TABLE OF CONTENTS

LIST OF TABLES

LIST OF APPENDICES

1.0 Introduction

LGL Limited was retained by Derry Britannia Developments Limited to prepare a tree management plan (TMP) for several properties fronting Ninth Line, in the city of Mississauga, collectively known as Mattamy Ninth Line. This assignment includes addresses 6136, 6168, 6252, 6288, 6302, 6314, 6432, and 6596 Ninth Line, located east of Highway 407, north of Britannia Road West, on the west side of 9th Line (Figure 1).

This file has included several tree management plan submissions over recent years, including:

- Tree Management Plan - Draft Plan of Subdivision Mattamy (Derry Britannia) Developments Limited, January 2023 (Revised Draft Plan)
- Tree Management Plan - Draft Plan of Subdivision Mattamy (Derry Britannia) Developments Limited, August 2021 (Revised Draft Plan)
- Tree Management Plan - 6596 Ninth Line Presentation Centre and Model Homes, 2021
- Tree Management Plan - Draft Plan of Subdivision Mattamy (Derry Britannia) Developments Limited, April 2020 (Revised Draft Plan)
- Tree Management Plan - Draft Plan of Subdivision Mattamy (Derry Britannia) Developments Limited, June 2019

The 6596 Ninth Line Presentation Centre and Model Homes study area has undergone a separate application (2019, February 2021) to permit the construction of a sales office and is included in this report for consistency, but proposed tree removals have been excluded from this tally. Further, the proponent has acquired 6288 Ninth Line, which was not part of previous report submissions but proposed tree removals are included in this report. These properties are collectively referred to as the Derry Britannia Developments Limited Subject Lands within this report.

This submission, subsequent to previous submissions for draft plan of subdivision application, is scoped only to the Stage 1 Tree Clearing Area as identified by Urbantech Consulting, and as illustrated in Figure 1.

2.0 Background

The City of Mississauga (City) has enacted a Terms of Reference for Arborist Reports (September 2022), which regulates the injury and removal of trees on private and municipal property and required replacement trees to compensate for removals. The City regulates the removal of trees greater than 10 centimetres in diameter on private property, 6 centimetres in diameter on municipal property within 6m of the subject property and requires landowners to obtain a City permit to remove trees for land development. Permits may be subject to various conditions including, but not limited to, replacement planting requirements, tree preservation planning, and adequate tree protection hoarding.

This report identifies tree resources, and confirms previous removal under City-issued permit for each tree found within the Subject lands. The information, interpretation and analysis contained within this Assessment are to be used solely for the purposes outlined within this Assessment. This Assessment is for the exclusive use of Mattamy Derry Britannia Developments Limited.

Relevant definitions of the By-law used in this report include:

- *Boundary tree* means a tree whose tree trunk, at ground level, straddles or is bisected by the property line of the lot;
- *Dead* means a tree that has no living tissue, or a tree which is infected by an invasive pest such as Emerald Ash Borer or Asian Long-horned Beetle as confirmed by an arborist;
- *DBH* means the diameter at breast height, measured outside the bark, of the trunk of a tree, measured at 1.37 metres above grade;
- *Dripline* means the vertical projection of the outermost edge of a tree's canopy;
- *Good Arboricultural Practices* means the proper implementation of removal, renewal and maintenance activities known to be appropriate for individual trees in and around urban areas to minimize detrimental impacts on urban forest values and includes pruning of trees to remove dead limbs, maintain structural stability and balance, or to encourage their natural form, provided that such pruning is limited to the appropriate removal or not more than one-third of the live branches or limbs of a tree, but does not include pruning to specifically increase light or space;
- *Hazard* means a tree that is destabilized or structurally compromised such that it poses a potential safety concern to property or life;
- *Healthy tree,* is not defined in the City's tree bylaw, and has been assumed to be a tree in fair or good condition within the context of this report;
- *Tree* means a self-supporting woody plan which will reach a height of at least 4.5 metres at maturity.
- *Tree Protection Fence,* in Mississauga, shall consist of 1.2 metre orange plastic fencing framed with solid top and bottom rail, or 1.2 metre plywood. This is to be installed at a minimum distance to dripline or along the edge and parallel to a tree protection zone; and,
- *Tree Protection Zone* is a distance from the trunk reserved for the protection of a tree's canopy and critical root zone to provide for the viability and stability of the tree.

This report identifies individual trees and respective health characteristics. The information, interpretation and analysis contained within this Assessment are to be used solely for the purposes outlined within this Assessment. This Assessment is for the exclusive use of the client.

