**Museums of Mississauga** offer interactive, hands-on experiences for students to explore topics in Canadian heritage, including Indigenous history, with authentic local connections.

In our Maple Sap to Syrup program at the Bradley Museum, students will see and learn:

- How maple syrup is made from start to finish.
- Maple sugaring traditions of Indigenous communities, Early Settlers, and modern maple sugar bushes.

This is one of our most popular programs and is only offered from late February to early April.

**Book early to avoid disappointment.**
