLE OF AREAS OF POTENTIAL ENVIRONMENTAL CONCERN
(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1	Entire Property	30 Importation of Fill Material of Unknown Quality	Onsite	Metals As, Sb, Se B-HWS CN- Cr(VI) Hg PAHs PHCs BTEX VOCs	Soil & Groundwater Soil & Groundwater Soil Soil & Groundwater Soil & Groundwater Soil & Groundwater Soil & Groundwater Soil & Groundwater Soil & Groundwater
APEC 2	Entire Property	Other1 De-Icing	Onsite	Na Cl- EC SAR	Groundwater Groundwater Soil Soil
APEC 3	Entire Property	Pesticides (including Herbicides, Fungicides and Anti-Fouling 40 Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Onsite	Metals Sb Cr (VI) Hg As, Se, Sb OCs	Soil Soil Soil Soil Soil Soil

Notes:

1 - Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,

- (a) identification of past or present uses on, in or under the phase one property, and
- (b) identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

3 - when completing this column, identify all contaminants of potential concern using the Method Groups as identified in the Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs	Metals
CPs	As, Sb, Se
1,4-Dioxane	Na
Dioxins/Furans, PCDDs/PCDFs	B-HWS
OCs	Cl-
PHCs	CN-
PCBs	Electrical Conductivity
PAHs	Cr (VI)
THMs	Hg
VOCs	Methyl Mercury
BTEX	Low or high pH,
Ca, Mg	SAR

4 - when submitting a record of site condition for filing, a copy of this table must be attached