3.0 Methodology

Investigations of the Subject Lands were conducted by LGL's ISA Certified Arborist on December 7, 2016 (6136 Ninth Line), July 24, August 1, 22, and September 18, 2018, March 8, 2021, December 22, 2022, and July 4, 2023. Trees on the subject property and shared boundaries with adjacent landowners were surveyed using the following methodology for tree inventory and impact assessment:

- Species: each tree was identified to species level using common and scientific names;
- Size: diameter at breast height (DBH) was recorded in centimetres and measured 1.4 metres above ground level, consistent with International Society of Arboriculture standards. All trees measuring 15cm DBH or greater were assessed;

- Health: each tree surveyed was assigned a ranking of *poor* (more than 30% dead branches, weak compartmentalization, early leaf drop, presence of insects/disease, major structural defects), *dead* – (tree exhibits no signs of life), *fair* (10 - 30% dead branches, size or occurrence of wounds presents some concerns, minor structural defects) or *good* (dead branches less than 10%, signs of good compartmentalization, none or minor wounds, no structural defects). Note that surveys were conducted from ground level only and did not include excavation of root systems or aerial inspections of the canopy;
- On-site identification: each tree was affixed with an aluminum tag showing a unique identification number;
- A species at risk screening (Ontario *Endangered Species Act,* 2007) was completed within 50 metres of the proposed work area;
- Geographic location: the location of each tree was recorded with a differential TopCon GRS1 GPS unit, and plotted in the appended figure with a horizontal accuracy of one metre but note that GPS accuracy is limited by satellite reception and is inherently prone to error. Tree locations on 6288 Ninth Line were recorded with an EOS Arrow 100 differential GPS unit. A review of the mapped locations confirms that accuracy is reasonably similar or within 1 metre in this data set. Identification numbers in the figure correspond with identification numbers in the inventory table;
- Depiction of tree resources on graphic illustrations of the Subject Lands; and,
- An impact assessment that lists trees identified for removal or protection in relation to the proposed plan has been prepared.

4.0 Results

4.1 OVERVIEW

A total of 1044 trees were assessed within the Subject Lands and their boundaries. In total, 39 species were documented, and DBH values ranged in size from 15 to 135 centimetres. Detailed information pertaining to each individual tree is found in Appendix B1 - Tree Resources. Identification numbers found in Appendix B1 correspond with those found on Figure 2A-2E – Tree Resources. Figure 3 presents the species composition for the entire inventory.

4.2 6136 NINTH LINE

The majority of the trees are clustered in the northeast corner of the property and appear to have previously surrounded a residential dwelling that is now demolished. This area is composed primarily of coniferous species that were likely planted as a windrow around the residence (Figure 2A).

Hedgerows adjacent to Ninth Line and on the north edge of the property were composed of typical hedgerow species such as Bur Oak (*Quercus macrocarpa*), Ash (*Fraxinus* spp.), and White Elm (*Ulmus americana*). Several large diameter Bur Oak, Eastern Cottonwood (*Populus deltoides ssp. deltoides*), Red Maple (*Acer rubrum*) and Ash were found throughout the site. Many of the Ash trees were in poor condition, or standing dead. Evidence of Emerald Ash Borer (*Agrilus planipennis*) infestation was present

in all Ash trees assessed.

Two small constructed farm ponds currently exist on site, with an ephemeral drainage ditch/swale poorly connecting both and intersecting the property from north to south. The swale is dominated by Reed-canary Grass (*Phalaris arundinaceae*) and Cattails (*Typha sp.*) dominate the constructed farm ponds.

4.3 6150 NINTH LINE (ADJACENT LANDS)

An adjacent property, 6150 Ninth Line, is currently excluded from the draft plan of subdivision application and Stage 1 Tree Clearing Area. An inventory was completed from the Subject Lands for this parcel, as such, the inventory does not include diameter measurements or location detail with high accuracy. Trees within this parcel are generally limited to dead red ash and opportunistic Manitoba maple, both species exhibiting an approximate 10-20 cm diameter.

4.4 6168 NINTH LINE

This parcel had been undergoing regeneration with a prevalence of Ash trees, though many have succumbed to Emerald Ash Borer infestation and are dead or in a state of severe health decline (Figure 2B). A remnant farm pond and ditch are found on this parcel and associated with Willow and Manitoba Maple, among other species less representative. Several Manitoba maple were added to the inventory in December 2022, as they have become of size to meet the City's criteria for tree inventory. These include trees 556-567.

4.5 6252 NINTH LINE

This parcel has several amenity trees in the front and backyard of former house, now demolished, and a row of Willows lining the ditch at the rear (southwest) of the property (Figure 2C).

4.6 6288 NINTH LINE

An existing house is surrounded by amenity trees of various species, with a prominence of Red Ash is varying states of decline. Willows are prevalent adjacent to a barn/outbuilding garage and near the west boundary of the property.

4.7 6302 NINTH LINE

One of the more densely treed parcels, 6302 is host to the former works yard and lumber mill of an arborist company, now demolished. A White Spruce plantation occurs towards the rear of the property, along with a ditch (Figure 2C). Amenity trees provide dense canopy coverage near the road frontage and surrounding the existing home and office buildings.

4.8 6314 NINTH LINE

This parcel is host to amenity trees surrounding an existing single-family house and a hedgerow boundary

with 6302 Ninth Line (Figure 2C).

4.9 6596 NINTH LINE

This parcel is devoid of trees with the exception of shared boundary trees along the Ninth Line right-of-way (Figure 2E). This parcel has undergone tree removals as part of a development application to construct a Sales Office.

4.10 NINTH LINE RIGHT-OF-WAY

Several trees are located either within or on the existing Ninth Line right-of-way. A total of 17 trees are considered boundary trees along Ninth Line (see Appendix A and Figures).

4.11 STAGE 1 CITY-OWNED NLT-1 CORRIDOR AND MTO 407 LANDS TREE CLEARING AREA

Seventy-three trees were inventoried on July 4, 2023, as part of an additional area identified for tree clearing due to the proposed NLT-1 Corridor channel works and MTO 407 property grade changes.

4.12 SPECIES AT RISK

Species regulated by the Ontario *Endangered Species Act* (ESA, 2007) were not observed on the Subject Lands, nor within a 50m proximity.

5.0 Proposed Plan

The proposed Stage 1 Tree Clearing Area excludes existing woodlots and natural heritage system buffers. Grade changes are required to attain positive drainage and elevate the subject lands from the floodplain.

6.0 Impact Analysis

An impact analysis has been prepared by overlaying the proposed draft plans and grading plans onto the GIS tree data. Tree removal has been recommended for instances where grading, lotting, stormwater management facilities, road widening/daylight triangles, trails, etc., conflict with tree locations and result in an anticipated impact of approximately 20-25% of a tree's dripline. Much of the rationale for tree removal is due to the proposed grade change required to elevate the developable lands to avoid complications with the floodplain (much of the subject lands are currently in the floodplain).

Trees located outside of the Stage 1 tree clearing/site alteration limits have been identified for preservation at this time.

6.1 Tree Removals

A total of 745 trees are proposed for removal to facilitate implementation of the Stage 1 Tree Clearing Area. Of these, 648 are equal to or greater than 15cm and in fair to good condition and require a replacement as a condition of the City's tree removal process.

Fourteen trees identified for removal are dead, and greater than 15cm, and have been excluded from compensation calculations.

6.2 Tree Protection

Trees outside of the proposed Phase 1 Tree Clearing Area shall be preserved unless written authorization from the legal owner is acquired. Currently, trees not owned by the proponent and owned by non-participating parties are proposed for protection.

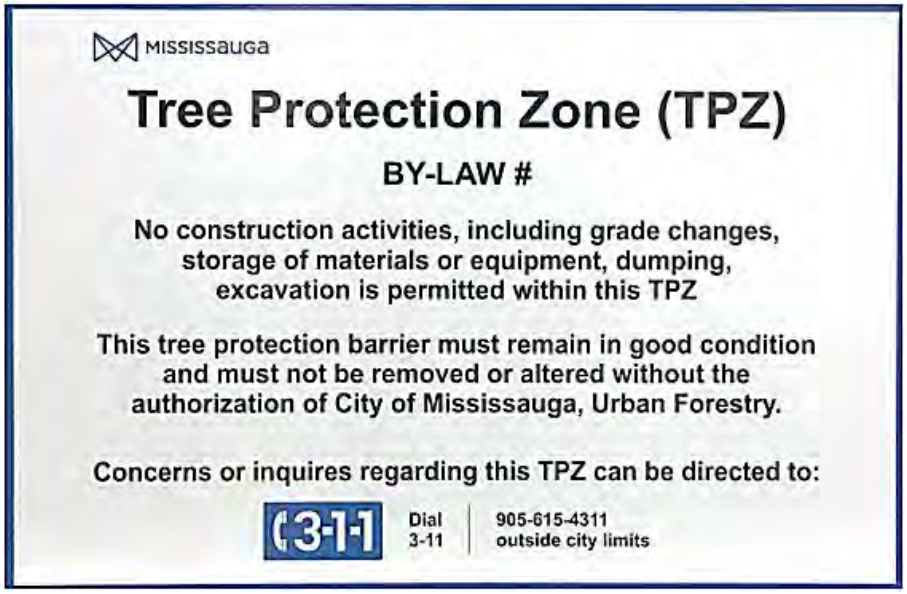
Tree protection specifications comply with City of Mississauga Detail 02830-06 (Appendix C).

Representatives from the City of Mississauga shall inspect all tree preservation hoarding prior to any tree removals.

6.2.1 Tree Protection Zone Sign Specification

Tree protection zone signs are to be:

> 40.64cm by 60.96cm printed on waterproof material. Installation of these signs is mandatory and costs will be assumed by the proponent. No other signage is permitted on tree protection hoarding. TPZ signs will include the following information:



7.0 Municipal Regulation

The City of Mississauga regulates removal of trees greater than 15cm DBH and a tree removal permit may be required prior to site alteration.

The City may issue a Permit requiring the Permit Holder to comply with conditions which may include but are not limited to any one or more of the following:

(1) having regard for Good Arboricultural Practices;

(2) planting a Replacement Tree if the Tree removed is a Healthy Tree;

(3) establishing plans for Tree preservation to the satisfaction of the Commissioner;

(4) maintaining Hoarding around a Tree not subject to Injury or Destruction, and plans indicating the location and type of Hoarding to the satisfaction of the Commissioner; and

(5) any other condition as may be required by the Commissioner.

Where the City has imposed a condition to plant Replacement Trees, the City may also require that:

(1) the Replacement Tree be located on the same Lot from which a Tree was removed, in a location, number, size and/or species to the satisfaction of the Commissioner;

(2) more than one Replacement Tree be required based on the Diameter of the Tree that was removed in accordance with the applicable City policy;

(3) a replanting plan be filed with the City to the satisfaction of the Commissioner; or

(4) a security deposit in accordance with the City's Fees and Charges By-law in a form satisfactory to the Commissioner be delivered to the Commissioner to cover the costs of the Replacement Tree, and for any potential maintenance related to the Replacement Tree for a period of up to two years.

All landowners are required as a condition of the tree removal permit process, to provide 1 replacement tree for every 15cm DBH of tree removed. The sum or DBH (cm) Replacement trees for the Stage 1 Tree Clearing Area are summarized in Table 1. A list of tree removals is provided in Appendix B2. A list of trees identified for removal and greater than 15cm and in fair-good condition is provided in Appendix B3.

Table 1 Tree Replacement Requirements.

Tree Replacement Category	Proposed Tree Removals Meeting City Criteria for Compensation	Cumulative DBH (cm)	Required Replacement Trees Using Formula: Cumulative DBH/15
Trees in fair or good condition equal to or greater than 15cm	648	18,107	1207

7.1 PREVIOUS PROPERTY STANDARDS ORDER

The City of Mississauga Transportation and Works Department issued a Property Standards Order on December 15, 2020, to Derry Britannia Developments Limited for the 6168 Ninth Line property (Appendix D). The Order required that all trees on the property be maintained in a manner that will eliminate a dangerous condition. The required action stated by the City was to remove and clear all dead trees that are within 20 metres from the sidewalk west of Ninth Line. To accommodate this Order, Derry Britannia Developments Limited retained a qualified tree removal contractor to remove dead trees within 20 metres of the sidewalk. Since removals were limited to dead trees the results of this Tree Management Plan remain unchanged as dead trees do not affect compensation/replacement requirements.

8.0 Boundary Trees

The *Forestry Act* regulates harm to trees but also provides governance of boundary or shared property trees. In these instances, removal of boundary trees must be negotiated with neighbouring owners. The following excerpt from the *Forestry Act* also has relevance to this application:

> ***Boundary trees***
>
> ***10.*** *(1) An owner of land may, with the consent of the owner of adjoining land, plant trees on the boundary between the two lands. 1998, c. 18, Sched. I, s. 21.*
>
> ***Trees common property***
>
> *(2) Every tree whose trunk is growing on the boundary between adjoining lands is the common property of the owners of the adjoining lands. 1998, c. 18, Sched. I, s. 21.*
>
> ***Offence***
>
> *(3) Every person who injures or destroys a tree growing on the boundary between adjoining lands without the consent of the land owners is guilty of an offence under this Act. 1998, c. 18, Sched. I, s. 21.*

Acquiring written consent from the adjacent landowner is also a condition for the permit application under the Mississauga Private Tree By-Law 254-12.

A land surveyor may be required to stake the property boundaries for trees where ownership is of concern. Areas include the Ninth Line right-of-way and boundaries with non-participating owner .

9.0 Recommendations

Specific recommendations for the subject property are intended to protect trees identified for preservation. Recommendations include:

- The Site Supervisor, design engineers, landscape architects shall be familiar with the City's Tree Protection standards and understand the purpose and function of Tree Protection Zones (TPZ). In this case, Tree Protection Fence (TPF) has been recommended to avoid disturbance to the TPZ;
- Appendix B lists the recommended tree protection zone for each tree identified for protection. Appendix C provides specifications for tree hoarding required by the City of Mississauga;
- Delineation of the TPF's shall be clearly defined on drawings and on the site;
- The tree protection hoarding/barrier must be erected prior to commencement of work;
- Any area inside the TPF must be left undisturbed (including overhead), other than the prescribed pruning;
- Construction materials or equipment are not to be stored within the TPZ of the trees;
- No signs or objects should be displayed or affixed to any retained trees;
- Disposal of liquids shall not occur within the TPZ;

- Should any incidental or accidental tree injuries occur during construction, a qualified Arborist or Town Forester/Arborist should be consulted to determine if other mitigation measures should be employed;
- For project planning and scheduling purposes, removal of vegetation should not occur between April 1 to September 1 for isolated tableland trees to avoid impacts to nesting birds and summer roosting bats;
- Tree protection measures are to remain in place until all site works have been completed, at which point tree protection measures shall be removed;
- Periodic inspections of TPZ's during construction and assessments of hazard potential post-construction should be conducted to ensure adequate protection is provided for trees identified for preservation and to ensure the risk of hazard is kept to a minimum; and,
- Trees on neighbouring non-participating properties or on the property boundary shall be left in place until such time that the ownership is confirmed or upon acquisition of written authorization for removal. In particular, trees within the City owned Ninth Line right-of-way will require permission for removal from the City of Mississauga.

10.0 Conclusion

Derry Britannia Developments Limited is pursuing development of the Subject Lands, an activity which requires the removal of existing trees and triggers the requirement of a Tree Management Plan and permission from the City of Mississauga under a Site Plan application.

A total of 1044 trees comprised of 39 species between diameters of 8 and 135 cm DBH were assessed on the subject lands and adjacent lands. There were no species regulated by the *Endangered Species Act, 2007,* observed on or within 50 metres of the Subject Properties.

A total of 745 trees are proposed for removal to facilitate the draft plans. Of those, **648 trees are greater than 15cm DBH, in fair-good condition and qualify for compensation**. As all landowners are required as a condition of the tree removal permit process to provide 1 replacement tree for every 15cm DBH of tree removed, a total of **1207 Replacement Trees** are required. Removal is proposed for 14 dead trees greater than 15cm DBH. These have been excluded from compensation calculations.

11.0 Disclaimer

11.1 LIMITATIONS OF THIS ASSESSMENT

This Assessment is based on the circumstances and observations as they existed at the time of the site inspection of the Client's Property and the trees situate thereon and upon information provided by the Client to LGL Limited. The opinions in this Assessment are given based on observations made and using generally accepted professional judgment, however, because trees and plants are living organisms and subject to change, damage and disease, the results, observations, recommendations, and analysis as set out in this Assessment are valid only as at the date any such testing, observations and analysis took place and no guarantee, warranty, representation or opinion is offered or made as to the length of the validity of the results, observations, recommendations and analysis contained within this Assessment. As a result, the Client shall not rely upon this Assessment, save and except for representing the circumstances and observations, analysis and recommendations that were made as at the date of such inspections. It is recommended that the trees discussed in this Assessment should be re-assessed periodically.

11.2 RESTRICTION OF ASSESSMENT

The Assessment carried out was restricted to the Property. No assessment of any other trees or plants has been undertaken by LGL. LGL is not legally liable for any other trees or plants on the Property except those expressly discussed herein. The conclusions of this Assessment do not apply to any areas, trees, plants or any other property not covered or referenced in this Assessment.

11.3 PROFESSIONAL RESPONSIBILITY

In carrying out this Assessment, LGL Limited and any Assessor appointed for and on behalf of LGL Limited to perform and carry out the Assessment has exercised a reasonable standard of care, skill and diligence as would be customarily and normally provided in carrying out this Assessment. The Assessment has been made using accepted arboricultural techniques. These include a visual examination of each tree for structural defects, scars, external indications of decay such as fungal fruiting bodies, evidence of insect attack, discolored foliage, the condition of any visible root structures, the degree and direction of lean (if any), the general condition of the tree(s) and the surrounding site, and the current or planned proximity of property and people. Except where specifically noted in the Assessment, none of the trees examined on the property were dissected, cored, probed, or climbed and detailed root crown examinations involving excavation were not undertaken.

While reasonable efforts have been made to ensure that the trees recommended for retention are healthy, no guarantees are offered, or implied, that these trees, or all parts of them will remain standing. It is professionally impossible to predict with absolute certainty the behaviour of any single tree or group of trees, or all their component parts, in all given circumstances. Inevitably, a standing tree will always pose some risk. Most trees have the potential to fall, lean, or otherwise pose a danger to property and persons in the event of adverse weather conditions, and this risk can only be eliminated if the tree is removed.

Without limiting the foregoing, no liability is assumed by LGL or its directors, officers, employers, contractors, agents or Assessors for:

a) any legal description provided with respect to the Property;

b) issues of title and or ownership respect to the Property;

c) the accuracy of the Property line locations or boundaries with respect to the Property;

d) the accuracy of any other information provided to LGL by the Client or third parties;

e) any consequential loss, injury or damages suffered by the Client or any third parties, including but not limited to replacement costs, loss of use, earnings and business interruption; and,

f) the unauthorized distribution of the Assessment.

11.4 GENERAL

Any plans and/or illustrations in this Assessment are included only to help the Client visualize the issues in this Assessment and shall not be relied upon for any other purpose.

- Proposed Tree Clearing Area

For project planning and scheduling purposes, removal of vegetation should not occur between March 30 to September 1 to avoid impacts to nesting birds and summer roosting bats.

Trees on neighbouring non-participating properties or on the property boundary shall be left in place until such time that the ownership is confirmed or upon acquisition of written authorization for removal.

Tree protection measures are to remain in place until all site works have been completed, at which point tree protection measures shall be removed.

Periodic inspections of TPZ's during construction and assessments of hazard potential post-construction should be conducted to ensure adequate protection is provided for trees identified for preservation and to ensure the risk of hazard is kept to a minimum.

Appendix A Application Form

Application to Permit the Injury or Destruction of Trees on Private Property

For a Tree Permit or Tree Removal Permission

Community Services Department
Forestry Section
950 Burnhamthorpe Road West
Mississauga, Ontario L5C 3B4
Tel.: 3-1-1 (905-615-4311 outside City limits)
FAX: 905-615-3098
www.mississauga.ca/forestry

MISSISSAUGA

Personal information on this form is collected under the authority of Section 135 of the *Municipal Act, 2001*, SO 2001, c25 and City of Mississauga By-law 0254-2012 and will be used for processing tree permit/permission applications. For the purpose of public access to information, a limited amount of information will be displayed on the City's website. Questions about the collection of personal information should be directed to the Private Tree Protection By-law Inspector at 3-1-1.

Important Information / Requirements regarding Application process

A separate application is required for each applicable address. Incomplete applications will not be processed.

- This is not a permit. Removal of three trees or more each with a diameter greater than 15 cm before receiving an approved permit will put you in contravention of By-law 0254-2012.
- Ensure you have read and understand the Private Tree Protection By-law in its entirety before completing this application.
- If this application is signed by an applicant or agent other than the owner, written authorization of the owner is required.
- Provide two (2) copies of plans or drawings of the property showing the location of trees to be removed and those being preserved, and if replanting please include a replanting or landscaping plan. Additional copies may be requested.
- Provide an Arborist report completed by an Arborist as defined, at the direction of the Private Tree Protection By-law Inspector.
- Before removing any trees, written consent is required from an adjacent property owner where any portion of the tree trunk rests on the property line or the adjacent owner's property.
- Mail or deliver this application and other supporting documentation to the Forestry Section at 950 Burnhamthorpe Road West.
- Applications may take up to 30 days to be processed.
- Fee Requirements: As per #7.
- All Ash trees are considered dead/dying.
- All pages of this application must be completed to be accepted by Forestry for review.
- For ASH TREE ONLY applications please email applications to: privatetree@mississauga.ca

FOR APPLICATIONS WITH ASH TREES ONLY, APPLICANT MUST HAVE A CERTIFIED ARBORIST VERIFY AND SIGN OFF ON INFORMATION

Owner / Applicant / Municipal Address Information

◆ **Application to be completed by applicant** ◆ **Print clearly** ◆ **All fields are mandatory** ◆

Provide all contact details where applicable, indicating your preferred contact method by checking ☑ the appropriate box.

Municipal Site Address _____ Ward # 10

Name of Applicant/Agent Derry Britannia Developments Limited

☐ Phone _____ ☐ Cellphone _____

☐ Fax (if applicable) _____ ☐ Email _____

Name of Registered Owner Derry Britannia Developments Limited

Mailing Address of Owner (if different than municipal address) 7880 Keele Street, Suite 500, Vaughan, ON L4K 4G7

Existing land use residential, agricultural

Declaration

◆ **If Owner's signature cannot be included, a separate Letter of Owner's Authorization must be provided** ◆

Declaration
I, the Applicant and the Owner, hereby declare that the statements made by me upon this application are, to the best of my belief and knowledge, a true and complete representation of the purpose and intent of this application.

Permit No. _____ Received by _____ Date (YYYY/MM/DD) _____

Fee $ _____ Official Receipt # _____ Received by _____ Date (YYYY/MM/DD) _____

Tree Detail

1. If applicable, provide the file number for any current development applications that have been submitted

- ☐ Official Plan/Rezoning _____
- ☐ Subdivision _____
- ☐ Building Permit _____
- ☐ Committee of Adjustment _____
- ☐ Erosion & Sediment Control Permit _____
- ☐ Site Plan _____
- ☐ Pool Permit _____
- ☐ Land Division _____

2. Have you removed any trees within this calendar year?
☐ Yes ☐ No
If yes, how many trees were removed? _____

How many of these trees were larger than 15 cm? _____
(Please list these trees below)

3. Number of trees being injured or removed:

Total _____

Dead/Dying _____ Healthy _____

4. Indicate the species, diameter (in cm) and reason for removal, as well as any additional comments on the Tree Removal Inventory Table below, and/or provide an Arborists Report.

5. Will you be planting replacement trees? ☐ Yes ☐ No
If yes, are copies of the replanting plan attached?
☐ Yes ☐ No

6. A site plan or drawing of the subject property is required and must include the following:

- The location of any buildings on the property
- The dimensions of the property and location of the streets
- The location and size of trees being protected
- The proposed location for replacement tree(s).
- Other natural features on the property such as slopes and creeks.

7. Fee Requirements: At time of application submission, please provide only the base Tree Removal Permit Fee for the removal of 3 healthy trees, each with a diameter greater than 15 cm as defined in the Fees and Charges by-law. Please don't pay for any additional trees at this time. When applicable, after inspection of the property any further payments required will be communicated to the Applicant using their preferred method of communication.

Trees which are dead, dying or hazardous are not subject to any fees but do require a permit.

Cheques payable to "City of Mississauga".
This fee is non-refundable.

Tree Removal Inventory
Indicate the species, diameter (in cm), reason for removal or additional comments and tree condition.
If more than two (2) healthy trees, document them using the Tree Removal Inventory Table below and/or provide an Arborists Report.

Status	Species	Diameter	Reason/Comments	Condition

Appendix B3 Removals and Replacement Specifications

Appendix 3 Tree Replacement

Project: Mattamy 9th Line

Client: Mattamy

Collectors: LMC, JCN, MJO, VLG

Date: December 7 , 2016, July 24, Aug 1, 22, Sept 18 2018, March 8 2021

Area: 9th Line, Mississauga

18107.0 Sum of DBH (cm) for trees >15cm in fair-good condition

1207 Replacement Trees are required to compensate for the listed removals.

14 greater than 15cm, dead, identified for removal

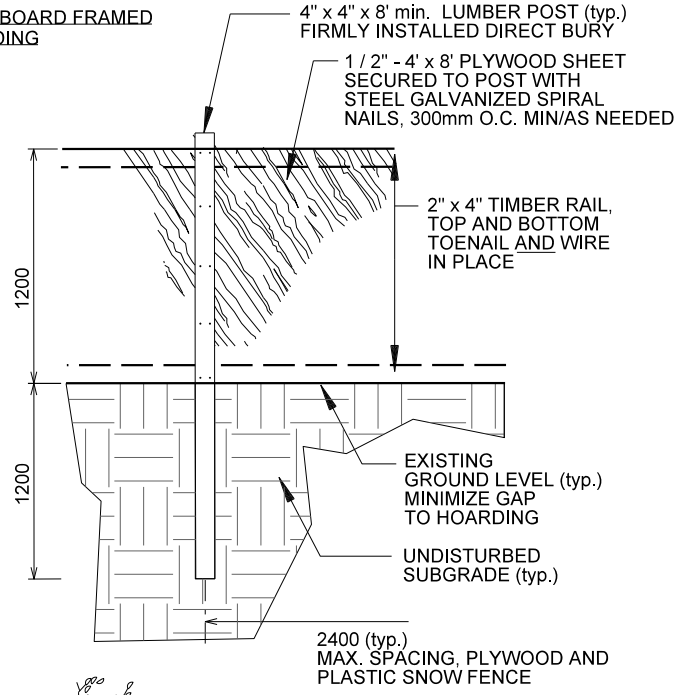
Appendix C Tree Hoarding Detail

02830-6

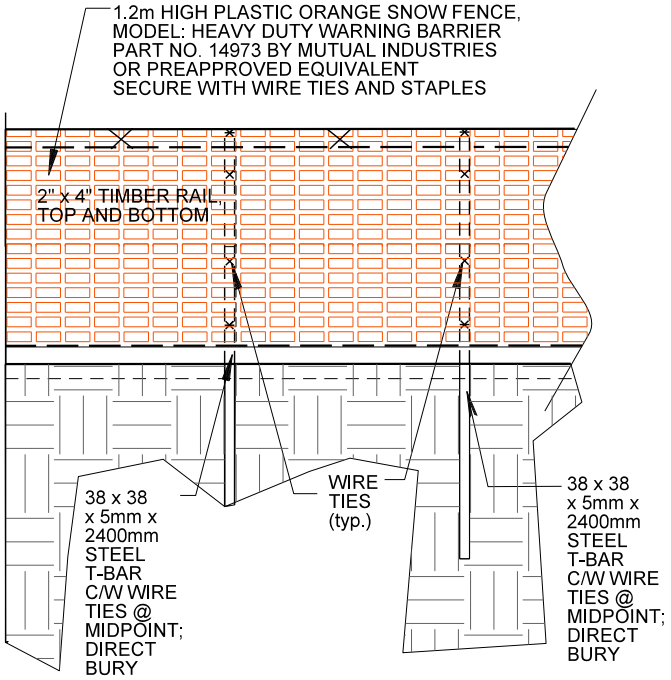
Hoarding
Framed Protective Construction Hoarding
Solid Board- Plastic Snow Fence

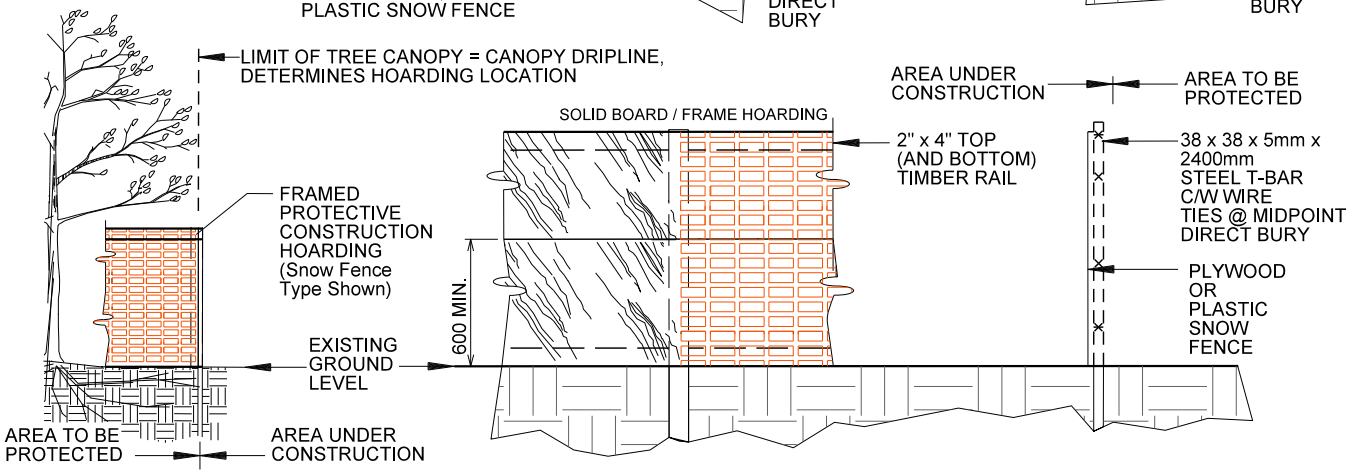
NOTE:
TO BE USED AS A GUIDELINE ONLY. NOT TO SCALE. REMOVE CITY TITLE BLOCK AND REDRAW TO REPRESENT SITE SPECIFIC CONDITIONS. ALL SITE SPECIFIC CONDITIONS ARE TO BE CONFIRMED BY THE PROJECT CONSULTANT.

SOLID BOARD FRAMED HOARDING



PLASTIC SNOW FENCE FRAMED HOARDING





NOTES:

1. HOARDING LOCATION AS PER DRAWINGS. HOARDING INSTALLATIONS ARE TO INCLUDE WOVEN GEOTEXTILE FABRIC FOR SEDIMENT CONTROL.
2. NO MOBILIZATION OR CONSTRUCTION WORK TO OCCUR UNTIL HOARDING HAS BEEN INSPECTED AND APPROVED BY COMMUNITY SERVICES PROJECT MANAGER (CSPM). CONTRACTOR TO ARRANGE FOR A HOARDING INSPECTION WITH (CSPM), 48 HOUR NOTICE RQUIRED.
3. HOARDING TO BE SUPPLIED, INSTALLED AND MAINTAINED BY THE CONTRACTOR THROUGH ALL PHASES OF WORK ON SITE.
4. THE CONTRACTOR IS TO REMOVE AND DISPOSE THE HOARDING OFF SITE WHEN DIRECTED BY THE (CSPM).
5. ALL WOOD PRODUCTS TO BE NEW AND LUMBER KILN DRIED SPF.
6. ALL FASTENERS TO BE NEW GALVANIZED STEEL AND SECURELY INSTALLED. WIRE TIES MIN 3.5mm DIA. GALVANIZED STEEL.
7. DO NOT ALLOW WATER TO COLLECT AND/OR POND ON EITHER SIDE OF THE HOARDING.
8. WHEN INSTALLING DIRECT BURY TIMBER POSTS AND T-BARS, TAKE CARE TO AVOID VISIBLE AND ASCERTAINABLE TREE ROOTS.
9. PLACE HOARDING AT LIMIT OF TREE CANOPY DRIP LINE OR BEYOND (E.G. FURTHER AWAY FROM TRUNK) OF TREE.
10. HOARDED OFF AREA TO REMAIN UNDISTURBED. NO STOCKPILING, STAGING OR MOVEMENT OF VEHICLES TO OCCUR WITHIN PROTECTED AREA.
11. FOR PROTECTION OF TREE'S AND ROOT SYSTEM, CONTRACTOR MAY BE REQUIRED TO PROVIDE WATERING, MULCHING, FERTILIZING, PRUNING OR OTHER ACTIVITIES TO ENSURE THE HEALTH OF THE TREE(S).
12. ALL MEASUREMENTS IN MILLIMETRES UNLESS NOTED OTHERWISE (E.G. DIMENSIONAL LUMBER).
13. CONTRACTOR RESPONSIBLE FOR LOCATES

N.T.S.
